1. The authority citation for part 932 continues to read as follows:

Authority: Secs. 2A, 2B, as added by sec. 702, 103 Stat. 413, 414 (12 U.S.C. 1422a, 1422b); secs. 6–7, 47 Stat. 727, 736, as amended (12 U.S.C. 1426–1427); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); sec. 207, 62 Stat. 692, as added by sec. 1a, 76 Stat. 1123, as amended (18 U.S.C. 207); sec. 602, 92 Stat. 2115, as amended (42 U.S.C. 8101, *et seq.*).

§§ 932.2, 932.4, 932.5, 932.6, and 932.7 Removed.

2. In part 932, §§ 932.2, 932.4, 932.5, 932.6, and 932.7 are removed.

3. Part 933 is revised to read as follows:

PART 933—MEMBERS OF THE BANKS

Subpart A—Definitions

Sec.
933.1 Definitions.

Subpart B—Application For Membership

Sec.
933.2 Membership application approval process.
933.3 Membership eligibility requirements.
933.4 Delegation.
933.5 Determination of membership in a district.

Subpart C—Stock Requirements

Sec.
933.6 Par value and price of stock.
933.7 Stock purchase.
933.8 Issuance and form of stock.
933.9 Adjustments in holdings.
933.10 Excess stock.

Subpart D—Consolidations and Reorganizations Involving Members

Sec.
933.11 Consolidation of members.
933.12 Reorganizations involving nonmembers.

Subpart E—Withdrawal and Removal From Membership

Sec.
933.13 Procedure for withdrawal.
933.14 Procedure for removal.
933.15 Automatic termination of membership for institutions placed in receivership.
933.16 Orderly liquidation of advances and redemption of stock.
933.17 Acquisition of membership after expiration of period of withdrawal.

Subpart F—Bank Access to Information

Sec.
933.18 Reports and examinations.

Subpart G—Membership Insignia

Sec.
933.19 Official membership insignia.

Authority: Secs. 2A, 2B, as added by sec. 702, 103 Stat. 413, 414 (12 U.S.C. 1422a, 1422b); sec. 4, as amended by secs. 701(b)(1), 704(a), 710(b)(1), 103 Stat. 412, 415, 418, (12 U.S.C. 1424); sec. 6, as amended by secs. 701(b)(1), 706, 710(b) (2), (3), 715, 103 Stat. 412, 416, 418, 421 (12 U.S.C. 1426); sec. 22, as amended by sec. 719, 103 Stat. 422 (12 U.S.C. 1442).

Subpart A—Definitions

§ 933.1 Definitions.

As used in this part:

(a) *Act* means the Federal Home Loan Bank Act, as amended (12 U.S.C. 1421 *et seq.*).

(b) *Aggregate unpaid loan principal* means the aggregate unpaid principal of a subscriber's or member's home mortgage loans, home purchase contracts, and similar obligations.

(c) *Appropriate Federal banking agency* has the same meaning as used in 12 U.S.C. 1813(q) and for federally insured credit unions shall mean the National Credit Union Administration.

(d) *Bank* means a Federal Home Loan Bank established under the authority of the Act.

(e) *Board* means the Federal Housing Finance Board established under the authority of the Act, its governing Board of Directors, or an official duly authorized to act on its behalf.

(f) *Combination business or farm property* means real property for which the total appraised value is attributable to residential, and business or farm uses.

(g) *Consolidated subsidiary* means a subsidiary of a member, whose assets and liabilities are consolidated with those of the member for purposes of reports filed with the member's appropriate Federal banking agency.

(h) *Dwelling unit* means a single, unified combination of rooms designed for residential use by one household.

(i) *Funded residential construction loan* means the portion disbursed to the borrower of a loan secured by real property made to finance the on-site construction of one-to-four or multifamily dwelling units.

(j) *Home mortgage loan* means:

(1)(i) A loan, whether or not fully amortizing, which is secured by a mortgage, a deed of trust or other security agreement, or an interest in such a loan, which creates a first lien on one of the following interests in domestic real property:

(A) One-to-four family property or multifamily property, in fee simple;

(B) A leasehold on one-to-four family property or multifamily property under a lease not less than 99 years which is renewable or under a lease having a period of not less than 50 years to run from the date the mortgage was executed;

(ii) The term home mortgage loan shall not include a loan secured by nonresidential real property, or combination business or farm property;

(2) A mortgage pass-through security which represents an undivided ownership interest in:

(i) Loans, all of which loans at the time of issuance of the security meet the requirements of paragraph (j)(1) of this section; or

(ii) Securities which represent an undivided ownership interest in loans, all of which loans at the time of issuance of the security meet the requirements of paragraph (j)(1) of this section; or

(3) Any loans which the Board in its discretion otherwise determines are home mortgage loans.

(k) *Institutions which are eligible to make application to become members* mean, for purposes of 12 U.S.C. 1431(e)(2)(A), any building and loan association, savings and loan association, cooperative bank, homestead association, insurance company, savings bank or any insured depository institution, regardless of whether the institution applies for or would be approved for membership.

(l) *Insured depository institution* means an insured depository institution as defined in 12 U.S.C. 1422(12).

(m) *Long-term home mortgage loan* means a home mortgage loan with a term to maturity greater than five years, or any other home mortgage loan which the Board in its discretion determines is a long-term home mortgage loan.

(n) *Manufactured housing loan* means a loan that is secured by manufactured housing, as defined in the Manufactured Home Construction and Safety Standards Act, 42 U.S.C. 5402(6).

(o) *Member* means an institution that has been admitted to membership in a Bank and, pursuant to the requirements of § 933.7 of this part, has purchased capital stock in the Bank.

(p) *Multifamily property* means:

(1) Real property containing five or more dwelling units; or

(2) Real property containing five or more dwelling units with commercial units combined, provided the property is primarily residential.

(q) *Nonresidential real property* means real property not used for residential purposes, including business or industrial property, hotels, motels, churches, hospitals, nursing homes, educational and charitable institutions, dormitories, clubs, lodges, association buildings, "homes" for elderly persons, golf courses, recreational facilities, farm property not containing a dwelling unit, or similar types of property, except as otherwise determined by the Board in its discretion.

(r) *One-to-four family property* means:

(1) Real property containing one-to-four dwelling units, or real property containing more than four dwelling units if each unit is separated from the other units by dividing walls that extend from ground to roof, including row houses, townhouses or similar types of property;

(2) Manufactured housing if:

(i) Applicable state law defines the purchase or holding of manufactured housing as the purchase or holding of real property; and

(ii) The loan to purchase the manufactured housing is secured by that manufactured housing and such security interest is evidenced by a mortgage or other lien on real property;

(3) Individual condominium dwelling units or interests in individual cooperative housing dwelling units that are part of a condominium or cooperative building without regard to the number of total dwelling units therein; or

(4) Real property containing one-to-four dwelling units with commercial units combined, provided the property is primarily residential.

(s) *Residential mortgage loan* means any one of the following types of domestic loans, whether or not fully amortizing:

(1) Home mortgage loans;

(2) Funded residential construction loans;

(3) Manufactured housing loans whether or not defined by state laws as secured by an interest in real property;

(4) Loans secured by junior liens on one-to-four family or multifamily property;

(5) Mortgage pass through securities representing an undivided ownership interest in:

(i) Loansall of which loans at the time of issuance of the security meet the requirements of paragraphs (s)(1) through (4) of this section; or

(ii) Securities representing an undivided ownership interest in loans, all of which loans at the time of issuance of the security meet the requirements of paragraphs (s)(1) through (4) of this section;

(6) Mortgage debt securities secured only by loans, all of which loans at the time of issuance of the security meet the requirements of paragraphs (s)(1) through (4) of this section;

(7) Home mortgage loans secured by leasehold interests, as defined in § 933.1(j) of this part, except that the period of the lease term may be for any duration; or

(8) Any loans which the Board in its discretion otherwise determines are residential mortgage loans.

(t) *State* means a State of the United States, the District of Columbia, Guam, Puerto Rico or the U.S. Virgin Islands.

Subpart B—Application for Membership

§ 933.2 Membership application approval process.

(a) *Application form.* An applicant for membership in a Bank shall submit to that Bank an application form which satisfies Board requirements.

(b) *Approval process.* All applications for membership shall be submitted to the Board for approval pursuant to the requirements of § 933.3 of this part, except as set forth in § 933.4 of this part.

(c) *Action on applications.* If an application is forwarded to the Board for action, the Board shall promptly notify the Bank after action is taken on the application. Upon receipt of notice of Board action, the Bank shall promptly inform the applicant of such action.

(d) *Automatic approval for Federal savings associations.* Upon receipt of a Federal savings association charter pursuant to section 5 of the Home Owners' Loan Act, a Federal savings association or Federal savings bank automatically becomes a member of the Bank of the district in which its principal place of business is located, and shall purchase stock in that Bank pursuant to § 933.7(b)(1) of this part. No application for membership must be filed.

(e) *Automatic approval for certain charter conversions.* A federally insured depository institution member that converts to a different charter shall automatically become a member on the effective date of such conversion, if the resulting institution continues to be an insured depository institution. In such case, all relationships existing between the member and the Bank at the time of such conversion may continue. No application for membership must be filed.

§ 933.3 Membership eligibility requirements.

(a) *Eligibility requirements.* Any building and loan association, savings association, cooperative bank, homestead association, insurance company, savings bank, or any insured depository institution, shall be eligible to become a member of a Bank if:

(1) The applicant is duly organized under the laws of any State or of the United States;

(2) The applicant is subject to inspection and regulation under the banking laws, or under similar laws, of the State or of the United States;

(3) The applicant (including its consolidated subsidiaries) originates or purchases long-term home mortgage loans;

(4) The applicant (including its consolidated subsidiaries) has at least 10 percent of its total assets in residential mortgage loans;

(5) The applicant has a financial condition such that advances may be safely made to such institution; and

(6) The applicant has character of management and a home-financing policy that are consistent with sound and economical home financing.

(b) *One-year grace period.* A member that has recently commenced business operations shall have until one year after commencing its initial business operations to meet the 10 percent residential mortgage loans requirement contained in paragraph (a)(4) of this section.

§ 933.4 Delegation.

(a) The Board hereby delegates to the board of directors of each Bank the authority to approve applications for membership that are filed by institutions eligible for membership in their Bank that meet all of the conditions set forth in policy guidelines established by the Board. The board of directors of each Bank may further delegate the authority to approve such applications to the President or other senior officers of the Bank.

(b) If the board of directors of a Bank approves an application pursuant to this section, the Bank shall notify the Board of its action within 10 calendar days of the Bank's approval. The Bank shall make monthly reports to the Board setting forth purchases (pursuant to § 933.7 of this part) by new members of their minimum stock requirement.

§ 933.5 Determination of membership in a district.

(a) *Eligibility.* (1) In general, an institution eligible to become a member of a Bank under the Act and this part may become a member of, and secure

advances only from, the Bank of the district in which the institution's principal place of business is located.

(2) An institution eligible to become a member may become a member of the Bank of a district adjoining such district if demanded by convenience and then only with the approval of the Board.

(b) *Principal place of business.* Except as designated in accordance with paragraphs (c) and (e) of this section, the principal place of business of an institution is the state in which the institution maintains its home office established as such in conformity with the laws under which the institution is organized.

(c) *Designation of principal place of business.* A member or an applicant for membership may request in writing that a state other than the state in which it maintains its home office be designated as its principal place of business. Within 90 days of receipt of such written request, the board of directors of the Bank in the district where the institution maintains its home office shall designate a state other than the state where the institution maintains its home office as the institution's principal place of business, provided all of the following factors are satisfied:

(1) At least 80 percent of the institution's accounting books, records or ledgers are maintained, located, or held in such state;

(2) A majority of meetings of the institution's board of directors and constituent committees are conducted in such state; and

(3) A majority of the institution's five highest paid officers have their place of employment located in such state.

(d) *Transfer of membership by Bank board of directors.* (1) Written notice of a designation made pursuant to paragraph (c) of this section shall be sent to the Board and the institution.

(2) The notice shall include the designated principal place of business and the Bank district to which membership will be transferred.

(3) No transfer of membership made pursuant to paragraph (c) of this section shall take effect until the Bank districts involved reach agreement on a method of orderly transfer.

(4) In the event that the Banks fail to agree on a method of orderly transfer, the Board shall determine the conditions under which the transfer shall take place.

(e) *Effect of transfer.* A transfer of membership pursuant to this section shall be effective for all purposes including directorial representation under section 7(c) of the Act, 12 U.S.C. 1427(c), and § 932.11 of this chapter, but shall not be subject to the provisions on withdrawal or removal from membership set forth in section 6 of the Act, 12 U.S.C. 1426, or §§ 933.13, 933.14 and 933.16 of this part, including the moratorium on reacquiring Bank membership set forth in § 933.17 of this part.

(f) *Board designation.* If the board of directors of the Bank in the district where the institution maintains its home office fails to make the designation requested by the member or applicant pursuant to paragraph (c) of this section, then the member or applicant may request in writing that the Board make the designation.

Subpart C—Stock Requirements

§ 933.6 Par value and price of stock.

The capital stock of each Bank shall be sold at par, unless the Board has fixed a higher price.

§ 933.7 Stock purchase.

(a) *Minimum stock purchase.* (1) All members shall purchase and hold Bank stock in an amount at least equal to one percent of the member's aggregate unpaid loan principal, but not less than $500.

(2) If a member has less than 30 percent of its total assets in home mortgage loans, it shall purchase stock equal to one percent of 30 percent of its total assets.

(3) When calculating a member's minimum stock purchase requirement under this section, the Bank shall include the assets of the member's consolidated subsidiaries.

(4) A member's aggregate unpaid loan principal shall be calculated according to guidelines issued by the Board.

(b) *Timing of minimum stock purchase.* (1) Within 30 calendar days after an institution's application for membership is approved or an institution obtains a Federal savings association charter pursuant to section 5 of the Home Owners' Loan Act, 12 U.S.C. 1464, the institution shall purchase its minimum stock requirement as set forth in paragraph (a) of this section.

(2) At the election of the newly admitted institution, the institution may purchase its minimum stock requirement in installments, provided that not less than one-fourth of the total amount payable shall be paid within 30 calendar days of the approval of membership, and that a further sum of not less than one-fourth of such total shall be paid at the end of each succeeding period of four months until the total is paid.

(3) An applicant approved for membership shall become a member at the time it pays for its minimum stock requirement or the first installment thereof. If the applicant fails to pay for its minimum stock requirement or its first installment within 30 calendar days of its approval for membership, such approval shall be rescinded and the applicant shall be required to submit a new application for membership.

(4) The Board may approve a written request from an applicant for an extension of time not to exceed 30 days within which to purchase its minimum stock requirement upon evidence of good cause.

§ 933.8 Issuance and form of stock.

(a) A Bank shall issue to each new member, as of the effective date of membership, stock in the member's name for the amount of stock purchased and paid for in full.

(b) If the member purchases stock in installments, the stock shall be issued in installments with the appropriate number of shares issued after each payment is made.

(c) Stock may be issued in certificated or uncertificated form at the discretion of the Bank.

(d) A Bank may convert all outstanding certificated stock to uncertificated form at its discretion.

§ 933.9 Adjustments in holdings.

(a) *Annual adjustment.* (1) A Bank shall calculate each member's required minimum stock holdings annually, using calendar year-end financial data provided by the member to the Bank each year, pursuant to § 933.18(d) of this part.

(2) The Bank shall increase or decrease the amount of stock that each member must hold to conform to section 6(b) of the Act, 12 U.S.C. 1426(b), and notify each member of the adjustment.

(b) *Redemption of excess shares.* (1) If the amount of stock that a member must hold is decreased, upon proper application of the member, the Bank may, in its discretion, retire such excess stock, and the Bank shall pay for each share upon surrender the value thereof determined pursuant to section 6(b)(3) of the Act, 12 U.S.C. 1426(b)(3), or, at its election, credit any part of such payment against the member's debt to the Bank.

(2) A Bank may require a member to give 30 calendar days written notice of its intention to apply, pursuant to this paragraph, to retire excess stock.

(3) A member's stock holdings shall not be reduced to an amount less than required by sections 10(c) and 10(e) of the Act, 12 U.S.C. 1430(c), (e).

§ 933.10 Excess stock.

Upon approval by a member's Bank, such member may purchase stock over the minimum amount required by sections 6(b) and 10(e)(3) of the Act, 12 U.S.C. 1426(b), 1430(e)(3), if the laws under which the member operates so permit.

Subpart D—Consolidations and Reorganizations Involving Members

§ 933.11 Consolidation of members.

(a) *Consolidation of institutions in same district.* Upon consolidation of two or more member institutions which are all members of the same Bank district into one institution operating under the charter of one of the consolidating institutions, the stock of the disappearing institution(s) may be redeemed, provided that the resulting institution holds the minimum amount of stock required pursuant to § 933.7(a) of this part; based on the total assets and borrowings of the consolidated institution.

(b) *Consolidation of institutions in different districts*—(1) *Termination of membership.* Upon consolidation of two member institutions located in different Bank districts into one institution operating under the charter of one of the consolidating institutions, the disappearing institution's membership shall be terminated upon cancellation of its charter, except that in the event that more than 80 percent of the assets of the consolidated institution are derived from assets of the disappearing institution, then the consolidated institution shall continue to be a member of the Bank to which the disappearing institution belongs and the membership of the other institution shall be terminated upon consummation of the consolidation.

(2) *Bank stock acquired in the consolidation.* The consolidated institution may continue to hold the stock of the Bank of which it is no longer a member only for as long as the Bank requires that the stock be held as collateral securing any outstanding indebtedness to the Bank for which the Bank does not demand immediate repayment.

(3) *Liquidation of disappearing institution's indebtedness to Bank.* The indebtedness owed to the Bank in which membership has been terminated shall be liquidated in an orderly manner as determined by the Bank; provided that this section shall not require a Bank to call any such indebtedness prior to maturity of the advance, if so doing would be inconsistent with the Bank's safe and sound operation. The Bank shall deem any such liquidation a prepayment of the member's indebtedness, and the member shall be subject to any fees applicable to such prepayment. As such indebtedness is liquidated, the stock shall be redeemed in the manner prescribed in § 933.16 of this part.

(4) *Dividends on acquired Bank stock.* The consolidated institution is entitled to receive dividends on its outstanding stock of the Bank of which it is no longer a member in accordance with section 6(g) of the Act, 12 U.S.C. 1426(g), and § 932.3 of this chapter.

(5) *No voting rights on acquired Bank stock.* The consolidated institution may not cast votes on the stock acquired in the consolidation in an election of directors of the Bank of which it is no longer a member. The consolidated institution may not include the stock in its calculation of the number of votes it may cast in an election of directors of the Bank in which it is a member.

§ 933.12 Reorganizations involving nonmembers.

(a) *Termination of membership.* If a member is part of a reorganization that results in the transfer of all of the member's assets to an institution that is not a member, the Bank shall terminate its membership in accordance with § 933.16 of this part.

(b) *Notification of decision to seek membership.* If the acquiring institution notifies the Bank within 60 calendar days after the effective date of the reorganization that it intends to apply for membership, the Bank may permit the acquiring institution to continue to hold any outstanding Bank advances and stock pending a determination on the membership application.

(c)(1) *Application for membership required.* The acquiring institution must apply for membership pursuant to § 933.2 of this part within 60 calendar days of the notification required in paragraph (b) of this section. The acquiring institution shall become a member upon approval of its application for membership.

(2) *Outstanding advances and Bank stock.* If the application for membership is approved, then the Bank may permit the acquiring institution to assume the outstanding advances and may transfer the stock held by disappearing institution to the acquiring institution.

(3) *Minimum stock requirement.* (i) The acquiring institution shall maintain the minimum amount of stock required under § 933.7(a) of this part, based on the total assets and borrowings of the acquiring institution after the reorganization. If the amount of stock acquired by the acquiring institution is less than the amount of stock required to be held under § 933.7(a) of this part, the acquiring institution shall purchase the deficient amount of stock within 30 calendar days of the membership approval.

(ii) At the election of the acquiring institution, the deficient amount of stock may be purchased in installments, provided that not less than one-fourth of the total deficient amount payable shall be paid within 30 calendar days of the approval of membership, and that a further sum of not less than one-fourth of such total shall be paid at the end of each succeeding period of four months until the total is paid.

(iii) The Board may approve a written request from the acquiring institution for an extension of time not to exceed 30 days within which to purchase the deficient amount of stock upon evidence of good cause.

(d)(1) *Failure to obtain membership.* If the acquiring institution fails to apply for membership, or if the application for membership is denied, then any indebtedness to the Bank shall be liquidated in an orderly manner as determined by the Bank; provided that this section shall not require a Bank to call any such indebtedness prior to maturity of the advance, if so doing would be inconsistent with the Bank's safe and sound operation. The Bank shall deem any such liquidation a prepayment of the member's indebtedness, and the member shall be subject to any fees applicable to such prepayment. As such indebtedness is liquidated, the Bank may redeem outstanding Bank stock in the manner prescribed in § 933.16 of this part.

(2) *Dividends on acquired Bank stock.* The acquiring institution is entitled to receive dividends on outstanding stock of the disappearing member institution in accordance with section 6(g) of the Act, 12 U.S.C. 1426(g) and § 932.3 of this chapter.

(3) *No voting rights on acquired Bank stock.* The acquiring institution may not cast votes on the stock acquired from the disappearing member institution in an election of directors of the disappearing member institution's Bank, unless the acquiring institution is approved for membership.

Subpart E—Withdrawal and Removal From Membership

§ 933.13 Procedure for withdrawal.

(a) Any member that is eligible under applicable law to withdraw from Bank membership may do so after providing the Board and its Bank at least six months written notice of the member's intention to terminate its membership.

(b) A member may cancel its notice of withdrawal by providing both the Board and its Bank written notice any time before the effective date of the withdrawal.

§ 933.14 Procedure for removal.

(a) *Removal.* If a Bank believes that any of the grounds for removal of a member contained in paragraph (b) of this section exists, it may submit a written request to the Board recommending removal of the member.

(1) The request shall state the grounds for removing the member.

(2) If the Board, in its sole discretion, believes that any of the grounds for removal of a member in paragraph (b) of this section exists, it may, after a hearing, remove the member from membership.

(b) *Grounds.* The following are grounds for removing a member from membership in a Bank:

(1) Failure to comply with any provision of the Act or any regulation of the Board adopted under the Act;

(2) The member is insolvent. A member is deemed insolvent if its assets are less than its liabilities;

(3) A member's management or home-financing policies are inconsistent with sound and economical home-financing or with the purposes of the Act; or

(4) Any other condition of a member's operations exists that the Board believes would jeopardize the safety and soundness of the member's Bank.

(c) *Procedure.* (1) If the Board believes any of the grounds set forth in paragraph (b) of this section exists, and it determines that membership should be withdrawn, it shall provide the member with at least 30 calendar days written notice of its intention to terminate the member's membership.

(2) Such notice shall be served as determined by the Board and shall state the grounds for such action and the time and place of a hearing at which the member may be heard.

(3) Such hearing shall be conducted in accordance with procedures established by the Board.

§ 933.15 Automatic termination of membership for institutions placed in receivership.

(a) *Automatic termination.* As of the effective date of being placed in receivership, an institution's Bank membership shall be automatically terminated.

(b) *Orderly liquidation of advances and redemption of stock.* Upon such termination of Bank membership, the indebtedness owed to the Bank by the institution placed in receivership shall be liquidated in an orderly manner as determined by the Bank; provided that this section shall not require a Bank to call any such indebtedness prior to maturity of the advance, if so doing would be inconsistent with the Bank's safe and sound operation. The Bank shall deem any such liquidation a prepayment of the member's indebtedness, and the member shall be subject to any fees applicable to such prepayment. As such indebtedness is liquidated, the Bank shall redeem outstanding Bank stock held by the receiver in the manner prescribed in § 933.16 of this part.

(c) *Dividends on Bank stock.* The receiver shall be entitled to receive dividends on outstanding Bank stock of the institution placed in receivership in accordance with section 6(g) of the Act, 12 U.S.C. 1426(g), and § 932.3 of this chapter.

(d) *No voting rights on Bank stock.* The receiver may not cast votes on the Bank stock of the institution placed in receivership in an election of directors of such institution's Bank.

§ 933.16 Orderly liquidation of advances and redemption of stock.

(a) If an institution's membership in a Bank is terminated, the indebtedness of such institution to the Bank shall be liquidated in an orderly manner as determined by the Bank; provided that this section shall not require a Bank to call any such indebtedness prior to maturity of the advance, if so doing would be inconsistent with the Bank's safe and sound operation. The Bank shall deem any such liquidation a prepayment of the member's indebtedness, and the member shall be subject to any fees applicable to such prepayment. As such indebtedness is liquidated, the Bank may redeem outstanding Bank stock on a *pro rata* basis, provided that the institution's stock holding shall not be reduced to an amount less than that required by sections 10(c) and 10(e) of the Act, 12 U.S.C. 1430 (c), (e), until all outstanding indebtedness has been liquidated. Upon completion of such liquidation, such institution's remaining stock in the Bank shall be surrendered and canceled.

(b) Upon termination of membership, the Bank may immediately redeem an institution's stock in the Bank if the institution has no outstanding indebtedness to the Bank. The institution shall receive a sum equal to the original amount paid for the stock surrendered, except that if at any time the Board finds that the paid-in capital of a Bank is or is likely to be impaired as a result of losses in or depreciation of the assets held by the Bank, the Bank shall on the order of the Board withhold from the amount to be paid in retirement of the stock a *pro rata* share of the amount of such impairment as determined by the Board.

§ 933.17 Acquisition of membership after expiration of period of withdrawal.

An institution which withdraws from membership pursuant to § 933.13 of this part may acquire membership in a Bank only after the expiration of a period of 10 years thereafter, except:

(a) Where such withdrawal is a consequence of a transfer of membership on a non-interrupted basis between Banks pursuant to § 933.5 of this part; or

(b) In connection with obtaining a charter as a Federal savings association (as defined in 12 U.S.C. 1813), which automatically becomes a Bank member pursuant to § 933.2(d) of this part.

Subpart F—Bank Access to Information

§ 933.18 Reports and examinations.

As a condition precedent to Bank membership, each member:

(a) Consents to such examinations as the Bank or the Board may require for purposes of the Act;

(b) Agrees that reports of examinations by local, state or appropriate Federal agencies or institutions may be furnished by such authorities to the Bank or the Board upon request;

(c) Agrees to give the Bank or the appropriate Federal banking agency, upon request, such information as the Bank or the appropriate Federal banking agency may need to compile and publish cost of funds indices and to publish other reports or statistical summaries pertaining to the activities of Bank members;

(d) Agrees to provide the Bank with calendar year-end financial data each year, for purposes of § 933.9(a) of this part; and

(e) Agrees to provide the Bank with copies of reports of condition and required to be filed with the member's appropriate Federal banking agency, if applicable, within 20 calendar days of filing, as well as copies of any annual report of condition and operation required to be filed.

Subpart G—Membership Insignia

§ 933.19 Official membership insignia.

Members may display the approved insignia of membership on their documents, advertising and quarters, and likewise use the words "Member Federal Home Loan Bank System."

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92-ANE-16]

Airworthiness Directives; Pratt & Whitney PW4000 Series Turbofan Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the supersedure of an existing airworthiness directive (AD), applicable to Pratt & Whitney PW4000 series engines, that currently requires switching the ENGINE ANTI ICE "ON" prior to every takeoff and keeping it "ON" for any flight operation below 15,000 feet, and placing a placard in the cockpit to make the crew aware of this requirement. This action would limit the requirements of the AD to those engines which are not equipped with an improved electronic engine control (EEC). This proposal is prompted by the development of new EEC software that provides for more cooling flow at lower idle speeds. The actions specified by the proposed AD are intended to prevent a high pressure compressor failure caused by excessive blade tip to airseal interference, that can result in total loss of engine thrust.

DATES: Comments must be received by January 11, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), New England Region, Office of Assistant Chief Counsel, Attention: Rules Docket No. 92-ANE-16, 12 New England Executive Park, Burlington, Massachusetts 01803-5299. Comments may be inspected at this location between 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Airbus Industrie, Product Support Directorate, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex France. This information may be examined at the FAA, New England Region, Office of the Assistant Chief Counsel, 12 New England Executive Park, Burlington, Massachusetts.

FOR FURTHER INFORMATION CONTACT: Chris Gavriel, Engine Certification Branch, ANE-141, Engine Certification Office, Engine and Propeller Directorate, Aircraft Certification Service, FAA, 12 New England Executive Park, Burlington, Massachusetts 01803-5299; telephone (617) 273-7084; fax (617) 270-2412.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92-ANE-16." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, New England Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 92-ANE-16, 12 New England Executive Park, Burlington, Massachusetts 01803-5499.

Discussion

On February 15, 1991, the FAA issued AD 91-05-20, Amendment 39-6919 (56 FR 8707), applicable to Pratt & Whitney PW4000 series turbofan engines, to require switching the Engine Anti Ice "On" prior to every takeoff and keeping it "On" for any flight operation below 15,000 feet, and placing a placard in the cockpit to make the crew aware of this requirement. That action was prompted by five engine failures while undergoing production acceptance testing at the engine manufacturer's facilities and by two additional in-flight engine failures experienced during a specialized flight test program. All failed engines exhibited excessive HPC blade tip to airseal interference, resulting in substantial loss of outer airseal material from the ninth through fifteenth stages of the HPC. An investigation identified that HPC blade tip to airseal clearances were insufficient to ensure proper engine operation during rapid acceleration to takeoff power when that acceleration was preceded by several minutes of operation at takeoff power and minimum idle rotor speed, sequentially. At minimum rotor idle speed the compressor bore internal cooling flow was insufficient to provide the necessary compressor rotor thermal contraction. During rapid acceleration to takeoff power the blade tip to airseal clearances were insufficient to prevent excessive blade tip rubbing. For this reason, higher inflight engine idle rotor speeds were needed to assure proper HPC bore cooling airflow. Although no revenue service engine failures have been reported, the flight test failures confirm that certain inflight operating profiles can occur which produce excessive blade tip to airseal interference. That condition, if not corrected, could result in a high pressure compressor (HPC) failure caused by excessive blade tip to airseal interference, which can result in total loss of engine thrust.

Since the issuance of that AD, a new variable stator vane (VSV) control schedule has been developed that has been incorporated into improved electronic engine controls (EEC). This new VSV control schedule provides for adequate HPC secondary cooling flow without the need to maintain the idle speed at higher levels, as required by the current AD. This cooling airflow assures proper rotor thermal contraction which results in sufficient blade to airseal clearance, thus providing more margin during rapid engine acceleration to takeoff power from low rotational speeds. Engines equipped with the new VSV control schedule are no longer required to have the Engine Anti Ice "On" prior to every takeoff and kept "On" for any flight operation below 15,000 feet.

Operation with the Engine Anti Ice "On" precludes the engine from attaining inflight idle rotational speed below Approach Idle. Engine operation at a higher rotational speed burdens the operator with the cost of increased fuel consumption. Relieving operators of this requirement provides operational

advantages and cost savings while maintaining an acceptable level of safety.

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would supersede AD 91–05–20 to limit the requirements of AD 91–05–20 to those engines that are not equipped with the improved EEC as identified by part numbers.

There are approximately 41 PW4000 series engines of the affected design that are installed on aircraft of U.S. registry. The FAA estimates that the proposed change will decrease fuel consumed by the affected engines by about 0.7%, or an estimated cost per year per engine of $52,500. Relieving operators of this burden will save approximately $2,152,500 per year in decreased fuel costs.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39–6919 (56 FR 8707, March 1, 1991) and by adding a new airworthiness directive to read as follows:

Pratt & Whitney: Docket No. 92–ANE–16. Supersedes AD 91–05–20, Amendment 39–6919.

Applicability: Pratt & Whitney Models PW4152, PW41456, and PW4158 model turbofan engines equipped with electronic engine control (EEC) Part Numbers 50D436, 50D791, 50D824, 51D037, and 51D053, installed on but not limited to Airbus A310 and Airbus A300 series aircraft.

Compliance: Required within 30 days after the effective date of this airworthiness directive (AD), unless accomplished previously.

To prevent a high pressure compressor failure that can be caused by excessive blade tip to airseal interference, which can result in total loss of engine thrust, accomplish the following:

(a) The Engine Anti Ice must be switched to "On" prior to takeoff and must be in the "On" position for any flight operation below 15,000 feet.

(b) Install placards in the cockpit of Airbus A310–300 and A300–600 aircraft, just above the Captain and the First Officer Primary Flight Displays, indicating the following: "BEFORE TAKE OFF, SET ENG. ANTI ICE ON. KEEP ENG. ANTI ICE ON FOR ANY OPERATION BELOW 15,000 FT."

Note: Further information on the placards may be obtained from Airbus Industrie Service Information Letter 72–001, Revision 1, dated September 18, 1990.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Engine Certification Office. The request should be forwarded through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Engine Certification Office.

Note: Information concerning the existence of approved alternative methods of compliance with this airworthiness directive, if any, may be obtained from the Engine Certification Office.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Burlington, Massachusetts, on November 19, 1992.

Jack A. Sain,

Manager, Engine and Propeller Directorate, Aircraft Certification Service.

[FR Doc. 92–30120 Filed 12–10–92; 8:45 am]

BILLING CODE 4910–13–M

14 CFR Part 39

[Docket No. 92–NM–214–AD]

Airworthiness Directives; Airbus Industrie Model A320 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Airbus Industrie Model A320 series airplanes. This proposal would require repetitive detailed visual inspections to detect cracks in the fatigue-sensitive area around the fasteners on the wing rear spar between ribs 1 and 2, and repair, if necessary. This proposal would also require modification of the outer wing rear spar forward face which, when accomplished, would constitute terminating action for the repetitive inspections. This proposal is prompted by results of fatigue testing of the center fuselage, which revealed cracks on the wing rear spar that spread around four fasteners in a fatigue-sensitive area. The actions specified by the proposed AD are intended to prevent reduced structural integrity of the wing.

DATES: Comments must be received by February 8, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–214–AD, 1601 Lind Avenue SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Greg Holt, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055–4056; telephone (206) 227–2140; fax (206) 227–1320.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such

written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92–NM–214–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–214–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion:

The Direction Générale de l'Aviation Civile (DGAC), which is the airworthiness authority for France, recently notified the FAA that an unsafe condition may exist on certain Airbus Industrie Model A320 series airplanes. The DGAC advises that during a fatigue test of the center fuselage on a Model A320 series airplane, damage was found on the wing rear spar after 103,126 simulated flights. Cracks were found that spread around four fasteners in a fatigue-sensitive area. If not detected and corrected, cracks in this area could propagate and form a long crack in the rear spar. This condition, if not corrected, could result in reduced structural integrity of the wing.

Airbus Industrie has issued Service Bulletin A320–57–1020, dated September 5, 1991, which describes procedures for repetitive detailed visual inspections to detect cracks in the fatigue-sensitive area around the fasteners on the wing rear spar between ribs 1 and 2. Airbus Industrie has also issued Service Bulletin A320–57–1021, dated September 5, 1991, which describes procedures for modification of the outer wing rear spar forward face between ribs 1 and 2. This modification involves cold working the bolt holes and installing medium interference fit bolts on the aft wing spar attachment. The DGAC classified these service bulletins as mandatory and issued French Airworthiness Directive 92–204–034(B) in order to assure the continued airworthiness of these airplanes in France.

This airplane model is manufactured in France and is type certificated for operation in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the DGAC has kept the FAA informed of the situation described above. The FAA has examined the findings of the DGAC, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require repetitive detailed visual inspections to detect cracks in the fatigue-sensitive area around the fasteners on the wing rear spar between ribs 1 and 2, and repair, if necessary. The proposed AD would also require modification of the outer wing rear spar forward face which, when accomplished, would constitute terminating action for the repetitive inspections. The actions would be required to be accomplished in accordance with the service bulletins described previously.

The FAA estimates that 51 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 12.5 work hours per airplane to accomplish the proposed actions, and that the average labor rate is $55 per work hour. Required parts would cost approximately $112 per airplane. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $40,775 or $800 per airplane. This total cost figure assumes that no operator has yet accomplished the proposed requirements of this AD action.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption ADDRESSES.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Airbus Industrie: Docket 92–NM–214–AD.

Applicability: Model A320 series airplanes; serial numbers 002 through 071, inclusive; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent reduced structural integrity of the wing, accomplish the following:

(a) Prior to the accumulation of 13,000 total landings, or within 1,000 landings after the effective date of this AD, whichever occurs later: Perform a detailed visual inspection to detect cracks in the left- and right-hand sides of the wing rear spar between ribs 1 and 2, in accordance with Airbus Industrie Service Bulletin A320–57–1020, dated September 5, 1991.

(1) If any crack is found, prior to further flight, repair in accordance with a method approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate.

(2) If no cracks are found, repeat the inspection required by paragraph (a) of this

AD thereafter at intervals not to exceed 3,000 landings.

(b) Within 3 years after the effective date of this AD, modify the outer wing rear spar forward face between ribs 1 and 2, in accordance with Airbus Industrie Service Bulletin A320–57–1021, dated September 5, 1991.

(c) Accomplishment of the modification required by paragraph (b) of this AD constitutes terminating action for the repetitive inspections required by paragraph (a) of this AD.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on December 7, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92–30178 Filed 12–10–92; 8:45 am]

14 CFR Part 71

[Airspace Docket No. 92–AGL–20]

Proposed Control Zone and Transition Area Modifications; Brookings, SD

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to modify the control zone and transition area near Brookings, SD, to accommodate a new ILS/DME RWY 30 instrument approach procedure to Brookings Municipal Airport, Brookings, SD. The intended effect of this action is to provide segregation of aircraft using instrument approach procedures in instrument conditions from other aircraft operating in visual weather conditions.

DATES: Comments must be received on or before January 20, 1993.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Office of the Assistant Chief Counsel, AGL–7, Attn: Rules Docket No. 92–AGL–20, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

The official docket may be examined in the Office of the Assistant Chief Counsel, Federal Aviation Administration, 2300 East Devon, Avenue, Des Plaines, Illinois.

An informal docket may also be examined during normal business hours at the Air Traffic Division, System Management Branch, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois.

FOR FURTHER INFORMATION CONTACT: Douglas F. Powers, Air Traffic Division, System Management Branch, AGL–530, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694–7568.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 92–AGL–20." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination in the Rules Docket, FAA, Great Lakes Region, Office of the Assistant Chief Counsel, 2300 East Devon Avenue, Des Plaines, Illinois, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA–220, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 267–3485. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A, which describes the application procedure.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to modify the control zone and transition area near Brookings, SD, to accommodate a new ILS/DME RWY 30 instrument approach procedure to Brookings Municipal Airport, Brookings, SD.

The development of the procedure requires that the FAA alter the designated airspace to ensure that the procedure would be contained within controlled airspace. The minimum descent altitude for this procedure may be established below the floor of the 700-foot controlled airspace.

Aeronautical maps and charts would reflect the defined area that would enable pilots to circumnavigate the area in order to comply with applicable visual flight rule requirements.

The coordinates for this airspace docket are based on North American Datum 83. Control zones are published in § 71.171 of FAA order 7400.7A dated November 2, 1992, and effective November 27, 1992, which is incorporated by reference in 14 CFR 71.1. The control zone listed in this document would be published subsequently in the Order. Transition areas are published in § 71.181 of FAA order 7400.7A dated November 2, 1992, and effective November 27, 1992, which is incorporated by reference in 14 CFR 71.1. The transition area listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air

traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zones, Incorporation by reference, Transition areas.

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. app. 1348(a), 1354(a), 1510; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

§71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.7A, Compilation of Regulations, dated November 2, 1992, and effective November 27, 1992, is amended as follows:

Section 71.171 Designation of Control Zones

* * * * *

AGL SD CZ Brookings, SD [Revised]
Brookings Municipal Airport, SD (lat. 44°18′15″ N, long. 96°48′58″ W)
Brookings VOR (lat. 44°18′12″ N, long. 96°48′54″ W)

That airspace extending upward from the surface within a 7 nautical mile radius of the Brookings Municipal Airport. This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective dates and times will thereafter be continuously published in the Airport/Facility Directory.

* * * * *

Section 71.181 Designation of Transition Areas

AGL SD TA Brookings, SD [Revised]
Brookings Municipal Airport, SD (lat. 44°18′15″ N, long. 96°48′58″ W)
BARTT Outer Marker (lat. 44°14′20″ N, long. 96°42′06″ W)

That airspace extending upward from 700 feet above the surface within a 7 nautical mile radius of the Brookings Municipal Airport and within 4 nautical miles northeast and 8 nautical miles southwest of the 129° bearing from the BARTT outer marker extending from the outer marker to 16 nautical miles southeast of the outer marker, and within 8 nautical miles north and 4 nautical miles south of the 118° bearing from the airport to 16 nautical miles east of the airport, and within 8 nautical miles southwest and 4 nautical miles northeast of the 322° bearing from the airport extending from the airport to 16 nautical miles northwest of the airport, excluding that airspace within the Brookings, SD, Control Zone during the specific dates and times that it is effective.

* * * * *

Issued in Des Plaines, Illinois on October 26, 1992.

John P. Cuprisin,

Manager, Air Traffic Division.

[Docket No. 48524; Notice No. 92–32]

RIN 2137–AB94

Amendments to the On-Time Disclosure Rule

AGENCY: Research and Special Programs Administration, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to revise the on-time flight performance reporting requirements by (1) eliminating the exclusion of flights delayed or cancelled due to mechanical problems, (2) adding the aircraft tail number, wheels-up and wheels-down time for each flight reported, (3) adding several definitions, (4) clarifying the reporting requirement for a new flight, and (5) making some editorial changes.

DATES: Comments on the proposed rule must be received on or before January 11, 1993.

ADDRESSES: Comments should be directed to the Docket Clerk, Docket 48524, room 4107, Office of the Secretary, Department of Transportation, 400 Seventh Street SW., Washington, DC 20590–0001. Comments should identify the regulatory docket number and be submitted in duplicate to the address listed above. Commenters wishing the Department to acknowledge receipt of their comments must submit with those comments a self-addressed stamped postcard on which the following statement is made: Comments on Docket 48524. The postcard will be dated/time stamped and returned to the commenter. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments.

FOR FURTHER INFORMATION CONTACT: Bernard Stankus or Jack Calloway, Office of Airline Statistics, DAI–10, Research and Special Programs Administration, 400 Seventh Street SW., Washington, DC, 20590 (202) 366–4387 or 366–4383, respectively.

SUPPLEMENTARY INFORMATION:

Background

On September 9, 1987, the Department issued a final rule (52 FR 34056) which required the largest U.S. air carriers to report their on-time performance for every domestic scheduled passenger flight operated to or from a reportable airport, with the exception of qualifying flights that were delayed 15 minutes or more or cancelled because of mechanical problems. A flight is considered on-time if it arrives less than 15 minutes after its published arrival time. The U.S. carriers covered by the reporting requirement are those generating at least 1 percent of the U.S. domestic scheduled-passenger revenues on a yearly basis. Reportable airports are those airports in the continguous 48 states generating at least 1 percent of the domestic scheduled-passenger enplanements on an annual basis. In practice, all reporting carriers are voluntarily submitting data for their entire domestic scheduled-passenger operations. The purpose of the rule was to reduce airline flight delays and consumer dissatisfaction with airline service by providing a persuasive market-based incentive for airlines to improve their quality of service and reliability of schedules. The reporting system developed for the administration of these reporting requirements is called the On-Time Flight Performance System.

Flights that were delayed 15 minutes or more or cancelled because of mechanical problems and which were reported to the Federal Aviation Administration (FAA) under 14 CFR 121.703 or 121.705, were excluded from the reporting requirements. Mechanical delays included delays on the flight on which the problem was encountered and subsequent delayed flights performed by the same aircraft, or the aircraft substituted for it, for which the delay was attributed to the initial mechanical problem. However, flights delayed less than 15 minutes because of a mechanical problem were included in the on-time performance data.

In 1986–87, the Department conducted a year-long study on airline operating performance at eight of the country's largest airports. This study included all flights, even those delayed or cancelled because of mechanical problems, and it showed that only 40 to 50 percent of the flights arrived on-time. In September 1991, the on-time flight performance for the 31 largest airports

ranged from 79 to 92 percent. The 1991 figures are higher than the carrier's actual performance, since mechanical delays and cancellations (estimated to impact about 2 to 7 percent of all flights) are excluded. Nonetheless, there has been marked improvement in carrier on-time performance which has greatly benefited consumers.

The improvement can be attributed to, among other things, more realistic flight scheduling by the air carriers and improved traffic management by the FAA. The reporting requirements created an incentive for the carriers to adjust scheduled flight times and make other changes to improve schedule reliability. These actions reduced unrealistic scheduling resulting in improved on-time performance. In September 1987, the first month the on-time flight performance statistics were reported under 14 CFR 234, there were 150 nonstop flight segments that were late at least 80 percent of the time (Air Travel Consumer Report, issued November 1987). In March 1992, the number went down to 32 nonstop flight segments that were late at least 80 percent of the time (Air Travel Consumer Report, issued May 1992). While the occurrence of perpetually late flight segments has decreased, there is still room for improvement.

Inspector General Audit

The Department's Office of Inspector General (IG) audited the March 1989 on-time performance reports of Alaska, American, America West, Continental, Delta, Eastern, Northwest, Pan American, Southwest, Trans World, United, and USAir to determine their accuracy. The IG sampled 4,598 of the 383,501 carriers' reported flights, and found that the data were accurate in every case. However, there were problems with non-reported flight operations for all 12 reporting carriers. A non-reported flight operation was a flight which the carrier believed was excluded from the reporting requirements because the flight experienced a qualifying mechanical delay or cancellation or was a discontinued flight. Out of the 3,903 non-reported flights sampled by the IG, 1,005 reporting discrepancies were found (25.7 percent of total). Most of the reporting discrepancies were flights delayed because of mechanical problems but not reported to FAA under 14 CFR 121.703 or 121.705.

The IG concluded that the Research and Special Programs Administration (RSPA) relied too heavily on air carrier reporting. It determined that if all scheduled flights were reported including qualifying mechanicals, RSPA would have a complete data base for the carriers' on-time flight performance statistics. Currently, the Department must try to monitor mechanical delays and discontinued flights by matching each carrier's reported flights against the monthly Official Airline Guide tape of the carriers' schedules. The Department is presently unable to readily verify that the approximately 23,000 flights excluded from the reporting system each month for mechanical problems actually experienced a mechanical problem. From an information standpoint, it is preferable to track an actual record rather than to compute what is missing, and then try to assess why it is missing.

Regulatory Review

To reduce the burden of government regulations, the President requested that agencies review existing regulations ("Reducing Burden of Government Regulations" memorandum, dated January 28, 1992). As part of the Department's initiative, RSPA considered a request from FAA that RSPA expand the On-Time Flight Performance System to include: aircraft tail number, wheels-up time (the time the aircraft leaves the ground) and wheels-down time (the time the aircraft touches the ground) for each flight. This notice of proposed rulemaking is consistent with the criteria established by the President. The expected benefits to society clearly outweigh the costs. This proposal promotes the economic health of the airline industry by providing the FAA the needed information to reduce costly airline delays by more efficient use of the existing air network.

The addition of the data items would give the FAA valuable data for pinpointing airport delays. Wheels-up and wheels-down time used in conjunction with departure and arrival times (already reported by carriers) would tell the FAA the extent of ground delays. Elapsed flight time (computed from the wheels-up time and the wheels-down time) would reveal delays experienced in the air. The reporting of the aircraft tail number would allow the FAA to track an aircraft through the air network, which would enable the FAA to study the ripple effects of delays at hub airports. Data by aircraft type would tell the FAA the capacity impacted by air traffic delays and congestion.

With the additional data, the FAA would build a model to analyze air traffic delays. A safer environment for aircraft operations would result with the added information to accurately analyze the impact of airspace reconfigurations. The data also could be analyzed for airport design changes, new equipment purchases, the planning of new runways or airports based on current and projected airport delays, and traffic levels.

FAA has estimated that a mere 1 percent reduction in flight delays would produce a cost savings of $85 million to the public and industry. According to an FAA study, air traffic delays cost the public and the industry $8.5 billion in 1990.

New Reporting Requirements

Given the improvement in carrier on-time flight performance and the opportunity to make further improvements, RSPA proposes to maintain the current On-Time Flight Performance System with some modifications. We are proposing to require carriers to include mechanical delayed and cancelled flights in their submissions; and to add the aircraft tail number, wheels-up and wheels-down time for each flight reported. The proposed data are items which air carriers track for their internal use. The modifications in the reporting system would result in improved consumer information and give the FAA data it needs to improve the air traffic control system.

Mechanical delays and cancellations would now be included in each carrier's reported data, not as a separate category, providing the consumer with complete information concerning a carrier's performance. The intent of the on-time performance rule was to provide the consumer with information to make an informed decision on which flight or carrier to use. However, under the current reporting requirements, the delays and cancellations due to mechanical problems are not a part of the on-time performance information on which the consumer's decision is based. Carriers currently report their flight performance statistics based on some factors over which they normally have no control, such as weather. Yet, a factor (carrier maintenance) over which a carrier does have some control is not reported in the on-time performance statistics.

In the earlier notice of proposed rulemaking (52 FR 22046, June 10, 1987), the Department was concerned how the proposed disclosure, enforcement, and computer reservation system (CRS) displays alternatives might affect airline safety. The question was asked: "For example would such a rule put undue pressure on airline personnel to keep aircraft in service and meet flight schedules?" American Airlines responded (Docket 44827) that "it did not believe that on-time

disclosure would impinge on air carrier safety." It went on to say that "there is no economic reason to create a special category of excusable delays such as maintenance * * * carriers can control the quality of their maintenance by devotion of sufficient resources." On the other hand, Continental responded in the same docket that reporting mechanical delays and cancellations could be counterproductive to safety considerations. It stated that:

> Safety considerations frequently require maintenance delays. Safety is *promoted* by these delays. If consumers were to associate levels of maintenance delays with low levels of carrier performances, there might be an incentive unreasonably to expedite maintenance and possibly enlarge the safety risk.

No other carrier commented specifically on the safety question of reporting mechanical delays or cancellations; however, there was a common concern that setting on-time performance standards, which carriers would be required to meet, could compromise safety. Because of this concern, the Department did not adopt performance standards in the final rule.

The Department stated in the final rule:

> The data requirements will not adversely affect airline safety. The air carriers owe the highest duty to their passengers to provide safe air transportation. The regulation in no way seeks to interfere with that obligation (52 FR 34062, September 9, 1987).

The Department added a precautionary measure to the reporting requirements which stated:

> However, to avoid any possibility of penalizing carriers for their conscientiousness and concern for the safety of their passengers, we are providing that delays and cancellations caused by mechanical problems be excluded from the reported data (Ibid.).

Flight delays and cancellations caused by aircraft mechanical problems were, therefore, excluded from the On-Time Flight Performance System in order "not to create negative incentives or to compromise safety in any way." (Ibid.) However, after five years of experience with the On-Time Flight Performance System, do you believe that the mechanical delay and cancellation exclusions need to be continued as a precautionary measure?

The smallest reporting carrier reports approximately 8,000 domestic passenger flights per month, while the largest carrier reports approximately 80,000 a month. For the smallest carrier to increase its on-time performance a mere 1 percentage point, it would have to operate 80 flights that should have been delayed or cancelled for mechanical reasons. For the largest carrier the number goes up to 800 flights. Do you believe the incentive exists at either end of the spectrum, for a carrier to compromise safety for the sake of on-time performance statistics?

Even though the IG's audit found 1,005 reporting exceptions out of a sample of 3,903 nonreported flights, the IG concluded that the exceptions appear to be caused by confusion over interpretations of FAA and DOT regulations, rather than intentional misreporting by the air carriers to show better on-time performance. The IG also found that these 1,005 exceptions in the nonreported flight segments did not materially affect the on-time flight performance of any carrier.

Would carriers try to improve their on-time flight performance by taking safety risks which may violate safety rules and subject the carriers to fines or penalties by the FAA? Would the adverse publicity of safety violations be a sufficient deterrent to carriers? Air carriers owe the highest duty to provide safe air transportation. If we include mechanical delays and cancellations in the data base would we be interfering with this obligation?

To address Continental's concern that travelers may associate maintenance delays with low levels of carrier performance, creating an incentive for carriers to unreasonably expedite maintenance and possibly enlarging the safety risk, the proposal to include mechanical delays and cancellations in the On-Time Flight Performance System would treat all delays alike. The causes of flight delays would not be reported or identified. Therefore, consumers and DOT would not be able to compare air carriers' on-time flight performances on the basis of mechanical delays and cancellations.

Collecting data on all flights delayed or cancelled because of mechanical problems would increase the amount of data reported by carriers. However, at the same time, it would simplify and reduce carrier reporting burden. Carriers would not be required to determine which delays were cause by qualifying mechanical delays; and they would not be required to filter out the qualifying mechanical delays for reporting purposes. In the Department's 1987 regulatory evaluation of the rule which established On-Time Flight Performance System, it was estimated that excluding mechanical delays from the reporting system would double the cost of the monthly submissions from $185,000 to $370,000 for all reporting carriers. By including all mechanical delays or cancellations, the confusion between the on-time reporting requirements and the FAA's mechanical reporting requirements would be eliminated. The carriers would be filing more complete and accurate data; and consumers would have a more complete factual basis on which to make purchase decisions concerning air transportation.

The Department proposes to include all mechanical delays and cancellations in the On-Time Flight Performance System and to collect aircraft tail number, wheels-up time and wheels-down time. By adding three basic data items to an existing data base, DOT will be able to make more efficient use of its resources. This action will save the FAA the time, effort and expense of creating a new data base that is needed for the study of air traffic delays.

Any regulation considered by the Department must be evaluated in terms of the impact on safety. Commenters should address whether, and specifically how, the proposed change in the rule would affect airline operations in any way that would impinge on safety. For example, would such a rule change put undue pressure on airline personnel to keep aircraft in service and meet flight schedules? If an adverse impact is possible, how could such an effect be avoided?

Definitions

Since the airline service quality performance reporting went into effect, the Office of Airline Statistics has clarified the reporting instructions by issuing interpretations. Consistent with these interpretations RSPA is proposing to amend the regulations by adding several definitions. Specifically, RSPA is proposing to define cancelled or discontinued flight, diverted flight, extra-section flight, and wet-leased flight.

Cancelled Flights

A cancelled flight means a flight operation that was not operated, but was listed in a carrier's computer reservation system 7 days or less of the scheduled departure. A cancelled flight is a reportable flight and is counted as a late flight.

Discontinued Flights

A discontinued flight means a flight dropped from a carrier's computer reservation system more than 7 days before its scheduled departure. A discontinued flight is excluded from the on-time performance reporting system.

Diverted Flights

A diverted flight means a flight which is not operated in accordance with the carrier's published schedule. When

reporting statistics relating to a diverted flight, the original scheduled flight number and the original scheduled origin and destination airport codes are used. For example, a carrier has a published schedule of A to B to C. If the carrier were to actually fly an A to C operation, the correct reporting would show A to B as a diverted flight, and B to C as a cancelled flight.

Extra-Section Flights

An extra-section flight means a flight conducted as an integral part of scheduled service, that has not been provided for in published schedules and is required for transportation of traffic that cannot be accommodated on the regularly scheduled flight (see 14 CFR 241.03). For example, 180 passengers arrive to board a carrier's 9:00 scheduled flight. The aircraft has a seating capacity of 100. The carrier then rolls out a second aircraft to accommodate the other 80 passengers. The second flight is an extra-section flight, which is not reported under part 234.

Wet-Leased Flights

A wet-lease flight means a flight operated with a leased aircraft and crew. When a carrier fulfills its scheduled flights by a wet-lease arrangement, it shall report the flights as if the leased aircraft and crews were a part of its own fleet.

Clarification of Reporting Requirement

In the past, carriers have asked what is the effective date for reporting a new flight. Consistent with previous interpretations, we are proposing to clarify the regulations to state that a reporting carrier shall report the information for a new flight beginning with the first day of the new scheduled operation.

Waivers From Part 234 Reporting Requirements

Pursuant to § 234.12, the Secretary, or his or her delegate, may for good cause grant waiver from the reporting requirements of part 234.

In January 1992, the administration of airline service quality performance reporting was transferred to RSPA's Office of Airline Statistics from the Office of Secretary. The Administrator of RSPA has delegated authority from the Secretary to oversee the collection and dissemination of information on civil aeronautics (49 CFR 1.53(g)). In this NPRM, we propose to amend section 234.12 to clarify that the waivers from the rule will be granted or denied by the Administrator, Research and Special Programs Administration.

Editorial Changes

Since the original regulations were issued, the Office of Aviation Information Management was renamed the Office of Airline Statistics. Appropriate changes to the regulations are proposed to reflect this name change.

The appendix to the final rule implementing the On-Time Flight Performance System (52 FR 34056, dated September 9, 1987) lists the data items that the reporting carriers are required to report. Two of the data items listed in the appendix which carriers are reporting (difference in minutes between OAG and CRS scheduled arrival times, and difference in minutes between OAG and CRS scheduled departure times) were inadvertently omitted from § 234.4(a). We propose to include them in this section.

Rulemaking Analyses and Notices

Executive Order 12291 and DOT Regulatory Policies and Procedures

This proposed rule has been reviewed under Executive Order 12291, and it has been determined that this is not a major rule. It will not result in an annual effect on the economy of $100 million or more. There will be no increase in production costs or prices for consumers, individual industries, Federal, State or local governments, agencies or geographical regions. Furthermore, this proposed rule will not adversely affect competition, employment, investment, productivity, innovation, or the ability of United States based enterprises to compete with foreign based enterprises in domestic or export markets. The objective of the proposed rule is to simplify the on-time reporting instructions, and to expand the data base to supply the FAA the necessary data to reduce air traffic delays and congestion.

This proposed rulemaking is considered significant under DOT's regulatory policies and procedures, because it involves an important Departmental policy concerning the reporting of flight delays and cancellations caused by mechanical problems. A draft regulatory evaluation has been prepared and placed in the rulemaking docket. There is a potential savings to the airline industry and to the general public of $85 million. This saving would be derived from the decrease in air traffic delays, resulting from FAA's more efficient management to air traffic. The FAA estimates that a mere 1 percent reduction in delays will produce a cost savings of $85 million to the public and industry. Air traffic delays cost the public and the industry $8.5 billion in 1990. The cost to the air carriers to add the three data items would be a one-time programming and testing cost of approximately $34,000, 10 carriers at $3,400 per carrier. Once the programming is in place, the annual cost to the carriers would be approximately $1,000 per carrier. By our calculations, the economic benefits to the industry, as well as to the consumer, far outweigh the cost of supplying the data. We also are proposing to eliminate the exclusion of flights delayed by mechanical problems in the carriers' on-time performance reports. While this action would require carriers to report more data, it would save the carriers from identifying the cause of the delays and filtering out the mechanical delays. The end result will be better consumer information, at a cost savings to the carriers of at least $204,000 based on 10 reporting carriers. This estimate is based on the cost estimated by the Department to exclude mechanical delays when the rule was adopted in 1987. We encourage air carriers to comment on these cost estimates.

Executive Order 12612

This proposed action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612 and it has been determined that the proposed rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Executive Order 12630

This proposed action has been analyzed in accordance with the principles and criteria contained in Executive Order 12630 and it has been determined the proposed rulemaking does not pose the risk of a taking of constitutionally protected private property.

Regulatory Flexibility Act

I certify that this proposed rule will not have a significant economic impact on a substantial number of small entities. For purposes of its aviation economic regulations, Departmental policy categorizes certificated air carriers operating small aircraft (60 seats or less or 18,000 pounds maximum payload or less) in strictly domestic service as small entities for purposes of the Regulatory Flexibility Act (14 CFR 399.73). The amendments will affect only large certificated air carriers accounting for at least 1 percent of U.S. domestic passenger revenues (over $400 million annually).

carriers operating small aircraft (60 seats or less or 18,000 pounds maximum payload or less) in strictly domestic service as small entities for purposes of the Regulatory Flexibility Act (14 CFR 399.73). The amendments will affect only large certificated air carriers accounting for at least 1 percent of U.S. domestic passenger revenues (over $400 million annually).

Paperwork Reduction Act

The reporting and recordkeeping requirement associated with this rule is being sent to the Office of Management and Budget for approval in accordance with 44 U.S.C. chapter 35 under OMB No: 2138–0041; Administration: Research and Special Programs Administration; Title: Airline Service Quality Performance Reports; Need for Information: Consumer Information Flight Data for Air Traffic Control; Proposed Use of Information: Consumer Publications and To build a Model for Studying Air Traffic Delays; Frequency: Monthly; Burden Estimate: 1,780; Average Burden Hours Per Respondent; 178. For further information contact: The Information Requirements Division, M–34, Office of the Secretary of Transportation, 400 Seventh Street SW., Washington, DC 20590–0001, (202) 366–4735 or Transportation Desk Officer, Office of Management and Budget, New Executive Office Building, room 3228, Washington, DC 20503.

Regulation Identifier Number

A regulation identifier number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number 2137–AB94 contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

List of Subjects in 14 CFR Part 234

Advertising, Air carriers, Consumer protection, Reporting requirements, Travel agents.

Proposed Rule

Accordingly, RSPA proposes to amend Chapter II, 14 CFR part 234—Airline Service Quality Performance Reports as follows:

PART 234—AIRLINE SERVICE QUALITY PERFORMANCE REPORTS

1. The authority for part 234 would continue to read as follows:

Authority: 49 U.S.C. 1302, 1324, 1374, 1377 and 1381; 5 U.S.C. 553(e) and 14 CFR 302.38.

2. Section 234.2 "Definitions" would be amended by revising the definitions of "reportable flight" and "reporting carrier;" removing the definitions of "mechanical delay" and "mechanical cancellation;" and adding new definitions "cancelled flight", "discontinued flight", "diverted flight", "extra-section flight" and "wet-leased flight", in alphabetical order to read as follows:

§ 234.2 Definitions.

For the purpose of this part:

Cancelled flight means a flight operation that was not operated, but was listed in a carrier's computer reservation system within 7 days of the scheduled departure.

Discontinued flight means a flight dropped from a carrier's computer reservation system more than 7 days before its scheduled departure.

Diverted flight means a flight which is not operated in accordance with the carrier's published schedule. For example, a carrier has a published schedule of A to B to C. If the carrier were to actually fly an A to C operation, the A to B segment is a diverted flight, and the B to C segment is a cancelled flight.

Extra-section flight means a flight conducted as an integral part of scheduled service, that has not been provided for in published schedules and is required for transportation of traffic that cannot be accommodated on the regularly scheduled flight.

* * * * *

Reportable flight means any nonstop flight to or from any airport within the contiguous 48 states that account for at least 1 percent of domestic scheduled-passenger enplanements in the previous calendar year, as reported in the reports submitted to the Department pursuant to part 241 of this title. Qualifying airports will be specified periodically in accounting and reporting directives issued by the Offices of Airline Statistics (OAS).

Reporting carrier means an air carrier certificated under section 401 of the Federal Aviation Act of 1958 that accounted for at least 1 percent of domestic scheduled-passenger revenues in the 12 months ending March 31 of each year, as reported in reports submitted to the Department pursuant to part 241 of this title. Reporting carriers will be identified periodically in accounting and reporting directives issued by OAS.

Wet-leased flight means a flight operated with a leased aircraft and crew.

3. Section 234.4 would be amended by revising paragraphs (a) and (b), redesignating paragraphs (c) and (d) as (e) and (f), respectively, and adding new paragraphs (c) and (d) to read as follows:

§ 234.4 Reporting of on-time performance.

(a) Each reporting carrier shall file RSPA Form 234 "On-Time Flight Performance Report" with OAS, on a monthly basis, setting forth the information for each of its reportable flights held out in the Official Airline Guide (OAG), in the computer reservations systems, or in other schedule publications. The reportable flights include, but are not limited to, cancelled flights, diverted flights, new flights and wet-leased flights. The report shall be made in the form and manner set forth in accounting and reporting directives issued by the Director, OAS, and shall contain the following information:

(1) Carrier and flight number.

(2) Aircraft tail number.

(3) Origin and Destination airport codes.

(4) Published OAG departure and arrival times for each scheduled operation of the flight.

(5) CRS scheduled arrival and departure time for each scheduled operation of the flight.

(6) Actual departure and arrival time for each operation of the flight.

(7) Difference in minutes between OAG and CRS scheduled arrival times.

(8) Difference in minutes between OAG and CRS scheduled departure times.

(9) Actual wheels-up and wheels-down time for each operation of the flight.

(10) Date and day of week of scheduled flight operation.

(11) Scheduled elapsed time, according to CRS schedule.

(12) Actual elapsed time.

(13) Amount of departure delay, if any.

(14) Amount of arrival delay, if any.

(15) Amount of elapsed time difference, if any.

(b) When reporting the information specified in paragraph (a) of this section for a diverted flight, a reporting carrier shall use the *original* scheduled flight number and the *original* scheduled origin and destination airport codes.

(c) A reporting carrier shall report the information specified in paragraph (a) of this section for a new flight beginning with the first day of the new scheduled operation.

(d) A reporting carrier shall not report the information specified in paragraph (a) of this section for any discontinued or extra-section flight.

* * * * *

4. Section 234.5 would be revised to read as follows:

§ 234.5 Form of reports.

Except where otherwise noted, all reports required by this part shall be filed with the OAS on ADP computer tape in the format specified in accounting and reporting directives issued by the Director, OAS, within 15 days of the end of the month for which data are reported.

5. Section 234.6 would be revised to read as follows:

§ 234.6 Baggage-handling statistics.

Each reporting carrier shall report monthly to the Department on a domestic system basis, excluding charter flights, the total number of passengers enplaned systemwide, and the total number of mishandled-baggage reports filed with the carrier. The information shall be submitted to the Department within 15 days of the end of the month to which it applies and must be submitted with the transmittal letter accompanying the data for on-time performance in the form and manner set forth in the reporting directives issued by the Director, OAS.

6. Section 234.8 would be amended by revising paragraphs (a) and (b)(1) to read as follows:

§ 234.8 Calculation of on-time performance codes.

(a) Each reporting carrier shall calculate an on-time performance code in accordance with this section and as provided in more detail in accounting and reporting directives issued by the Director, OAS. The calculations shall be performed for each reportable flight, except those scheduled to operate three times or less during a month. In addition, each reporting carrier shall assign an on-time performance code to each of its single plane one-stop or multi-stop flights, or portion thereof, that it holds out to the public through a CRS, the last segment of which is a reportable flight.

(b) The on-time performance code shall be calculated as follows:

(1) Based on reportable flight data provided to the Department, calculate the percentage of on-time arrivals of each nonstop flight. Calculations shall not include discontinued or extra-section flights for which data are not reported to the Department.

* * * * *

7. Section 234.12 would be revised to read as follows:

§ 234.12 Waivers.

Any air carrier may request a waiver from the reporting requirements of this part. Such a request, at the discretion of the Administrator, Research and Special Programs Administration may be granted for good cause shown. The requesting party shall state the basis for such a waiver.

Issued in Washington, DC on December 4, 1992.

Richard R. John,

Acting Associate Administrator for Research, Technology and Analysis, Research and Special Programs Administration.

BILLING CODE 4910-62-M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 4

Past Performance Reporting

AGENCY: Commodity Futures Trading Commission.

ACTION: Extension of comment period.

SUMMARY: On November 10, 1992, the Commodity Futures Trading Commission ("Commission") published in the **Federal Register** a request for public comment on the efficacy of Commission rules relative to performance reporting and disclosure by commodity pool operators and commodity trading advisors. The original comment period expires on December 10, 1992. 57 FR 53457 (November 10, 1992). The Commission has received a request for an extension of the comment period. In order to ensure that all interested parties have an adequate opportunity to submit meaningful comments, the Commission has determined to extend the comment period for an additional 65 days.

DATES: Written comments must be received on or before February 16, 1993.

ADDRESSES: Comments should be sent to Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Attn: Secretariat. Reference should be made to the request for public comment on past performance reporting.

FOR FURTHER INFORMATION CONTACT: Paul Bjarnason, Chief Accountant, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Telephone: (202) 254-8955.

Issued in Washington, DC on the 7th day of December, 1992, by the Commission.

Jean A. Webb,

Secretary of the Commission.

[FR Doc. 92-30140 Filed 12-10-92; 8:45 am]

BILLING CODE 6351-01-M

17 CFR Part 150

Revision to Recordkeeping Requirements; Reopening of Comment Period

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed rule; reopening of comment period.

SUMMARY: On October 26, 1992, the Commodity Futures Trading Commission ("Commission") published in the **Federal Register** a Notice of Proposed Rulemaking relating to Commission recordkeeping requirements. 57 FR 48480. The applicable comment period expired on November 25, 1992. The Commission has received a request for an extension of the comment period. In light of the apparently widespread interest in the proposed revisions to these rules, and because it wishes to ensure that all interested parties have an adequate opportunity to submit informed comments, the Commission has determined to reopen the period for public comment.

DATES: The comment period will remain open through January 9, 1993.

ADDRESSES: Comments should be sent to the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581 and should make reference to "Recordkeeping Requirements".

FOR FURTHER INFORMATION CONTACT: Lamont L. Reese, Supervisory Statistician, (202) 254-3310.

Issued in Washington, DC, this 7th day of December, 1992, by the Commission.

Jean A. Webb,

Secretary of the Commission.

BILLING CODE 6351-01-M

DEPARTMENT OF TREASURY

Internal Revenue Service

26 CFR Part 301

[GL-709-86]

RIN 1545-AM70

Levy and Distraint

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains a proposed regulatory amendment regarding the authority to collect taxes by means of levy and distraint. The Technical and Miscellaneous Revenue

Act of 1988 (TAMRA), amended section 6331 of the Internal Revenue Code concerning the collection of tax by means of levy in several respects. The statute increased the 10 day requirement for notification of intention to levy to 30 days, required specific types of information to be included in the notice, and expanded the reasons for releasing a levy on salary or wages to include all the situations described in section 6343(a). TAMRA also placed restrictions on levies that are uneconomical or that are scheduled to be made on the day a person is required to appear in response to a summons issued for the purpose of collecting any underpayment of tax by that person. The proposed regulatory amendment reflects these changes. In addition, the proposed regulatory amendment changes the existing regulations with respect to levying on bank deposits to conform to section 6332(c), which was enacted by TAMRA. The proposed regulatory amendment also reflects two changes made by the Tax Equity and Fiscal Responsibility Act of 1982: Extending to "other property" of a taxpayer the requirement of notification of intention to levy that exists for a levy on salary or wages; and requiring that any mailing of that notice be done by certified or registered mail. Finally, several stylistic changes were made to clarify parts of the regulations that were not affected by the statutory changes.

DATES: Written comments and requests for a public hearing must be received by February 9, 1993.

ADDRESSES: Send submissions to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC:CORP:T:R (GL–709–88), room 5228, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Susan B. Watson, 202–622–3640 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

This notice of proposed rulemaking contains proposed changes to §§ 301.6331–1 and 301–6331–2, to reflect amendments made to sections 6331 and 6332(c) of the Internal Revenue Code by section 349(a) of the Tax Equity and Fiscal Responsibility Act of 1982, Public Law No. 97–248, 96 Stat. 325 (TEFRA) as well as by sections 6236(a), (b) and (d) of the Technical and Miscellaneous Revenue Act of 1988, Public Law No. 100–647, 102 Stat. 3573 (TAMRA).

Explanation of Provisions

Some minor changes are proposed to § 301.6331–1. The first change relates to section 6332(c), which was enacted by section 6236(e)(1) of TAMRA and which provides that banks may not surrender funds to the Service until 21 days after a levy on those funds is served. Prop. reg. § 1.6331–1(a)(1) reflects this change by providing that a levy on a bank account applies not only to those funds on deposit at the time the levy is made, but also to any interest that accrues on those deposits during the 21 day waiting period. In addition, some conforming changes have been made to the jeopardy rules contained in § 301.6331–1(a)(2), and existing § 301.6331–2(c), which describes the continuing effect of a levy on salary or wages, has been moved to § 301.6331–1 to improve organization. This section also has been amended to provide that a continuous levy on salary or wages remains in effect until released for any of the reasons provided in section 6343(a). Previously such a levy was required to be released only if it was satisfied or if the period of limitations provided in section 6502 (and any period during which such period of limitations was suspended as provided by law) had lapsed. Finally, some minor clarifying changes also have been made to the section.

The changes made to § 301.6331–2 principally reflect the additional protections provided to taxpayers by the Taxpayer Bill of Rights contained in TAMRA. As proposed, § 301.6331–2(a)(1) now provides that the Service must notify a taxpayer of the Services's intent to levy at least 30 days (instead of 10 days) in advance. Also, this protection is being extended so that in addition to applying to salary and wages, it now applies to other property as well. In addition, if the notice is mailed, the Service must use certified or registered mail.

New § 301.6331–2(a)(2) provides that the notice to the taxpayer must contain a brief and non-technical description of (1) the statutory provisions and procedures relating to the levy and sale of property, (2) the administrative appeals available to the taxpayer with respect to the levy and sale and the procedures relating to those appeals, (3) the alternatives available to taxpayers that could prevent levy on the property (including installment agreements), and (4) the statutory provisions and procedures relating to redemption of property and the release of liens on property. As under prior law, the requirement to give notice and the observance of a waiting period do not apply if the Service determines that the collection of tax is in jeopardy.

Proposed § 301.6331–2(b) reflects TAMRA's enactment of section 6331(f). Under section 6331(f), no levy may be made on property if the levy and sale expenses estimated by the Service exceed the estimated fair market value of the property. While section 6331(f) could be narrowly read to require an estimate to be made as the Service is about to seize property, there is no legislative history regarding this provision to suggest that Congress intended to impose such an unworkable approach. Accordingly, the proposed regulations adopt the more reasonable and practical approach. They require this estimate to be made either at the time of the seizure or within a reasonable period of time prior to the seizure. The estimates made within this time frame may be based upon earlier estimates and may be formal or informal.

Section 6331(f) and its legislative history do not indicate whether estimates are to be made on an aggregate basis or with respect to each individual item of property potentially subject to seizure. For practical reasons, the proposed regulations provide that the estimate of expenses and fair market value are to be made on an aggregate basis for all of the items to be seized pursuant to a particular levy. The proposed regulations also provide that no levy should be made on individual items of insignificant monetary value. This restriction does not limit, for example, the Service's ability to seize boxes of paper clips or other supplies owned by a business whose assets are to be levied upon.

In accordance with section 6331(g), which also was enacted by TAMRA, § 301.6331–2(c) of the proposed regulations generally precludes the Service from levying on the property of a taxpayer on the day the taxpayer (or an officer or employee of that taxpayer) is required to appear in response to a summons issued by the Service for the purpose of collecting any underpayment of tax by the taxpayer. The relevant date is not only the date established pursuant to section 7605 but also any date set by a court of competent jurisdiction if judicial enforcement of the summons is required.

Proposed Effective Dates

These regulations are proposed to be effective on December 10, 1992. The Service believes that prior to the effective date of these regulations, taxpayers are afforded the protections enacted by TAMRA by virtue of the provisions of the Internal Revenue Code, but the Service solicits comments as to whether these regulations should be retroactive.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Chief Counsel on Advocacy of the Small Business Administration for comment on their impact on small business.

Comments on Proposed Regulations

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted timely (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying in their entirety. A public hearing will be scheduled and held upon written request by any person who submits comments on the proposed rules. Notice of the time and place for the hearing will be published in the **Federal Register**.

Drafting Information

The principal author of these proposed regulations is Susan B. Watson, Office of the Assistant Chief Counsel (General Litigation), Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in their development.

List of Subjects in 26 CFR Part 301

Administrative practice and procedure, Bankruptcy, Courts Crime, Disclosure of information, Employment taxes, Estate tax, Excise taxes, Filing requirements, Gift tax, Income taxes, Investigations, Law enforcement, Penalties, Pensions, Statistics, Taxes.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 301 is proposed to be amended as follows:

PART 301—[AMENDED]

Paragraph 1. The authority citation for part 301 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Section 301.6331–1 is amended as follows:

1. In paragraph (a)(1), following the eight sentence, a new sentence is added.
2. In the new tenth sentence of paragraph (a)(1), the language "§ 301.6331–2(c)" is removed and "§ 301.6331–1(b)(1)" is added in its place.
3. The new fourteenth sentence of paragraph (a)(1) is revised.
4. Paragraph (a)(2) is revised.
5. Paragraph (b) is amended by:
a. Redesignating paragraph (b) as (b)(2):
b. Adding a paragraph heading for new paragraph (b);
c. Adding a new paragraph (b)(1) heading and text.
6. New paragraph (d) is added.
7. The additions and revisions read as follows:

§ 301.6331–1 Levy and distraint.

(a) * * *

(1) * * * A levy on a bank reaches any interest that accrues on the taxpayer's balance under the terms of the bank's agreement with the depositor during the 21-day holding period provided for in section 6332(c). * * * Similarly, a levy on reaches property in the possession of the person levied upon at the time the levy is made together with interest that accrues during the 21-day holding period provided for in section 6332(c). * * *

(2) *Jeopardy cases.* If the district director finds that the collection of any tax is in jeopardy, he may make notice and demand for immediate payment of such tax and, upon failure or refusal to pay such tax, collection thereof by levy shall be lawful without regard to the 10-day period provided in section 6331(a), the 30-day period provided in section 6331(d) or the limitation on levy provided in section 6331(g)(1).

* * * * *

(b) *Continuing levies and successive seizures*—(1) *Continuing effect of levy on salary and wages.* A levy on salary or wages has continuous effect from the time the levy originally is made until the levy is released pursuant to section 6343. For this purpose, the term "salary or wages" includes compensation for services paid in the form of fees, commissions, bonuses, and similar items. They levy attaches to both salary or wages earned but not yet paid at the time of the levy, advances on salary or wages made subsequent to the date of the levy, and salary or wages earned and becoming payable subsequent to the date of the levy, until the levy is released pursuant to section 6343. In general, salaries or wages that are the subject of a continuing levy and are not exempt from levy under section 6334(a)(8) or (9), are to be paid to the district director, the director of the service center, or the director of the compliance center on the same date the payor would otherwise pay over the money to the taxpayer. For example, if an individual normally is paid on the Wednesday following the close of each work week, a levy make upon his or her employer on any Monday would apply to both wages due for the prior work week and wages for succeeding work weeks as such wages become payable. In such a case, the levy would be satisfied if, on the first Wednesday after the levy and on each Wednesday thereafter until the employer receives a notice of release from levy described in section 6343, the employer pays over to the district director, the director of the service center, or the director of the compliance center wages that would otherwise be paid to the employee on such Wednesday (less the exempt amount pursuant to section 6334).

* * * * *

(d) *Effective date.* These regulations are effective December 10, 1992.

Par. 3. Section 301.6331–2 is revised to read as follows:

§ 301.6331–2 Procedures and restrictions on levies.

(a) *Notice of intent to levy*—(1) *In general.* Levy may be made upon the salary, wages, or other property of a taxpayer for any unpaid tax no less than 30 days after the district director, the director of the service center, or the director of the compliance center has notified the taxpayer in writing of the intent to levy. The notice must be given in person, be left at the dwelling or usual place of business of the taxpayer, or be sent by registered or certified mail to the taxpayer's last known address. The notice of intent to levy is separate from, but may be given at the same time as, the notice and demand described in § 301.6331–1.

(2) *Content of Notice.* The notice of intent to levy is to contain a brief statement in non-technical terms concerning the following information—

(i) The Internal Revenue Code provisions and the procedures relating to levy and sale of property;

(ii) The administrative appeals available with respect to the levy and sale of property and the procedures relating to such appeals;

(iii) The alternatives available that could prevent levy on the property (including the use of an installment agreement under section 6159); and

(iv) The Internal Revenue Code provisions and the procedures relating

to redemption of property and release of liens on property.

(b) *Uneconomical levy*—(1) *In general.* No levy may be made on property if the district director estimates that the anticipated expenses with respect to the levy and sale will exceed the fair market value of the property. The estimate is to be made on an aggregate basis for all of the items that are anticipated to be seized pursuant to the levy. Generally, no levy should be made on individual items of insignificant monetary value. For the definition of fair market value, see § 301.6325–1(b)(1)(i). See § 301.6341–1 concerning the expenses of levy and sale.

(2) *Time of estimate.* The estimate, which may be formal or informal, is to be made at the time of the seizure or within a reasonable period of time prior to a seizure. The estimate may be based on earlier estimates of fair market value and anticipated expenses of the same or similar property.

(3) *Examples.* The following examples illustrate the application of this paragraph:

Example 1. A district director anticipates that Taxpayer A has only one item of property that can be seized and sold. This item is estimated to have a fair market value of $250.00. The district director also estimates that the costs of seizure and sale will total $300.00 if this item is seized. The district director is prohibited from levying on this one item of Taxpayer A's property because the costs of seizure and sale are estimated to exceed the property's fair market value.

Example 2. The facts are the same as in *Example 1* except that the district director anticipates that Taxpayer A has 10 items of property that can be seized and sold. Each of those items is estimated to have a fair market value of $250.00. The district director also estimates that the costs of seizure and sale will total $300.00 regardless of how many of those items are seized. The district director is prohibited from levying on only one item of Taxpayer A's property because the cost of seizure and sale are estimated to exceed the fair market value of the single item of property. The district director, however, would not be prohibited from levying on two or more items of Taxpayer A's property because the aggregate fair market value of the seized property would exceed the estimated costs of seizure and sale.

Example 3. A taxpayer has three items of property, A, B, and C. The district director anticipates that the value of items A, B, and C depends on their being sold as a unit. The district director estimates that due to high anticipated costs of storing or maintaining item B prior to the sale, the aggregate fair market value of items A, B, and C will not exceed the anticipated expenses of seizure and sale if all three items are seized. Accordingly, the district director is prohibited from levying on items A, B and C.

Example 4. The facts are the same as in *Example 3* except that the district director does not anticipate that the value of items A, B, and C depends on those items being sold as a unit. If the district director estimates that the aggregate fair market value of items A and C exceeds the aggregate anticipated costs of the seizure and sale of those two items, items A and C can be seized and sold. The district director is prohibited from levying on item B because the high cost of storing or maintaining item B prevents the aggregate fair market value of items A, B, and C from exceeding the anticipated expenses of seizure and sale if all three items are seized.

(c) *Restriction on levy on date of appearance.* Except for continuing levies on salaries or wages described in § 301.6331–1(b)(1), no levy may be made on any property of a person on the day that person, or an officer or employee of that person, is required to appear in response to a summons served for the purpose of collecting any underpayment of tax from the person. For purposes of this paragraph (c), the date on which an appearance is required is the date fixed by an officer or employee of the Internal Revenue Service pursuant to section 7605 or the date, if any, fixed as the result of a judicial proceeding instituted under sections 7604 and 7402(b) seeking the enforcement of such summons.

(d) *Jeopardy.* Paragraphs (a) and (c) of this section do not apply to a levy if the district director finds, for purposes of § 301.6331–1(a)(2), that the collection of tax is in jeopardy.

(e) *Effective date.* These regulations will become effective on December 10, 1992.

Shirley D. Peterson,

Commissioner of Internal Revenue.

BILLING CODE 4830–01–M

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 9

[Notice No. 763; 92F–014P]

Dunnigan Hills Viticultural Area

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Bureau of Alcohol, Tobacco and Firearms (ATF) is considering the establishment of a viticultural area located in Yolo County, California, to be known as "Dunnigan Hills." This proposal is the result of a petition filed by Ron McClendon of R.H. Phillips Vineyards.

ATF believes that the establishment of viticultural areas and the subsequent use of viticultural area names as appellations of origin in wine labeling and advertising allows wineries to designate the specific areas where the grapes used to make the wine were grown and enables consumers to better identify the wines they purchase.

DATES: Written comments must be received by January 25, 1993.

ADDRESSES: Send written comments to: Chief, Wine and Beer Branch; Bureau of Alcohol, Tobacco and Firearms; P.O. Box 50221; Washington, DC 20091–0221; Attn: Notice No. 763.

FOR FURTHER INFORMATION CONTACT: Marjorie D. Ruhf, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, 650 Massachusetts Avenue NW., Washington, DC 20226 (202–927–8230).

SUPPLEMENTARY INFORMATION:

Background

On August 23, 1978, ATF published Treasury Decision ATF–53 (43 FR 37672, 54624) revising regulations in 27 CFR part 4. These regulations allow the establishment of definite American viticultural areas. The regulations also allow the name of an approved viticultural area to be used as an appellation of origin in the labeling and advertising of wine.

On October 2, 1979, ATF published Treasury Decision ATF–60 (44 FR 56692) which added a new part 9 to 27 CFR, providing for the listing of approved American viticultural areas. Section 4.25a(e)(1), title 27, CFR, defines an American viticultural area as a delimited grape-growing region distinguishable by geographical features. the boundaries of which have been delineated in subpart C of part 9. Section 4.25a(e)(2) outlines the procedure for proposing an American viticultural area. Any interested person may petition ATF to establish a grape-growing region as a viticultural area. The petition should include:

(a) Evidence that the name of the proposed viticultural area is locally and/or nationally known as referring to the area specified in the petition;

(b) Historical or current evidence that the boundaries of the viticultural area are as specified in the petition;

(c) Evidence relating to the geographical features (climate, soil, elevation, physical features, etc.) which distinguish the viticultural features of the proposed area from surrounding areas;

(d) A description of the specific boundaries of the viticultural area, based on features which can be found on United States Geological Survey

(U.S.G.S.) maps of the largest applicable scale; and

(e) A copy of the appropriate U.S.G.S. map(s) with the boundaries prominently marked.

Petition

ATF has received a petition from R.H. Phillips Vineyards proposing to establish a viticultural area in northwestern Yolo County, California, to be known as "Dunnigan Hills." The proposed viticultural area is located near Sacramento, California, and between the Napa Valley viticultural area on the west and the Clarksburg, Merritt Island and Lodi viticultural areas to the southeast. The proposed area contains approximately 89,000 acres, of which 1,118 acres are planted to vineyards. The terrain in the proposed viticultural area is characterized by gently rolling hills of 100 to 400 feet elevation. The petitioner states that two wineries and 6 vineyards are located within the proposed viticultural area.

Evidence of Name

According to the petitioner, the Dunnigan Hills area was settled in the 1850's and 1860's by western Europeans who raised grain and livestock. In 1853, A.W. Dunnigan opened a hotel which was known as Dunnigan's. In 1876, the Northern Railway was extended to Dunnigan's hotel and a town plat was recorded for the town of Dunnigan. The nearby hills were soon known as the Dunnigan Hills.

Evidence that the name of the proposed area is locally and/or nationally known as referring to the area specified in the petition includes:

(a) The name "Dunnigan Hills" appears on each of the three U.S.G.S. maps submitted with the petition.

(b) The name "Dunnigan Hills" appears in the United States Department of Agriculture Soil Survey of Yolo County California (1972).

(c) The petitioner states that the name "Dunnigan Hills" was used to describe the subject area as early as 1913 by Tom Gregory in A History of Yolo County and as recently as 1987 by Joann Larkey, in Yolo County, Land of Changing Patterns.

Evidence of Boundaries

Each of the U.S.G.S. maps used to delineate the boundary of the proposed area shows the name "Dunnigan Hills" over an area which roughly coincides with the boundaries of the proposed Dunnigan Hills viticultural area. According to the petitioner, the southern, eastern and northern boundaries of the Dunnigan Hills are distinguished by a change from the low, rolling hills of the proposed area to the flat terrain of the floor of the Sacramento Valley. On the west, the terrain changes to the steeper and higher slopes of the Coast Range.

Geographical Features

The Dunnigan Hills are a group of low, rolling hills running in a northwest to southeasterly direction for about 19.5 miles. At the widest point, the hills are about 10 miles wide.

The petitioner provided the following evidence relating to features which he contends distinguish the proposed viticultural area from the surrounding areas:

Topography and Elevation

The Dunnigan Hills rise out of a part of the Sacramento Valley which is nearly flat, varying only between 60 and 130 feet above sea level. In contrast to the surrounding valley floor, the proposed area consists of low, rolling hills, which rise to an elevation of about 400 feet above sea level. The hills are crossed by streams that flow west to east out of the Coast Range. On the west, the Dunnigan Hills drop to an elevation of approximately 250 feet before the transition to the steeper, higher slopes of the Coast Range begins. The terrain in the Coast Range rises rapidly to 1,200 and 1,600 feet, with peaks which are even higher.

Soil

The predominant soils in the proposed area are the Corning-Hillgate association, well-drained, gently sloping to moderately steep gravelly loams or loams on terraces, and the Sehorn-Balcom association, well-drained, gently sloping to steep silty clay loams and clays over sandstone. Soils outside the area include the Dibble-Millsholm and Positas associations in the foothills of the Coast Range to the west, and the Yolo-Brentwood, Rincon-Marvin-Tehama, Capay-Clear Lake and Willows-Pescadero associations on the valley floor to the north, south and east.

Climate

The petitioner states that the proposed area is warmer in the summer and winter than the Coast Range highlands to the west. He also states that the area is less prone to frost damage in the spring than the rest of the Sacramento Valley because "the hills and streams provide better air drainage than that found on the valley floor to the north, east and south of the Dunnigan Hills." This air drainage also makes the proposed area cooler than the surrounding valley floor in summer.

Proposed Boundary

The boundary of the proposed Dunnigan Hills viticultural area may be found on three United States Geological Survey (U.S.G.S.) maps with a scale of 1:62500. The boundary is described in § 9.145.

Executive Order 12291

It has been determined that this proposed regulation is not a major regulation as defined in Executive Order 12291 and a regulatory impact analysis is not required because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

It is hereby certified that this regulation will not have a significant economic impact on a substantial number of small entities. Any benefit derived from the use of a viticultural area name is the result of the proprietor's own efforts and consumer acceptance of wines from a particular area. No new requirements are proposed. Accordingly, a regulatory flexibility analysis is not required.

Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1980, Public Law 96–511, 44 U.S.C. chapter 35, and its implementing regulations, 5 CFR part 1320, do not apply to this notice of proposed rulemaking because no requirement to collect information is proposed.

Public Participation

ATF requests comments from all interested parties concerning this proposed viticultural area. Comments received on or before the closing date will be carefully considered. Comments received after that date will be given the same consideration if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before the closing date.

ATF will not recognize any comment as confidential. Comments may be disclosed to the public. Any material which a commenter considers to be confidential or inappropriate for disclosure to the public should not be included in the comment. The name of

the person submitting a comment is not exempt for disclosure. During the comment period, any person may request an opportunity to present oral testimony at a public hearing. However, the Director reserves the right to determine, in light of all circumstances, whether a public hearing will be held.

Drafting Information

The principal author of this document is Marjorie D. Ruhf, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

List of Subjects in 27 CFR Part 9

Administrative practice and procedure, Consumer protection, Viticultural areas, and Wine.

Authority and Issuance

Title 27, Code of Federal Regulations, part 9, American Viticultural Areas, is amended as follows:

PART 9—AMERICAN VITICULTURAL AREAS

Paragraph 1. The authority citation for part 9 continues to read as follows:

Authority: 27 U.S.C. 205.

Par. 2. Subpart C is amended by adding § 9.145 to read as follows:

Subpart C—Approved American Viticultural Areas

§ 9.145 Dunnigan Hills.

(a) *Name.* The name of the viticultural area described in this section is "Dunnigan Hills."

(b) *Approved maps.* The appropriate maps for determining the boundary of the Dunnigan Hills viticultural area are three U.S.G.S. 15 minute series topographical maps of the 1:62500 scale. They are titled:

(1) "Guinda, Calif.," 1959.

(2) "Dunnigan, Calif.," 1953.

(3) "Woodland, Calif.," 1953.

(c) *Boundary.* The Dunnigan Hills viticultural area is located in Yolo County, California. The boundary is as follows:

(1) The beginning point is on the Dunnigan, Calif., U.S.G.S. map at the intersection of Buckeye Creek and U.S. Route 99W just south of the Colusa—Yolo county line;

(2) From the beginning point, the boundary follows Route 99W in a southeasterly direction until an unnamed westbound light-duty road coincident with a grant boundary (referred to by the petitioner as County Road 17) diverges from Route 99W just north of the town of Yolo, California, on the Woodland, Calif., U.S.G.S. map;

(3) The boundary then follows the Country Road 17 for approximately 2 miles to an unnamed southbound light duty road (referred to by the petitioner as County Road 95A);

(4) The boundary then follows County Road 95A south for approximately ½ mile to an unnamed westbound light duty road (referred to by the petitioner as County Road 17A);

(5) The boundary then proceeds west along County Road 17A for approximately ⅜ mile to an unnamed southbound light duty road (referred to by the petitioner as County Road 95);

(6) The boundary then proceeds south along County Road 95 for approximately 1 mile to an unnamed light duty road which goes in a southwesterly direction (referred to by the petitioner as County Road 19);

(7) The boundary than proceeds southwest along County Road 19 for approximately ¼ mile to an unnamed light duty road which travels south-southwest (referred to by the petitioner as County Road 94B);

(8) The boundary then proceeds southwest along County Road 94B approximately 1¼ mile until it intersects Cache creek

(9) The boundary then follows Cache Creek in a westerly direction 5.5 miles until it intersects an unnamed north-south light duty road approximately 1 mile north of the city of Madison, California (referred to by the petitioner as County Road 89);

(10) The boundary then follows County Road 89 two miles in a northerly direction back on to the Dunnigan, Calif., U.S.G.S. map where it intersects an unnamed light duty road (referred to by the petitioner as County Road 16);

(11) The boundary follows County Road 16 west for approximately 2 miles onto the Guinda, Calif., U.S.G.S. map, where it turns north onto an unnamed light-duty road between sections 31 and 32 of T10N/R1W (referred to by the petitioner as County Road 87);

(12) The boundary follows County Road 87 north for 2 miles to an unnamed east-west light duty road (referred to by the petitioner as County Road 14);

(13) The boundary follows County Road 14 west for 3 miles, and then leaves the unnamed road and turns north on the dividing line between sections 22 and 23 of T11N/R2W;

(14) The boundary continues due north until it intersects Little Buckeye Creek just south of the Yolo-Colusa county line;

(15) The boundary then follows Little Buckeye Creek in an easterly direction until it joins Buckeye Creek;

(16) The boundary then follows Buckeye Creek in an easterly direction back to the point of beginning on the Dunnigan, Calif., U.S.G.S. map.

Stephen E. Higgins,

Director.

Address Information Product Cycle and Mandatory Update Change

AGENCY: Postal Service.

ACTION: Proposed rule.

SUMMARY: This rule proposes to change the frequency of required use of updated address information product files from four times a year to six times a year. The Computerized Delivery Sequence File (CDS) will not be affected by the frequency change. This action will reduce the potential for outdated address information being applied to mailings.

DATES: Comments must be received on or before January 18, 1993.

ADDRESSES: Written comments should be directed to Susan Hawes, Address Management Office, Customer Service Support, U.S. Postal Service Headquarters, 475 L'Enfant Plaza SW., room 5801, Washington, DC 20260-6803.

Copies of all written comments will be available for inspection and photocopying between 9 a.m. and 4 p.m., Monday through Friday, in the Address Management Office, Customer Service Support, room 5801, U.S. Postal Service Headquarters, 475 L'Enfant Plaza SW., Washington, DC 20260-6803.

FOR FURTHER INFORMATION CONTACT: Susan Hawes, (202) 268-3503.

SUPPLEMENTARY INFORMATION: The Postal Service makes a variety of address information products available to mailers for the purpose of validating mailing address information and obtaining access to postal rate discounts. The Postal Service proposes to change the current quarterly product cycle dates for these products to bimonthly cycles. The requirements and mandatory usage dates for these products will remain unchanged (i.e., CRIS, 75 days; ZIP+4, 6 weeks). Currently updates are produced by January 15, April 15, July 15, and October 15 of each year. Mailers are then required to update their lists within a specified time to qualify for certain postage discounts. For example, mailers using the Carrier Route

Information System (CRIS) product to qualify for carrier-route discounts are given two and one-half months to update their lists, so that use of information from the updated CRIS products becomes mandatory April 1, July 1, October 1, and January 1, respectively. The time provided mailers to update their list varies by product.

(Note: The following charts are based on the CRIS product cycle and are provided as examples designed to enhance the understanding of the proposed cycle changes.)

PRESENT QUARTERLY UPDATE SCHEDULE
[CRIS Product]

Release date	Mandatory use date	Period covered
January 15	April 1	January 15 to June 30 (5½ months).
April 15	July 1	April 15 to September 30 (5½ months).
July 15	October 1	July 15 to December 31 (5½ months).
October 15	January 1	October 15 to March 31 (5½ months).

In addition to the regular quarterly updates, monthly update information is also available to mailers. The use of monthly update information is not mandatory; however, many mailers find the monthly updates valuable as a fresh data source for maintaining the most current and accurate quality information possible.

During fiscal year 1991, 8 million changes occurred to the Address Management System (AMS) database containing approximately 29 million address records. This translates to approximately 667,061 changes per month. Due to the dynamic nature of this database, the Postal Service has concluded that the current period covered by each mandatory quarterly update is no longer sufficient, and that increasing the frequency of the mandatory updates of all Address Information System (AIS) products and their use by mailers will decrease the potential for "stale" mailings which must be rehandled by the Postal Service.

Accordingly, based on discussions with mailers concerning the optimum number of mandatory updates for these products, the Postal Service proposes to increase the mandatory update frequency for all address information products from four to six times per year. This increase in frequency will apply to the following address information products.

CRIS File
Five Digit File
Delivery Statistics
City State File
CRIS Cross File
File
Zip+4 File
County Cross File

The time provided to mailers to update their mailing lists after receipt of an updated product would remain unchanged. Because of a concern to avoid unduly increasing mailers' processing costs, the Postal Service believes that updates more frequent than every other month are not appropriate at this time.

Based on the use of more frequently updated and therefore more accurate address information, mailers are expected to realize the following benefits.

—More mail qualifying for presort discounts based on the use of the later information available.
—Enhanced timeliness of delivery based on the use of up-to-date carrier route numbers and 5-digit ZIP Codes for addresses that have changed.
—More stable rates because of less rehandling volume.

The following chart lists the proposed CRIS product update release dates, the proposed mandatory use dates, and the period covered by each update.

The implementation of the revised schedule will begin no sooner than December 20, 1992, the next effective date of the Domestic Mail Manual (DMM).

PROPOSED UPDATE SCHEDULE
[CRIS Product]

Release date	Mandatory use date	Period covered
February 15	May 1	February 15 to June 30 (4½ months).
April 15	July 1	April 15 to August 31 (4½ months).
June 15	September 1	June 15 to October 31 (4½ months).
August 15	November 1	August 15 to December 31 (4½ months).
October 15	January 1	October 15 to February 28 (4½ months).
December 15	March 1	December 15 to April 30 (4½ months).

Although exempt from the notice and comment requirements of the Administrative Procedure Act (5 U.S.C. 553(b), (c)) regarding proposed rulemaking by 39 U.S.C. 410(a), the Postal Service invites public comment on the following proposed amendments to the Domestic Mail Manual (DMM), which is incorporated by reference in the Code of Federal Regulations. See 39 CFR 111.1.

List of Subjects in 39 CFR Part 111

Postal service.

PART 111—[AMENDED]

1. The authority citation in 39 CFR part 111 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 101, 401, 403, 404, 3001–3011, 3201–3219, 3403–3406, 3621, 5001.

PART 122—DELIVERY ADDRESS

2. In 122.441, Delivery Statistics File, change the fifth sentence to read: "The information is updated monthly via transaction files and can be ordered either with a single base file in the initial shipment or with a base file furnished bimonthly."

PART 323—PRESORTED AND CARRIER ROUTE FIRST-CLASS MAIL

3. In 323.2, Carrier Route First-Class Mail, revise the sixth sentence to read as follows: "Mailers must incorporate Carrier Route Information System (CRIS) changes in their mailings within 75 days of each effective date of the bimonthly updates, which are February 15, April 15, June 15, August 15, October 15, December 15."

PART 424—ADDITIONAL ELIGIBILITY REQUIREMENTS FOR SPECIFIC [SECOND CLASS] RATES

424.7 Walk-Sequence Rates

4. In 424.773, DSF, change the first sentence to read: "The Delivery Sequence File (DSF) is updated bimonthly."

424.8 Additional Requirements for Presort Rates

5. In 424.832, Proper Makeup, change the first sentence to read: "Mailers are responsible for makeup of mail to carrier routes according to the information published bimonthly in the Carrier Route Information System (CRIS)." Change the second sentence to read: "Mailers must incorporate Carrier Route Information System (CRIS) changes in their mailings within 75 days of the effective date of the bimonthly updates, which are February 15, April 15, June 15, August 15, October 15, December 15."

PART 531—CODING ACCURACY SUPPORT SYSTEM (CASS) CERTIFICATION [AUTOMATION-COMPATIBLE MAIL]

6. Change 531.14, Use of Current Information, to read: "When used for ZIP+4 coding or ZIP+4 barcoding, the ZIP+4 matching software and methods described in 531.11 through 531.13 must have a valid CASS certification. The matching software must use the current Postal Service ZIP+4 file that includes all applicable monthly or bimonthly change transaction files.".

7. Change 535.1a, ZIP+4 Database Product Description, to read: "ZIP+4 Database Tape and Bimonthly Cumulative Updates, which contain a master copy of the ZIP+4 database plus bimonthly updates of all additions, changes, or deletions that occurred within the database since the last release date.".

PART 624—PREPARATION OF SPECIFIC [THIRD-CLASS] BULK RATES

624.3 Eligibility for Carrier Route Presort Rate

8. In 624.361, Proper Makeup, change the first and second sentences to read: "Mailers are responsible for makeup of mail to carrier routes according to the information published bimonthly in the Carrier Route Information System (CRIS). Mailers must incorporate Carrier Route Information System (CRIS) changes in their mailings within 75 days of the bimonthly updates, which are February 15, April 15, June 15, August 15, October 15, December 15.".

9. In 624.362(b), change the heading to read as follows: "CRIS Hard-Copy (Paper) Bimonthly Updates and Monthly Scheme Changes.". Change the last sentence to read as follows: "Customers requesting updates to bimonthly Carrier Route Information System (CRIS) scheme information are provided updates on a complete zone-by-zone basis each month.".

10. In 624.362(c), change the heading to read as follows: "CRIS Bimonthly Updates and Monthly Scheme Microfiche Changes.". Change the last sentence to read as follows: "Customers requesting updates to bimonthly Carrier Route Information System (CRIS) scheme information are provided entire new sets to fiche each month that include all the monthly updates.".

11. In 624.362(d), change the heading to read as follows: "CRIS Bimonthly Updates and Monthly Scheme Tape Changes.".

12. In 624.362(f), Other Methods, change the third and fourth sentences to read as follows: "However, the mailer is responsible for sorting in accordance with the latest bimonthly CRIS scheme provided in 624.362(a) through 624.362(f). The mailer is considered to have made a sorting error only if the mail is not sorted according to the latest bimonthly CRIS scheme.".

624.8 Walk-Sequence Reduction

13. In 624.873, Delivery Sequence Information, change the first sentence to read: "The Delivery Sequence File (DSF) is updated bimonthly.".

PART 763—[FOURTH CLASS] CARRIER ROUTE BOUND PRINTED MATTER

763.2 Current Scheme

14. In 763.222, change the heading to read: "CRIS Hardcopy (Paper) Bimonthly Updates and Monthly Scheme Changes.". Change the last sentence to read: "Customers requesting updates to bimonthly CRIS scheme information are provided updates on a complete zone-by-zone basis each month.".

15. In 763.223, change the heading to read: "CRIS Bimonthly Updates and Monthly Scheme Microfiche Changes.". Change the last sentence to read: "Customers requesting updates to bimonthly scheme information are provided entire new sets of fiche each month that include all monthly updates.".

16. In 763.224, change the heading to read: "CRIS Bimonthly Updates and Monthly Scheme Tape Changes.".

17. In 763.23, Other Methods, change the third sentence to read: "However, the mailer is responsible for sorting in accordance with the latest bimonthly CRIS scheme provided in 624.362.".

An appropriate amendment to 39 CFR 111.3 to reflect these changes will be published if the proposal is adopted.

Stanley F. Mires,

Chief Counsel, Legislative Division.

[FR Doc. 92-30110 Filed 12-10-92; 8:45 am]

BILLING CODE 7710-12-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 36, 61, 64, and 69

[CC Docket Nos. 91-141, 91-213, 92-222, and 80-286; DA 92-1606]

Expanded Interconnection With Local Telephone Company Facilities; Transport Rate Structure and Pricing; Allocation of General Support Facility Costs; Establishment of a Joint Board

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; extension of time.

SUMMARY: The Commission grants in part and denies in part (DA 92-1606) a Motion to Restructure Pleading Cycles by the United States Telephone Association. The revised comment dates spread the burden of the comments and other pleadings in these dockets over a longer, more manageable time frame, while ensuring that all of these proceedings move forward in a timely manner.

DATES: Comments on Allocation of General Support Facility Costs (CC Docket No. 92-222) are due on December 4, 1992, and reply comments are due on December 21, 1992. Comments on Expanded Interconnection—Separations (CC Docket Nos. 92-141 and 80-286) are due on December 21, 1992, and reply

comments are due on January 22, 1993. Comments on Expanded Interconnection—Transport—Phase I (CC Docket No. 91–141) are due on January 14, 1993, and replies are due on February 19, 1993. Comments on Transport Rate Structure and Pricing (CC Docket No. 91–213) are due on February 1, 1993, and reply comments are due on March 9, 1993. Comments on Expanded Interconnection—Transport—Phase II (CC Docket No. 91–141) are due on March 3, 1993, and reply comments are due on April 2, 1993.

ADDRESSES: Parties should send comments and reply comments to the Office of the Secretary, Federal Communications Commission, Washington, DC 20554.

In addition, parties should file two copies of any such pleadings with the Policy and Program Planning Division, Common Carrier Bureau, room 544, 1919 M Street, NW., Washington, DC 20554. Two copies of the comments concerning the separations issues are also to be filed with all CC Docket No. 80–286 Federal-State Joint Board Commissioners, staff members, and other persons listed in Appendix A of Expanded Interconnection with Local Telephone Company Facilities and Amendment of Part 36 of the Commission's Rules and Establishment of a Joint Board, CC Docket Nos. 91–141 and 80–286, FCC 92–441 (released Oct. 16, 1992) (Expanded Interconnection Notice).

FOR FURTHER INFORMATION CONTACT: Douglas L. Slotten (202–653–6975), Linda L. Haller (202–632–1298), or David L. Sieradzki (202–632–1304), Policy & Program Planning Division, Common Carrier Bureau.

SUPPLEMENTARY INFORMATION: The proposed rules originally appeared in the **Federal Register** at Transport Rate Structure and Pricing, 57 FR 54205 (Nov. 17, 1992); Allocation of General Support Facility Costs, 57 FR 54542 (Nov. 19, 1992), and Expanded Interconnection with Local Telephone Company Facilities and Amendment of Part 36 of the Commission's Rules and Establishment of a Joint Board.

1. The United States Telephone Association, Inc. (USTA) has requested that the pleading cycles in the above-captioned proceedings be restructured.[1] USTA proposes no changes in the comment dates in the proceeding on the allocation of general support facility (GSF) costs[2] and the Joint Board proceeding on the separation of expanded interconnection costs.[3] USTA proposes extending the comment dates in the Transport Rate Structure and Pricing proceeding[4] and in Phases I and II of the Expanded Interconnection proceeding.[5] Under USTA's proposal, comments in Phase I of the Expanded Interconnection proceeding would be due on January 8, 1993, and replies would be due on February 9, 1993; and comments in Phase II of the Expanded Interconnection proceeding would be due on February 24, 1993, and replies would be due on March 26, 1993. Comments in the Transport proceeding would be due on March 30, 1993, and replies would be due on May 7, 1993, more than six months after release of the recent order.

2. In support of its request, USTA states that the schedules in these proceedings require a large number of filings, including comments, tariff filings, and petitions for reconsideration, within a short time frame. Given the novelty of the issues and the complexity of the required tasks, USTA argues that a restructured pleading cycle would promote more efficient use of resources by the Commission and the parties, and would not affect the pace of policy implementation. Several parties, including LECs, competitive access providers, and interexchange carriers, filed comments generally supporting USTA's proposal.[6]

3. While we do not routinely grant extensions of time,[7] we believe that USTA has shown good cause for a limited extension of time. There are an extraordinary number of filings due during December and January in these proceedings, as well as possible petitions for reconsideration and activities related to the tariff revisions reflecting the policies we have adopted concerning expanded interconnection and transport. We believe, however, that USTA's proposed comment and reply dates for the Transport proceeding would result in undue delay. Instead, we restructure the pleading cycle in a manner that ensures that both the Expanded Interconnection and Transport proceedings more forward in a timely manner.

4. We therefore adopt the following schedule:

December 4, 1992: Comments on Allocation of GSF Costs (CC Docket No. 92–222) (no change)

December 21, 1992: Reply comments on Allocation of GSF Costs (CC Docket No. 92–222) (no change). Comments to Joint Board on Separation of Expanded Interconnection Costs (CC Docket Nos. 91–141 and 80–286) (no change)

January 14, 1993: Comments on Expanded Interconnection for Switched Transport (Phase I) (CC Docket No. 91–141)

January 22, 1993: Reply comments to Joint Board on Separation of Expanded Interconnection Costs (CC Docket Nos. 91–141 and 80–286) (no change)

February 1, 1993: Comments on Transport Rate Structure and Pricing (CC Docket No. 91–213)

February 19, 1993: Reply comments on Expanded Interconnection for Switched Transport (Phase I) (CC Docket No. 91–141)

March 3, 1993: Comments on Expanded Interconnection—Competitive Switched Access Networks (Phase II) (CC Docket No. 91–141)

March 9, 1993: Reply comments on Transport Rate Structure and Pricing (CC Docket No. 91–213)

April 2, 1993: Reply comments on Expanded Interconnection—Competitive Switched Access Networks (Phase II) (CC Docket No. 91–141)

5. Accordingly, it is *Ordered that* the USTA Motion to Restructure Pleading

---

[1] Motion to Restructure Pleading Cycles by the United States Telephone Association (Nov. 10, 1992).

[2] Expanded Interconnection with Local Telephone Company Facilities and Amendment of the Part 69 Allocation of General Support Facility Costs, Report and Order and Notice of Proposed Rulemaking, CC Docket Nos. 91-141 and 92-222, FCC 92-440 (released Oct. 19, 1992) (Expanded Interconnection Order), ¶¶ 267-69. The comment date on the allocation of GSF is December 4, 1992 and the reply comment date is December 21, 1992.

[3] Expanded Interconnection with Local Telephone Company Facilities and Amendment of Part 36 of the Commission's Rules and Establishment of a Joint Board, CC Docket Nos. 91-141 and 80-286, FCC 92-441 (released Oct. 16, 1992) Expanded Interconnection Notice), ¶¶ 54-55. The comment date on separation of expanded interconnection costs is December 18, 1992, and the reply comment date is January 22, 1993.

[4] Transport Rate Structure and Pricing, Report and Order and Further Notice of Proposed Rulemaking, CC Docket No. 91-213, FCC 92-442 (released Oct. 16, 1992) (Transport Order and Notice). Comments are due on December 18, 1992, and replies are due on January 21, 1993.

[5] Expanded Interconnection Notice, ¶¶ 1-53. Comments on Phase I are due on December 4, 1992 and replies are due on December 21, 1992. Comments on Phase II are due on December 21, 1992, and replies are due on January 22, 1993.

[6] MCI Telecommunications Corp. Comments (Nov. 24, 1992); MFS Communications Co., Inc. Comments (Nov. 24, 1992); *Ex Parte* Letter from Lisa M. Zaina, General Counsel, Organization for the Protection and Advancement of Small Telephone Companies, to James D. Schlichting, Chief, Policy and Program Planning Commission (Nov. 20, 1992); Rochester Comments (Nov. 16, 1992); Sprint Communications Co. Comments (Nov. 20, 1992) (generally supporting USTA proposal but suggesting modifications to schedule that would slightly advance date of Transport comments and slightly postpone date of Transport replies); WilTel, Inc. Comments (Nov. 16, 1992).

[7] 47 CFR 1.46(a).

Cycles is granted to the extent provided herein, and otherwise is denied.*

47 CFR Part 73

[MM Docket No. 92-238, RM-8086]

Radio Broadcasting Services; Amarillo, TX

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition filed by KAEZ-FM, Inc., permittee of Station KAEZ-FM, Channel 289A, Amarillo, Texas, seeking the substitution of Channel 289C3 for Channel 289A at Amarillo, Texas, and the modification of Station KAEZ-FM's license accordingly. Channel 289C3 can be allotted to Amarillo in compliance with the Commission's minimum distance separation requirements and can be used at Station KAEZ-FM's licensed site. The coordinates for Channel 289C3 at Amarillo are North Latitude 35-12-28 and West Longitude 101-51-18. In accordance with § 1.420(g) of the Commission's Rules, we will not accept competing expressions of interest in use of Channel 289C3 at Amarillo or require the petitioner to demonstrate the availability of an additional equivalent class channel for use by such parties.

DATES: Comments must be filed on or before January 4, 1993, and reply comments on or before January 19, 1993.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Eric S. Kravetz, Esq., Brown Nietert & Kaufman, 1920 N Street, NW., suite 660, Washington, DC 20036 (Counsel for petitioner).

FOR FURTHER INFORMATION CONTACT: Pamela Blumenthal, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 92-238, adopted September 28, 1992, and released November 10, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, Downtown Copy Center, (202) 452-1422, 1990 M Street, NW., suite 640 Washington, DC 20036.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Fish and Wildlife Service (Service) proposes to list the tidewater goby (*Eucyclogobius newberryi*) as endangered, as provided by section 4 of the Endangered Species Act of 1973, as amended (Act). The tidewater goby is a fish that occurs in tidal streams associated with coastal wetlands in California. This species has significantly declined throughout its historic range and continues to be threatened by loss and degradation of its coastal habitat. Since 1900, the tidewater goby has disappeared from nearly 50 percent of the coastal lagoons within its historic range, including 74 percent of the lagoons south of Morro Bay. Only three populations currently exist south of Ventura County. The Service seeks comments and data from the public on this proposed rule.

DATES: Comments from all interested parties must be received by February 9, 1993. Public hearing requests must be received by January 25, 1993.

ADDRESSES: Comments and materials concerning this proposal should be sent to Office Supervisor, U.S. Fish and Wildlife Service, Ventura Field Office, 2140 Eastman Avenue, suite 100, Ventura, California 93003 (telephone 805/644–1766). Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Donna C. Brewer, Ventura Field Office (see **ADDRESSES** section).

SUPPLEMENTARY INFORMATION:

Background

The tidewater goby, *Eucyclogobius newberryi* (Girard), is a small fish, rarely exceeding 50 mm (2 inches) standard length, and is characterized by large pectoral fins and a ventral sucker-like disk formed by the complete fusion of the pelvic fins. The tidewater goby was first described as a new species (*Gobius newberryi*) by Girard (1856) from specimens collected in the San Francisco Bay area. Based on Girard's specimens, Gill (1862) reassigned *Gobius newberryi* to the newly described genus *Eucyclogobius* (Eschmeyer 1990).

A member of the family Gobiidae, the tidewater goby is the only species in the genus *Eucyclogobius* and is almost unique among fishes along the U.S. Pacific coast in its restriction to low-salinity waters in California's coastal wetlands. All life stages of tidewater gobies are found at the upper end of lagoons in salinities less than 10 parts per thousand (ppt). Although its closest relatives are marine species, the tidewater goby does not have a marine life history phase. This lack of a marine phase severely restricts the frequency of genetic exchange between coastal lagoon populations and significantly lowers the potential for natural recolonization of a locality once extirpated. Studies by Crabtree (1985) noted that some populations of gobies have differentiated genetically, indicating long isolation. Tidewater gobies have a shorter lifespan, and seem to be an annual species (Swift 1990; Irwin and Stoltz 1984), further restricting their potential to recolonize habitats from which they have been extirpated.

The tidewater goby occurs in shallow water (less than 1 meter (3 ft) deep), on the substrate, in loose aggregations of a few to several hundred individuals (Swift *et al.* 1989). Peak nesting activities commence in late April or early May, when male gobies dig a vertical nesting burrow 10–20 centimeters (4–8 in) deep in clean, coarse sand. Suitable water temperatures for nesting are 18–22 °C with salinities of 5–10 ppt. Male gobies remain in the burrows to guard eggs, which are hung from the ceiling and walls of the burrow until hatching. Larval gobies are found midwater around vegetation until they become benthic (Swift *et al.* 1989). Although the potential for year-round spawning exists, it is probably unlikely, because of seasonal low temperatures and disruptions of lagoons during winter storms. Although usually associated with lagoons, the tidewater goby has been documented in ponded freshwater habitats as far as 8 km (5 miles) upstream from San Antonio lagoon in Santa Barbara County (Irwin and Stoltz 1984).

Currently, the tidewater goby is discontinuously distributed throughout California, ranging from Tillas Slough (mouth of the Smith River), Del Norte County, south to Agua Hedionda Lagoon in San Diego County. Areas of precipitous coastlines that preclude the formation of lagoons at stream mouths

have created three natural gaps in the distribution of the goby. Gobies are apparently absent from three sections of the coast, between: (1) Humboldt Bay and Ten Mile River, (2) Point Arena and Salmon Creek, and (3) Monterey Bay and Arroyo del Oso.

Roughly 10 percent of the coastal lagoons presently containing populations of tidewater goby are under Federal ownership. Over 40 percent of the remaining populations are either wholly or partly owned and managed by the State of California. The remainder are privately owned.

Previous Federal Action

The tidewater goby was first classified by the Service as a category 2 species in 1982 (47 FR 58454). It was reclassified as a category 1 candidate in 1991 (56 FR 58804) based on status and threat information in Swift *et al.* (1989). Category 2 applies to taxa for which information in the possession of the Service indicates that proposing to list as endangered or threatened is possibly appropriate, but for which conclusive data on biological vulnerability and threat are not available to support proposed rules. Category 1 applies to taxa for which the Service has on file substantial information on biological vulnerability and threats to support proposals to list them as endangered or threatened species. On October 24, 1990, the Service received a petition from Dr. Camm Swift, Associate Curator of Fishes at the Los Angeles Museum of Natural History, to list the tidewater goby as endangered (Swift 1990). The Service's finding that this petition presented substantial information that the requested action may be warranted was published on March 22, 1991 (56 FR 12146). Following this finding, the Service initiated a status review on the tidewater goby.

Section 4(b)(3)(B) of the Endangered Species Act (Act), as amended in 1982, requires the Secretary to make a finding within 12 months of the date a petition is received as to whether or not the requested action is warranted. Based on the additional information supplied by Dr. Swift's petition, this proposed rule constitutes the Service's finding that the petitioned action is warranted. The petition, status surveys, and accompanying data describe the goby as imperiled owing to past and continuing wide-ranging losses of coastal and riparian habitats within its historic range.

Summary of Factors Affecting the Species

Section 4 of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to the Federal Lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to the tidewater goby (*Eucyclogobius newberryi*) are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of its Habitat or Range

Coastal development projects that result in the loss of coastal saltmarsh habitat are currently the major factor affecting the tidewater goby. Coastal marsh habitats have been drained and reclaimed for residential and industrial developments, and waterways have been dredged for navigation and harbors, resulting in permanent and direct losses of wetland habitats as well as indirect losses due to associated changes in salinity. Coastal road construction projects have severed the connection between marshes and the ocean, resulting in unnatural temperature and salinity profiles that the tidewater goby cannot tolerate.

Furthermore, upstream water diversions adversely affect the tidewater goby by altering downstream flows, thereby diminishing the extent of marsh habitats that occurred historically at the mouths of most rivers and creeks in California. Alterations of flows upstream of coastal lagoons has already changed the distribution of downstream salinity regimes. Since the tidewater goby has relatively narrow salinity tolerances, changes in salinity distributions due to upstream water diversions may adversely affect both the size and distribution of goby populations (D. Holland, Univ. of Southwestern Louisiana, pers. comm., 1991).

Historically, the tidewater goby occurred in at least 87 of California's coastal lagoons (Swift *et al.* 1989). Since 1900, it has disappeared from approximately 50 percent of formerly occupied lagoons. A rangewide status survey conducted in 1984 found that 22 historic populations of tidewater goby had been extirpated (Swift *et al.* 1989). Only 5 years later, a subsequent status survey documented the disappearance of an additional 21 populations. In the San Francisco Bay area, 9 of 10 previously identified populations have disappeared (Swift *et al.* 1989, 1990). Losses in the southern part of the State have been greatest, including 74 percent of the coastal lagoons south of Morro Bay. Only three populations currently remain south of Ventura County. Since 1989, three additional tidewater goby populations have been lost, in San Luis Obispo and Santa Cruz counties (Swift *et al.* 1989, 1990). Five small populations have been rediscovered since 1984, but the overall losses indicate a decline of 35 percent rangewide in only 6 years (Holland 1991a, 1991b, 1991c; Swift *et al.* 1991).

Of the 43 remaining populations of tidewater gobies identified by Swift *et al.* (1990), most are small and threatened by a variety of both human and natural factors. According to Swift *et al.* (1990), only 6 extant localities contain populations that are considered large enough and free enough from habitat degradation to be safe for the immediate future. These areas are all located north of San Francisco Bay. The remaining lagoons are so small or so modified that tidewater goby populations are restricted in distribution and vulnerable to elimination (Swift *et al.* 1989, 1990). The number of extirpated localities of gobies has left remaining populations so widely separated throughout most of its range that recolonization is unlikely.

Several specific proposed and ongoing coastal development activities threaten habitats supporting tidewater gobies, including (1) road widening and bridge replacement projects along Highway 101, (2) water diversion projects in San Luis Obispo County, (3) expansion of several State Park Recreation areas in Santa Barbara and San Luis Obispo Counties, and (4) hotel and golf course developments in San Luis Obispo and Marin Counties.

In addition to these specific threats, the tidewater goby is vulnerable throughout its remaining range because of the loss of coastal marsh, as noted above and because of other effects of water diversions as well. In addition to restricting the goby's overall range by altering downstream salinities, water diversions and alternations of water flows may negatively impact the species' breeding and foraging activities. Gobies in southern and central California breed primarily in sand/mud substrates and apparently avoid areas that contain large amounts of decaying vegetation (Holland 1991b). Reductions in water flows may allow aggressive plant species to colonize the otherwise bare sand/mud substrates of coastal lagoon margins, thus degrading the habitat quality for the goby. Decreases in stream flows also reduce the deep stream pools utilized by gobies venturing upstream from lagoons. In San Luis Obispo County alone, the effects of drought, either directly or

exacerbated by upstream water diversions, have been responsible for the extirpation of at least three populations of gobies between 1986 and 1990 (K. Worcester, Calif. Dept. Fish Game, pers. comm., 1991).

The tidewater goby is also adversely affected by groundwater overdrafting and discharge of agricultural and sewage effluents. In Santa Barbara, for example, increased groundwater pumpage and siltation from topsoil runoff in the San Antonio Creek drainage has significantly affected areas immediately upstream of occupied goby habitat (i.e., Barka Slough) (C. Swift, Los Angeles County Museum of Natural History, pers. comm., 1991). Swift *et al.* (1989) cite evidence that enrichment by agricultural and sewage effluents may cause algal blooms and deoxygenation that restrict habitable areas of lagoons utilized by tidewater gobies, especially in summer. The potential for these factors to degrade remaining goby habitats has also been noted at all three extant localities south of Ventura County (D. Holland, pers. comm., 1991), and at several sites along the central California coast (T. Taylor, Calif. State Parks and Recreation, pers. comm. 1991; K. Worcester, pers. comm., 1991).

The tidewater goby is further threatened by channelization of the rivers it inhabits. Because most of the goby's localities have been moderately to extremely channelized, winter floods scour the species out of the restricted channelized areas where no protection is afforded from such high flows. This type of event was responsible for the disappearance of gobies from Waddell Creek lagoon in the winter 1972–73 (C. Swift, pers. comm., 1991), and they have not returned.

Finally, cattle grazing and feral pig activities also present a threat to the existence of the tidewater goby. These activities have resulted in increased sedimentation of coastal lagoons and riparian habitats, removal of vegetative cover, increased ambient water temperatures, and elimination of plunge pools and collapsed undercut banks utilized by tidewater gobies. In San Luis Obispo County, increased sedimentation into Morro Bay has significantly accelerated the conversion of wetland habitats to upland (Josselyn *et al.* 1989). Presently, cattle continue to graze freely both upstream and in many of the coastal lagoons supporting tidewater gobies (K. Worcester, pers. comm., 1991).

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

Not known to be applicable.

C. Disease or Predation

Over the past 20 years, at least 60 species of fishes have been introduced to the western states, 59 percent of which are predatory (Hayes and Jennings 1986, Jennings 1988). The introduction of exotic predators to southern California waters has been facilitated by the interbasin transport of water (e.g., California Aqueduct). Introduced predators, particularly centrarchid fishes, may have contributed to the elimination of tidewater gobies from several localities in California (Swift *et al.* 1989). The present-day absence of the tidewater gobies from the San Francisco delta area may well be explained by the presence of introduced predators such as striped bass (*Morone saxatilis*) and native predators including the Sacramento perch (*Archoplites interruptus*) (Swift *et al.* 1989, 1990). Two of the most recent disappearances of gobies from San Luis Obispo County (Old Creek) and San Diego County (San Onofre Creek) are likely due to the presence of largemouth bass (*Micropterus salmoides*) and green sunfish (*Lepomis cyanellus*), respectively. Natural predation on gobies by rainbow trout (*Oncorhynchus mykiss*) has been documented (Swift *et al.* 1989). Other non-native predators, specifically crayfish (*Cambarus spp.*) and mosquitofish (*Gambusia spp.*), may also threaten goby populations through direct predation on adults, larvae, or eggs.

D. The Inadequacy of Existing Regulatory Mechanisms

Section 10 of the Rivers and Harbors Act and section 404 of the Clean Water Act regulate the placement of dredge and fill materials into waters of the United States. Under section 404, nationwide permits, which undergo minimal public and agency review, can be issued for projects involving less than 10 acres of waters of the United States and adjacent wetlands, unless a listed species may be adversely affected. Individual permits, which are subject to more extensive review, are required for projects that affect greater than 10 acres.

The U.S. Army Corps of Engineers (Corps) is the agency responsible for administering the section 10 and section 404 programs. The Service, as part of the section 404 review process, provides comments on both pre-discharge notices for nationwide permits and public notices for individual permits. The Service's comments are only advisory, although procedures exist for elevation when disagreements between the agencies arise. In practice, the Corps' actions under section 10 and section 404 are insufficient to protect the tidewater goby.

Most projects within the range of the tidewater goby may require approval from the Corps as currently described in section 404 of the Clean Water Act. Projects proposed in coastal lagoons may also require a permit under section 10 of the Rivers and Harbors Act. Federal listing of this species would ensure greater consideration of the effects of permitted actions during the review process as well as provide the protections of section 7 of the Endangered Species Act.

The National Environmental Policy Act (NEPA) and California Environmental Quality Act (CEQA) require an intensive environmental review of projects that may adversely affect Federal candidate species. However, project proponents are not required to avoid impacts to this species, and proposed mitigation measures are frequently not adequately implemented. As with section 404 permits, the Service's comments through these environmental review processes are only advisory.

The California Coastal Act (CCA) regulates the approval of developments within the coastal zone. The continued loss and degradation of coastal wetlands since the CCA was enacted in 1974 attests to the limitations of this legislation, although a significant slowing in wetland losses has occurred.

E. Other Natural or Manmade Factors Affecting its Continued Existence

By far, the most significant natural factor adversely affecting the tidewater goby is drought, and resultant deterioration of coastal and riparian habitats. California has recently experienced 5 consecutive years of lower than average rainfall. These drought conditions, when combined with human induced water reductions (i.e., diversions of water from streams, excessive groundwater withdrawals) have degraded coastal and riparian ecosystems and have created extremely stressful conditions for most aquatic species. Formerly large populations of tidewater gobies have declined in numbers owing to reduced availability of suitable lagoon habitats (i.e., San Simeon Creek, Pico Creek), others disappeared owing to lack of water when the lagoons dried (i.e., Santa Rosa Creek). In San Luis Obispo County alone, 6 of 20 populations of tidewater gobies were extirpated between 1984 and 1989 owing to drought coupled with water diversions and pollution (K. Worcester, pers. comm., 1991).

Habitat degradation and losses of the tidewater goby from weather-related

natural phenomena commonly occur, due to the restriction of the species to coastal lagoon systems and its dependence on freshwater inflows. Events such as river flooding and heavy rainfall have been reported to destroy goby burrows and wash gobies out to sea. Storm surges that enter a lagoon may also adversely affect entire goby populations by rapidly changing salinity.

The tidewater goby was undoubtedly subjected to such natural flood events even before major human alteration of drainage basins. As mentioned under Factor A, channelization and urbanization have increased the frequency and perhaps the intensity of such flood events. In addition, populations of gobies are becoming more isolated from one another as intervening populations are extirpated, thus further decreasing the likelihood of successfully colonizing and reestablishing a population lost to a "natural" flood.

Competition with introduced species is a potential threat to the tidewater goby. Although problems have not been documented so far, the spread of two introduced oriental gobies (the yellowfin goby, *Acanthogobius flavimanus*, and chameleon goby, *Tridentiger trigonocephalus*) may have a detrimental effect on the tidewater goby. According to Swift *et al.* (1990), the chameleon goby was recently found in Pyramid Lake, probably imported with central California water. If this goby becomes established in the Santa Clara River as other imported species have (e.g., *Cottus asper*), the tidewater goby population at the mouth of the Santa Clara River may be at risk.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to propose this rule. The tidewater goby has been extirpated from nearly 50 percent of the lagoons within its historic range, including 74 percent of the lagoons south of Morro Bay. Forty-three populations remain; however, only 6 are large in number and reasonably free from immediate threats. Based on this evaluation, the preferred action is to list the tidewater goby as endangered. The tidewater goby has experienced substantial declines throughout its historic range, lives within specific habitat zones that have been, and will continue to be targeted for development and suffer degradation by human activities, and are extremely vulnerable to adverse habitat modification and to water quality changes. The tidewater goby is imminent danger of extinction throughout its range and requires the full protection of listing as endangered under the Act in order to survive. For the reasons discussed below, critical habitat is not being proposed at this time.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that, to the maximum extent prudent and determinable, the Secretary designate critical habitat concurrently with determining a species to be endangered or threatened. Furthermore, the Service is to designate critical habitat on the basis of the best scientific and commercial data available after taking into consideration the economic, and other relevant impacts of specifying an area as critical habitat (16 U.S.C. 1533(b)(2)). In the case of the tidewater goby, critical habitat is not presently determinable. A final designation of critical habitat requires detailed information on the possible economic effects of such a designation. The Service does not currently have sufficient information needed to perform the economic analysis. A delay in the proposed listing of the species in order to gather additional information and perform analyses would not serve the needs of the species. The Service will continue to gather information on this species, and will publish a determination on the designation of critical habitat at a later date.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain activities. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibitions against taking and harm are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act as codified at 50 CFR part 402. Section 7(a)(4) of the Act requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to insure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service.

A number of Federal agencies or departments control lands that support the tidewater goby. These agencies include the Department of Defense (U.S. Army Corps of Engineers, U.S. Navy, U.S. Air Force, and U.S. Marine Corps) and Department of the Interior (National Park Service and U.S. Fish and Wildlife Service). Federal actions that may be affected by this proposal would be the funding or authorization of projects within the species' habitat, including the construction of roads, bridges, and dredging projects subject to section 404 of the Clean Water Act (33 U.S.C. 1344 *et seq*) and section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 401 *et seq.*), and special use permits. Other Federal actions that are subject to environmental review under the National Environmental Policy Act would also require consultation with the Service. Projects on federally owned land would also be subject to the provisions of section 7 of the Endangered Species Act.

The Act and implementing regulations found at 50 CFR 17.21 set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. These prohibitions, in part, would make it illegal for any person subject to the jurisdiction of the United States to take (includes harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect; or attempt any of these), import or export, transport in interstate or foreign commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

The Act and 50 CFR 17.22 and 17.23 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered wildlife species under certain circumstances. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, for incidental

take in connection with otherwise lawful activities, and for economic hardship under certain circumstances. Requests for copies of the regulations on listed plants and wildlife and inquiries regarding them may be addressed to the Office of Management Authority, U.S. Fish and Wildlife Service, Room 432, 4401 North Fairfax Drive, Arlington, Virginia 22203–3507 (703/358–2104).

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning this proposed rule are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to this species:

(2) The location of any additional populations of this species and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range, distribution, and population size of this species; and

(4) Current or planned activities in the subject area and their possible impacts on this species.

Any final decision on this proposal will take into consideration the comments and any additional information received by the Service, and such communications may lead to a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be received within 45 days of the date of publication of the proposal. Such requests must be made in writing and addressed to the Office Supervisor at the Ventura Field Office (see **ADDRESSES** section).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Proposed Regulation Promulgation

PART 17—[AMENDED]

Accordingly, it is hereby proposed to amend part 17, subchapter B of chapter I, Title 50 of the Code of Federal Regulations, as set forth below:

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361-1407; 16 U.S.C. 1531-1544; 16 U.S.C. 4201-4245; Public Law 99-625, 100 Stat. 3500; unless otherwise noted.

2. It is proposed to amend § 17.11(h) by adding the following, in alphabetical order under Fishes to the List of Endangered and Threatened Wildlife:

§ 17.12 Endangered and threatened wildlife.

Endangered and Threatened Wildlife and Plants; Proposal To List the Relict Darter and Bluemask (=Jewel) Darters as Endangered Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The U.S. Fish and Wildlife Service (Service) proposes to list the relict darter (*Etheostoma chienense* and bluemask (=jewel) darter (*Etheostoma (Doration)* sp.) as endangered under the Endangered Species Act of 1973, as amended (Act). The relict darter, which is endemic to the Bayou du Chien drainage in western Kentucky, has been collected from only five sites within this drainage and is known to spawn in only one Bayou du Chien tributary. The relict darter has been and continues to be impacted by poor water quality and habitat deterioration resulting from stream channelization, siltation caused by poor land use practices, and by other water pollutants. The bluemask darter is endemic to the Caney Fork River system (above Great Falls), Cumberland River

basin, in central Tennessee. Based on historic records, the species was known from five rivers in the Caney Fork River system. The bluemask darter is now known from four stream reaches. Its distribution has been reduced by such factors as impoundments, water withdrawal, and the general deterioration of water quality resulting from siltation and other pollutants contributed by coal mining, gravel mining, poor land use practices, and waste discharges. These factors continue to impact the species and its habitat. Comments and information are sought from the public on this proposal.

DATES: Comments from all interested parties must be received by February 9, 1993. Public hearing requests must be received by January 25, 1993.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Field Supervisor, U.S. Fish and Wildlife Service, Asheville Field Office, 330 Ridgefield Court, Asheville, North Carolina 28806 (704/665–1195). Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: For further information on this proposed rule, please contact Mr. Richard G. Biggins at the above address.

SUPPLEMENTARY INFORMATION:

Background

Relict Darter

The relict darter is endemic to the Bayou du Chien watershed in extreme western Kentucky. Recently this darter, which is one of 10 recognized species in the *Etheostoma squamiceps* complex of the subgenus *Catonotus*, was formally described by Page *et al.* (1992). It is a small (2½-inch) fish. Females and nonbreeding males have light tan colored backs and sides, with brown mottling and six to eight dark brown saddles. They have white unmarked undersides. Breeding males have gray to dark brown sides and backs and light tan undersides.

Warren and Burr (1991) reviewed all known recent and historical literature regarding the relict darter and surveyed known collection sites and potential habitat within the Bayou du Chien watershed. They reviewed fish collection records from adjacent watersheds and also surveyed these areas for the relict darter. They speculated that the fish was once more widespread in the Bayou du Chien system. However, based on historic and current records, they reported that the fish has only been documented from nine sites in Graves and Hickman Counties, Kentucky; only one spawning site is known.

The relict darter's distribution has apparently been reduced by such factors as channelization and the general deterioration of water and habitat quality resulting from siltation and other pollutants contributed by poor land use practices and by waste discharges. These factors continue to impact the species and its habitat. Because the species presently inhabits only limited areas and is known to spawn in only one small tributary, it is very vulnerable to extirpation from toxic chemical spills. Additionally, because of its small population size, the species' long-term genetic viability is questionable.

On October 29, 1991, the Service notified by mail (22 letters) potentially affected Federal and State agencies, and local governments, as well as interested individuals, that a status review of the relict darter was being conducted. Three comments were received as a result of this notification. The Tennessee Valley Authority and the Kentucky State Nature Preserves Commission supported the species' potential Federal protection and the Kentucky Department of Fish and Wildlife Resources provided information on fish collections in the watershed. No objections to the potential listing of the relict darter were received.

The relict darter does not appear in the Service's notice of review for animal candidates published in the **Federal Register** of November 21, 1991 (56 FR 58804–58836). However, a status survey completed in late 1991 indicated the species is facing significant threats and is in need of protection under the Act. Based on this information, the Service's Acting Assistant Director on April 29, 1992, approved elevating the relict darter to a category 1, priority 2 (based on a priority scale of 1 to 12) candidate. A category 1 species is a species for which the Service has sufficient information to propose for protection under the Act. The listing priority scale is fully explained in a notice covering the Service's listing and recovery priority guidelines that was published in the **Federal Register** of September 21, 1983 (48 FR 43098).

Bluemask Darter

Although formal description of the bluemask darter (*Etheostoma* (*Doration*) sp.) is not expected before early 1993, species distinctiveness is affirmed by the morphological and allozymic comparison of the characteristics of this species with those of other darters of the same subgenus (Steven Layman, University of Alabama, personal communication, 1992). The bluemask darter is a small (1¾-inch) fish, closely related to *E. stigmaeum*. Breeding males are nearly covered by a bright blue color. Females and nonbreeding males are not as brightly colored. They have six dark saddle-like markings across the back and seven to eight lateral blotches. The species inhabits areas of slow to moderate current over sand and fine gravel, a habitat type that is very limited in some of the occupied streams.

The bluemask darter is endemic to the Caney Fork River system (above Great Falls), Cumberland River basin, in central Tennessee. Based on current and historic records reviewed by Layman (1991), the species has been collected from five rivers in the Caney Fork River system—Upper Caney Fork River, Collins River, Rocky River, Calfkiller River, and Cane Creek in Grundy, Warren, Van Buren, and White Counties.

A 1991 fish survey (Layman 1991) of the Caney Fork River system above and below Great Falls revealed that the species is now restricted to isolated populations in reaches of four rivers in the Caney Fork River system—Cane Creek, Van Buren County: Collins River, Warren and Grundy Counties; Rocky River, Van Buren County; and Upper Caney Fork River, White County.

The bluemask darter has been impacted by such factors as impoundments, water withdrawals, and the general deterioration of water and substrate quality resulting from siltation and other pollutants contributed by coal mining, gravel mining, poor land use practices, water withdrawal, and waste discharges. These factors continue to impact the species and its habitat.

In the **Federal Register** (56 FR 58804–58836) of November 21, 1991, the Service listed the bluemask darter as a category 2 species. A category 2 species is one that is being considered for possible addition to the Federal List of Endangered and Threatened Wildlife and Plants, but for which there is insufficient information to proceed with a listing proposal. Based on more recent status information, this species was approved by the Service's Acting Assistant Director on April 29, 1992, as a category 1, priority 2 candidate.

On February 28, 1992, the Service notified by mail (40 letters) potentially affected Federal and State agencies and local governments, as well as interested individuals, that a status review of the bluemask darter was being conducted. Three agencies responded. The Tennessee Wildlife Resources Agency said it would help protect the darter during the status review period and

would continue this protection if it were listed. The U.S. Soil Conservation Service and the Department of the Air Force responded to the bluemask darter notification letter but did not take a position on the potential listing. No objections to the potential listing of the bluemask darter were received.

Summary of Factors Affecting the Species

Section 4(a)(1) of the Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to the Federal lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to the relict darter and the bluemask darter are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of its Habitat or Range

The relict darter is endemic to the Bayou du Chien system in extreme western Kentucky (Warren and Burr 1991). Webb and Sisk (1975) indicated that this darter was "fairly common" in the high gradient reaches of Bayou du Chien in the early 1970s. Warren and Burr (1991) speculated that in presettlement times the species was likely more widespread within the Bayou du Chien watershed in areas upstream of the Mississippi floodplain (upstream of Moscow, Kentucky).

Warren and Burr (1991) surveyed the system in 1991 and collected the species of five sites but found it abundant at only two sites (18 were collected at one site and 46 at another). The other three sites yielded a total of only eight relict darters. They and other researchers have only been able to locate one spawning area in a small tributary stream located in Graves County.

Adult relict darters are concentrated in headwater areas in slow-flowing pools, usually associated with gravel, sand, and leaf litter substrates near fallen tree branches, undercut banks, or overhanging streambank vegetation (Warren and Burr 1991). Warren and Burr (1991) noted that the Bayou du Chien system has been extensively channelized. Much of the streams' sinuosity was eliminated, undercut banks were lost, streambank vegetation and instream cover were removed, and some smaller streams now flow only intermittently. This massive alteration of the relict darter's habitat reduced both relict darter numbers and the amount of suitable habitat. Aside from past channelization impacts, the area is extensively farmed, and much of the watershed has been deforested. These alterations result in a fairly high silt load within the Bayou du Chien system that continues to degrade the habitat and further impacts the species.

The bluemask darter has only been collected from the Caney Fork River system (above Great Falls), Cumberland River basin, in central Tennessee. Layman (1991) reviewed historic collection records and reported that the species has been collected from five rivers in the Caney Fork River system—Upper Caney Fork River, Collins River, Rocky River, Calfkiller River, and Cane Creek in Grundy, Warren, Van Buren, and White Counties. Historic fish collection records are sparse for this area. However, considering the extent of the fish's preferred habitat (slow to moderate current areas with sand and fine gravel substrates (Layman 1991)), which was inundated by Great Falls Reservoir in the 1910s, the species was once likely more widely distributed within this portion of the Caney Fork system than available records indicate. The belief that the species has undergone a range reduction is also supported by Starnes and Etnier (1980).

In 1991 Layman (1991) surveyed the Caney Fork River system above and below Great Falls. He found the fish restricted to isolated populations in short reaches of four rivers in the Caney Fork River system—Cane Creek, Van Buren County; Collins River, Warren and Grundy Counties; Rocky River, Van Buren County; and upper Caney Fork River, White County. Layman (1991) estimated that the bluemask darter currently inhabits about 500 feet of Cane Creek, 25 miles of the Collins River, 2 miles of the Rocky River, and 2.5 miles of the upper Caney Fork River.

The species was historically taken from two sites in the Calfkiller River, White County. However, Layman (1991) made collections at both of these historic collection sites and four other Calfkiller River sites, but no specimens were taken. It is believed that the species has now been extirpated from this river. The fish was also not taken (Layman 1991) in collections made in other Caney Fork tributaries—Barrens Fork River, Falling Water River, Charles Creek, Laurel Creek, Hickory Creek, Town Creek, and Mountain Creek.

The bluemask darter's distribution has been reduced by such factors as impoundments, water withdrawal, and the general deterioration of water quality resulting from siltation and other pollutants contributed by coal mining, gravel mining, poor land use practices, water withdrawal, and waste discharges. These factors continue to impact the species and its habitat.

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

The specific areas inhabited by both fish are presently unknown to the general public, and until this proposal is published the public will be unaware of the presence of these rare fish in the Bayou du Chien and the Caney Fork River watersheds. As a result, take of these fish by the general public has not been a problem. However, both fish exist in very small, restricted areas; and the relict darter is known to spawn in only one short stream reach. If the specific inhabited stream reaches become public knowledge through critical habitat designation during the sometimes controversial listing process, it would be extremely easy for vandals to seriously impact the species. Although scientific collecting is not presently identified as a threat, take by private and institutional collectors could pose a threat if specific inhabited locations are revealed. Federal protection could help to minimize the negative impact of illegal or inappropriate take.

C. Disease or Predation

Although the relict and bluemask darters are undoubtedly consumed by predators, there is no evidence that predation is a threat to the species.

D. The Inadequacy of Existing Regulatory Mechanisms

The States of Kentucky and Tennessee prohibit taking fish and wildlife for scientific purposes without a State collecting permit. These permits provide some protection for these fish. However, the species are generally not protected from other threats. Federal listing will provide additional protection for the species under the Act by requiring Federal permits to take the species and by requiring Federal agencies to consult with the Service when projects they fund, authorize, or carry out may adversely affect them.

E. Other Natural or Manmade Factors Affecting its Continued Existence

Because the existing relict and bluemask darter populations inhabit only short stream reaches, they are vulnerable to extirpation from accidental toxic chemical spills. This is especially true of the only known relict darter spawning site, which is close to a railroad line. Additionally, because the relict darter population has been drastically reduced in size, the species'

long-term genetic viability is questionable.

All bluemask darter populations are now isolated by the Great Falls Reservoir. As the populations in Cane Creek and the Upper Caney Fork are extremely small, and as the reservoir restricts gene flow among populations, the long-term genetic viability of these populations is questionable.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by both fish in determining to propose these rules. Based on these evaluations, the preferred action is to propose the relict darter and bluemask darter for Federal protection. The relict darter is now known from only five sites in the Bayou du Chien system in western Kentucky. The bluemask darter is currently known from only four streams in the Caney Fork River system in central Tennessee. These fish and their habitat have been and continue to be impacted by habitat destruction and range reduction. Their limited distribution also makes them very vulnerable to toxic chemical spills. Because of their restricted distributions and their vulnerability to extinction, endangered status appears to be the most appropriate classification for these species. (See "Critical Habitat" section for a discussion of why critical habitat is not being proposed for these fish.)

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that, to the maximum extent prudent and determinable, the Secretary propose critical habitat at the time the species is proposed to be endangered or threatened. The Service's regulations (50 CFR 424.12(a)(1)) state that designation of critical habitat is not prudent when one or both of the following situations exist: (1) The species is threatened by taking or other activity and the identification of critical habitat can be expected to increase the degree of threat to the species or (2) such designation of critical habitat would not be beneficial to the species. The Service finds that designation of critical habitat is not presently prudent for these species. Such a determination would result in no known benefit to these species, and designation of critical habitat could further threaten these two species.

Section 7(a)(2) and regulations codified at 50 CFR part 402 require Federal agencies to ensure, in consultation with and with the assistance of the Service, that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of listed species or destroy or adversely modify their critical habitat, if designated. Section 7(a)(4) requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in the destruction or adverse modification of proposed critical habitat. (See "Available Conservation Measures" section for a further discussion of section 7.) As part of the development of this proposed rule, Federal and State agencies were notified of the fishes' general distribution, and they were requested to provide data on proposed Federal actions that might adversely affect the two species. No specific projects were identified. Should any future projects be proposed in areas inhabited by these fish, the involved Federal agency will already have the general distributional data needed to determine if the species may be impacted by their action; and if needed, more specific distributional information would be provided.

Each of these fish occupies very restricted stream reaches. Thus, as any significant adverse modification or destruction of these species' habitat would likely jeopardize their continued existence, no additional protection for the species would accrue from critical habitat designation that would not also accrue form listing these species. Therefore, when listed, habitat protection for these species will be accomplished through the section 7 jeopardy standard and section 9 prohibitions against take.

In addition, both fish are very rare, and taking for scientific purposes and private collection could pose a threat if specific site information were released. The publication of critical habitat maps in the **Federal Register** and local newspapers and other publicity accompanying critical habitat designation could increase the collection threat and increase the potential for vandalism during the often controversial critical habitat designation process. The locations of populations of these species have consequently been described only in general terms in these proposed rules. Any existing precise locality data would be available to appropriate Federal, State, and local governmental agencies from the Service office described in the "ADDRESSES" section; from the Service's Cookeville Field Office, 446 Neal Street, Cookeville, Tennessee 38501; and from the Kentucky Department of Fish and Wildlife Resources, Kentucky State Nature Preserves Commission, Tennessee Wildlife Resources Agency, and Tennessee Department of Conservation.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibitions against taking and harm are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service.

The Service notified Federal agencies that may have programs affecting these species. No specific proposed Federal actions were identified that would likely affect the species. Federal activities that could occur and impact the species include, but are not listed to, the carrying out or the issuance of permits for reservoir construction, stream alterations, wastewater facility development, pesticide registration, and road and bridge construction. It has been the experience of the Service, however, that nearly all section 7 consultations can be resolved so that the species is protected and the project objectives are met.

The Act and implementing regulations (50 CFR 17.21) set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. These prohibitions, in part,

make it illegal for any person subject to the jurisdiction of the United States to take (includes harass, harm, pursue, hunt, shoot, wound, kill, trap, or collect; or to attempt any of these), import or export, ship in interstate commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving endangered wildlife species under certain circumstances. Regulations governing permits are at 50 CFR 17.22 and 17.23. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in connection with otherwise lawful activities. In some instances, permits may be issued for a specified time to relieve undue economic hardship that would be suffered if such relief were not available. These species are not in trade, and such permit requests are not expected.

Public Comments Solicited

The Service intends that any final action resulting from these proposals will be as accurate and as effective as possible. Therefore, comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning these proposed rules are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to the species;

(2) The location of any additional populations of the species and the reasons why any habitat should or should not be determined to be critical habitat as provided by Section 4 of the Act;

(3) Additional information concerning the range, distribution, and population size of the species; and

(4) Current or planned activities in the subject areas and their possible impacts on the species.

Final promulgation of the regulations on these species will take into consideration the comments and any additional information received by the Service, and such communications may lead to final regulations that differ from these proposals.

The Act provides for a public hearing on this proposal, if requested. Requests must be received within 45 days of the date of publication of these proposals. Such requests must be made in writing and should be addressed to the Field Supervisor (see **ADDRESSES** section of this rule).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Proposed Regulations Promulgation

PART 17—[AMENDED]

Accordingly, it is hereby proposed to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; Pub. L. 99–625, 100 Stat. 3500; unless otherwise noted.

2. It is proposed to amend § 17.11(h) by adding the following, in alphabetical order under FISHES, to the List of Endangered and Threatened Wildlife:

§ 17.11 Endangered and threatened wildlife.

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Notice of Finding on Petition to List Barton Springs Salamander

AGENCY: Fish and Wildlife Service, Interior.

ACTION: 90-day petition finding.

SUMMARY: The Fish and Wildlife Service (Service) announces a 90-day finding for the petition to add the Barton Springs salamander (*Eurycea* sp.) to the List of Endangered and Threatened Wildlife and Plants. The petition has been found to present substantial information indicating that the requested action may be warranted. A status review is initiated.

DATES: The finding announced in this notice was made on November 25, 1992. To be incorporated into the 12-month finding, information should be submitted to the Service by January 11, 1993 (see **ADDRESSES** below). However, the Service will continue to accept information on the status of the Barton Springs salamander at any time

ADDRESSES: Information, comments, or questions concerning this petition should be sent to the State Administrator, Ecological Services Field Office, U.S. Fish and Wildlife Service, 611 East 6th Street, room 407, Austin, Texas 78701. The petition, petition finding, and supporting data are available for public inspection by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Patrick Connor, Fish and Wildlife Biologist, at the above address (Telephone 512/482-5436).

SUPPLEMENTARY INFORMATION:

Background

Section 4(b)(3)(A) of the Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531 *et seq.*), requires that the Service make a finding as to whether a petition to list, delist, or reclassify a species presents substantial scientific or commercial information indicating that the petitioned action may be warranted. To the maximum extent practicable, this finding is to be made within 90 days of receipt of the petition, and the finding is to be published promptly in the **Federal Register**. If the finding is positive, the Service is also required to promptly commence a status review of the species concerned.

On January 22, 1992, the Service received a petition from Dr. Mark Kirkpatrick and Ms. Barbara Mahler to list the Barton Springs salamander (*Eurycea* sp.) as an endangered species. The petition also requested critical habitat be designated. The Kirkpatrick and Mahler document, dated January 22, 1992, clearly identified itself as a petition and contained the names, signatures, affiliations, telephone numbers, and addresses of the petitioners.

This finding is based on various documents, including the petition and sources readily available to the Service. Listing will be evaluated in accordance with the Act's requirements. In accordance with the Administrative Procedure Act (5 U.S.C. 553), the Service will consider the request to designate critical habitat and will review the information provided and otherwise available in its deliberation.

The Barton Springs salamander has been considered a Category 2 candidate species since December 30, 1982, when it first appeared in the Animal Candidate Review for Listing as Endangered or Threatened Species (Animal Notice of Review). Category 2 taxa are considered by the Service as candidates for possible addition to the List of Endangered and Threatened Wildlife, but for which conclusive data on biological vulnerability and threats are not currently available to support proposed rules.

Biological Information

The Barton Springs salamander is a morphologically and genetically distinct, but currently unnamed, species in the genus *Eurycea*. Sweet (1978, 1984) found distinct morphological differences between the Barton Springs salamander and other Texas *Eurycea*, but did not formally describe the salamander as a new species. Recent taxonomic work at the University of Texas, based on morphological and genetic data, clearly separates the Barton Springs salamander from other Texas *Eurycea* [Texas Parks and Wildlife Department (TPWD) 1992]. Based on geographic isolation and morphological and genetic differences, the Barton Springs salamander warrants recognition as a species (TPWD 1989, 1990, 1992, Sweet 1978, 1984, Chippindale, pers. comm., 1992).

The Barton Springs salamander is completely aquatic. Adults average about 2.5 inches in length. The Barton Springs salamander is a neotenic (retains a larval form with external gills throughout its life) salamanders from the Edwards Plateau of Texas.

Population Status

There are inherent difficulties in estimating the population size and range of aquifer-dwelling species, such as the Barton Springs salamander. The subterranean conduits, caverns and cavities where the salamanders are found are inaccessible to humans. Consequently, the abundance of Barton Springs salamander is unknown. Researchers have to rely on observing individuals that reach the surface. During the past 4 years, Barton Springs salamander juveniles have been found at one of the openings of Barton Springs (Andrew Price, Texas Parks and Wildlife Department, pers. comm., 1992, Hillis and Chippindale 1992, providing evidence that the subterranean population is reproductively viable.

The known range of the Barton Springs salamander is the subterranean, water-filled conduits, caverns, and cavities in a segment of the Edwards Aquifer near the Barton Springs, in Zilker Park, Austin, Texas (Sweet 1978, 1984; TPWD 1990, 1992). Hereafter, this aquifer segment will be referred to as the Barton Springs segment. Some individuals reach the surface in springhead areas in Zilker Park. Charles Sexton (City of Austin, *in litt.*, 1992) has reported sightings of adult Barton Springs salamanders during the summers of 1989, 1990, and 1991 in the Barton Springs swimming area. Despite searches for Barton Springs salamander in other springs, including springs in the Barton Springs segment, and in caves reaching the water table, the salamander has not been found outside of its currently recognized ranged (TPWD) 1990).

Until the nearly 1970's, the Barton Springs salamander was commonly observed in aquatic vegetation in the Barton Springs headwaters (Hillis and Chippindale 1992). The abundance of salamanders in this area declined over the next 15 years. The decline can be attributed to maintenance of a vegetation-free area which has: (1) Reduced or eliminated areas where Barton Springs salamander can hide from predators; and (2) adversely affected the Barton Springs salamander's prey, particularly amphipods.

Within the Barton Springs segment, the distribution of Barton Springs salamander is limited by physical, chemical, and biological factors. Physical factors that define the distribution include the water level in the Barton springs segment and size and pattern of water filled openings or pores in the limestone skeleton of the aquifer. Pertinent chemical factors range form the nutrient content necessary to sustain the aquifer community to factors that may adversely affect the community, such as high levels of total dissolved solids or contaminants in toxic amounts. One of the important biological factors is the distribution and availability of prey items (Samuel Sweet, University of California at Santa Barbara, pers. comm., 1992).

Attempts to propagate captive Barton Springs salamander have not succeeded (Andrew Price, pers. comm., 1992). Similarly, attempts to achieve laboratory reproduction in the San Marcos salamander (*Eurycea nana*) have been unsuccessful (Janet Nelson, Southwest Texas State University, pers. comm., 1992).

Threats to Barton Springs Salamander

Barton Springs salamander faces two principal threats: a deterioration of water quality and a decline in aquifer level in the Barton Springs segment. The restricted range of the Barton Springs salamander increases the immediacy of these threats because a single incident (e.g., a pollution event) could impact the entire known population.

Water Quality Threats

The Edwards Aquifer along the Balcones Fault Zone in the Austin Region has been identified as having the highest pollution potential among all the major aquifers in Texas (Texas Water Commission 1989). This is based on a combination of geologic, hydrologic, geomorphologic, and meteorologic factors (Texas Water Commission 1989). Austin, and the surrounding area, is rapidly developing (City of Austin 1988, U.S. Geological Survey 1990). The watershed of the Barton Springs segment is a mosaic of urban, suburban, and rural land uses. Further development in the recharge area and watershed of the Barton Springs segment is likely to increase the levels of pollutants reaching Barton Creek, other creeks serving as recharge paths, and Barton Springs.

Urbanization has already affected surface water quality (USGS 1990). Analyses of surface water has found increased levels of suspended solids, biochemical oxygen demand, total organic carbon, total nitrogen, total phosphorus, and fecal-group bacteria. Fecal-group bacteria contamination at Barton Springs has occurred (USGS 1986). The conveyance and treatment of sewage in the watershed, particularly in the recharge zone, may result in an impaired local water quality. However, other than fecal-group bacteria, the water quality in the Barton Springs segment has been good (USGS 1986).

Potential contaminants of surface water and groundwater are: nutrients (nitrogen and phosphorous compounds), man-made organic contaminants including petroleum-related hydrocarbons, halogenated hydrocarbons, insecticides (organochlorine, organophosphate, carbamates, and pyrethroids), herbicides, and inorganics (such as cadmium, copper, lead, mercury, and zinc). These contaminants are of concern because: (1) They are stored, present, transported, or used in the watershed; (2) they affect acquatic life typically at trace levels; and (3) some contaminants may be present in pulses that are missed by periodic or regular contaminant sampling.

Barton Springs salamanders feed on amphipods and other similarly sized invertebrates inhabiting the Barton Springs segment of the Edwards Aquifer (Hillis and Chippindale 1992). Crustaceans, particularly amphipods, are sensitive to several organic chemicals (Fish and Wildlife Service 1986).

The Environmental Protection Agency has developed acute and chronic toxicity criteria for freshwater aquatic life for a number of contaminants (U.S. Environmental Protection Agency 1986). Data published by the U.S. Geological Services (USGS) (1986, 1990) indicate that some samples of water from streams in the Austin area, and groundwater in the Barton Springs segment, approach or exceed acute and/or chronic criteria for freshwater aquatic life. These contaminants include dissolved cadmium, copper, lead, mercury, and zinc.

Although the percentage of water samples that exceed these criteria for any particular contaminant has been small, contaminants may be present at values and durations capable of impacting Barton Springs salamander and/or its prey base. The availability/toxicity of these metals is decreased in water with high values of hardness and Barton Springs water is considered to be very hard, with a hardness greater than 180 mg/l as $CaCO_3$. However, these metals may be more toxic when they occur in mixtures and with certain organics, such as ammonia. Additionally, the levels of detection used by USGS (1990) appear to be higher than the chronic lead and mercury toxicity criteria for freshwater aquatic life.

Threat From Decline in Aquifer Level

Reduced water levels in the Barton Springs segment would adversely impact the Barton Springs salamander by causing direct loss of habitat. Ground water pumping in the area is expected to increase due to further urbanization of the outlying areas of Austin. Currently, the amount of water discharged from the Barton Springs segment (both through pumping and springflow) is roughly equal to recharge (BS/EACD 1990). Aquifer water levels rise and decline in relation to rainfall. Artificial recharge enhancement in Onion Creek is being studied (BS/EACD 1990). Since aquifer water levels respond rapidly to differences between recharge and discharge, a combination of intense pumping and drought would result in reduced flows from Barton Springs. Barton Springs has always been recorded as flowing and one of the Barton Springs/Edwards Aquifer Conservation District's (BS/EACD) goals is to assure Barton Springs springflow "does not fall appreciably below historic low levels" (BS/EACD 1990). For this purpose, BS/EACD has developed a drought contingency plan.

Additional ground water pumping may exceed the resources of the Barton Springs segment and result in a change from the "existing dynamic equilibrium" to declining ground water levels and a decrease in (or cessation of) discharge at Barton Springs (USGS 1986). Barton Spring's long-term mean discharge is about 50 cubic feet per second (cfs), with a recorded minimum discharge of 10 cfs (USGS 1986). In 1982, estimated pumping from the Barton Springs segment was about 5 cfs (USGS 1986). Water well production in the higher elevations of the Barton Springs segment has been limited during periods of lower aquifer levels in recent years (Bill Couch, Barton

Springs/Edwards Aquifer Conservation District, pers. comm., 1992).

When aquifer levels are low, the potential exists for the movement of water with high levels of total dissolved solids from a "bad-water" zone to the freshwater zone of the Barton Springs segment, including Barton Springs (USGS 1986). The "bad-water" zone is an area of groundwater with total dissolved solids greater than 1000 mg/l. The "bad-water" zone occurs along the eastern boundary of the Barton Springs segment. The higher concentration of dissolved solids that would result from an encroachment of "bad-water" would likely adversely affect wildlife found in the aquifer supplying Barton Springs. The potential for "bad-water" encroachment is increased with pumping of the aquifer and extended low recharge or low flow conditions (USGS 1986). Under low flow conditions, Barton Springs, and a well near the "bad-water" line (YD–58–50–216), show increased dissolved solid concentrations, particularly sodium and chloride, indicating encroachment from the "bad-water" zone (USGS 1986).

After a review of the petition, the references cited, and information otherwise available to the Service, the Service found that the petition presented substantial information indicating that listing the Barton Springs salamander (*Eurycea* sp.) may be warranted. The Service will consider the request for designation of critical habitat. If the Service determines designation of critical habitat is prudent and determinable, it will be included if a proposed rule is published.

This finding initiates a status review for the Barton Springs salamander as required under section (4)(b)(3)(A) of the Act. The Service would appreciate any additional data, information, or comments from the public, government agencies, the scientific community, industry, or any other interested party concerning the status of the Barton Springs salamander.

BILLING CODE 4310–55–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 649

[Docket No. 921106–2306]

American Lobster Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Proposed rule.

SUMMARY: NMFS proposes to amend the regulations implementing Amendment 3 to the American Lobster Fishery Management Plan (FMP). This rule would modify the language of the existing regulations to allow lobster traps not constructed entirely of wood to contain a ghost panel with a specified degradable door fastener. The intent is to provide codified regulations to replace an interim action that is effective only through July 1, 1993.

DATES: Comments on the proposed rule must be received on or before January 11, 1993.

ADDRESSES: Comments on the proposed rule should be sent to Richard B. Roe, Regional Director, National Marine Fisheries Service, Northeast Regional Office, One Blackburn Drive, Gloucester, MA 01930. Mark the outside of the envelope "Comments on the Lobster Regulations." Copies of Amendment 3, which contains an environmental assessment and the regulatory impact review, are available from Douglas G. Marshall, Executive Director, New England Fishery Management Council, Suntaug Office Park, 5 Broadway (U.S. Rt. 1), Saugus, Massachusetts 01906.

FOR FURTHER INFORMATION CONTACT: Paul H. Jones (Resource Policy Analyst, Northeast Region, NMFS), 508–281–9273.

SUPPLEMENTARY INFORMATION: The American Lobster Fishery is managed under the FMP prepared by the New England Fishery Management Council (Council) and its implementing regulations at 50 CFR part 649 under the authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act). Regulations implementing the FMP require that lobster traps contain a ghost panel to allow for the escapement of lobster after

a trap has been abandoned or lost. Section 649.21(d)(1)(iii), allows the use of the door of the lobster trap to serve as the ghost panel if fastened with a degradable material described in § 649.21(d)(1)(ii); and § 649.21(d)(2) provides the Director, Northeast Region, NMFS (Regional Director) with the authority to approve alternative designs and/or materials, at the request of, or after consultation with, the Council's Lobster Oversight Committee (Committee).

At the April 23, 1992, Committee meeting, alternatives to this ghost panel specification were discussed and the Committee agreed to request that the Regional Director approve the use of a bungee cord attachment in those instances when the bungee cord is attached with material approved under § 649.21(d)(1)(ii). At its May 20–21, 1992, meeting, the Council endorsed the Committee recommendation.

After consideration of the comments from the Committee, the Regional Director determined that the Council's recommendation was consistent with § 649.21(d)(1)(iii) and the intent of the requirement and published a notice in the **Federal Register** on July 10, 1992 (57 FR 30684), effective through July 1, 1993, approving use of this fastening alternative to the ghost panel regulations. This proposed action is necessary to codify the fastening alternative before July 1, 1993. This alternative would allow lobster fishermen to comply with the degradable escape panel requirements and allow escapement of lobster after a trap has been abandoned or lost.

Classification

The Regional Director has initially determined that this rule is necessary for the conservation and management of the American lobster fishery and is consistent with the Magnuson Act and with other applicable law.

The Regional Director has determined that this rule is consistent with the FMP and the economic effects of this rule on fishermen are contained within the Regulatory Impact Review (RIR) for Amendment 3. This proposed rule further clarifies the intent of the regulations that implemented Amendment 3. A determination was made for the final rule for Amendment 3 from review of the RIR that the rule was not a major rule under Executive Order 12291.

An Environmental Assessment (EA) was prepared which concluded that the final rule for Amendment 3 will not have a significant impact on the human environment. This rule does not alter the scope or intent of Amendment 3 and the effects of this rule are contained in the EA for Amendment 3. Therefore, this action is categorically excluded from the requirement to prepare an EA by NOAA Administrative Order 216–6.

The General Counsel of the Department of Commerce concluded that this regulation would not have a significant economic impact on a substantial number of small entities.

This rule does not contain a collection-of-information requirement for purposes of the Paperwork Reduction Act.

The Regional Director has determined that this rule would be consistent to the maximum extent practicable with the approved coastal zone programs of Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, and Virginia. The reason for this determination is that this proposed rule agrees with the intent of the final rule for Amendment 3 implementing the ghost panel requirements. Thus, it was not necessary to submit this rulemaking for review by the responsible state agencies under Section 307 of the Coastal Zone Management Act.

This rule does not contain regulatory provisions with federal implications sufficient to warrant preparation of a federalism assessment.

List of Subjects in 50 CFR Part 649

Fisheries.

Dated: December 7, 1992.

William W. Fox, Jr.,

Assistant Administrator for Fisheries National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR Part 649 is proposed to be amended as follows:

PART 649—AMERICAN LOBSTER FISHERY

1. The authority citation for part 649 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 649.21, paragraph (d)(1)(iii) is revised to read as follows:

§ 649.21 Gear identification and marking, escape vent, and ghost panel requirements.

* * * * *

(d) * * *

(1) * * *

(iii) The door of the trap may serve as the ghost panel if fastened with:

(A) A bungee cord that is attached with untreated nonstainless/uncoated ferrous metal not greater than 3/32 inch (0.24 cm) in diameter can serve as the fastener of the trap door. The bungee cord must be attached so that when the untreated material degrades, the door of the trap will pivot open freely; or

(B) A material specified in paragraph (d)(1)(ii) of this section.

* * * * *

50 CFR Part 669

Shallow-water Reef Fish Fishery of Puerto Rico and the U.S. Virgin Islands; Public Hearings

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Public hearings on Amendment 2 to the Fishery Management Plan for the Shallow-water Reef Fish Fishery of Puerto Rico and the U.S. Virgin Islands.

SUMMARY: The Caribbean Fishery Management Council (Council) will hold public hearings and provide a comment period to solicit public input on proposed changes to exiting regulations affecting the shallow-water reef fish fishery contained in Amendment 2 to the Fishery Management Plan for the Shallow-water Reef Fish Fishery of Puerto Rico and the U.S. Virgin Islands (FMP). The proposed actions address continuing and growing concerns by the Council over scarce resources, the need to protect important species when they aggregate for spawning, and the need to extend protection to other reef-associated species not presently in the management unit.

DATES: Written comments must be submitted by January 25, 1993. See **SUPPLEMENTARY INFORMATION** for times and dates of public hearings.

ADDRESSES: Written comments on the proposed actions should be addressed to Miguel A. Rolon, Executive Director, Caribbean Fishery Management Council, Banco de Ponce Building, Suite 1108, Hato Rey, PR 00918. Further details on each meeting and additional documents will be available at Council headquarters. See **SUPPLEMENTARY INFORMATION** for locations of public hearings.

FOR FURTHER INFORMATION CONTACT: Miguel A. Rolon, Caribbean Fishery Management Council, Banco de Ponce Building, Suite 1108, Hato Rey, PR 00918; phone (809) 766–5926.

SUPPLEMENTARY INFORMATION: The FMP for the Shallow-Water Reef Fish Fishery of Puerto Rico and the U.S. Virgin Islands prepared by the Council under the authority of the Magnuson Fishery Conservation and Management Act became effective in September 1985. The FMP established a management program for shallow-water reef fish

resources within the exclusive economic zone (EEZ) of the Council's area of jurisdiction.

The FMP established regulations to rebuild declining reef fish species in the fishery and reduce conflicts among fishermen. It established criteria on mesh size, escape panels and degradable fasteners for the construction of fish traps; required owner identification and marking of gear and boats; prohibited the hauling of or tampering with another person's traps without the owner's written consent; prohibited the use of poisons, drugs, other chemicals and explosives for the taking of reef fish; established a minimum size limit on the harvest of yellowtail snapper and Nassau grouper; and established a spawning season closure of the taking of Nassau grouper.

The measures proposed under Amendment 2 would: Expand the management unit to include the major components of the deep-water reef fish fishery and the marine aquarium trade; restrict the collection of marine aquarium fishes to hand-held dip nets and slurp guns; modify existing fish trap construction characteristics; prohibit the harvest or possession of jewfish in waters around Puerto Rico and the U.S. Virgin Islands; recommend a permitting and reporting system by local governments; close two additional red hind aggregation areas during the December through February spawning season; prohibit the harvest of mutton snapper in a spawning aggregation area off St. Croix, from March through June of each year; establish marine coral reef reserves at strategic locations within the management area; and prohibit the unauthorized introduction of exotic spcies into marine waters.

The public hearings are scheduled to begin at 7 p.m. on the following dates and at the following addresses:

Monday, December 21, 1992—Salon Bahia, Parador Villa Parguera, La Parguera, Lajas, Puerto Rico;

Tuesday, December 22, 1992—Conference Room, Fisheries Research Laboratory, Department of Natural Resources, Road 102, 8.6 Km Interior, Punta Arenas (Joyuda) Cabo Rojo, Puerto Rico;

Wednesday, December 23, 1992—El Meson Criollo, Road 987, 3.2, Km Las Croabas, Fajardo, Puerto Rico;

Monday, December 28, 1992—Conference Room, Legislature Building, Charlotte Amalie, St. Thomas, U.S. Virgin Islands;

Tuesday, December 29, 1992—Conference Room, Legislature Building, Christiansted, St. Croix, U.S. Virgin Islands.

Council meetings are open to the public.

Dated: December 8, 1992.

David S. Crestin,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Food Distribution Program; Level of Assistance from October 1, 1992 to September 30, 1993

AGENCY: Food and Nutrition Service, USDA.

ACTION: Notice.

SUMMARY: This notice announces the initial level of per-meal assistance for the Nutrition Program for the Elderly (NPE) for Fiscal Year 1993. The initial level of assistance is set at $.5780 for each eligible meal in accordance with section 311(a)(4) of the Older Americans Act of 1965, as amended by section 310 of the Older Americans Act Amendments of 1992, Public Law 102–375.

EFFECTIVE DATE: October 1, 1992.

FOR FURTHER INFORMATION CONTACT: Philip K. Cohen, Program Administration Branch, Food Distribution Division, Food and Nutrition Service, U.S. Department of Agriculture, 3101 Park Center Drive, Alexandria, Virginia 22302–1594 or telephone (703) 305–2660.

SUPPLEMENTARY INFORMATION:

Classification

This program is listed in the Catalog of Federal Domestic Assistance under Nos. 10.550 and 10.570 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V, and final rule related notice published at 48 FR 29114, June 24, 1983.)

This notice imposes no new reporting or recordkeeping provisions that are subject to Office of Management and Budget review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507). This action is not a rule as defined by the Regulatory Flexibility Act (5 U.S.C. 601–612) and thus is exempt from the provisions of that Act.

Legislative Background

Under section 311(a)(4) of the Older Americans Act of 1965, 42 U.S.C. 3030a(a)(4), the level of suport to be provided by the Department of Agriculture for each eligible meal claimed under the Nutrition Program for the Elderly (NPE) was fixed at $.5576 for each of Fiscal Years 1986 through 1991. This rate is reflected in the NPE regulations at 7 CFR 250.42. On September 30, 1992, the President signed Public Law 102–375, the Older Americans Act Amendments of 1992. Section 310 of this law amended section 311(a)(4) of the Older Americans Act to require the Secretary of Agriculture to maintain an annually programmed level of assistance equal to the greater of: (1) The current appropriation divided by the number of meals served in the preceding fiscal year; or (2) 61 cents per meal adjusted annually beginning with Fiscal Year 1993 to reflect changes in the Consumer Price Index (CPI). Section 311(c)(2) of the Act was amended to provide that the final reinbursement claims shall be adjusted to use the full amount appropriated for the fiscal year.

However, Congress appropriated funds for NPE for Fiscal Year 1993 in the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 1993 (Pub. L. 102–341), on August 14, 1992, prior to enactment of the Older Americans Act Amendments of 1992. Therefore, the Fiscal Year 1993 NPE appropriation was established on the basis of the per-meal rate in effect at that time, i.e., $.5676, rather than the rate that was subsequently established by the 1992 amendments to section 311. Given current estimates of participation projected for NPE in Fiscal Year 1993, the appropriation provided by the Congress in Public Law 102–341 cannot support the newly established reimbursement rate.

Notwithstanding the initial rates established by the Older Americans Act, the Department must comply with the spending clause of the U.S. Constitution and 31 U.S.C. 1341(a)(1)(A) (known as the Antideficiency Act) which prohibit the obligation or expenditure of funds in excess of the available appropriation. Thus the Department is required to establish (and, if necessary, adjust) rates in such a manner as to fully expend, but not exceed, the program appropriation.

Alternatives

The Department has identified two alternatives for providing NPE per-meal support for meals served in Fiscal Year 1993 that would comply with the aforementioned statutory requirements. The first alternative would be to reimburse initially at the rate established by the Older Americans Act, which would be 61 cents per meal adjusted to reflect changes in the CPI. However, it would mean that the Department would not be able to pay claims for reimbursement received after the Fiscal Year 1993 appropriation was exhausted.

Under the second alternative, the Department would establish the initial per-meal reimbursement rate of $.5780, which, assuming that the Department's participation estimates are accurate, could be sustained throughout the year. The Department derived this lower initial rate by dividing the Fiscal Year 1993 appropriation ($142,912,000) by the current participation estimate of 247,210,805 meals. This projected meal count represents a growth factor of almost 1 percent for Fiscal Year 1993, which is consistent with participation trends in recent years.

Fiscal Year 1993 Rate and Procedures

In order to best serve the interests of State and local level program operations, the Department has chosen the latter alternative, which will provide a more consistent approach to the reimbursement process. Assuming accurate participation projections, the rate of $.5780 can be maintained throughout the fiscal year. Thus, State agencies can better plan and budget their program operations, and local project operators can, in turn, depend on a steady, uniform flow of meal service support during the fiscal year.

Implementation of the first alternative would not be consistent with responsible program stewardship because the appropriation could not sustain the higher per-meal reimbursement rate throughout the fiscal year. This alternative would inevitably raise false expectations at the local project site level. Site operators who planned and managed their programs based on the higher initial rate would be forced to curtail program services abruptly and significantly later

in the fiscal year in response to the depletion of the Fiscal Year 1993 appropriation. Sudden reductions in program participation and/or meal quality could prove necessary. Such changes would have both immediate and long-range negative impacts on the program.

Therefore, the Department intends to reimburse each NPE meal served in Fiscal Year 1993 at $.5780. However, if it appears that due to changes in projected participation levels that funds would be insufficient to support the $.5780 per-meal reimbursement rate or that funds would remain unspent, the Department will adjust the rate at which all meals claimed for the fiscal year are reimbursed. In any event, pursuant to section 311(c)(2)(B) of the Older Americans Act, a final rate adjustment will take place after the fiscal year close-out, when the actual number of meals claimed for the fiscal year has been firmly established. The final rate will be derived by dividing this actual meal count into the program appropriation for the fiscal year, and final payments to States will be made accordingly. Thus each State will receive support in the amount of this final rate for each meal claimed during Fiscal Year 1993. State agencies will be notified directly of any further changes in the rates for Fiscal Year 1993.

Dated: December 7, 1992.

Phyllis Gault,

Acting Administrator, Food and Nutrition Service.

BILLING CODE 3410-30-M

Forest Service

Management Guidelines and Inventory and Monitoring Protocols for the Mexican Spotted Owl in the Southwestern Region

AGENCY: Forest Service, USDA.

ACTION: Notice: Adoption of Interim Policy.

SUMMARY: The Regional Forester, Southwestern Region of the U.S. Forest Service, is issuing new management direction to provide protection for the Mexican spotted owl (MSO). Because of concern for the habitat needs of the Mexican spotted owl (*Strix occidentalis lucida*) and to provide for regulatory mechanisms. This direction is being issued as an interim directive to the Forest Service Manual at 2676.2, Spotted Owl. This interim directive replaces MSO Interim Directive No. 2 (**Federal Register** Vol. 55, No. 127 27278–27287), which officially expired December 26, 1991 but was extended as policy by the Regional Forester on December 4, 1991 until replaced.

This interim directive implements the conservation strategy developed by the Forest Service over the past year. The conservation strategy has two parts. The first part develops and implements short term spotted owl habitat management direction to provide the protection necessary to ensure the owl remains viable throughout its range until a long-term strategy is developed. The second part of the strategy identifies a Scientific Team to develop a program to evaluate the effects various management activities would have on the owl and its habitat. The team would also develop a monitoring program to estimate the effects of these activities, to identify any instances when the strategy was not implemented as designed, and to ensure the strategy removes the threats identified by the U.S. Fish and Wildlife Service (FWS) (1991) for the Mexican spotted owl.

Implementation of the supplement prescribes management activities, including but not limited to prescribed fire and silvicultural treatments. These activities are designed to maintain or improve the characteristics of suitable habitat for the Mexican spotted owl. Some of the modifications prescribed in suitable habitat reduce the canopy closure below the minimum level of suitability identified for the forest cover type being modified. These modifications would be designed to improve the tree species composition and distribution in the diameter classes present. They would also be designed to maintain or increase the number and/or vigor of desired shade intolerant hardwood and conifer species. These lowered levels of canopy closure are expected to return to the suitable habitat canopy closure range in 5–7 years as trees grow taller and crowns grow wider.

Surveyed but unoccupied suitable habitat would be managed under the strategy to ensure a linkage is maintained between the blocks of occupied habitat. Management prescribed in capable habitat would speed its return to a suitable condition to meet the long term needs of the species.

Although these guidelines are being issued as policy in the form of a interim directive, the Southwestern Region will continue the administrative study and research program we jointly began in 1989 with the Rocky Mountain Forest and Range Experiment Station (RMS) to collect more information on this species. These data would provide a better understanding of habitat preferences, diet, home range size, demographics, and other characteristics of the MSO population. The intent of this data gathering program was to increase the understanding of the owl and its habitat for future development of a long-term stragegy to conserve the Mexican spotted owl, planned for fiscal year 1995/1996.

Besides issuing management direction, this interim policy also provides inventory and monitoring protocols to standardize methods used during inventory work in suitable MSO habitat and when conducting variability and population monitoring. The inventory protocol ensures consistency across the Region in the effort necessary to obtain complete coverage of all suitable habitat while still providing reasonable assurance all occupied Mexican spotted owl habitat is identified. The monitoring protocols identify the procedures to be used to monitor Management Territories to ensure consistency in data collection so the information can be compared from one Territory to another and from one year to next.

The directive identifies that a Mexican spotted owl Management Territory should be established whenever and wherever a Mexican spotted owl is located. It provides the methodology to use to establish and manage a Mexican spotted owl territory. It also provides standard definitions to use when determining habitat suitability and owl occupancy.

This interim policy is being published under Forest Service regulations at 36 CFR part 216, Involving the Public in the Formulation of Forest Service Directives. It is being published in advance of giving the public an opportunity to comment because of the immediate need to protect occupied Mexican spotted owl habitat. However, the Forest Service welcomes comments on this interim policy. These comments will be used to develop a final policy for incorporation into the Forest Service Manual as a Regional Supplement. This Regional Supplement, along with any appropriate National Environmental Policy Act (NEPA) documentation and a biological evaluation, should be completed shortly after the end of the comment period.

DATES: This policy is effective January 1, 1993. Comments on the guidelines must be received on or before January 10, 1993.

ADDRESSES: Direct comments to: Larry Henson, Regional Forester, 2670, Southwestern Region, USDA Forest Service, 517 Gold Avenue SW., Albuquerque, New Mexico 87102.

FOR FURTHER INFORMATION CONTACT: James Lloyd, Director, Wildlife and Fisheries or Keith W. Fletcher, Mexican Spotted Owl Program Manager (505) 842-3261 or 842-3267. Direct requests for a complete copy of the manual supplement or the conservation strategy to Keith W Fletcher at the above address.

SUPPLEMENTARY INFORMATION:

Background and Need for Guidelines

The Mexican spotted owl is one of three subspecies of spotted owls. This subspecies can be found in the forested mountains and canyons of central Colorado and southern Utah south through Arizona and New Mexico into central Mexico. The other two subspecies include the northern (*S.o. caurina*) and the California (*S.o. occidentalis*) spotted owls. The northern subspecies occurs in the forested mountains of the coastal and Cascade ranges of northern California, Oregon, Washington and southern British Columbia. The California spotted owl inhabits the forested mountains and canyons and oak woodlands of the Sierra Nevada and coastal mountain ranges of central and southern California.

The Mexican spotted owl is historically known from only a few records and occasional observations. Johnson and Johnson (1985), Ganey and others (1986), Skaggs (1988) and Webb (1982) summarized the historical occurrences in the Southwest. The current range coincides very well with the range of historic sightings except where the low elevation riparian habitat in southeastern Arizona and adjacent southwestern New Mexico no longer exists.

Current surveys have shown Mexican spotted owls occur primarily in forested mountains containing dense, multi-layered stands with a moderately-closed to closed canopy (Bent 1938, Forsman 1988, Ganey and Balda 1989a) and rock-walled canyons often containing little or no tree cover (Kertell 1977, Reynolds 1990 and Rinkevich 1991). The forested stands inhabited by the owl are typically comprised of mixed conifer forest types, but ponderosa pine and pine/oak forest types as well as evergreen hardwood forests and woodlands, oak woodland, and canyons, often with riparian deciduous broadleaf communities, are also used by the owl (Bent 1938, Ganey 1988, Ganey and Balda 1989a, Ganey et al. 1988, Ligon 1926, Marshal 1957, Reynolds 1990 and Rinkevich 1991).

On November 4, 1991, the U.S. Fish and Wildlife Service proposed to list the Mexican spotted owl as threatened under authorities contained in the Endangered Species Act of 1973, as amended (USFWS 1991). No critical habitat was proposed because the FWS found that it is "not prudent" to do so. Once the owl was proposed for listing, the U.S. Forest Service (FS) was required to review its actions to determine if any action is likely to jeopardize the continued existence of a proposed species (Jeopardy is defined in 50 CFR 402.02 as follows: " 'Jeopardize the continued existence of' means to engage in an action that reasonably would be expected, directly or indirectly, to reduce appreciably the likelihood of both the survival and recovery of a listed species in the wild by reducing the reproduction, numbers of distribution of that species."). Other Federal Agencies are also required to conduct this review.

Section 4(a)(1) of the Endangered Species Act, and the regulations published to implement the listing provisions of this Act, set forth the procedures for adding species to the Federal lists. A species may be determined to be an endangered or threatened species because of one or more of the five factors described in section 4 of these regulations. These factors include: (1) The present or threatened destruction, modification or curtailment of its habitat or range; (2) Overutilization for commercial, recreational, scientific, or educational purposes; (3) Disease or predation; (4) Inadequacy of existing regulatory mechanisms; or (5) Other natural or manmade factors affecting its continued existence.

In addition to the Endangered Species Act, the National Forest Management Act (NFMA) and its implementing regulations call for maintaining well-distributed populations of native and desired non-native vertebrates. Forest Service policy based on NFMA calls for maintaining populations throughout their geographic range (FSM 2670.22) and avoiding adverse impacts on species while their Federal status is being determined (FSM 2670.31).

The FWS's November 4, 1991 decision to propose the Mexican spotted owl as a threatened species, focused primarily on concerns related to listing factor 1, modifications in stands of suitable habitat, and listing factor 4, inadequacy of regulatory mechanisms. Their primary concerns included: (1) Regulatory mechanisms do not exist for most federal and state agencies and Indian nations that would prevent adverse modification of suitable Mexican spotted owl habitat; (2) Existing regulatory mechanisms in place for National Forests in Arizona and New Mexico are interim and expire December 1991; (3) Regulatory mechanisms in place in Arizona and New Mexico allow the potential for adverse modifications of un-occupied suitable habitat thus increasing fragmentation between population centers which may increase predation on dispersing owls; (4) Forest Plans in Arizona and New Mexico project a 30 percent increase in the 444 million board foot (MMbf) maximum annual sale quantity (ASQ) over the next few decades; and (5) Forest plans on five National Forests in Arizona and New Mexico and several in Utah and Colorado allow logging on steep slopes, which would increase the amount of suitable habitat modified in the future.

These concerns lead the FWS to the assumption the Mexican spotted owl would become threatened at some time in the future because of a lack of regulatory mechanisms and the present and future levels of modifications in suitable owl habitat.

Forest plans provide umbrella direction that sets out goals, objectives, standards, guidelines and are permissive in nature for a 10–15 year period. For example, all Forest plans have an objective for sensitive species habitat protection. However, detailed guidelines for Mexican spotted owl habitat management are provided by direction in the the Forest Service Directives System. The directives which describe official agency policy and official correspondence gives us the capability to act quickly when new information comes to light.

The need for spotted owl protection has been a good example of how this works. Since little was known about owl habitat needs, Forest plans contained few detailed guidelines about owl habitat management. The body of knowledge grew quickly after Forest plans were approved. Subsequently, our Interim Directive No. 1 was issued in June 1989. Additional new information was the basis for issuing Interim Directive No. 2 in June 1990 to replace Interim Directive No. 1. The body of information has continued to grow exponentially, resulting in this new management directive which replaces Interim Directive No. 2. Forest Supervisors and District Rangers are obligated to address these guidelines in site specific project design. These directives supersede Forest plan guidelines where there is a conflict.

We have issued a Notice of Intent to prepare an environmental impact statement and decision which will amend Forest plans to include the latest management guidelines. This will close

the loop and all of our control mechanisms will be included in the Forest plans.

In January of 1992, representatives from the Wildlife and Fisheries and Timber Management Staffs of the Southwestern Region (Arizona and New Mexico) in conjunction with representatives of the Wildlife and Fisheries staffs of the Rocky Mountain (Colorado) and Intermountain (Utah) Regions began developing a strategy to conserve the Mexican spotted owl. After intensive review, revision and re-review by members of the spotted owl scientific research community, a strategy was adopted by the Forest Service.

The intent of this conservation strategy is to ensure there are no future declines in the amount of occupied suitable habitat, no long-term declines in the amount of surveyed but unoccupied suitable habitat. It is also the intent of this strategy to improve both the quantity and quality of the habitat used by the Mexican spotted owl. This would remove any threats to the continued survival of the species on National Forest lands throughout its range, as identified by the U.S. Fish and Wildlife Service in their proposal to list the subspecies as threatened under the Endangered Species Act (USFWS 1991b).

The removal of threats provided by this strategy would be accomplished by cessation of practices the FWS believed would cause widespread modification of suitable habitat (USFWS 1991b) and replace these practices with ones that maintain or improve the condition of suitable spotted owl habitat and return capable habitat to suitable conditions. These proposed management practices range from no action to active habitat manipulation of habitats now delineated as suitable, capable, potential foraging, and unsuitable. To that end, management strategies and habitat conditions considered necessary for the conservation of the species have been identified, based upon the best scientific data currently available. These data include information gathered primarily by the Forest Service, but also include what information was available from other agencies, and independent researchers.

During the course of the inventory work conducted in 1988 it became evident a consistent method of inventorying Mexican spotted owl habitat throughout the Region was needed. An inventory protocol was developed by a team of spotted owl biologists and research scientists. This protocol is included in the interim directive, was included in ID No. 2 and has been used to inventory all activities since the 1989 field season. The protocol remains in effect and provides a consistent, efficient and economical method of searching potential Mexican spotted owl habitat to determine the presence or absence of Mexican spotted owls prior to management activities occurring in an area.

Under the interim directive being incorporated into the Forest Service Manual, inventories would continue to follow this protocol and would continue to be conducted in suitable habitat not known to be occupied by spotted owls prior to management activities occurring in an area.

It is assumed in the conservation strategy that Mexican spotted owls would be detected in future inventories at approximately the same rates they have been found during past inventories. Much of this assumption is based on the fact that most inventories conducted through 1992 have not targeted the habitat with the highest potential for detecting owls. Rather, the location for inventories has been determined by the location of the proposed activity. These activity areas do include some of the best habitat, but these locations also include many areas where detecting owls is less likely. Future inventories, at least for the next 3–5 years, should continue to include a mixture of habitat quality, and thus owls should continue to be detected at approximately the same rates as they are being found today.

Conservation of Mexican Spotted Owl Habitat

Any standards developed to manage Mexican spotted owl habitat must be based on the best available data describing the needs of the owl to ensure they would remove the threats identified by the FWS in their Proposed Rule to list the owl as threatened. However, the information needed to develop decisions to best meet the long-term needs of the owl is limited. For this reason, it is a priority of the conservation strategy to continue gathering information to use in making future decisions on managing owl habitat. This will be achieved through a scientific program that will recommend various land management activities to evaluate their effects on providing for the owl's needs. We expect it to take a total of 5 or more years to obtain this information. Long-term management direction will be developed once the results of this program are available. During the time it is expected to take to set up the experimental program, short-term direction has been designed to guide the 1993 forest activities to maintain and/or improve spotted owl habitat.

The short-term direction applies to all national forests within the range of the owl. This direction will be in effect through 1993 or until the scientific program replaces it. Changes to this direction could also be recommended from other spotted owl studies if their results identifies there is a need to change the prescribed management.

No changes will be made to an activity once it is awarded or the appropriate NEPA document is signed, unless the change is necessary to protect the owl's population viability, or to implement the evaluation program.

The Region 3 Biological Evaluation of the 1992 Actions (FY 1992 and first quarter FY 1993) (USFS 1992) evaluated the effects activities would have on the continued existence of the Mexican spotted owl. Any activity that was not included in this evaluation that modifies suitable owl habitat and that has not been harvested or completed by the date the FWS determines if listing is or is not warranted, would be reviewed. This review would follow the process used in the Regional Biological Evaluation.

Once the evaluation program is designed and ready to be implemented, it will provide the primary focus for management of spotted owl habitat. The short-term direction identified below will continue only where it does not conflict with this evaluation program.

Use the spotted owl strategy when suitable or capable Mexican spotted owl habitat overlaps northern goshawk habitat. The owl strategy will meet or exceed stand conditions for multi-story goshawk management. Under the owl strategy, goshawk foraging habitat would not provide the high levels of prey numbers for the wide variety of species identified in the goshawk management recommendations (Reynolds, et al. 1991). But, the owl strategy should provide optimum or near optimum conditions for several prey species used by the goshawk. Thus, the total number of individual prey animals available for the goshawk under the owl strategy should not be any different in most years than would be provided by the goshawk strategy, just the number of prey species would be different (Reynolds, personal communication).

Where suitable or capable habitat overlaps critical or essential habitat of a listed species, the management of this critical or essential habitat will follow the guidelines identified in the recovery plan for the listed species.

In certain instances, based on concurrence between wildlife biologists

and silviculturists, compelling reasons may exist to deviate from the following guidelines to prevent large-scale losses of suitable habitat from insect or disease epidemics. When this occurs, the evidence of the epidemic conditions, reasons for deviation from the guidelines and conditions to help mitigate the effects of deviating from the guidelines shall be included in the documentation for the project.

Short-term Direction for Management of Suitable Habitat

The objective of managing suitable spotted owl habitat is to maintain or improve the condition of this habitat. The condition of this habitat would be based on the description of suitable habitat identified in the owl strategy, or a revised description based on modifications recommended by the scientific committee. A variety of uneven-aged silvicultural treatments can be used to maintain or improve spotted owl habitat. Some of these treatments include single tree selection, thinning from below, free thinning, small group selection, and intermediate cuts including improvement, salvage, sanitation, thinning, etc.

All activity areas containing suitable habitat would be inventoried according to the inventory protocol prior to authorizing any proposed activity that modifies suitable habitat or would occur during the spotted owl's breeding season.

The existing Management Territories established under ID No. 2 will continue to be used. New Management Territories, with the same minimum of 2,000 acres, will be identified wherever and whenever an owl is found during spotted owl inventories. Under the new interim directive, this 2,000 acre Territory represents the mean plus two standard deviations of the 80 percent contour core area identified from home range studies in mixed conifer (Ganey and Balda 1989b and Kroel and Zwank 1991). (The 80 percent contour is the area where 80 percent of the radio locations were found during a telemetry study. It represents the area in which an owl pair would likely spend 80 percent of its time.) This contrasts with the definition used in ID No. 2 where the average home range size was used to determine the Management Territory size. Since the acreage figures for the areas being used to identify where differences in management may occur are the same for the two strategies the term "Management Territory" will continue to be used during the short-term program to reduce confusion. The Scientific Team will recommend whether this term should continue to be used or a new term applied to the area where occupied habitat would be managed.

Inside all Territories there will be a 450 acre "NO TREATMENT CORE AREA" around the nest or day roost. This represents the average of the 60 percent contour core area identified from the home range studies in mixed conifer cover types. Use the core area acreage figures (based on a minimum size core area of 450 acres) currently identified for existing territories. Allow no management activities in the no treatment core area unless prescribed in the scientific evaluation program, or allowed elsewhere in this document.

Stands meeting suitable habitat conditions should have at least a moderately closed canopy with a range of canopy closure from 60 to 100 percent in mixed conifer and 50 to 100 percent in Ponderosa pine and pine/oak, and have a multi-storied canopy, generally with three or more layers in mixed conifer stands and two or more layers in pine/oak, Ponderosa pine and other pine, oak or hardwood stands. (The habitat section of the conservation strategy has a more detailed description of suitable habitat).

Limit the extent of management activities in existing Management Territories, or newly created ones in future activities, to no more than 10 percent of the total number of Management Territories on a forest the year the activity is proposed. This percentage limit does not apply to any activities prescribed by the evaluation program.

To implement the following guidelines, it will be necessary to identify the relationship between canopy closure and basal area and/or stand density index by diameter classes. Canopy closure will be measured using a convex densiometer on a tripod to measure foliage cover or line intercept transects using a clinometer during development of this relationship. Use a sufficient number of plots to provide a statistically reliable relationship between canopy density and basal area.

Specific Short-term Direction To Manage Suitable Habitat Inside Management Territories

Conduct no stand modifying activities within the no treatment core area unless prescribed by the evaluation program, or unless allowed by other items in these guidelines.

Apply the following guidelines in the remainder of the Management Territory.

1. Maintain the existing multi-layered structure and species composition of any stand entered.

2. From the stands of suitable habitat with the highest canopy closure, select at least 20 percent to provide the best long-term, forested nesting and day roosting habitat available. Conduct no stand modifying activities within these stands. These stands should be selected or reviewed by a journey level biologist. Selection criteria should be based on canopy closure, topography, forest health and location. Generally, the stands making up this 20 percent area should exceed 80 percent canopy closure in mixed conifer and 70 percent in Ponderosa pine and pine/oak for types. Use stands with less than 80 percent canopy closure when these dense stands are not available in a Management Territory or it is desirable to select a less dense stand because of location, topography, or other reasons. Document reasons why the 20 percent was selected in the biological evaluation, especially where there is more than 20 percent of the area in stands with greater than 80 percent canopy closure or where there is a valid reason(s) relating to the owl why other stands with a lower canopy closure should be substituted for ones with a higher canopy closure in an individual Territory.

3. Identify an additional 40 percent of the suitable habitat in the core area to provide for high use foraging areas. Select this 40 percent from those stands with the next highest canopy closure. Use stands with a lower canopy closure than other stands when it is desirable to select a less dense stand because of location, topography, or other reasons. Limit stand modifying activities in these stands so that there is a minimum of a 65 percent average stand canopy closure remaining after the activity in mixed conifer forest type and 55 percent in pine and pine/oak types (Ganey and Balda 1989b). Generally, it is not expected to be economically feasible to treat stands with an average canopy closure of less than 70 percent in mixed conifer and 60 percent in pine and pine/oak. Document stand selection as in #2 above.

4. In the remaining 40 percent of the suitable habitat, limit stand modifying activities to a minimum average stand canopy closure of 50 percent in mixed conifer and 40 percent in pine and pine/oak after the activity. These will provide additional areas for foraging (Joe Ganey, Jared Verner, and Eric Forsman, personal communication) and improve stand structure and condition to maintain longterm habitat suitability.

5. Manage ponderosa pine forest types within the Management Territory boundary according to the type of

spotted owl habitat they provide, i.e. suitable, capable or potential foraging.

6. Use a reverse "J" curve and a "Q" factor that favors retaining large trees in regulating the diameter distribution for all stand modifying activities where single tree selection is used.

7. Limit openings created by group selection cuts to 1 acre, with most being less than ¼ acre in size.

8. Conduct no stand modifying management activities within ¼ mile of a nest area, except as prescribed by the evaluation program or identified elsewhere in these guidelines. Limit other prescribed activities that may affect the reproductive output of the Management Territory to outside the breeding season within this same ¼ mile distance.

9. Limit harvest activities to two seasons within each Management Territory.

10. Do not construct roads within ¼ mile of the nest area unless there is no environmentally-feasible alternative route. Conduct no road building within ¼ mile of the nest area during the breeding season (February 1–August 31). Close newly-constructed roads within ¼ mile of the nest area during all breeding seasons following construction. Close and rehabilitate unnecessary roads. Minimize road construction and use. Use dedicated skid trails. Protect rub trees where necessary to ensure average canopy closures are met.

11. Maintain a stand average of 10 square feet of basal area per acre of snags in mixed conifer and 6 square feet in pine and pine/oak. Select snags from the larger diameter classes first until the desired level is reached. Snags should be greater than 18 inches in diameter and more than 30 feet tall. Substitute smaller diameter snags only when large ones do not exist and cannot be created. Substitute shorter snags only when taller ones do not exist. Do not count any snag less than 12 inches diameter at breast height (DBH) or less than 15 feet tall. Retain sufficient cull trees to ensure replacements are available for the large snags. Girdle or kill by other means cull trees when prescribed to meet the snag density.

12. Maintain a stand average of down logs sufficient to provide an equivalent of 10 square feet of basal area per acre in mixed conifer and 6 square feet in pine and pine/oak. Measure all logs at the mid point. Down logs should be greater than 10 inches diameter at the small end and more than 12 feet long to be counted. Treat small sized down material or leave it untreated depending on other resource needs. Do not include large material when piling. Large piles of slash (5 foot by 10 foot by 5 foot tall or larger) may be substituted for down logs on a 2 foot per slash pile rate if down logs are not available. Leave slash piles unburned unless necessary to burn for other resource needs. Do not burn slash piles substituted for down logs.

13. Retain the existing hardwood component, especially oak. Also ensure the hardwood component is maintained throughout time. Each large oak tree is important. They take a long time to attain the size and structure used for nesting and roosting by the owls.

14. Prescribed fire will be designed to meet the conditions identified in 1–13 above. Limit prescribed fire to no more than 25 percent of the Management Territory in a burn year and leave a minimum of 2 full years between burn years in a Management Territory (burn year 1, wait years 2 and 3, burn year 4, etc.).

Management of Suitable Habitat Outside Management Territories

Apply the following guidelines to the suitable habitat outside of the Management Territory. Use a 5,000 to 10,000 acre analysis area for the area to consider for treatment.

1. Same as No. 1 for inside the Management Territories, except it applies to the analysis area and not the Management Territory.

2. Same as No. 2 for inside the Management Territories, except it applies to the analysis area and not the Management Territory.

3. Same as No. 3 for inside the Management Territories, except it applies to the analysis area and not the Management Territory. In addition, the minimum average stand canopy closure remaining after the activity is 60 percent in mixed conifer forest types and 50 percent in pine/oak types.

4. Same as No. 4 for inside the Management Territories, except it applies to the analysis area and not the Management Territory.

5. Manage ponderosa pine outside of the Management Territory under the 50–9–40 rule identified for potential foraging habitat. That is, 50 percent of the area has at least a 40 percent canopy closure of 9 inch DBH or larger trees.

6. Same as No. 6 for inside the Management Territories, except it applies to the analysis area and not the Management Territory.

7. Same as No. 7 for inside the Management Territories, except it applies to the analysis area and not the Management Territory.

8. Same as No. 11 for inside the Management Territories, except it applies to the analysis area and not the Management Territory.

9. Same as No. 12 for inside the Management Territories, except it applies to the analysis area and not the Management Territory.

10. Same as No. 13 for inside the Management Territories, except it applies to the analysis area and not the Management Territory.

11. Prescribed fire will be designed to meet the conditions identified in 1–10 above. Limit prescribed fire to no more than 35 percent of the Management Territory in a burn year and leave a minimum of 2 years between burn years in the analysis area.

Specific Short-term Direction to Manage Capable Habitat in Arizona and New Mexico

Manage capable habitat such that suitable habitat conditions will be attained as or more quickly than if no activity were prescribed. Even and uneven-aged techniques can be used in capable habitat as long as it can be demonstrated it would return to a suitable condition more quickly.

Manage snags and down logs as identified in numbers 11 and 12 in the section describing the short-term direction inside Management Territories.

Manage hardwoods as described in number 13 in the section describing the short-term direction inside Management Territories.

Management of Suitable, Capable, and Unsuitable Habitat in Colorado and Utah

Follow existing Forest Plan management direction, except allow no even aged management in suitable habitat.

Long-term Program

The second objective of the conservation strategy is to begin designing long-term management recommendations and standards needed to provide for the Mexican spotted owl and thus avoid the need to list the owl throughout its range. Part of this will be to expand the existing monitoring and study program to collect the information necessary to develop a long-term strategy. Throughout the stages of implementation of this program, the monitoring and research studies will have a vital function producing the information needed to improve management of MSO habitat. The process of using such information to refine management over time is referred to as adaptive management (Holling 1978 and Walters 1986). In this strategy, the objective of adaptive management is to improve the biological and economic efficiency through the continual gain of

knowledge about the owl and its habitat. This is to occur while providing the level of protection necessary for maintaining the viability of the owl over time.

Since it has been identified there is a lack of sufficient information on the owl, a scientific program will be established to obtain the needed information. Specific objectives of this program will be to use existing knowledge, on-going research and monitoring efforts to provide the forests the necessary guidelines for managing the resources. Through this effort, scientists will be able to evaluate the effects silvicultural and other management activities can have on owl habitat. From this research, a future, long-term conservation strategy and management direction will be developed.

The scope of this research program will incorporate the timber program as well as other programs for those national forest lands within the range of the owl. This program would be of sufficient size to provide a statistically valid sample with a high level of reliability. A full range of management activities will be included in the research programs. Through adaptive management, the conservation strategy will be subject to continual review by the team as new information becomes available. The research program will be amended, as necessary, to ensure the needs of the owl are continually being met.

A Scientific Advisory Team (Team) will be formed no later than Janury 1993 to evaluate the effects various management activities can have on owl habitat. Once formed, the Team will meet to begin setting up the scientific program by the end of February 1993. The short-term guides will prevail until the Team recommends alternative viable sale designs. These designs are intended to be completed by the end of FY 1993.

The Team will be made up of Forest Service scientists. Additional members may be appointed as appropriate. The Team should include individuals with research experience with spotted owl and/or Southwestern forest ecosystems and include avian ecology, forest ecology, and/or silviculture. The scientific program for the MSO will be each member's highest work priority and the Forest Service will provide the necessary support to help achieve their objectives. The Team would be terminated at the earliest time possible. Its needs would be reviewed periodically, but within 5 years. The term of the Team may be adjusted by the Regional Forester as necessary or needed.

Responsibilities of the team will include:

1. Design a strategy to evaluate the effects of management activities on spotted owl habitat and the owls' primary prey species. Develop a program to monitor populations of the owl. Based on their recommendation, the Regional Forester would develop implementation guidelines for incorporation into the Forest Service Manual. The forests would then develop a program of work to implement this strategy. The Team would review the programs developed by the forests and recommend necessary modifications to the Regional Forester.

2. Provide technical information on Mexican spotted owl adaptive management to the Regional Forester (Southwestern Region) and Station Director (Rocky Mountain Station).

3. Consult with and involve experts from FWS, New Mexico Department of Game and Fish, Arizona Game and Fish Department, Utah Division of Wildlife Resources, and Colorado Division of Wildlife. Consultation will also involve appropriate expertise from universities and other researchers.

4. Develop a summary of the current state of knowledge on Mexican Spotted Owls.

5. Prepare a comprehensive research program on population ecology and habitat requirements of Mexican Spotted Owls; establish research priorities.

6. Coordinate research and monitoring activities within and between agencies. Evaluate and incorporate results of non-federal research efforts.

7. Provide technical review of management guidelines based on the best available scientific information.

Summary of the Inventory Protocol

The objectives of the Southwestern Region's Mexican spotted owl inventory and monitoring protocols are to: Standardize the survey and monitoring methods used in the Region; ensure an adequate search effort is conducted in suitable Mexican spotted owl habitat to identify general areas where territories would be placed and to locate nest and roost sites to aid in identifying core areas; provide reasonable assurance of the absence of Mexican spotted owls prior to any management activities occurring in an area; provide standard forms for collection and compilation of inventory, monitoring and suitable habitat stand characteristic data; and, to coordinate a Regional Mexican spotted owl data base.

The protocols provide standard definitions of terms used during inventory and monitoring work. They provide the methods used to design survey routes, conduct the field outings, complete follow-up visits and complete all record keeping. The inventory protocol also requires a second year of inventory be completed in unoccupied habitat for all activities where no owl(s) was found during the first year of inventory.

Summary of Management Direction and Inventory and Monitoring Protocols

This management direction and the inventory and monitoring protocols, issued through an Interim Directive to the Forest Service Manual at 2676.2, provide the regulatory mechanism and remove the threat to Mexican spotted owl habitat identified by the Fish and Wildlife Service in their proposal to list the subspecies as threatened. They are also in keeping with the provisions of the National Cooperative Agreement on Spotted Owl Management signed December 1987 between the Forest Service and the U.S. Fish and Wildlife Service, and later signed by the Bureau of Land Management and National Park Service. Analysis by the Forest Service indicates there will be little or no reduction in the amount of suitable habitat during the 1 to 2 year life of the short-term direction.

Dated: December 4, 1992.

R. Forrest Carpenter,

Deputy Regional Forester.

BILLING CODE 3410–11–M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket 35–92]

Proposed Foreign-Trade Zone—Marysville, Michigan (Port Huron Customs Port of Entry); Application Filed

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Greater Detroit Foreign Trade Zone, Inc. (GDFTZ), requesting authority to establish a general-purpose foreign-trade zone in Marysville, St. Clair County, Michigan, adjacent to the Port Huron Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR part 400). It was formally filed on December 1, 1992. The applicant is authorized to make the proposal under Act No. 154 of the Public Acts of 1963 of the State of Michigan.

GDFTZ is the grantee of Foreign-Trade Zone 70, Detroit, Michigan, which was approved in July 1981 (Board Order 176, 46 FR 38941, 7/30/81). It is now requesting authority to establish a new general-purpose zone in the Port Huron area.

The proposed zone would consist of two contiguous parcels (32 acres) located in Marysville, some seven miles south of Port Huron and 50 miles north of Detroit. Parcel A (9 acres) includes a 130,000 square foot building and Parcel B (23 acres) consists of undeveloped land. Both parcels are owned by Wilkie Brothers Conveyors, Inc., which operates a manufacturing plant on site in which public warehouse space will be available. Metro International Trade Services, Inc., an operator of certain FTZ 70 warehouses, will operate the proposed zone.

The application indicates there is a need for zone services in the Port Huron area. The first user will be Wilkie Brothers, whose zone activity would be limited to warehousing. Specific manufacturing approvals are not being sought at this time. Requests would be made to the Board on a case-by-case basis.

In accordance with the Board's regulations (as revised, 56 FR 50790–50808, 10–8–91), a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment on the application is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is February 9, 1993. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to February 24, 1993.

While no public hearing has been scheduled for the FTZ Board, consideration will be given to such a hearing during the review.

A copy of the application and accompanying exhibits will be available during this time for public inspection at the following locations:

Office of the Port Director, U.S. Customs Service, 526 Water Street, room 301, Port Huron, Michigan 48060–5471.

Office of the Executive Secretary, Foreign-Trade Zones Board, room 3716, U.S. Department of Commerce, 14th & Pennsylvania Avenue, NW., Washington, DC 20230.

Dated: December 4, 1992.

John J. Da Ponte, Jr.,

Executive Secretary.

International Trade Administration

[A–588–817]

Active-Matrix Liquid Crystal High Information Content Flat Panel Displays and Display Glass Therefor From Japan; Initiation of Changed Circumstances Antidumping Duty Administrative Review and Consideration of Revocation of Antidumping Duty Order

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of initiation of changed circumstances antidumping duty administrative review and consideration of revocation of antidumping duty order.

EFFECTIVE DATE: December 11, 1992.

FOR FURTHER INFORMATION CONTACT: Carlo Cavagna, Michael Diminich, or Breck Richardson, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone (202) 482–3601.

SUPPLEMENTARY INFORMATION:

Background

On September 4, 1991, the Department of Commerce (the Department) published in the **Federal Register** (56 FR 43741) an antidumping duty order on active-matrix liquid crystal high information content flat panel displays and display glass therefor from Japan (the order). On November 3, 1992, Guardian Industries, on behalf of OIS Optical Imaging Systems (OIS), one of the petitioners, submitted a request for a changed circumstances review and revocation of the order. Guardian is the controlling shareholder of OIS, and OIS is the only petitioner that manufactures active-matrix LCDs.

Initiation of Changed Circumstances Review and Consideration of Revocation of the Antidumping Duty Order

Pursuant to sections 751(c) of the Tariff Act of 1930, as amended (the Act), the Department may revoke an antidumping duty order if the Department determines, based on a review under section 751(b) of the Act, that changed circumstances exist sufficient to warrant revocation. Section 353.25(d) of the Department's regulations provides that, if the Department finds that the order under review is no longer of interest to domestic interested parties, such finding constitutes a changed circumstance sufficient to warrant revocation.

The changed circumstance cited by OIS and Guardian as the basis for the request for review is the absence of any further interest in maintaining the order. The Department has determined that the petitioner's affirmative statement of no interest constitutes "good cause" for conducting a changed circumstances review, as provided in section 751(b)(2) of the Act, and 19 CFR 353.22(f)(3).

Scope of the Review

Imports covered by this review are shipments of active-matrix liquid crystal high information content flat panel displays and display glass therefor from Japan, which are defined as large area, matrix addressed displays, no greater than four inches in depth, with a picture element (pixel) count of 120,000 or greater, whether complete or incomplete, assembled or unassembled. These products are currently classified under items 8471, 8531.20.00, 8531.90.00, 9013.80.60, 9230, and 9240 of the Harmonized Tariff Schedule (HTS). HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive. This changed circumstance administrative review covers all producers/exporters of the subject merchandise produced in Japan and all shipments of subject merchandise entered, or withdrawn from warehouse for consumption on or after February 21, 1991.

Request for Comments

The Department requests written comments from interested parties regarding this review and the grounds for revocation. Comments may be submitted not later than 30 days after the date of publication of this notice. Rebuttal to written comments, limited to the issues raised in those comments, may be filed not later than 37 days after the date of publication. All written comments shall be submitted in accordance with 19 CFR 353.31(e) and shall be served on interested parties in accordance with 19 CFR 353.31(g). The Department will publish the preliminary results of this administrative review after its analysis of any written comments.

This review and notice are in accordance with sections 751 (b) and (c) of the Act and 19 CFR 353.22(f) and 353.25(d) (1992).

Rolf Th. Lundberg, Jr.,

Acting Assistant Secretary for Import Administration.

Sodium Thiosulfate From the People's Republic of China; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative review.

SUMMARY: In response to a request by the petitioner, the Calabrian Corporation, the Department of Commerce has conducted an administrative review of the antidumping duty order on sodium thiosulfate from the People's Republic of China (the PRC). This review covers China National Chemicals Import and Export Corporation (Sinochem), and Shanghai Chemicals Import and Export Corporation (Shanghai), and the period December 12, 1990, through January 31, 1992. Since Sinochem failed to respond to our questionnaire, we have reviewed this firm using the best information available (BIA) for purposes of these preliminary results of review. We preliminarily determine that there were no shipments of this merchandise to the United States by Shanghai during the period of review. Although we initiated reviews for Henan Provincial Chemical Plant (Henan) and Eeyer Hat Oil Chemical Plant (Eeyer), based on petitioner's request, we were unable to locate these firms. Therefore, Henan and Eeyer are not included in these preliminary results. The estimated antidumping cash deposit rates for Shanghai, Henan, and Eeyer will be the "all others" rate to be established in the final results of this administrative review.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: December 11, 1992.

FOR FURTHER INFORMATION CONTACT: Joseph A. Fargo or Richard Rimlinger, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 482-5253.

SUPPLEMENTARY INFORMATION:

Background

On January 31, 1992, the Department of Commerce (the Department) published in the **Federal Register** (57 FR 3740) a notice of "Opportunity to Request an Administrative Review" of the antidumping duty order on sodium thiosulfate from the PRC. On February 19, 1992, the petitioner, the Calabrian Corporation, requested administrative review of Sinochem, Shanghai, Henan, and Eeyer, four manufacturers/exporters of this merchandise to the United States. We initiated these reviews covering the period December 12, 1990, through January 31, 1992, on March 16, 1992 (57 FR 9104). The Department has now conducted these reviews for Sinochem and Shanghai in accordance with section 751 of the Tariff Act of 1930, as amended (the Tariff Act). Henan and Eeyer could not be located and are not included in these preliminary results.

Scope of the Review

Imports covered in this review are shipments of all grades of sodium thiosulfate, in dry or liquid form. The chemical composition of sodium thiosulfate is $Na^2S^2O^3$. Sodium thiosulfate is currently classifiable under Harmonized Tariff Schedule (HTS) subheading 2832.30.1000. The HTS subheading is provided for convenience and customs purposes. The written description remains dispositive.

The review covers two manufacturers/exporters of sodium thiosulfate from the PRC and the period December 12, 1990, through January 31, 1992 (the POR).

United States Price and Foreign Market Value

We forwarded the antidumping questionnaire to Sinochem and Shanghai, two manufacturers/exporters of this merchandise to the United States.

With respect to Sinochem, since the firm failed to respond to our questionnaire, the Department used the best information available (BIA) to review its sales during the POR, in accordance with section 776(c) of the Tariff Act. When a company fails to provide requested information in a timely manner, or otherwise significantly impedes the Department's review, the Department normally considers the company uncooperative and generally assigns to that company as BIA the higher of: (a) The highest rate assigned to any company in a previous review or the investigation or (b) the highest rate for a responding company with shipments during the review period. This practice is consistent with Commerce's long-standing position that BIA is not necessarily the most accurate information on the record but a choice of information on the record which is usually adverse to respondents who fail to comply with the Department's requests for information. See 19 CFR 353.37(b); Final Results of Antidumping Duty Administrative Reviews: Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof from France, et al., 57 FR 8360 (June 24, 1992); Final Results of Antidumping Administrative Review: Potassium Permanganate from the People's Republic of China, 56 FR 19640 (April 29, 1991).

With respect to the above, the highest previous rate was 25.57 percent, calculated in the investigation using price and cost information submitted by petitioner. However, petitioner submitted information on the record in this review indicating that because costs and prices in the industry have changed substantially since the investigation, 25.57 percent was no longer sufficiently adverse to induce respondents to submit timely, accurate, and complete responses. Therefore, we have preliminarily determined to revise the investigation BIA calculation, based on the information submitted by petitioner, for purposes of this review.

In this review, we again based our BIA calculation upon the price and cost information submitted by petitioner in the investigation, as revised according to the information submitted on the record of this review. United States Price (USP) was based on the average 1991 price of sodium thiosulfate imported from the PRC, as derived from official Commerce import statistics. Foreign Market Value (FMV) was based on petitioner's 1991 cost of manufacturing sodium thiosulfate, adjusted for known differences in labor costs and the labor cost in Pakistan, the country selected in this administrative review as a surrogate for the PRC. Pakistan was selected as a surrogate because of its comparability to the PRC in terms of per capital gross national product and the availability of current Pakistani labor rate statistical data.

The increase in the cost of manufacture of sodium thiosulfate coupled with the decline in U.S. sales prices result in a dumping margin of 148.42 percent.

With respect to Shanghai, since the firm reported that it made no shipments of this merchandise to the United States during the POR, and Shanghai also had no prior company-specific estimated deposit rate, the Department will use as the estimated deposit rate for Shanghai the "all others" rate to be established in the final results of this administrative

review based on our analysis of Sinochem.

Preliminary Results of the Review

As a result of our comparison of USP to FMV, we preliminarily determine that a dumping margin of 148.42 percent exists for all manufacturers/exporters during the period December 12, 1990, through January 31, 1992.

Parties to the proceeding may request disclosure and/or an administrative protective order within 5 days of the date of publication of this notice. Any interested party may request a hearing within 10 days of publication. Any hearing, if requested, will be held 44 days after the date of publication, or the first workday thereafter. Case briefs and/or written comments from interested parties may be submitted not later than 30 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues raised in the case briefs and comments, may be filed not later than 37 days after the date of publication. The Department will publish the final results of the administrative review, including the results of its analysis of issues raised in any such written comments or at a hearing. Upon completion of this administrative review, the Department will issue appraisement instructions directly to the Customs Service.

The following deposit requirements will be effective upon publication of the final results of this administrative review for all shipments of sodium thiosulfate, from the PRC, entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 571(a)(1) of the Tariff Act: (1) The cash deposit rate for the reviewed company will be that established in the final results of this administrative review; (2) for exporters not covered in this review, but covered in previous reviews or the original less-than-fair-value investigation, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, previous reviews, or the original less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be that established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will be the "All others" rate established in the final results of this administrative review based on our analysis of Sinochem. Although the "all others" rate is normally based on the highest non-BIA rate from the current review (or from a prior review if there is no non-BIA rate in the current review), in this case there have been no non-BIA rates. Therefore, it is anticipated the current Sinochem rate will be the "all others" rate. These deposit requirements when imposed shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated December 4, 1992.

Rolf Th. Lundberg, Jr.,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

Coastal Zone Management: Federal Consistency Appeal by Olga Vélez-Lugo From an Objection and by the Puerto Rico Planning Board

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of appeal and request for comments.

By letter dated July 9, 1992, Ms. Olga Vélez-Lugo (Appellant), through her chosen representative, filed with the Department of Commerce a notice of appeal. The Appellant is appealing to the Secretary of Commerce (Secretary) under section 307(c)(3)(A) of the Coastal Zone Management Act (CZMA) and the Department's implementing regulations, 15 CFR part 930, subpart H. The appeal is taken from an objection by the Puerto Rico Planning Board (PRPB) to the Appellant's consistency certification that the construction of a wood dock 50 feet long by six feet wide, the restoration of an existing boat ramp, and the emplacement of approximately 400 cubic yards of fill on her property in the Playitas Ward, Salinas, Puerto Rico, for which a U.S. Army Corps of Engineers permit must be obtained, is consistent with Puerto Rico's coastal zone management program.

The CZMA provides that a timely objection by a state, (including Puerto Rico), to a consistency certification precludes any Federal agency from issuing licenses or permits for the activity unless the Secretary of Commerce finds that the activity is either "consistent with the objectives" of the CZMA (Ground I) or "necessary in the interest of national security" (Ground II). Section 307(c)(3)(A). To make such a determination, the Secretary must find that the proposed project satisfies the requirements of 15 CFR 930.121 or 930.122.

The Appellant requests that the Secretary override the PRPB's consistency objections based on Ground I. To make the determination that the proposed activity is "consistent with the objectives" of the CZMA, the Secretary must find that: (1) The proposed activity furthers one or more of the national objectives or purposes contained in section 302 or section 303 of the CZMA, (2) the adverse effects of the proposed activity do not outweigh its contribution to the national interest, (3) the proposed activity will not violate the Clean Air Act or the Federal Water Pollution Control Act, and (4) no reasonable alternative is available that would permit the activity to be conducted in a manner consistent with Puerto Rico's coastal management program. 15 CFR 930.121.

Public comments are invited on the findings that the Secretary must make as set forth in the regulations at 15 CFR 930.121. Comments are due within 30 days of the publication of this notice and should be sent to Ms. Angelica Fleites, Law Clerk, Office of the Assistant General Counsel for Ocean Services, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 1825 Connecticut Avenue, NW., suite 603, Washington, DC 20235. Copies of comments will also be forwarded to the Appellant and the PRPB.

All nonconfidential documents submitted in this appeal are available for public inspection during business hours at the offices of the PRPB and the Office of the Assistant General Counsel for Ocean Services.

FOR ADDITIONAL INFORMATION CONTACT: Ms. Angelica Fleites, Law Clerk, Office of the Assistant General Counsel for Ocean Services, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 1825 Connecticut Avenue, NW., suite 603, Washington, DC 20235 at (202) 606-4200.

(Federal Domestic Assistance Catalog No. 11.419 Coastal Zone Management Program Assistance)

Dated: December 4, 1992.

Thomas A. Campbell,

General Counsel.

BILLING CODE 3510-08-M

Atlantic Bluefin Tuna Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of public scoping meetings on an Atlantic bluefin tuna fishery environmental impact statement; request for comments.

SUMMARY: NMFS will hold three public scoping meetings in order to discuss preparations to develop an Environmental Impact Statement (EIS) to assess the potential impacts on the human environment of the western Atlantic bluefin tuna fishery in 1994–95. In addition, the analysis done in this EIS for the Atlantic bluefin tuna fishery will be used, as appropriate, in NMFS's preparation of a Fishery Management Plan for Atlantic tunas. A notice of intent to prepare an EIS was published in the **Federal Register** on November 4, 1992 (57 FR 52617). The EIS will evaluate the effects on stock size and harvest rates of possible actions for the 1994–95 fishing years. NMFS is responsible for managing the Atlantic bluefin tuna fishery and implementing the recommendations of the International Commission for the Conservation of Atlantic Tunas (ICCAT).

The purpose of this notice is to inform the interested public of EIS scoping meetings to solicit input to help NMFS scope issues and possible actions to be included in drafting the EIS. In addition, NMFS requests written comments on aspects of the bluefin tuna fishery that would be appropriate to include in the EIS.

DATES: Written comments on the issues for a proposed rulemaking must be received on or before January 15, 1993. See **SUPPLEMENTARY INFORMATION** for dates and times of the scoping meetings.

ADDRESSES: Written comments should be sent to Richard H. Schaefer, Director, Office of Fisheries Conservation and Management (F/CM), National Marine Fisheries Service, 1335 East-West Highway, Silver Spring, MD 20910. Clearly mark the outside of the envelope "Bluefin Tuna EIS Suggestions."

See **SUPPLEMENTARY INFORMATION** for the addresses of the scoping meeting locations.

FOR FURTHER INFORMATION CONTACT: Richard B. Stone, 301-713-2347.

SUPPLEMENTARY INFORMATION: Public scoping meetings will be held to provide an opportunity for informal discussion between the public and NMFS on the preparation of an EIS on the western Atlantic bluefin tuna fishery for the 1994–1995 season. In addition, the analysis done for this EIS will be used as appropriate, in preparing a Fishery Management Plan for all western Atlantic tunas. Additional discussion was provided in the notice of intent, and is not repeated here.071

The public scoping meetings are scheduled as follows:

January 5, 1992, Gloucester, Mass., 7–10 p.m.

NMFS Northeast Regional Office, One Blackburn Dr., Gloucester, MA 01930, (508) 281-9260 (contact Kevin Foster).

January 6, 1992, Silver Spring, Md., 1–30–6 p.m.

NMFS Headquarters, SSMC II, Second Floor Conference Rm., 1325 East-West Highway, Silver Spring, MD 20910, (301) 713-2347 (contact Aaron King).

January 7, 1993, Madeira Beach, Fla., 7–10 p.m.

Madeira Beach City Hall, 300 Municipal Drive, Madeira Beach, FL 33708, (813) 893-3161 (contact Rod Dalton).

Dated: December 7, 1992.

David S. Crestin,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Marine Mammals

AGENCY: National Marine Fisheries Service, NMFS, NOAA, Commerce.

ACTION: Issuance of Permit Modification (P70E).

Notice is hereby given that pursuant to the provisions of § 216.33 (d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216) and § 222.25 of the regulations governing endangered fish and wildlife permits, Scientific Research Permit No. 765 issued to Dr. William A. Watkins, Senior Research Specialist, Woods Hole Oceanographic Institution, Woods Hole, MA 02543, on February 25, 1992, has been modified to allow sound playback experiments, at various levels, on up to five tagged whales, and to harass up to 60 additional sperm whales annually up to 10 times per payback test.

This modification becomes effective December 11, 1992.

Documents pertaining to this Modification and Permit are available for review, by appointment, in the Permits Division, Office of Protected Resources, National Marine Fisheries Service, 1335 East-West Hwy., Silver Spring, MD 20910 (301/713-2289);

Director, Northeast Region, National Marine Fisheries Service, NOAA, One Blackburn Drive, Gloucester, MA 01930 (508/281-9200); and

Director, Southeast Region, National Marine Fisheries Service, NOAA, 9450 Koger Blvd., St. Petersburg, FL 33702 (813/893-3141).

Dated: December 3, 1992.

BILLING CODE 3510-22-M

Marine Mammals; Permits

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Issuance of modification No. 1 to permit No. 772 (P475).

SUMMARY: On March 27, 1992, notice was published in the **Federal Register** (57 FR 10650) that Permit No. 772 had been issued to Ms. Dena Matkin, P.O. Box 22, Gustavus, Alaska 99826.

Notice is hereby given that on December 3, 1992, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), the Endangered Species Act of 1973 (16 U.S.C. 1531–1543) and the Regulations Governing Endangered Fish and Wildlife (50 CFR parts 217–222), the National Marine Fisheries Service modified Permit No. 772 to extend the effective date through March 31, 1993.

The modified Permit is available for review by interested persons in the following offices by appointment:

Office of Protected Resources, National Marine Fisheries Service, NOAA, 1335 East-West Highway, room 7324, Silver Spring, MD 20910 (301/713-2289); and

Director, Alaska Region, National Marine Fisheries Service, NOAA, Federal Annex, 9109 Mendenhall Mall Rd., suite 6, Juneau, AK 99802 (907/586-7221).

Dated: December 3, 1992.

Michael F. Tillman,

Acting Director, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COMMISSION ON NATIONAL AND COMMUNITY SERVICE

National and Community Service Act, Subtitle B1, B2 & D Programs; Availability of Funds

AGENCY: Commission on National and Community Service.

ACTION: Notice of availability of funds.

SUMMARY: The Commission on National and Community Service hereby announces the availability of funds for new projects pursuant to the National and Community Service Act of 1990, as amended. The Commission has been appropriated $73 million for programs and activities in Fiscal Year 1993. The majority of these funds will be committed to continuing programs established in Fiscal Year 1992. However, a small portion of funds is available for specific types of new applicants and projects (programs funded under subtitles B1 (local applicants of North Dakota only), B2, and D). This notice pertains only to the availability of funds for these new projects, and does not pertain to existing grantees submitting requests for continuations. Existing grantees will be notified separately with respect to continuation requirements.

DATES: All grant applications under these three programs must be received by the Commission by 4:30 p.m., local standard time, February 16, 1993.

ADDRESSES: Applications should be submitted to the Commission on National and Community Service, 529 14th Street, NW., suite 452, Washington, DC 20045.

FOR FURTHER INFORMATION CONTACT: The Commission on National and Community Service, (202) 724–0600: Ruby Anderson for questions concerning subtitle B1; Smita Singh—subtitle B2; Michael Camunez—subtitle D; and Mike Kenefick—grants and administration.

SUPPLEMENTARY INFORMATION: Funding is available for the following types of new applicants and projects:

1. Subtitle B1, Serve-America: Funds are available under this notice for local applicants of North Dakota only. Grants will be awarded on a competitive basis to public or private nonprofit organizations and local educational agencies working in partnership with nonprofit organizations. The Serve-America program provides support for school-age Americans who volunteer their services for the benefit of others, and aims to increase the number of adults who volunteer in schools. Projects may be school-based service-learning programs, community-based service programs or adult volunteer or partnership programs. Available funds total $43,000.

2. Subtitle B2, Higher Education: Institutions of higher education and consortia of such institutions are eligible to receive grants under this program. States, Indian Tribes and public agencies or nonprofit organizations in consortia with institutions of higher education may also apply for these funds. Higher Education programs should involve students in community service activities or train teachers in service-learning concepts. Approximately $1 million is available for awards under this notice.

3. Subtitle D, National and Community Service: States and Indian Tribes are eligible to apply for funds under this notice. Up to $10 million may be available in Fiscal Year 1993 to test one to three National Service programs. Programs should engage individuals ages 17 and older in full- or part-time service.

Application materials are available from the Commission on National and Community Service, 529 14th Street, NW., suite 452, Washington, DC 20045.

Authority: 42 U.S.C. 12501 *et seq.*

Dated: December 8, 1992.

Catherine Milton,

Executive Director.

BILLING CODE 6820–BA–M

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Additions and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Additions to and deletions from procurement list.

SUMMARY: This action adds to the Procurement List commodities and a service to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and deletes from the Procurement List a commodity and a service previously furnished by such agencies.

EFFECTIVE DATE: January 11, 1993.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557–1145.

SUPPLEMENTARY INFORMATION: On August 21, September 11 and 25, October 16 and 23, 1992, the Committee for Purchase From People Who Are Blind or Severely Disabled published notices (57 FR 37598, 41730, 44364, 47453 and 48359) of proposed additions to and deletions from Procurement List:

Additions

After consideration of the material presented to it concerning capability of qualified workshops to provide the commodities and service, fair market price, and impact of the additions on the current or most recent contractors, the Committee has determined that the commodities and service listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

I certify that the following actions will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodities and service to the Government.

2. The action will not have a severe economic impact on current contractors for the commodities and service.

3. The action will result in authorizing small entities to furnish the commodities and service to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodities and service proposed for addition to the Procurement List.

Accordingly, the following commodities and service are hereby added to Procurement List:

Commodities

Magazine, Cartridge
1005–00–921–5004

Charcoal, Activated, Technical
6810–00–726–7944

Can, Water, Plastic
7240–00–089–3827

Service

Administrative Services
Federal Supply Service
Tool Acquisition Division 1 (6FEP–CO)
Arlington, Virginia

This action does not affect current contracts awarded prior to the effective date of this addition or options exercised under those contracts.

Deletions

After consideration of the relevant matter presented, the Committee has determined that the commodity and service listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

Accordingly, the following commodity and service are hereby deleted from the Procurement List:

Commodity

Button, Insignia
8455–00–530–3700

Service

Janitorial/Custodial
Charles E. Boston USARC
Houma, Louisiana

Beverly L. Milkman,

Executive Director.

[FR Doc. 92–30148 Filed 12–10–92; 8:45 am]

BILLING CODE 6820–33–M

Procurement List Proposed Addition

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed addition to procurement list.

SUMMARY: The Committee has received proposals to add to the Procurement List a commodity to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: January 11, 1993.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557–1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed action.

If the Committee approves the proposed addition, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodity listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodity to the Government.
2. The action does not appear to have a severe adverse impact on the current contractors for the commodity.
3. The action will result in authorizing small entities to furnish the commodity to the Government.
4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodity proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

It is proposed to add the following commodity to the Procurement List for production by the nonprofit agency listed:

Scouring Powder
7930–01–294–1115
Nonprofit Agency: Lifetime Assistance, Inc.
Rochester, New York

Beverly L. Milkman,

Executive Director.

Procurement List Proposed Addition

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed addition to procurement list.

SUMMARY: The Committee has received proposals to add to the Procurement List a commodity to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: January 11, 1993.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557–1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed action.

If the Committee approves the proposed addition, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodity listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodity to the Government.
2. The action will result in authorizing small entities to furnish the commodity to the Government.
3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodity proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

It is proposed to add the following commodity to the Procurement List for production by the nonprofit agency listed:

Paper, Toilet Tissue
8540–00–530–3770
(Requirements for the Palmetto, GA Depot only)
Nonprofit Agency: Duluth Lighthouse for the Blind, Duluth, Minnesota

Beverly L. Milkman,

Executive Director.

BILLING CODE 6820–33–M

DEPARTMENT OF DEFENSE

Department of the Army

Environmental Assessment (EA) for Realignment of Forces and the Restationing of the 513th Military Intelligence Brigade From Fort Monmouth, New Jersey and Vint Hill Farms Station, VA to Fort Gordon, GA and Restationing the 470th Military Intelligence Brigade From Panama to Fort Gordon, GA

AGENCY: Department of Defense, United States Army.

ACTION: Finding of No Significant Impact (FNSI).

SUMMARY: The proposed action is to withdraw two Military Intelligence Brigades from their present stations (elements of the 513th in Fort Monmouth, NJ, and Vint Hill Farms Station, VA, and the 470th from Panama) and restation them to Fort Gordon. This will be accomplished starting in FY93 and be completed during FY99. The two Brigades will be consolidated as the 513th MI Brigade. The Army considered consolidation and restationing at Fort Drum, NY, consolidation and restationing at Fort Polk, LA, the "no action" alternative, the proposed action, and the proposed action with the addition of a military remote operations facility (ROF).

No new buildings will be constructed as a result of this action. The activities conducted by the 513th MI Brigade are conducted primarily indoors. The type of training activities conducted by the 513th MI Brigade are similar to those conducted by other units at Fort Gordon.

It has been determined that the proposed action and the alternatives will not constitute an action significantly affecting the quality of the human environment. The alternatives will not significantly affect air or water quality or land use. There will not be significant impact on threatened or endangered species, nor other biotic resources. There will not be significant impact to socioeconomic conditions.

Because there would be no significant environmental impacts resulting from implementation of the Proposed Action, an Environmental Impact Statement (EIS) is not required and will not be prepared.

SUPPLEMENTARY INFORMATION: There is a 30-day waiting period for the public prior to implementation.

ADDRESSES: A request for a copy of the EA and comments may be forwarded to: Headquarters, US Army Intelligence and Security Command, Public Affairs Office, Fort Belvoir, Virginia 22060–5370.

FOR FURTHER INFORMATION CONTACT: Questions concerning this FNSI may be directed to Mr. Paul Sutton, (703) 806–5326.

Lewis D. Walker,

Deputy Assistant Secretary of the Army, (Environment, Safety & Occupational Health) OASA (I, L&E).

[FR Doc. 92–30108 Filed 12–10–92; 8:45 am]

BILLING CODE 3710–08–M

Preparation of a Supplement to the 1989 Environmental Impact Statement for Proposed Actions at U.S. Army Kwajalein Atoll (USAKA)

AGENCY: Department of Defense, United States Army.

ACTION: Notice of intent.

SUMMARY: This Notice of Intent is for the preparation of a Supplemental Environmental Impact Statement to the 1989 Draft and Final Environmental Impact Statement (DEIS and FEIS) on Proposed Actions at USAKA. The Supplemental EIS adds to the original EIS by modifying its Proposed Action in two respects. One Proposed Action of the Supplemental EIS would increase the level of strategic defense test and evaluation activities to support the development and deployment of a ballistic missile defense system. The other Proposed Action would adopt USAKA Environmental Standards that have been specifically designed to protect the unique environmental conditions of the Kwajalein Atoll. This supplemental EIS also addresses the adoption of the new environmental standards for USAKA activities. The development of these new standards was provided for in the Compact of Free Association between the United States and the Government of the Republic of the Marshall Islands (RMI).

LEAD AGENCY: U.S. Army Space and Strategic Defense Command (USASSDC)

COOPERATING AGENCY: Strategic Defense Initiative Organization (SDIO)

Alternatives to this Proposed Action to be analyzed:

- Low level of Test Activities—involving the continuation of strategic defense system individual component level tests at an accelerated frequency and intensity compared to that analyzed in the 1989 USAKA EIS, but not to the higher level assessed in the proposed action. Each flight test would consist of only a single vehicle launched from USAKA.
- High level of Test Activities—consisting of multiple launches and sensing from multiple locations, and related support activities associated with both systems integration, development and operational testing; and annual service practice. This action would bound the greatest amount of range activity which could be conducted at USAKA. Each test flight would consist of a maximum of ten launches from USAKA.
- No Action Alternative—continuing space and defense activities at USAKA as described in the 1989 USAKA EIS Proposed Action and Record of Decision.

The second category of Proposed Actions relates to the environmental standards that govern U.S. Army activities at USAKA. The USAKA Environmental Standards derive from existing United States and RMI statutes, but are tailored to protect the specific environmental conditions of the Kwajalein Atoll. The Proposed Action would have one alternative:

- No-Action Alternative—defined as continuing the use of current United States regulations for environmental protection and analyses of the Kwajalein Atoll.

Scoping

The scoping process will include announcements in the Hourglass and The Marshall Islands' Journal (published in USAKA and Majuro, respectively), as well as in the **Federal Register**. The scoping process is intended to determine the significant environmental issues to be analyzed in depth in the environmental documentation. Comments received, either in writing or through contacts with RMI and U.S. Government representatives, will be used to identify potential issues. Comments should be received by January 9, 1992.

All written and verbal comments will be considered in preparing the Draft Supplemental EIS.

Written comments and questions about the Proposed Action and Supplemental EIS may be forwarded to: D. Randy Gallien, U.S. Army Strategic Defense Command, ATTN: CSSD–EN–V, P.O. Box 1500, Huntsville, Alabama 35807–3801. Verbal comments and questions regarding this proposal may be directed to D. Randy Gallien at (205) 955–4890.

More detailed information is available from Randy Gallien at the address and telephone number listed above; Dr. Don Ott, USAKA, at telephone number (805) 238–7994, extension 4218; and Alele Museum in Majuro, RMI.

Lewis D. Walker,

Deputy Assistant Secretary of the Army (Environment, Safety and Occupational Health) OASA (I,L&E).

BILLING CODE 3710–08–M

DEPARTMENT OF EDUCATION

[CFDA No.: 84.036A]

Library Education and Human Resource Development; Notice Inviting Applications for New Awards for Fiscal Year (FY) 1993

Purpose of Program: Provides grants to assist in covering the cost of courses

of study or staff development through short term or regular session institutes.

Eligible Applicants: Institutions of higher education and library organizations or agencies.

Deadline For Transmittal of Applications: February 24, 1993.

Deadline for Intergovernmental Review: April 26, 1993.

Applications Available: January 8, 1993.

Available Funds: $992,000.

Estimated Range of Awards: $35,000–$125,000.

Estimated Average Size of Awards: $66,000.

Estimated Number of Awards: 15.

Note: The Department is not bound by any estimate in this notice.

Project Period: Up to 12 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80 (for public library organizations or agencies), 82, 85, and 86 (for institutions of higher education); (b) The regulations for this program in 34 CFR part 776.

Priorities

Absolute Priorities: Under 34 CFR 75.105(c)(3) and 34 CFR 776.5(a) the Secretary gives an absolute preference to applications that meet one or both of the following priorities. The Secretary funds under this competition only applications that meet one or both of these absolute priorities:

Absolute Priority 1

To train or retrain library personnel in areas of library specialization where there are currently shortages, such as school media, children's services, young adult services, science reference and cataloging.

Absolute Priority 2

To train or retrain library personnel to serve the information needs of the elderly, the illiterate, the disadvantaged, or residents of rural America.

Invitational Priority: Within absolute priorities 1 and 2 specified in this notice, the Secretary is particularly interested in applications that meet the following invitational priority. However, under 34 CFR 75.105(c)(1) an application that meets this invitational priority does not receive competitive or absolute preference over other applications:

Applications for institutes that place particular emphasis on libraries and their contributions to achieving one or more of the following National Education Goals (1, 2, 3, 4, and 5):

Goal 1—Readiness for School: By the year 2000, all children in America will start school ready to learn.

Goal 2—High School Completion: By the year 2000, the high school graduation rate will increase to at least 90 percent.

Goal 3—Student Achievement and Citizenship: By the year 2000, American students will leave grades four, eight, and twelve having demonstrated competency in challenging subject matter including English, mathematics, science, history, and geography; and every school in America will ensure that all students learn to use their minds well, so they may be prepared for responsible citizenship, further learning, and productive employment in our modern economy.

Goal 4—Science and Mathematics: By the year 2000, U.S. students will be first in the world in science and mathematics achievement.

Goal 5—Adult Literacy and Lifelong Learning: By the year 2000, every adult American will be literate and will possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship.

SUPPLEMENTARY INFORMATION: Applicants interested in the invitational priority addressing libraries and their contributions to achieving the National Education Goals may request from the program office the complete text of the six goals, including the objectives supporting each individual goal.

FOR APPLICATIONS OR INFORMATION CONTACT: Yvonne B. Carter, or Louise V. Sutherland, U.S. Department of Education, 555 New Jersey Avenue, NW., room 404, Washington, DC 20208–5571. Telephone (202) 219–1315. Individuals who are hearing impaired may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 20 U.S.C. 1021, 1032.

Dated: December 8, 1992.

Diane Ravitch,

Assistant Secretary for Educational Research and Improvement.

[FR Doc. 92–30144 Filed 12–10–92; 8:45 am]

BILLING CODE 4000–01–M

[CFDA No 84.999F]

The National Assessment of Educational Progress (NAEP) Program; Notice Inviting Applications for New Awards for Fiscal Year 1993

Purpose of Program: To conduct data collection and prepare the sampling weights component for the 1994 National Assessment of Educational Progress (NAEP). NAEP supports the National Education Goals by providing measures of progress toward the Goals.

Eligible Applicants: Public, private, for-profit, and non-profit institutions, agencies, and other qualified organizations or consortia of such institutions, agencies, and organizations.

Deadline for Transmittal of Applicants: January 25, 1993.

Applications Available: December 11, 1992.

Available Funds: In fiscal year 1993, $1,400,000 will be available for the sampling, and data collection component. It is anticipated that in fiscal year 1994, a total of $5,000,000 will be available, and $900,000 in fiscal year 1995.

Estimated Number of Awards: 1.

Project Period: Up to 34 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) 34 CFR parts 74, 75, 77, 80, 81, 82, 85, 86; (b) The regulations in 34 CFR part 98 (Students Rights in Research, Experimental Activities, and Testing); and (c) 48 CFR part 31 (Contracts with Commercial Organizations).

SUPPLEMENTARY INFORMATION: The National Assessment of Educational Progress (NAEP) is authorized by section 406 of the General Education Provisions Act (20 U.S.C. 1221e–1), as amended by Public Law 100–297. This law provides for the establishment of the National Assessment Governing Board (NAGB). The law requires the NAGB, among other responsibilities, to formulate the policy guidelines for the National Assessment and select the subject areas to be assessed. The law further requires that the 1994 National Assessment of Educational Progress will assess 9-, 13-, and 17-year-olds and grades 4, 8, and 12 in reading, mathematics, science, U.S. history, and geography. A cooperative agreement is currently in operation to develop assessment instruments for the 1994 assessment.

This notice is limited to seeking applications for activities in connection with the National Assessment. The Secretary, however, continues strongly to support the idea of conducting assessments at the State level in 1994, as was done on a trial basis in 1990 and 1992. Although a consensus to authorize State assessments seemed to exist at the close of the last session of Congress, no law authorizing State assessments was enacted prior to adjournment. The Secretary remains hopeful that this

authority will be enacted promptly upon the return of Congress in early 1993. If legislation is approved, the Secretary intends an immediate and expeditious timetable to request applications or proposals and to make selections. This expedition will be required in order to execute the State assessments on a timely basis in 1994. Accordingly, those interested in submitting applications to do work on the State assessments are hereby placed on notice that they should be prepared to proceed at the fastest permissible speed if authorizing legislation is enacted upon Congress's return.

Priorities

Absolute Priority: Under 34 CFR 75.105(c)(3), the Secretary gives an absolute preference to applications that meet the following priority. The Secretary funds under this competition only applications that meet this absolute priority:

Collection of 1994 National Assessment of Educational Progress Data: The data collection for the 1994 NAEP authorized by section 406(i) of GEPA must be performed in accordance with guidelines developed by the NAGB.

Invitational Priority: Under 34 CFR 75.105(c)(1), the Secretary is particularly interested in applications that meet the following invitational priority. However, an application that meets this invitational priority does not receive competitive or absolute preference over other applications:

Conduct Transcript Study based upon graduating seniors in the 1994 NAEP sample.

SELECTION CRITERIA: Under 34 CFR 75.210(c), the Secretary is authorized to distribute an additional 15 points among the selection criteria to bring the total possible points to a maximum of 100 points. For the purpose of this competition, the Secretary will distribute the additional points as follows:

Plan of operation (34 CFR 75.210(b)(3)). Fifteen (15) additional points will be added for a possible total of 30 points for this criterion.

FOR APPLICATIONS OR INFORMATION CONTACT: Steve Gorman, U.S. Department of Education, 555 New Jersey Avenue, NW., room 308b, Washington, DC 20208–5653. Telephone: (202) 219–1937. Individuals who are hearing impaired may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 20 U.S.C. 1221e–1.

Dated: December 4, 1992.

Diane Ravitch,

Assistant Secretary for Educational Research and Improvement.

[CFDA No. 84.999G]

The National Assessment of Educational Progress (NAEP) Program; Notice Inviting Applications for New Awards for Fiscal Year 1993

Purpose of Program: To conduct the scoring, analysis, and reporting component for the 1994 National Assessment of Educational Progress (NAEP). This will consist of a national assessment. NAEP supports the National Education Goals by providing measures of progress toward the Goals.

Eligible Applicants: Public, private, for-profit, and non-profit institutions, agencies, and other qualified organizations or consortia of such institutions, agencies, and organizations.

Deadline for Transmittal of Applications: January 25, 1993.

Applications Available: December 11, 1992.

Available Funds: In fiscal year 1993, $600,000 will be available for the scoring, analysis, and reporting component. It is anticipated that in fiscal year 1994, a total of $8,000,000 will be available, and $2,800,000 available in fiscal year 1995.

Estimated Number of Awards: 1.

Project Period: Up to 34 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) 34 CFR parts 74, 75, 77, 80, 81, 82, 85, 86; (b) the regulations in 34 CFR part 98 (Students Rights in Research, Experimental Activities, and Testing); and (c) 48 CFR part 31 (Contracts with Commercial Organizations).

SUPPLEMENTARY INFORMATION: The National Assessment of Educational Progress (NAEP) is authorized by section 406 of the General Education Provisions Act (20 U.S.C. 1221e–1), as amended by Public Law 100–297. This law provides for the establishment of the National Assessment Governing Board (NAGB). The law requires the NAGB, among other responsibilities, to formulate the policy guidelines for the National Assessment and select the subject areas to be assessed. The law further requires that the 1994 National Assessment of Educational Progress will assess 9-, 13-, and 17-year-olds and grades 4, 8, and 12 in reading, mathematics, science, U.S. history, and geography. A cooperative agreement is currently in operation to develop assessment instruments for the 1994 assessment.

This notice is limited to seeking applications for activities in connection with the National Assessment. The Secretary, however, continues strongly to support the idea of conducting assessments at the State level in 1994, as was done on a trial basis in 1990 and 1992. Although a consensus to authorize State assessments seemed to exist at the close of the last session of Congress, no law authorizing State assessments was enacted prior to adjournment. The Secretary remains hopeful that this authority will be enacted promptly upon the return of Congress in early 1993. If legislation is approved, the Secretary intends an immediate and expeditious timetable to request applications or proposals and to make selections. This expedition will be required in order to execute the State assessments on a timely basis in 1994. Accordingly, those interested in submitting applications to do work on the State assessments are hereby placed on notice that they should be prepared to proceed at the fastest permissible speed if authorizing legislation is enacted upon Congress's return.

Priority

Absolute Priority: Under 34 CFR 75.105(c)(3), and section 406(i) of GEPA, the Secretary gives an absolute preference to applications that meet the following priority. The Secretary funds under this competition only applications that meet this absolute priority:

Scoring, Analysis and Reporting of Data from the 1994 National Assessment of Educational Progress.

The applicant must score, analyze and report data collected for reading, mathematics, science, geography and U.S. history in grades 4, 8, and 12 from a nationally representative sample. The data collected from the 1994 NAEP must be reported in order to increase the information available to educational policymakers and the general public regarding the educational achievement of American students. Section 406(i) requires the NAGB to develop the guidelines for the analysis and reporting of the NAEP results. The applicant must score, analyze and report in accordance with guidelines specified by the National Assessment Governing Board. Each report must be published and disseminated after completing the National Center for Educational Statistics (NCES) peer review procedure.

SELECTION CRITERIA: Under 34 CFR 75.210(c), the Secretary is authorized to

distribute and additional 15 points among the selection criteria to bring the total possible points to a maximum of 100 points. For the purpose of this competition, the Secretary will distribute the additional points as follows:

Plan of operation (34 CFR 75.210(b)(3)). Fifteen (15) additional points will be added for a possible total of 30 points for this criterion.

BILLING CODE 4000–01–M

Office of Postsecondary Education

Federal Perkins Loan, Federal Work-Study and Federal Supplemental Educational Opportunity Grant Programs: Closing Date for Institutions To File an Application for Institutional Eligibility and Certification for Participation in the Campus-Based Programs

AGENCY: Department of Education.

ACTION: Notice of the closing date for institutions to file an "Application for Institutional Eligibility and Certification" (ED Form E–40–34P, OMB #1840–0098) to participate in the Federal Perkins Loan, Federal Work-Study and Federal Supplemental Educational Opportunity Grant Programs for the 1993–94 Award Year.

SUMMARY: The Secretary invites currently ineligible institutions of higher education that filed a Fiscal Operations Report and Application to Participate (FISAP) (ED Form 646–1) in one or more of the "campus-based programs" for the 1993–94 award year to submit to the Secretary an "Application for Institutional Eligibility and Certification" and all documents required for an eligibility determination.

The campus-based programs are the Federal Perkins Loan Program, the Federal Work-Study Program, and the Federal Supplemental Educational Opportunity Grant Program and are authorized by title IV of the Higher Education Act of 1965, as amended. The programs support AMERICA 2000, the President's strategy for moving the Nation toward the national Education Goals, by enhancing opportunities for postsecondary education. The National Education Goals call for increasing the rate at which students graduate from high school and pursue high quality postsecondary education and for supporting life-long learning. The 1993–94 award year is July 1, 1993 through June 30, 1994.

DATES: *Closing Date for Filing Application and Required Documents.* To participate in a campus-based program in the 1993–94 award year, a currently ineligible institution must mail or hand-deliver its "Application for Institutional Eligibility and Certification" on or before January 11, 1993. The application along with all documents required for an eligibility determination must be submitted to the Institutional Participation Division at one of the addresses indicated below.

ADDRESSES: *Applications and Required Documents Delivered by Mail.* An institutional eligibility application and required documents delivered by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: IPD/IPOS/OPE, room 3633, Regional Office Building 3, 400 Maryland Avenue SW., Washington, DC 20202–4725.

An applicant must show proof of mailing consisting of one of the following: (1) A legibly dated U.S. Postal Service postmark; (2) a legible mail receipt with the date of mailing stamped by the U.S. Postal Service; (3) a dated shipping label, invoice or receipt from a commercial carrier; or (4) any other proof of mailing acceptable to the Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an institution should check with its local post office.

An applicant is encouraged to use registered or at least first class mail. Institutions that submit eligibility applications and required documents after the closing date will not be considered for funding under the campus-based programs for award year 1993–94.

Applications and Required Documents Delivered by Hand. An institutional eligibility application and required documents delivered by hand must be taken to the U.S. Department of Education, Application Control Center, room 3633, Regional Office Building 3, 7th and D Streets SW., Washington, DC. The Application Control Center will accept hand-delivered applications between 8:00 a.m. and 4:30 p.m. (Eastern Standard Time) daily, except Saturdays, Sundays and Federal holidays. An application for eligibility for the 1993–94 award year that is delivered by hand will not be accepted after 4:30 p.m. on the closing date.

SUPPLEMENTARY INFORMATION: Under the three campus-based programs, the Secretary allocates funds to eligible institutions of higher education. The Secretary will not allocate funds under the campus-based programs for award year 1993–94 to any currently ineligible institution unless the institution files its "Application for Institutional Eligibility and Certification" and other required documents by the closing date. If the institution submits its institutional eligibility and certification application or other required documents after the closing date, the Secretary will use this application in determining the institution's eligibility to participate in the campus-based programs beginning with the 1994–95 award year.

For purposes of this notice, ineligible institutions only include:

(1) An institution that has not been designated as an eligible institution by the Secretary, but has previously filed a FISAP.

(2) An off-campus site of an eligible institution that is currently not included in the Department's eligibility certification for that eligible institution, but has been included in the institution's 1993–94 FISAP.

(3) A branch campus that is currently part of an eligible institution, but has filed its own FISAP and is seeking eligibility as a separate institution of higher education.

The Secretary wishes to advise institutions that the insututional eligibility form, "Application for Institutional Eligibility and Certification," should not be confused with the FISAP form that institutions were required to submit electronically by October 1, 1992, in order to be considered for funds under the campus-based programs for the 1993–94 award year.

Applicable Regulations

The following regulations apply to the campus-based programs:

(1) Student Assistance General Provisions, 34 CFR part 668.

(2) Perkins Loan Program, 34 CFR part 674.

(3) College Work-Study Program, 34 CFR part 675.

(4) Supplemental Educational Opportunity Grant Program, 34 CFR part 676.

(5) Institutional Eligibility Under the Higher Education Act of 1965, as amended, 34 CFR part 600.

(6) New Restrictions on Lobbying, 34 CFR part 82.

(7) Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants), 34 CFR part 85.

(8) Drug-Free Schools and Campuses, 34 CFR part 86.

FOR FURTHER INFORMATION CONTACT: For information concerning designation of eligibility, contact Diane Sedicum, Acting Director, Institutional Participation Division, Office of Postsecondary Education, U.S. Department of Education, room 3030, Regional Office Building 3, 400 Maryland Avenue, SW., Washington, DC 20202–5242. Telephone: (202) 708–4906.

For technical assistance concerning the FISAP and/or other operational procedures of the campus-based programs, contact: Robert R. Coates, Director, Campus-Based Programs Financial Management Division, room 4621, Regional Office Building 3, 400 Maryland Avenue SW., Washington, DC 20202–5347. Telephone: (202) 708–9711. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., eastern standard time. Program Authority: 20 U.S.C. 1807 *et seq.*; 42 U.S.C. 2751 *et seq.*; and 20 U.S.C. 1070b *et seq.*

(Catalog of Federal Domestic Assistance, Federal Supplemental Educational Opportunity Grant Program, 84.007; Federal Work-Study Program, 84.033; Federal Perkins Loan Program, 84.037)

Dated: December 8, 1992.

Carolyna Reid-Wallace,

Assistant Secretary for Postsecondary Education

i. *FERC Contact:* Ms. Julie Bernt (202) 219–2814.

j. *Comment Date:* December 28, 1992.

k. *Description of Project:* Licenses were issued to the licensee to operate and maintain the Shelburn, Gorham, Cross, Cascade Sawmill and Riverside Project Nos. 2300, 2311, 2326, 2327, 2422, and 2423. The licensee intends to transfer the licenses to the transferee in order to facilitate a corporate merger. The transferee states that it would comply with all terms and conditions of the licenses.

1. The transfer application was filed within five years of the expiration of the licenses for Project Nos. 2300, 2311, 2326, 2327, and 2422. In Hydroelectric Relicensing Regulations Under the Federal Power Act (54 FR 23,756; FERC Statues and Regulations, Regulations Preambles 1986–1990 ¶ 30,854 at 31,437), the Commission declined to forbid license transfers during the last five years of an existing license, and instead indicated that it would scrutinize all such transfer requests to determine if the transfer's primary purpose was to give the transferee an advantage in relicensing (*id.* at p. 31,438 n. 318). Project Nos. 2300, 2311, 2326, 2327, 2422, and 2423 are subject to New License proceedings and the transfer will result in a substitution of the transferee for the licensee as applicant in the New License applications.

m. This notice also consists of the following standard paragraphs: B and C.

B. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "RECOMMENDATIONS FOR TERMS AND CONDITIONS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATIONS," "PROTEST" or "MOTION TO INTERVENE," as applicable, and the project number of the particular application to which the filing is in response. Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. An additional copy must be sent to: the Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, room 204–RB, at the above address. A copy of any notice of intent, competing application, or motion to intervene must also be served upon each representative of the applicant specified in the particular application.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

Office of Fossil Energy

[Docket No. FE C&E 92–19 & 92–20; Certification Notice—111]

Filing Certification of Compliance: Indeck-Corinth Ltd. Partnership et al.

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of filing.

SUMMARY: Indeck-Corinth Limited Partnership (C&E 92–19) and Turlock Irrigation District (C&E 92–20) have submitted coal capability self-certifications pursuant to section 201 of the Powerplant and Industrial Fuel Use Act of 1978, as amended.

ADDRESSES: Copies of the self-certification filings are available for public inspection upon request in the Office of Fuels Programs, Fossil Energy, room 3F–056, FE–52, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT: Ellen Russell at (202) 586–9624.

SUPPLEMENTARY INFORMATION: Title II of the Powerplant and Industrial Fuel Use Act of 1978 (FUA), as amended (42 U.S.C. 8301 *et seq.*), provides that no new baseload electric powerplant may be constructed or operated without the capability to use coal or another alternate fuel as a primary energy source. In order to meet the requirement of coal capability, the owner or operator of such facilities proposing to use natural gas or petroleum as its primary energy source shall certify, pursuant to FUA section 201(d), to the Secretary of Energy prior to construction, or prior to operation as a base load powerplant, that such powerplant has the capability to use coal or another alternate fuel. Such certification establishes compliance with section 201(a) on the day it is filed with the Secretary. The Secretary is required to publish a notice in the **Federal Register** that a certification has been filed. The following owners/operators of proposed new baseload powerplants have filed self-certifications in accordance with section 201(d).

Owner: Indeck-Corinth Limited Partnership, Buffalo Grove, Illinois
Operator: Indeck-Corinth Limited Partnership
Location: Corinth, New York
Plant Configuration: Combined cycle cogeneration
Capacity: 125 megawatts
Fuel: Natural gas
Purchasing Utilities: Consolidated Edison Company Edison Company
Expected In-Service Date: June, 1994

Owner: Turlock, Irrigation District, Turlock, California
Operator: Turlock Irrigation District
Location: Ceres, California
Plant Configuration: Combined cycle
Capacity: 49.9 megawatts
Fuel: Natural gas and L.P.G.
Purchasing Utilities: Turlock Irrigation District (100%)
Expected In-Service Date: November 1, 1994.

Issued in Washington, DC, on December 4, 1992.

Charles F. Vacek,
Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

[FR Doc. 92–30152 Filed 12–10–92; 8:45 am]
BILLING CODE 6450–01–M

[Docket No. FE C&E 92–18; Certification Notice—110]

Filing Certification of Compliance; Coal Capability of New Electric Powerplant, Powerplant and Industrial Fuel Use Act

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of filing.

SUMMARY: KIAC Partners has submitted a coal capability self-certification pursuant to section 201 of the Powerplant and Industrial Fuel Use Act of 1978, as amended.

ADDRESSES: Copies of the self-certification filing are available for public inspection upon request in the Office of Fuels Programs, Fossil Energy, room 3F–056, FE–52, Forrestal Building, 1000 Independence Avenue SW., Washington DC 20585.

FOR FURTHER INFORMATION CONTACT: Ellen Russell at (202) 586–9624.

SUPPLEMENTARY INFORMATION: Title II of the Powerplant and Industrial Fuel Use Act of 1978 (FUA), as amended (42 U.S.C. 8301 *et seq.*), provides that no new baseload electric powerplant may be constructed or operated without the capability to use coal or another alternate fuel as a primary energy source. In order to meet the requirement of coal capability, the owner or operator of such facilities proposing to use natural gas or petroleum as its primary energy source shall certify, pursuant to FUA section 201(d), to the Secretary of Energy prior to construction, or prior to operation as a base load powerplant, that such powerplant has the capability to use coal or another alternate fuel. Such certification establishes compliance with section 201(a) on the day it is filed with the Secretary. The Secretary is required to publish a notice in the **Federal Register** that a certification has been filed. The following owner/operator of a proposed new baseload powerplant has filed a self-certification in accordance with section 201(d).

Owner: KIAC Partners, c/o Airport Cogen Corp., Brooklyn, New York
Operator: CEA Kennedy Operators, Inc.
Location: JFK International Airport, Jamaica, New York
Plant Configuration: Combined cycle
Capacity: 100.7 megawatts
Fuel: Natural gas
Purchasing Utilities: The Port Authority—60%; Consolidated Edison Company—40%
Expected In-Service Date: April 30, 1994

Issued in Washington, DC on December 1, 1992.

Charles F. Vacek,
Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

Issuance of Decision of Orders

Office of Hearings and Appeals

During the Week of November 2 Through November 6, 1992

During the week of November 2 through November 6, 1992 the decisions and orders summarized below were issued with respect to appeals and applications for other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeals

Dale E. Wallace, 11/04/92, LFA–0247

Dale E. Wallace filed an Appeal from a determination issued by the Acting Director, Office of Communications, Department of Energy Field Office, Richland (DOE/RL), in response to a request for information submitted under the Privacy Act of 1974. In considering the Appeal, the DOE found: (1) Battelle Pacific Northwest Laboratories (Battelle), a DOE contractor who possessed the records sought by Wallace, is not an "agency" as defined in the Privacy Act; and (2) though Battelle is required under its contract to maintain three systems of records subject to the provisions of the Privacy Act, none of these systems of records contained documents responsive to Wallace's request. Accordingly, Wallace's Appeal was denied.

Haskell R. Brown, Jr., 11/06/92, LFA–0242

Haskell R. Brown, Jr. filed an Appeal from a Freedom of Information Act (FOIA) determination issued by the DOE's Office of Naval Reactors (ONR). In his Appeal, Mr. Brown challenged the adequacy of the search. In considering the Appeal, the DOE found that ONR's search was adequate under the FOIA and reasonably calculated to uncover responsive documents. The Appeal was therefore denied.

Knolls Action Project, 11/06/92, *KFA–0287*

The Knolls Action Project (KAP) filed an Appeal from a determination issued by the DOE's Office of Naval Reactors (ONR). In that determination, the ONR denied the KAP's request for information filed pursuant to the Freedom of Information Act (FOIA). The ONR denied portions of the KAP's request for information related to activities at the Knolls Atomic Power Laboratory pursuant to FOIA Exemptions 1, 3, 4, 5, and 6. In considering the Appeal, the DOE found that the determination to withhold the requested documents was consistent with the provisions of Exemption 5 and current classification guidelines. Accordingly, the DOE denied the KAP's Appeal.

Marylia Kelley, 11/06/92, *LFA–0244*

Marylia Kelley filed an Appeal from a Freedom of Information Act (FOIA) determination issued by the DOE's Office of Administrative Services (DOE–AS). In that Appeal, Ms. Kelley challenged the adequacy of the search. In considering the Appeal, the DOE found that the DOE–AS search was adequate under the FOIA and reasonably calculated to uncover responsive documents. The DOE also found that Ms. Kelley impermissibly broadened the scope of her initial request on Appeal. The Appeal was therefore denied.

Paul G. Richards, 11/05/92, *LFA–0145*

Paul G. Richards filed an Appeal from a denial by the Director of the Office of Classification, DOE Office of Security Affairs, of a request for information that he filed under the Freedom of Information Act (FOIA). In his Appeal, Dr. Richards challenged the Director's withholding of the yields of five underground nuclear tests conducted at the Nevada Test Site during 1979–1986. The test yields had been provided to the Soviet Union pursuant to the information exchange requirements under which the Joint Verification Experiment was conducted. Because the JVE Agreement precludes unilateral public dissemination of exchanged information, the requested data were classified as National Security Information under section 1.3(a)(5) of Executive Order 12356 (information concerning foreign relations or foreign activities), and therefore are exempt from mandatory disclosures under Exemption 1 of the FOIA. Accordingly, the Appeal was denied.

Refund Applications

Gulf Oil Corporation/Stewart & Stevenson Services, Inc., 11/02/92, RF300–20198

The DOE issued a Decision and Order concerning an Application for Refund submitted in the Gulf Oil Corporation special refund proceeding. This Application was filed by LK, Inc., a filing service, which had improperly submitted the Application without the applicant's written consent. Accordingly, the Application for Refund was denied.

Murphy Oil Corporation/Armstrong & Troutwine, Inc., 11/02/92, RF309–1147

This Decision and Order concerns the Application for Refund filed by F.P. Troutwine on behalf of Armstrong & Troutwine, Inc., in the Murphy Oil Corporation (Murphy) special refund proceeding. This closely held corporation, a retailer of Murphy gasoline and distillates during the refund period, was dissolved after the refund period, and the DOE was unable to locate Mr. Armstrong, Mr. Troutwine's partner. The Decision and Order determined that the refund should be divided equally between the two parties because Mr. Troutwine was unable to provide the firm's Articles of Dissolution or other documents detailing its stock ownership. Therefore, Mr. Troutwine was granted half the refund due to Armstrong & Troutwine, Inc. Mr. Armstrong is eligible to file a refund application for the other half of the refund. The total refund granted in this Decision and Order was $516 (comprised of $351 in principal and $165 in interest) based on 429,397 gallons of Murphy product.

Texaco Inc./BBS Construction, Inc., 11/06/92, RF321–19392

The DOE issued a Decision and Order rescinding an August 14, 1992 grant of an application for refund filed by Jim Pusley on behalf of BBS Construction, Inc., a consumer of Texaco products. Subsequently, on November 2, 1992, Wilson, Keller & Associates, a private filing service that submitted the application on behalf of Mr. Pusley, submitted evidence that the corporation was dissolved in 1985 and that Mr. Pusley was not the owner at the time of dissolution. The DOE found that Mr. Pusley was not entitled to a refund with respect to purchases made by BBS Construction, and accordingly rescinded the refund that has been granted to BBS.

Texaco Inc./Cook & Cooley, Inc., 11/02/92, RF321–14447

The DOE issued a Decision and Order denying an Application for Refund filed by Cook & Cooley, Inc. in the Texaco Inc. special refund proceeding. Subsequent to the filing of the application, the corporation sold its assets to Triton Fuel Group, Inc. The agreement regarding the sale transferred the right to any potential refunds in the Texaco proceeding. Consequently, the DOE determined that Cook & Cooley, Inc. was no longer eligible for a refund based on its purchases of Texaco products during the consent order period.

Texaco Inc./Wristen Texaco, Merced Mall Texaco, 11/05/92, RR321–55, RF321–18361, RF321–18362

The DOE issued a Decision and Order concerning a Motion for Reconsideration filed by Chester Bradley, an owner of Wristen Texaco. The DOE had previously denied two duplicate Applications for Refund filed by Bradley on behalf of Wristen Texaco because he had wrongly certified that he had not filed a duplicate application in the Texaco proceeding. The DOE found that Bradley was confused by the multiple application forms that he had received from Texas and from Federal Refunds, Inc., a private filing service, and that he did not intend to file duplicate applications. Consequently, the DOE granted the Motion for Reconsideration. For part of the time period that he operated Wristen Texaco, Bradley was a partner with Lee Wristen. Accordingly, his refund was based upon 100% of the volume of Texaco purchases during the period that he was a sole proprietor and 50% of the volume of Texaco purchases during the period that he was a partner.

Bradley had previously been granted a refund with respect to Merced Mall Texaco. However, it was subsequently discovered that he owned that station in a partnership with Lee Wristen. The DOE found that with respect to Merced Mall Texaco, Bradley should repay 50% of the amount of the refund that was attributable to the period of time that Lee Wristen was a partner. The DOE offset this repayment obligation by the amount of the refund that was approved for Wristen Texaco.

The DOE also granted a refund to Lee Wristen based upon his share of the purchases by these two stations.

Refund Applications

The Office of Hearings and Appeals issued the following Decisions and Orders concerning refund applications, which are not summarized. Copies of the full texts of the Decisions and Orders are available in the Public Reference Room of the Office of Hearings and Appeals.

BILLING CODE 6450–01–M

ENVIRONMENTAL PROTECTION AGENCY

[ER–FRL–4544–2]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared November 23, 1992 though November 27, 1992 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 260–5076.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 10, 1992 (57 FR 12499).

Draft EISs

ERP No. D–FHW–B40073–MA Rating EC2, MA–146/Massachusetts Turnpike Interchange Project, Improvements from MA–146 between I–290 at Brosnihan Square in Worcester and MA–122A in Millbury, Funding, COE section 404 Permit and EPA NPDES Permit, Cities of Worcester and Millbury, Worcester County, MA.

Summary: EPA expressed concern regarding wetland impact; water supply resources; hazardous wastes and air quality. EPA requested additional information be included in the FEIS.

ERP No. D–FHW–H40146–MO Rating EC2, Ozark Mountain Highroad Corridor Construction from existing US 65/MO–F north of Branson, then south across Lake Taneycomo to another intersection with US 65 south of Branson, Funding, COE section 10 and 404 Permits and Coast Guard Bridge Permit, Taney and Stone Counties, MO.

Summary: EPA agreed in general with the preferred alternative, it requested additional information regarding water quality and secondary development impacts.

Final EISs

ERP No. F–BLM–K61119–CA Redding Resource Area, Land and Resource Management Plan, Implementation, Ukiah District, Butte, Shasta, Siskiyou, Tehama and Trinity Counties, CA.

Summary: EPA had no objections to the proposed project.

ERP No. F–BOP–E81033–MS Yazoo City, Mississippi Federal Correctional Complex, Construction and Operation, Possibly Consisting of a High Security U.S. Penitentiary, Medium Security Federal Correctional Institution and Minimum Security Federal Prison, Site Selection and Possible COE section 404 Permit, Yazoo City, Yazoo County, MS.

Summary: EPA concerns have been adequately addressed.

Dated: December 8, 1992.

William D. Dickerson,

Deputy Director, Office of Federal Activities.

BILLING CODE 6560–50–M

[ER-FRL-4544-3]

Supplemental Environmental Impact Statement; National Pollutant Discharge Elimination System Permitting of New Sources in the Eastern and Central Gulf of Mexico

AGENCY: Environmental Protection Agency (EPA).

ACTION: EPA anticipates issuance of a new source NPDES general discharge permit for effluent discharges from oil and gas operations to territorial waters of the United States in the Outer Continental Shelf (OCS) of the eastern and central Gulf of Mexico.

ADMINISTRATIVE HISTORY: In August 1990, Mineral Management Services (MMS) issued a final environmental impact statement (FEIS) as a result of the Proposed Western, Central and Eastern Gulf of Mexico OCS Oil and Gas Lease Sales 131, 135, and 137. Also, in November 1992, MMS issued a FEIS as a result of the Proposed Central and Western Gulf of Mexico OCS Lease Sales 142 and 143. EPA is a Cooperating Agency on this FEIS. This Cooperating Agency status will help to avoid duplication of effort in fulfilling National Environmental Policy Act (NEPA) responsibilities for permitting new sources in the eastern and central Gulf of Mexico.

SUMMARY: EPA will be issuing New Source Performance Standards for the offshore subcategory of the "Oil and Gas Extraction Point Source" category, in January 1993. Region IV EPA will prepare the SEIS on issuance of a NPDES General Permit for discharges within its jurisdictional areas in the OCS of the Gulf of Mexico areas of Florida, Alabama and Mississippi. The SEIS will address the effects of discharges from OCS oil and gas activities that are considered as "New Sources" thus requiring NPDES permits. In accordance with Council on Environmental Quality (CEQ) NEPA regulations (40 CFR parts 1500–1508) EPA intends to adopt portions of the 1992 MMS FEIS on Lease Sales 142 and 143 and will incorporate portions of the 1990 FEIS on Lease Sales 131, 135, and 137. EPA has conducted an independent review of both documents and will supplement adopted or incorporated sections as necessary. EPA will prepare, circulate, and file the SEIS in the same fashion (exclusive of scoping) as a draft and final EIS.

Alternatives

Possible outcomes of the NEPA process include General NPDES Permit issuance with NSPS, non-issuance of the permit, or permit issuance with other conditions.

Role of Public

Participation in the SEIS process is invited from individuals, organizations, and all governmental agencies. EPA will consider all comments concerning the scope of the SEIS and relevant issues will be addressed in the SEIS as appropriate. Written comments on the scope and issues of this action will be accepted by Heinz Mueller at the address listed below until January 19, 1993. For further information or to be placed on the mailing list contact David Melgaard, USEPA Region 4, FAB/4–OCSEIS, 345 Courtland Street, Atlanta, Georgia 30365; (404) 347–3776. Estimated Release Date of draft SEIS: March 1993. Responsible Official: Greer C. Tidwell, Regional Administrator.

Dated: December 8, 1992.

William D. Dickerson,

Deputy Director, Office of Federal Activities.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–4544–6]

Science Advisory Board, Radiation Advisory Committee, Open Conference Call Meeting

Under Public Law 92–463, notice is hereby given that the Radiation Advisory Committee (RAC) of the Science Advisory Board of EPA will conduct a conference call meeting Thursday December 17, 1992 at 4:30 p.m. The meeting is open to the public.

At this meeting, the Committee will conduct a consultation on EPA's plans for a study addressing the "risk of adverse human health effects associated with exposure to various pathways of radon" as required under Safe Drinking Water Act Implementation, published in the Congressional Record September 25, 1992. The Committee plans to conduct a review of the final Agency product at an open meeting tentatively scheduled for April 26–27, 1993. This is the fourth in a series of conference call meetings on this subject and will concentrate on parameters for the uncertainty analysis. Members of the public who wish to receive a copy of the material prepared by the Agency should contact Nancy Chiu at (202) 260–7587.

For additional information concerning this meeting or to obtain an agenda, please contact Mrs. Dorothy Clark, Staff Secretary, Radiation Advisory Committee, Science Advisory Board (A–101–F), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Phone: (202) 260–6552; Fax: (202) 260–7118. Anyone wishing to provide public comment for the meeting should contact Mrs. Kathleen Conway, Designated Federal Official, Science Advisory Board, at the address and phone numbers given above, no later than December 14 and be prepared to fax their materials to the participants. Opportunities for oral comment will be limited to no more than five minutes per speaker and no more than fifteen minutes it total. A fixed number of conference lines have been reserved for the meeting.

Dated: December 3, 1992.

A. Robert Flaak,

Acting Staff Director, Science Advisory Board.

BILLING CODE [illegible]

FEDERAL COMMUNICATIONS COMMISSION

[CC Docket No. 92–77 FCC No. 92–465]

Billed Party Preference for 0+ InterLATA Calls

AGENCY: Federal Communications Commission.

ACTION: Statement of policy.

SUMMARY: This action directs AT&T to change its current practices by revising its network access instructions to holders of its proprietary calling cards. Specifically, the Order directs AT&T to educate its cardholders to check public phone notices and to use the 0+ form of access only at public phones identified as presubscribed to AT&T; to provide clear and accurate access code dialing instructions on every proprietary card issued; and make its 800 access code number easier to use.

EFFECTIVE DATE: January 11, 1993.

FOR FURTHER INFORMATION CONTACT: Barbara Esbin, 202–632–6917.

SUPPLEMENTARY INFORMATION: On October 8, 1992 the Commission adopted a Report and Order and Request for Supplemental Comment (Report and Order) in CC Docket 92–77, Phase I, FCC No. 92–465, released November 6, 1992 In the Report and Order, the Commission considered certain interexchange carrier (IXC) calling card practices in the first phase of its "billed party preference" (BPP) proceeding. In Phase I, the Commission considered the need to take immediate action in response to alleged competitive problems resulting from the use of AT&T proprietary calling cards with the 0+ form of access, pending its consideration of the costs and benefits of a BPP-routing methodology for 0+ dialed interLATA calls. The Order directs AT&T to make certain changes in its dialing instructions to its proprietary cardholders, to educate its customers on access code dialing and to make its 800 access code number easier to use. The full text of the Commission's Order is available for public inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this Order may also be purchased from the Commission's copy contractor, Downtown Copy Center, (202) 452–1422, suite 640, 1990 M Street, NW., Washington, DC 20554.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

BILLING CODE [illegible]

Applications for Consolidated Hearing

1. The Commission has before it the following mutually exclusive applications for a new FM station.

Applicant, city and state	File No.	MM docket No.
A. Russ Robinson; Richwood, LA.	BPH–910626ML	92–265
B. Barbara Dawson-Monk, d/b/a/ Urban Network Communications; Richwood, LA.	BPH–910626MM	

2. Pursuant to section 309(e) of the Communications Act of 1934, as amended, the above applications have been designated for hearing in a consolidated proceeding upon the issues whose headings are set forth below. The text of each of these issues has been standardized and is set forth in its entirety under the corresponding heading at 51 FR 19,347, May 29, 1986. The letter shown before each applicant's name, above, is used below to signify whether the issue in question applies to that particular applicant.

Issue Heading and Applicants

1. Contingent Environmental—A
2. Comparative—A, B
3. Ultimate—A, B

3. If there are any non-standardized issues in this proceeding, the full text of

the issue and the applicants to which it applies are set forth in an Appendix to this Notice. A copy of the complete HDO in this proceeding is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text may also be purchased from the Commission's duplicating contractor, Downtown Copy Center, 1114 21st Street, NW., Washington, DC 20036 (telephone 202–452–1422).

W. Jan Gay,

Assistant Chief, Audio Services Division, Mass Media Bureau.

BILLING CODE 4160–15–M

National Institutes of Health

National Institute of Allergy and Infectious Diseases; Meeting: Microbiology and Infectious Diseases Research Committee

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the Microbiology and Infectious Diseases Research Committee, National Institute of Allergy and Infectious Diseases, on February 25–26, 1993, in Building 31C, Conference Room 10, at the National Institutes of Health, Bethesda, Maryland 20892.

The meeting will be open to the public from 8 a.m. to 10 a.m. on February 25, to discuss administrative details relating to committee business and for program review. Attendance by the public will be limited to space available. In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), title 5, U.S.C. and section 10(d) of Public Law 92–463, the meeting will be closed to the public for the review, discussion, and evaluation of individual grant applications and contract proposals from 10 a.m. until recess on February 25, and from 8 a.m. until adjournment on February 26. These applications, proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications and proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Patricia Randall, Office of Research Reporting and Public Response, National Institute of Allergy and Infectious Diseases, Building 31, room 7A32, National Institutes of Health, Bethesda, Maryland 20892, telephone 301–496–5717, will provide a summary of the meeting and a roster of the committee members upon request.

Dr. Peter R. Jackson, Scientific Review Administrator, Microbiology and Infectious Diseases Research Committee, NIAID, NIH, Solar Building, room 4C13, Rockville, Maryland 20892, telephone 301–496–8426, will provide substantive program information.

BILLING CODE 4140–01–M

National Institute of Dental Research; Meeting of the National Advisory Dental Research Council

Pursuant to Public Law 92–463, notice is hereby given of a meeting of the National Advisory Dental Research Council, National Institute of Dental Research, to be held January 25–26, 1993, Conference Room 10, Building 31C, National Institutes of Health, Bethesda, Maryland. This meeting will be open to the public from 9 a.m. to adjournment on January 26 for general discussion and program presentations. A meeting of the National Advisory Dental Research Council Subcommittee on Minority Activities will be held on January 25 from 3 p.m. until adjournment at the same location. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), title 5, U.S.C. and section 10(d) of Public Law 92–463, the meeting of the Council will be closed to the public on January 25 from 9 a.m. to recess for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dr. Dushanka V. Kleinman, Executive Secretary, National Advisory Dental Research Council, and Deputy Director, National Institute of Dental Research, National Institutes of Health, Building 31, room 2C39, Bethesda, Maryland 20892, (telephone 301–496–9469) will furnish a roster of committee members, a summary of the meeting, and other information pertaining to the meeting.

National Institute of Child Health and Human Development; Meeting of the National Advisory Child Health and Human Development Council

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the National Advisory Child Health and Human Development Council, January 25–26, 1993. The meeting will be held in Building 31, Conference Room 6, National Institutes of Health, Bethesda, Maryland. The meeting of the Subcommittee on Planning will be held on January 25 in Building 31, room 2A03.

The Council meeting will be open to the public on January 25 from 9:30 a.m. until 5 p.m. The agenda includes a report by the Director, NICHD, and a report by the Mental Retardation and Developmental Disabilities Branch, NICHD. The meeting will be open on January 26 immediately following the review of applications if any policy issues are raised which need further discussion. The Subcommittee meeting will be open on January 25 from 8 a.m. to 9:30 a.m. to discuss program plans and the agenda for the next Council meeting. Attendance by the public will be limited to space available.

In accordance with the provision set forth in sections 552b(c)(4) and 552b(c)(6), title 5, U.S.C. and section 10(d) of Public Law 92–463, the meeting of the full Council will be closed to the public on January 26 from 8 a.m. to completion of the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Mary Plummer, Executive Secretary, NICHD, 6100 Executive Boulevard, room 5E03, National Institutes of Health, Bethesda, Maryland 20892, Area Code 301, 496–1485, will provide a summary of the meeting and a roster of Council members as well as substantive program information.

BILLING CODE 4140–01–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

[Docket No. N–92–1917; FR–3350–N–09]

Federal Property Suitable as Facilities To Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

ADDRESSES: For further information, contact James N. Forsberg, room 7262, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410; telephone (202) 708–4300; TDD number for the hearing- and speech-impaired (202) 708–2565 (these telephone numbers are not toll-free), or call the toll-free title V information line at 1–800–927–7588.

SUPPLEMENTARY INFORMATION: In accordance with 56 FR 23789 (May 24, 1991) and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless* v. *Veterans Administration*, No. 88–2503–OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this notice. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to Judy Breitman, Division of Health Facilities Planning, U.S. Public Health Service, HHS, Room 17A–10, 5600 Fishers Lane, Rockville, MD 20857; (301) 443–2265. (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 56 FR 23789 (May 24, 1991).

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1–800–927–7588 for detailed instructions or write a letter to James N. Forsberg at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including ZIP code), the date of publication in the **Federal Register**, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: *U.S. Army:* Robert Conte, Dept. of Army, Military Facilities, DAEN–ZCI–P; room 1E671, Pentagon, Washington, DC 20310–2600; (703) 693–4583; *Corps of Engineers:* Gary B. Paterson, Chief, Base Realignment and Closure Office, Directorate of Real Estate, 20 Massachusetts Avenue, NW., room 4133, Washington, DC 20314–1000; (202) 272–0520; *U.S. Air Force:* Bob Menke, USAF, Bolling AFB, SAF–MIIR, Washington, DC 20332–5000; (202) 767–6235; *GSA:* Ronald Rice, Federal Property Resources Services, GSA, 18th and F Streets, NW., Washington, DC 20405; (202) 501–0067; *Dept. of Transportation:* Ronald D. Keefer, Director, Administrative Services & Property Management, DOT, 400 Seventh Street, SW., room 10319, Washington, DC 20590; (202) 366–4246; *Dept. of Interior:* Lola D. Knight, Property Management Specialist, Dept. of Interior, 1849 C Street, NW., Mailstop 5512–MIB, Washington, DC 20240; (202) 208–4080; *Dept. of Agriculture:* Marsha Pruitt, Realty Officer, USDA, South Building, room 1566, 14th and Independence Aveune, SW., Washington, DC 20250; (202) 3338; (These are not toll-free numbers).

Dated: December 4, 1992.

Randall H. Erben,

Acting Assistant Secretary.

Title V, Federal Surplus Property Program Federal Register Report for 12/11/92

California—Fort Ord

Fort Ord is located 7 miles north of the City of Monterey and 120 miles southeast of San Francisco, California 93941–5000. The installation is scheduled for closure on or about September 1995. Properties shown below as suitable/available will be available at that time. The Army Corps of Engineers has advised HUD that some properties may be available for interim lease for use to assist the homeless prior to that date.

The installation consists of approximately 26,720 acres and 14 million square feet of permanent facilities that have been reviewed by HUD for suitability for use to assist the homeless. The properties that HUD has determined suitable and which are available include various types of housing; office and administrative buildings; recreational, maintenance and storage facilities; and other more specialized structures.

For specific information concerning Fort Ord, please contact Commander, 7th ID, Attn: AFZW–RM (LTC Anderson), Fort Ord, California 93941–5000.

Suitable/Available Properties

Property Number: 329210039
Type Facility: Housing—1431 family houses; majority are 2-story.

Property Number: 329210040

New Jersey—Fort Dix

Fort Dix is located in the eastern edge of Burlington County, and part of the western edge of Ocean County, New Jersey. It is approximately 17 miles southeast of Trenton, New Jersey. The installation is scheduled for realignment on or about October 1, properties may be available for interim lease for use to assist the homeless prior to that date.

In particular, the Sheridanville Family Housing complex will be available on or about December 31, 1992. The Sheridanville complex is located on Sailors Pond Road, approx. 1 mile east of State Highway 68.

The Kennedy Courts Family Housing complex is located at the corner of Pemberton-Pointville and Juliustown Roads, approx. 1 mile southeast of County Route 616 (Pemberton-Wrightstown Road). It is not available for homeless assistance use at this time. The majority of the base is being retained for Federal use.

Both complexes contain various types of housing, service stores, maintenance buildings, miscellaneous buildings and other more specialized structures.

For specific information concerning Fort Dix, please contact U.S. Army Training Center, Attn: ATZD–EHP, Jean M. Johnson, Fort Dix, NJ 08640–5506.

Office of Administration

[Docket No. N–92–3549]

Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: Angela Antonelli, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Kay F. Weaver, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street,

SW., Washington, DC 20410, telephone (202) 708–0050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Ms. Weaver.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: December 4, 1992.

Kay Weaver,

Acting Director, IRM Policy and Management Division.

Proposal: HOME Regulations-Interim Rule (Amendments) (FR–2937).

Office: Office of the Secretary.

Description of the Need for the Information and Its Proposed Use: This interim rule amends the December 16, 1991, HOME Program interim rule. The amendments provide additional guidance, make technical corrections and make substantive changes necessary for successful operation of the Program.

Form Number: HUD–40093, 40094/A, 40095/A, 40096/A, 40097/A, 40098/A, 40099, 40100/A and 40107.

Respondents: State or local governments and non-profit institutions.

Frequency of Submission: Annually and on occasion.

Reporting Burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
Information Collection	814		50		.8339		33,940
Recordkeeping	814		1		64.168		52,233

Total Estimated Burden Hours: 86,173.

Status: Revision.

Contact: Ginny Sardone, HUD, (202) 708–2470; Angela Antonelli, OMB, (202) 395–6880.

BILLING CODE 4210–01–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[CA–060–5440–10 B021]

Availability of Draft Environmental Impact Report/Environmental Impact Statement for Rail-Cycle Bolo Station Landfill, San Bernardino County

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: Notice is hereby given that a joint draft Environmental Impact Report/Impact Statement (EIR/EIS) has been prepared by the Bureau of Land Management and the County of San Bernardino for the proposed Bolo Station Class III landfill. The proposed federal action analyzes the environmental affects of a land exchange for 2.5 sections, a right-of-way and a plan amendment to the California Desert Plan.

SUPPLEMENTARY INFORMATION: Of the 2.5 sections of public land proposed for exchange, 1.5 sections is designated Multiple Use Class L (Limited Use) under the California Desert Plan. The proposed use of the 1.5 section for a landfill is not consistent with the guidelines of the Desert Plan, and the proposed amendment would designate the subject land, Multiple Use Class M, permitting an exchange. The proposed private lands (3 sections) to be exchanged for the Bolo Station public land contain tortoise habitat, recreational value and land in the East Mojave National Scenic Area.

Rail-Cycle, a partnership of Waste Management of North America and the Atchison, Topeka and Santa Fe Railroad Co., has proposed a waste-by-rail landfill facility. The proposed project would involve 4800 acres of which 2100 acres would be utilized for the landfill and ancillary facilities. Refuse would be sorted and recyclable material removed at Materials Recovery Facility (MRF), located in southern California. The remaining material would be packed into containers and transported by train to the Bolo Station facility, located between Amboy and Cadiz, south of US Route 66, and about 35 miles northeast of the City of Twentynine Palms. The proposed facility anticipates that within five to seven years, processed waste would total 21,000 tons per day and utilize seven trains. The proposed facility would be open 60 to 100 years and contain a maximum of 430 million tons of waste. Two alternatives beside the proposed action are considered. The EIS/EIR analyzes the effects of the proposed action on such environmental issues as water and air quality, minerals, and visual resources among other resources.

DATES: Owing to a proposed plan amendment, there is a 90 day public review period, and written comments will be accepted until March 3, 1993. Public hearings will be held on the following dates at 7 p.m.: February 8, 1993, Holiday Inn, 1511 E. Main St., Barstow, CA; February 10, 1993, Twentynine Palms High School, Multipurpose Room, 72750 Wildcat Way, Twentynine Palms, CA; February 11, 1993, San Bernardino County Government Center, Hearing Chambers, 385 North Arrowhead Ave., San Bernardino, CA.

ADDRESSES: Written comments will be accepted until March 3, 1993 and should be addressed to: County of San Bernardino, Planning Department, 385 N. Arrowhead Ave., Third Floor, San Bernardino, CA 92415–0182, Attn: Mr. Randy Scott.

Dated: December 4, 1992.

Bonnie R. Johnson,

Acting District Manager.

[FR Doc. 92–30083 Filed 12–10–92; 8:45 am]

BILLING CODE 4310–40–M

[ID-943-4210-06; IDI-15597]

Notice of Proposed Continuation of Withdrawal; ID

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Land Management proposes that a 2,333.90 acre withdrawal for Powersite Reserve No. 521, continue for an additional twenty years. The land is still needed for waterpower purposes. These lands will remain closed to surface entry, but have been and will remain open to mineral leasing and mining.

EFFECTIVE DATE: Comments should be received on or before March 11, 1993.

FOR FURTHER INFORMATION CONTACT: Larry R. Lievsay, Idaho State Office, BLM, 3380 Americana Terrace, Boise, Idaho 83706, (208) 384–3166.

The Bureau of Land Management proposes that the existing land withdrawal made by the Executive Order dated February 15, 1916, be continued for a period of 20 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, insofar as it affects the following described land:

Boise Meridian

T. 3 N., R. 41 E.,
- sec. 8, lots 1, 6 and 8;
- sec. 9, lots 2, 3, 4 and 8, W½NW¼, NE¼SW¼ and SW¼SE¼;
- sec. 10, lots 1 and 2 and SE¼SW¼;
- sec. 11, lots 3 and 4;
- sec. 14, lot 4;
- sec. 15, lots 1, 2, 5, 6, 7 and 8, NW¼NW¼ and SE¼NE¼.

T. 3 N., R. 42 E.,
- sec. 4, lot 5;
- sec. 5, lots 8 to 10 inclusive;
- sec. 7, lots 5 and 6;
- sec. 9, lots 2, 3, 6 and 7 and SW¼NW¼;
- sec. 10, lots 5 to 7 inclusive and SE¼SW¼;
- sec. 13, lots 5 and 6;
- sec. 14, lot 5, S½NE¼ and NE¼SE¼;
- sec. 15, lots 1 and 2 and SE¼NE¼;
- sec. 23, NE¼NE¼
- sec. 24, lots 1 to 4 inclusive and S½N½.

T. 3 N., R. 43 E.,
- sec. 19, lots 3, 6 and 7;
- sec. 30, lots 3, 4, 5, 8 and 11, NE¼SW¼ and SW¼SE¼;
- sec. 31, lots 2, 7 and 8, NW¼NE¼, SE¼SW¼, N½SE¼ and SE¼NE¼;
- sec. 32, lots 2 and 5.

The areas described aggregate 2,333.90 acres in Bonneville County.

The withdrawal is essential for protection of potential waterpower development. The existing withdrawal closes the described land to surface entry but not to mineral leasing and mining. No change in the segregative effect or use of the land is proposed by this action.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuation may present their views in writing to the Idaho State Director at the above address.

The authorized officer of the Bureau of Land Management will undertake such investigations as necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President and Congress, who will determine whether or not the withdrawal will be continued; and if so, for how long. The final determination of the withdrawal will be published in the **Federal Register**. The existing withdrawal will continue until such determination is made.

Dated: December 4, 1992.

William E. Ireland,

Chief, Realty Operations Section.

[FR Doc. 92–30084 Filed 12–10–92; 8:45 am]

BILLING CODE 4310-GG-M

National Park Service

Adoption of the Page Avenue Extension Environmental Impact Statement

SUMMARY: This notice is published to advise interested parties of the National Park Service's (NPS) adoption of the Page Avenue Extension Final Environmental Impact Statement (FEIS), St. Louis and St. Charles counties, Missouri, pursuant to Council on Environmental Quality regulations § 1506.3(c), for use in a Land and Water Conservation Fund (L&WCF) Act, as amended, section 6(f)(3) conversion request from the Missouri Department of Natural Resources.

SUPPLEMENTARY INFORMATION: The Federal Highway Administration recently completed the FEIS for the Page Avenue Extension project in St. Charles and St. Louis counties. The FEIS was filed with the Environmental Protection Agency and noticed in the **Federal Register** on December 4, 1992. This highway project, in addition to providing an additional crossing of the Missouri River, will also impact Creve Coeur Lake Memorial Park. In crossing the park, the proposed route will impact 183.4 acres, resulting in the conversion and necessary replacement of this land in accordance with section 6(f)(3) of the L&WCF Act of 1965, as amended. As a cooperating agency in the development of this FEIS and after an independent review of the statement, the NPS concludes that its comments and suggestions have been satisfied. Therefore, the NPS adopts this FEIS for use in the environmental evaluation requirements as identified in section 6(f)(3) of the L&WCF Act.

FOR FURTHER INFORMATION CONTACT: Clay McDermeit, Chief, Western Heartlands Division, Recreation Assistance Programs, National Park Service, Midwest Region, 1709 Jackson Street, Omaha, Nebraska 68102, (402) 221–3203.

Dated: December 2, 1992.

Don H. Castleberry,

Regional Director, Midwest Region.

Mississippi River Corridor Study Commission Meeting

AGENCY: National Park Service, Interior.

ACTION: Notice of meeting.

SUMMARY: This notice sets the schedule for the forthcoming meeting of the Mississippi River Corridor Study Commission. Notice of this meeting is required under the Federal Advisory Committee Act.

DATES & TIME: February 1, 1993, 2:30 p.m. to 5 p.m. February 2, 1993, 8 a.m. until business completed.

ADDRESSES: Harry S. Truman State Office Building Conference Room 490, 301 West High, Jefferson City, Missouri.

The business meeting will be open to the public. Space and facilities to accommodate members of the public are limited and persons will be accommodated on a first-come, first-served basis. The Chairman will permit attendees to address the Commission, but may restrict the length of presentations. An agenda will be available from the National Park Service, Midwest Region, 1 week prior to the meeting.

FOR FURTHER INFORMATION CONTACT: David N. Given, Associate Regional Director, Planning and Resources Preservation, National Park Service, Midwest Region, 1709 Jackson Street, Omaha, Nebraska 68102, (402) 221–3082.

SUPPLEMENTARY INFORMATION: The Mississippi River Corridor Study Commission was established by Public Law 101–398, September 28, 1990.

Dated: December 3, 1992.

Don H. Castleberry,

Regional Director, Midwest Region.

BILLING CODE 4310-70-M

INTERSTATE COMMERCE COMMISSION

[Ex Parte No. 55; Sub-No. 92]

Compliance Procedures

AGENCY: Interstate Commerce Commission.

ACTION: Policy statement.

SUMMARY: The Commission is reinstating its prior policy that an applicant for new motor, water, broker, or freight forwarder operating authority generally must comply with the applicable insurance or surety bond, tariff, and process agent requirements within a specified period of time. The procedural change is necessitated by the large number of unclosed files that have accumulated because the applicants have never effected compliance, and is intended to alleviate the current burden on Commission resources in maintaining these files.

EFFECTIVE DATE: December 11, 1992.

FOR FURTHER INFORMATION CONTACT: Julia Farr (202) 927–7513. [TDD for hearing impaired: (202) 927–5721]

SUPPLEMENTARY INFORMATION: The Commission is reinstating its prior policy that an applicant for new motor, water, broker, or freight forwarder operating authority generally must comply with the applicable insurance or surety bond, tariff, and process agent requirements within a specified period of time.

In the early 1980's, the Commission had eliminated the practice of requiring an applicant to effect compliance within a specific time period. Since then, however, over 16,000 files have accumulated for applicants granted authority more than a year ago, who have not complied with the terms of the grant and may never comply. The number of files awaiting compliance continues to increase and imposes a heavy burden on the Commission's limited resources, thus necessitating some resolution.

Effective upon publication of this policy statement, all new grants of authority will include the requirement that compliance be effected within 180 days. An applicant may seek a waiver of the 180-day compliance requirement, but such requests will only be granted on a showing of good cause. This procedure should allow applicants a sufficient amount of time to comply, while at the same time providing for relief in appropriate circumstances. If an applicant timely complies, the Commission will issue an appropriate certificate, permit, or license. If an applicant fails to comply or obtain a waiver within the 180-day period, the grant of authority will be, by its own terms, void and the application dismissed for want of prosecution.

As we have noted, several thousand applicants that were granted authority more than 180 days ago have not achieved compliance. As to these applicants, and any other applicants that were granted authority before publication of this policy statement, but that do not effect compliance within 180 days of their grant of authority, we will systematically issue a decision tentatively dismissing the application for want of prosecution. To afford each such applicant one final chance to effect compliance, each dismissal decision will not take effect for 60 days. If, within 60 days from the date of service of the dismissal decision, the applicant achieves compliance, then the application will not be dismissed for want of prosecution.

Authority: 5 U.S.C. 551(a); 5 U.S.C. 553; 5 U.S.C. 559; 16 U.S.C. 1456; 49 U.S.C. 10101; 49 U.S.C. 10305; 49 U.S.C. 10321; 49 U.S.C. 10921; 49 U.S.C. 10922; 49 U.S.C. 10923; 49 U.S.C. 10924; 49 U.S.C. 10928; 49 U.S.C. 11102.

Dated: December 2, 1992.

By the Commission, Chairman Philbin, Vice Chairman McDonald, Commissioners Simmons and Phillips.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035–01–M

[Docket No. AB–167 (Sub-No. 1104X)]

Consolidated Rail Corporation—Abandonment Exemption—In Clearfield County, PA

Consolidated Rail Corporation (Conrail) filed a notice of exemption under 49 CFR Part 1152 subpart F—*Exempt Abandonments* to abandon approximately 4.5-miles of line in Clearfield County, PA. The segment to be abandoned, the Mills Industrial Track (a.k.a. Moshannon Industrial Track), extends from a point approximately 1,800 feet west of State Route 53 at Osceola Mills, at approximately milepost 24.5, to approximately 1,750 feet north of the Beaver Branch Creek at West Moshannon, at approximately milepost 29.0.

Conrail has certified that: (1) No local or overhead traffic has moved over the line for at least 2 years; and (2) no formal complaint filed by a user of rail service on the line (or a State or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or with any U.S. District Court or has been decided in favor of the complainant within the 2-year period. Conrail has complied with the requirements at 49 CFR 1105.12 (newspaper publication) and 49 CFR 1152.50(d)(1) (notice to governmental agencies).

As a condition to this exemption, any employee affected by the abandonment shall be protected under *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

Provided no formal expression of intent to file an offer of financial

assistance has been received, this exemption will be effective on January 11, 1993, unless stayed or a formal expression of intent to file an offer of financial assistance (OFA) is filed. Petitions to stay that do not involve environmental issues,[1] formal expressions of intent to file an offer of financial assistance under 49 CFR 1152.27(c)(2),[2] and trail use/rail banking statements under 49 CFR 1152.29 must be filed by December 21, 1992.[3] Petitions to reopen or requests for public use conditions under 49 CFR 1152.28 must be filed by December 31, 1992, with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representatives: Robert S. Natalini, Consolidated Rail Corporation, Two Commerce Square, 2001 Market Street, P.O. Box 41416, Philadelphia, PA 19101–1416.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio*.

Applicant has filed an environmental report which addresses environmental or energy impacts, if any, on the environment and historic resources.

The Section of Energy and Environment (SEE) will issue an environmental assessment (EA) by December 16, 1992. Interested persons may obtain a copy of the EA from SEE by writing to it (room 3219, Interstate Commerce Commission, Washington, DC 20423) or by calling Elaine Kaiser, Chief, SEE at (202) 927–6248. Comments on environmental and energy concerns must be filed within 15 days after the EA becomes available to the public.

Environmental, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Decided: December 3, 1992.

[1] A stay will be routinely issued by the Commission in those proceedings where an informed decision on environmental issues (whether raised by a party or by the Section of Energy and Environment in its independent investigation) cannot be made prior to the effective date of the notice of exemption. See *Exemption of Out-of-Service Rail Lines*, 5 I.C.C.2d 377 (1989). Any entity seeking a stay involving environmental concerns is encouraged to file its request as soon as possible in order to permit this Commission to review and act on the request before the effective date of this exemption.

[2] See *Exempt. of Rail Abandonment—Offers of Finan. Assist.*, 4 I.C.C.2d 164 (1987).

[3] The Commission will accept a late-filed trail use statement as long as it retains jurisdiction to do so.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

[FR Doc. 92–30139 Filed 12–10–92; 8:45 am]

BILLING CODE 7035–01–M

DEPARTMENT OF LABOR

Employment Standards Administration; Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR part 1, appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decision shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., room S–3014, Washington, DC 20210.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office

(GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from:

Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783–3238

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC, this 8th day of December 1992.

Alan L. Moss,

Director, Division of Wage Determinations.

Employment and Training Administration

[TA–W–27,496]

Allied-Signal Aerospace Co., Garrett Fluid Systems Division, Tempe, AZ; Notice of Negative Determination Regarding Application for Reconsideration

By applications dated October 23 and November 9, 1992, the former workers at Allied-Signal Aerospace in Tempe, Arizona requested administrative reconsideration of the subject petition for trade adjustment assistance. The denial notice was signed on September 18, 1992 and published in the **Federal Register** on October 13, 1992 (57 FR 46880).

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) if it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) if in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

The former workers claim that Allied-Signal shifted some of its production (machining) to a company affiliate in Singapore which resulted in a loss of jobs and a decline in production at Tempe.

The investigation file shows that the increased import criterion and the "contributed importantly" test of the Group Eligibility Requirements of the Trade Act were not met. U.S. imports of parts for military aircraft decreased in the latest twelve month period May through April 1991–1992 compared with the same period in 1990–1991.

The "contributed importantly" test is generally demonstrated through a survey of the subject firm's customers. The Department's survey shows that the subject firm's major customers did not import aerospace hardware during the period relevant to the investigation.

The findings show that the workers were not separately identifiable by product line and that only a neligible amount of production was shifted to Singapore in the 1991–1992 period and much of the transferred production was performed for the company by outside vendors rather than by employees of the Tempe plant. The findings also show that the Singapore plant had declining sales in 1992 compared to 1991.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC, this 4th day of December, 1992.

Stephen A. Wandner,

Deputy Director, Office of Legislation & Actuarial Service, Unemployment Insurance Service.

Carter Jasper Company, Jasper, GA; Notice of Affirmative Determination Regarding Application for Reconsideration

On November 17, 1992, a company official requested administrative reconsideration of the Department of Labor's Notice of Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance for workers at the subject firm. The Department's Negative Determination was issued on October 27, 1992 and published in the **Federal Register** on November 17, 1992 (57 FR 54256).

The company official states that a major customer decreased its purchases of canvas footwear from the Carter Jasper Company and increased its imported purchases of canvas footwear from China.

Conclusion

After careful review of the application, I conclude that the claim is of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, DC, this 4th day of December, 1992.

Stephen A. Wandner,

Deputy Director, Office of Legislation and Actuarial Services, Unemployment Insurance Service.

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under title II, chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address show below, not later than December 21, 1992.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than December 21, 1992.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training

Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210.

Signed at Washington, DC, this 23d day of November, 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[TA-W-27,404, TA-W-27,404A Illinois, TA-W-27,404B New Jersey, TA-W-27,404C Colorado]

General Semiconductor Industries, Incorporated, Tempe, AZ; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on July 17, 1992, applicable to all workers of General Semiconductor Industries, Inc., Tempe, Arizona. The Notice was published in the **Federal Register** on August 4, 1992 (57 FR 34307).

At the request of the workers the Department reviewed the certification for workers of General Semiconductor in Tempe, Arizona. New information from the company shows that diode assembly accounted for the major portion of production at Tempe. New information shows that imported diode components were assembled at Tempe. After assembly, the diodes were tested, marked and packaged at Tempe for the domestic market through its regional sales offices.

Worker separations at the regional sales offices occurred in Illinois, New Jersey and Colorado as a result of the August 2, 1992 sale of the company's diode product line to an independent company, General Instruments, who immediately began the production of diodes in Europe. General Instrument has their own sales offices in the U.S.

The intent of the Department's certification is to include all workers of General Semiconductor in Tempe, Arizona and their regional sales offices in Illinois, New Jersey and Colorado who were affected by the transfer of diode production overseas and the subsequent imports into the domestic market.

The amended notice applicable to TA-W-27,404 is hereby issued as follows:

All workers of General Semiconductor Industries, in Tempe, Arizona and operating in the States of Illinois, New Jersey and Colorado who became totally or partially separated from employment on or after June 10, 1991 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 3rd day of December, 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Nerco Minerals Company Portland, OR; Dismissal of Application for Reconsideration

Pursuant to 29 CFR 90.18 an application for administrative reconsideration was filed with the Director of the Office of Trade Adjustment Assistance for workers at Nerco Minerals Company, Portland, Oregon. The review indicated that the application contained no new substantial information which would bear importantly on the Department's determination. Therefore, dismissal of the application was issued.

TA-W-27,829; Nerco Minerals Company, Portland, Oregon (December 3, 1992)

Signed at Washington, DC, this 4th day of December, 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

[TA-W-27, 602]

Nokia-Maillefer South Hadley, MA; Affirmative Determination Regarding Application for Reconsideration

On October 23, 1992, a former worker requested administrative reconsideration of the Department of Labor's Notice of Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance for workers at the subject firm. The Department's Negative Determination was issued on September 25, 1992 and published in the Federal Register on October 13, 1992 (57 FR 46880).

The former worker states that all of Nokia's production will be transferred from South Hadley to Finland and that Nokia's domestic customers will be supplied with wire and cable extrusion machinery from Finland.

Conclusion

After careful review of the application, I conclude that the claim is of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, DC, this 4th day of December, 1992.

Stephen A. Wandner,

Deputy Director, Office of Legislation & Actuarial Services Unemployment Insurance Service.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Agency Information Collection Activities Under OMB Review

AGENCY: National Endowment for the Arts, NFAH.

ACTION: Notice.

SUMMARY: The National Endowment for the Arts (NEA) has sent to the Office of Management and Budget (OMB) a request for expedited clearance, by January 6, 1993, of the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

DATES: Comments on this information collection must be submitted by December 29, 1992.

ADDRESSES: Send comments to Mr. Steve Semenuk, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., room 3002, Washington, DC 20503; (202-395-7316). In addition, copies of such comments may be sent to Ms. Roberta Dunn, National Endowment for the Arts, Congressional Liaison Office, room 525, 1100 Pennsylvania Avenue, NW., Washington, DC 20506; (202-682-5434).

FOR FURTHER INFORMATION CONTACT: Ms. Roberta Dunn, National Endowment for the Arts, Congressional Liaison Office, room 525, 1100 Pennsylvania Avenue, NW., Washington, DC 20506; (202-682-5434).

SUPPLEMENTARY INFORMATION: The Endowment requests the review of a new collection of information. This entry is issued by the Endowment and contains the following information: (1) The title of the form; (2) how often the required information must be reported; (3) who will be required or asked to report; (4) what the form will be used for; (5) an estimate of the number of responses; (6) the average burden hours per response; (7) an estimate of the total number of hours needed to prepare the form. This entry is not subject to 44 U.S.C. 3504(h).

Title: FY 93 International Program: United States/Mexico Artists Residencies Application Guidelines.

Frequency of Collection: One time.

Respondents: Individual artists.

Use: Guideline instructions and applications elicit relevant information from visual, folk, literary, and theater artists that apply for funding under the International Program Residencies category. This information is necessary for the accurate, fair and thorough consideration of competing proposals in the review process.

Estimated Number of Respondents: 150.

Average Burden Hours per Response: 10.

Total Estimated Burden: 1,500.

Roberta Dunn,

Congressional Liaison, National Endowment for the Arts.

NATIONAL SCIENCE FOUNDATION

Ocean Sciences Review Panel; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science

Foundation announces the following meeting.

Date and Time: December 16–18, 1993; 8:30 a.m.–5 p.m.

Place: Room 118, St. James Hotel, 950 24th St., NW., Washington, DC 20037.

Type of Meeting: Closed.

Contact Person: Phillip Taylor, National Science Foundation, 1800 G St., NW., Washington, DC 20550. Telephone: (202) 357–9639.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate Global Oceans Ecosystems Dynamic (GLOBEC) proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act.

Reason for Late Notice: Difficulty in arranging for a suitable meeting time for the full committee.

Dated: December 7, 1992

M. Rebecca Winkler,

Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget (OMB) Review

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35).

1. Type of submission, new, revision, or extension: Extension
2. The title of the information collection: Data Report on Spouse
3. The form number if applicable: NRC Form 354
4. How often the collection is required: On occasion
5. Who will be required or asked to report: NRC employees, NRC contractors, and NRC licensee access authorization applicants who are married to non-U.S. citizens; marry after completing NRC's Personnel Security Forms; or marry after having been granted an NRC access authorization or employment clearance.
6. An estimate of the number of responses annually: 88
7. An estimate of the number of hours needed annually to complete the requirement or request: 22 (.25 hours per response)
8. An indication of whether Section 3504 (h), Pub. L. 96–511 applies: Not applicable
9. Abstract: The NRC Form 354 is completed by NRC contractors, licensee applicants, and employee applicants who are married to non-U.S. citizens; marry after submission of the Personnel Security Forms, or after receiving an access authorization or employment clearance.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room 2120 L Street NW. (Lower Level), Washington, DC. Comments and questions can be directed by mail to the OMB reviewer: Ronald Minsk, Office of Information and Regulatory Affairs, (3150–0026), NEOB–3019), Office of Management and Budget, Washington, DC 20503.

Comments can also be submitted by telephone at (202) 395–3084. The NRC Clearance Officer is Brenda Jo. Shelton, (301) 492–8132.

Dated at Bethesda, Maryland this 18, day of December, 1992.

For the Nuclear Regulatory Commission.

Gerald F. Cranford,

Designated Senior Official for Information Resources Management.

I

Virginia Electric and Power Company (the licensee) is the holder of Facility Operating License Nos. NPF–4 and NPF–7 which authorize operation of North Anna Power Station, Units No. 1 and No. 2 (NA–1&2, the facility) at steady-state power levels not in excess of 2893 megawatts thermal. The licenses provide, among other things, that the facility is subject to all the rules, regulations, and orders of the Nuclear Regulatory Commission (the Commission) now or hereafter in effect.

The facility employs pressurized water reactors (PWRs) located at the licensee's site in Louisa County, Virginia.

The licensee is implementing a refurbishment and restoration program for the NA–1&2 service water system (SWS). The program is to be conducted in several stages. The Phase 1, Stage 1 efforts are to be conducted during the forthcoming NA–1 steam generator replacement program (SGRP) outage presently scheduled to commence on January 2, 1993. To support the Phase 1, Stage 1 SWS restoration program, the licensee has identified two exemptions required at this time. The two exemptions are specified below.

II

10 CFR Part 50, Appendix A, General Design Criterion-2 (GDC–2) requires that structures, systems, and components important to safety be designed to withstand the effects of natural phenomena such as tornados, without loss of capability to perform their safety functions.

During the Phase I, Stage I effort, approximately 160 feet (4 parallel lines approximately 40 feet in length) of buried piping will be exposed and replaced. This buried piping is located in the alleyway between the service building and the quench spray pump house. The replacement of this section of buried piping requires the excavation of which the exemption from GDC–2 (tornado missiles) is needed. In addition to the buried SWS piping, the alleyway also contains two concrete-encased electrical duct banks, a concrete encasement which encloses the 4-inch SWS lines to the NA–1 control room chillers, and various nonsafety-related storm drains. Approximately temporary supports will be used to maintain seismic qualification of critical components.

In order to accomplish these Stage I activities during the NA–1 SGRP outage, the buried portions of the SWS supply and return lines to the NA–1 containment recirculation spray heat exchangers must be excavated during a pre-outage period starting about 30 days prior to the scheduled outage. Likewise, the exposed piping will be recovered during a 30-day post-outage period. Therefore, the exemption is requested for the scheduled NA–1 SGRP outage period plus about 30 days prior to and 30 days after the scheduled outage. This will result in an exemption time period from early December 1992 through June 30, 1993. The actual repair and replacement of the piping will not begin until NA–1 is shut down for the SGRP outage.

The licensee is providing contingency measures with compensatory actions to provide added assurance of safe operation of the facility during the

exemption period. Although the exemption is requested only for missile protection, the risk to the plant due to construction mishaps is more significant than the risk due to natural phenomena. Therefore, the compensatory measures are geared toward preventing such mishaps in addition to minimizing the potential for missiles generating by severe weather. As stated in the enclosed Safety Evaluation, these compensatory actions include:

—Electronic scanning and nondestructive locating methods will be used to accurately determine underground locations of piping, duct banks, and other buried utilities prior to excavation.
—Machine excavation will be limited to near-surface depths. The bulk of the excavating will be by hand-operated power and manual tools.
—Physical barriers will be used to keep vehicles a safe distance from the excavation.
—All lifting and rigging will be inspected and load tested. Lifting of equipment or construction materials over the excavation will be prohibited while the piping is exposed and operable.
—Severe weather procedures will be used to provide notification to clear the area of vehicles and loose materials in the event of a tornado watch or other high wind conditions.
—Adequate wind protection and heating will be provided during freezing weather conditions.

In order to implement the SWS restoration project, the licensee will rely on the NA–1&2 Technical Specification (TS) 3/4.7.4.1 which permits removal of one SW header from service for up to 168 hours at a time in support of service water upgrade activities. When entering this 168-hour action statement, additional contingency and compensatory actions will be taken. As stated in the enclosed Safety Evaluation, these compensatory actions are:

—A temporary water supply from either the primary grade water or fire water systems will be available as a contingency to the charging pump coolers should the normal SWS supply be interrupted.
—Emergency pipe repair materials will be staged in key areas to reduce response time in the event of a leak or a rupture. Procedures for emergency pipe repair will be developed and plant personnel will be trained in the use of these procedures and materials.
—As required by the TS, three of the four SWS pumps and both of the auxiliary SWS pumps will be operable as a prerequisite for entry into the 168-hour action statement. There will be no planned maintenance on the SWS during an action statement period.
—Flood prevention and mitigation measures will be in place.

The excavation of the SWS piping will only affect the missile shield protection aspects of the GDC–2, with seismic support being retained. While producing some increase in missile interaction risk, excavation of the piping does not result in total vulnerability to missiles. The lines are substantially below grade and are surrounded on several sides by heavily reinforced concrete structures. This will provide some degree of protection from horizontally generated missiles from any source.

Considering the existing design features and compensatory measures proposed by the licensee, the likelihood of damage to the exposed SWS lines and safety-related electrical duct banks from postulated missiles generated by natural phenomena is minimal. Also, based on the compensatory measures provided, assurance exists that the ability to bring the plant to a safe shutdown will be maintained following any natural phenomena, including tornadoes or other severe weather which could result in airborne missiles. Therefore, there is reasonable assurance that the proposed GDC–2 exemption will present no undue risk to public health and safety.

III

10 CFR 50.49 (50.49) requires (in part) that each holder of a license to operate a nuclear power plant shall establish a program for qualifying safety-related electric equipment that is relied upon to remain functional during and following design basis events that are defined as conditions of normal operation, including operational events, and design basis accidents.

The requested exemption from 50.49 would permit temporary cooling of the NA–1 control room chillers from the common bearing cooling water system to provide normal control room temperatures and provide a reliable backup cooling system to the NA–2 air conditioning chillers. The period for the NA–1 chillers to be operating on bearing cooling water is projected to be between 90 and 120 days.

NA–1&2 each have three control room air conditioner chillers located in a missile-protected room of the service building off the respective unit's turbine building basement. Ventilation of each unit's chiller room is taken from and exhausted to the respective unit's turbine building basement. Hence, the chillers for each unit are located in the same environmental zone which is also common to the unit's turbine building basement. Therefore, as the result of an environmental qualification evaluation of the control room air conditioning systems, a station standing order requires at least one of the opposite unit's chillers to remain operable while that unit is in a shutdown condition and the other unit is operating. Specifically, the station standing order requires that at least one control room chiller on the unit in Mode 5 or 6 be maintained operable while the other unit is in Mode 4 or above. This measure assures that the air conditioning system serving the control room and emergency switchgear room of the operating unit would be available during a postulated main steam line break accident in the turbine building.

However, with bearing cooling water supplied to the NA–1 chillers instead of service water, the reliability of the NA–1 chillers is called into question because bearing cooling is not safety-related. Bearing cooling would not be available in the event of a loss of offsite power event or design basis earthquake coincident with the main steam line break accident in the turbine building. Therefore, an exemption from 10 CFR 50.49 for the NA–2 chillers is requested by the licensee for the period that the SWS is isolated from the NA–1 recirculation spray heat exchangers and the control room chillers.

While the shutdown unit's TS do not require the air conditioning systems to remain operable in Modes 5 and 6, the environmental qualification design basis for the operating unit's air conditioning systems requires at least one of the shutdown unit's chillers to be operable as a backup for the operating unit.

The design basis of concern results in an environmental condition in the NA–2 chiller room for which the NA–2 control room chillers are not qualified and may cease to function properly. The only postulated accident event that could cause this condition is the failure of a main steam line in the turbine building basement in proximity to the NA–2 chiller room. However, in order to have sufficient steam concentration in the area to disable the NA–2 chillers, the main steam trip valve on the line would also have to fail to a closed position. This is unlikely because the trip values are essentially check valves reversed to the flow of steam with the check disk physically held out of the steam flow path. Failure to hold the disk out of the steam flow path would cause the trip valve to slam shut. Failure of the valve caused by the disk sticking open is, therefore, unlikely The

likelihood of the above accident scenario during the time that the 50.49 exemption would be in effect is thus very low, and the exemption would not significantly affect the consequences of design basis accidents. The staff reviewed the risk associated with using bearing cooling water as a substitute for SWS cooling for a backup chiller and concluded the temporary change in environmental qualification is acceptable.

The required exemption period is technically from entry into the second 168-hour action statement through the clearing of the fifth 168-hour action statement for work activities associated with the Phase I, Stage 1 SWS restoration project and is projected to be between 90 and 120 days.

IV

The exemptions, as noted above, involve special circumstances as set forth in 10 CFR 50.12(a)(2)(V). The exemptions would provide only temporary relief from the applicable regulations (GDC–2 and 50.49). The exemptions are requested for a specific time period after which the facility would again be in conformance with all the requirements of GDC–2 and 50.49. The licensee has made good faith efforts in considering alternatives to the exemption requests and has concluded that the SWS refurbishment and restoration program can only be conducted without the subject exemptions during a period when both NA–1&2 are shut down and defueled. The impact of scheduling such a dual-unit outage would have significant consequences in terms of power supply, fuel storage, capacity, and replacement power costs. Finally, the exemptions will indirectly result in benefits to the public from increased reliability of the upgraded safety-related SWS.

Based on the above and on review of the licensee's submittals, as summarized in the enclosed Safety Evaluation, the NRC staff concludes that the likelihood of unacceptable damage to the exposed SW headers due to tornado-borne missiles during the exemption period is low. Also, the staff concludes that the only postulated accident which could affect the normal environmental design basis for the NA–2 control room chillers is a highly unlikely event. Therefore, for the time that the 50.49 exemption would be in effect, the exemption would not significantly affect the probability or consequences of environmental design basis events.

Based on the low probability of unacceptable events, coupled with the comprehensive compensatory measures which the licensee has committed to, the NRC staff finds the proposed exemption from GDC–2 and 50.49 acceptable. Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, the subject exemptions are authorized by law, will not present an undue risk to the public health and safety, and are consistent with the common defense and security. The Commission further determines that special circumstances, as provided in 10 CFR 50.12(a)(2)(v), are present justifying the exemptions, namely that the exemptions would provide only temporary relief from the applicable regulations and that the licensee has made good faith efforts to comply with the regulations.

Therefore, the Commission hereby approves the following exemptions: NA–1&2 may operate without conforming to the requirements of GDC–2 as they apply to the buried portions of the SWS supply and return lines to the NA–1 containment recirculation spray heat exchangers, providing that compensatory measures as described herein are continued for the period of the exemption. This exemption shall become effective on its date of issuance and shall expire on June 30, 1993.

NA–2 may operate without conforming to the requirements of 50.49 as they apply to the normal environmental design basis for the NA–2 control room chillers. This exemption shall be in effect during the Phase 1, Stage 1 SWS restoration program from entry into the second 168-hour action statement through the clearing of the fifth 168-hour action statement.

Pursuant to 10 CFR 51.32, the Commission has determined that granting the above exemption will have no significant effect on the quality of the human environment (August 27, 1992, 57 FR 38889; November 6, 1992, 57 FR 53146; and November 30, 1992, 57 FR 56606).

For further details with respect to this action, see the licensee's request dated July 16, 1992, as supplemented on September 11, 1992, and November 4, 1992, which are available for public inspection at the Commission's Public Document Room, Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the NA–1&2 Local Public Document Room, the Alderman Library, Special Collections Department, University of Virginia, Charlottesville, Virginia 22903–2498.

The GDC–2 exemption is effective from its date of issuance through June 30, 1993. The 50.49 exemption is effective during the Phase 1 Stage 1 SWS restoration program from entry into the second 168-hour action statement through the clearing of the fifth 168-hour action statement or June 30, 1993, whichever occurs first.

Dated at Rockville, Maryland, this 3rd day of December 1992.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Director, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–31565; File No. SR–OCC–91–16]

Self-Regulatory Organizations; The Options Clearing Corporation; Order Approving a Proposed Rule Change Relating To a Modification of the Margin Calculation for Clearing Members' Customers' Accounts and Firm Non-lien Accounts

December 4, 1992.

On November 7, 1991, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission ("Commission") under section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] a proposed rule change (File NoSR–OCC–91–16) relating to a modification of the margin calculation for clearing members' customers' accounts and firm non-lien accounts. The Commission published notice of this proposed rule change in the **Federal Register** on January 31, 1992.[2] No public comments were received. For the reasons discussed below, the Commission is approving the proposed rule change.

I. Description

Under the proposed rule change, OCC seeks to modify the logic within its Theoretical Intermarket Margin System ("TIMS")[3] which calculates margins for positions carried in clearing members' customers' accounts with OCC.[4] In particular, OCC proposes to eliminate the logic which reduces to zero any premium margin credit or additional margin credit for each class group comprising a given product group. Accordingly, the proposal deletes

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] Securities Exchange Act Release No. 30288 (January 24, 1992), 57 FR 3808.

[3] For a description of TIMS, refer to Securities Exchange Act Release Nos. 28928 (March 1, 1991), 56 FR 9995 [File No. SR–OCC–89–12] and 30761 (May 29, 1992), 57 FR 24286 [File No. SR–OCC–92–15].

[4] This proposal also would modify the logic controlling margin calculations for firm non-lien accounts. Currently, however, no clearing member maintains such an account with OCC.

paragraph (d)(3)[5] from Rule 601 (margins on stock options) and paragraphs (d)(3)[6] and (d)(4)[7] from Rule 602 (margins on non-equity options).

1. Background

OCC requires its clearing members to adjust their margin deposits with OCC in the morning on every business day pursuant to calculations performed by OCC overnight.[8] OCC imposes margin requirements on short positions and gives margin credits for unsegregated long positions.[9] Premium margin requirements and credits within class groups[10] are offset against each other to provide a net premium margin requirement or credit for each class group. For each class group, TIMS also calculates an upside and a downside variation.[11] Premium margin amounts are then totaled across all class groups within a product group[12] as are the upside and downside variations. Only at the product group level is the premium margin requirement or credit combined with either (1) the net upside or net downside variation (*i.e.*, the additional margin requirement) or (2) zero to arrive at the margin requirement or credit for a given product group.[13]

Under TIMS, the method for calculating margin requirements or credits for clearing members' market professionals' accounts (*e.g.*, firm accounts and market-maker's or specialist's accounts) differs in two important respects from the method for calculating margin requirements or credits for clearing members' customers' accounts. First, because OCC does not have a lien on segregated long positions in clearing members' customers' accounts, such long positions are not offset against short positions in the same series of options and are not assigned any value for margin calculation purposes.[14] Second, in calculating product group margin requirements or credits in clearing members' customers' accounts, margin credits for the class groups within a product group are reduced to zero.[15] That is, a premium margin credit for one class group cannot offset a premium margin requirement for another class group and an additional margin credit for one class group cannot offset an additional margin requirement for another class group.[16] It is the second difference (*i.e.*, reducing margin credits to zero) that this proposed rule change will eliminate.

2. Modification to Margin Calculation for a Clearing Member's Customers' Account

Under Rule 611, a clearing member may submit written instructions ("spread instructions") to OCC designating any segregated long positions in its customers' account that the clearing member desires OCC to release from segregation. A clearing member may not file spread instructions, however, unless the clearing member is carrying for the account of such customer a short position for an equal number of options contracts of the same class of option.[17] Once OCC releases the long position, it is deemed unsegregated and subject to OCC's lien. At that point, any premium margin credit the clearing member receives from the unsegregated long position is permitted to offset the premium margin requirement imposed on the short position but only up to the amount of the margin imposed.[18]

For certain spreads though, TIMS calculates a premium margin credit which may exceed the premium margin required for the short position.[19] However, because TIMS currently reduces premium margin credit for each class group in a customer's account to zero, a premium margin credit from one class group cannot be used to offset a premium margin requirement for another class group within the same product group or an additional margin requirement at the product group level.

---

[5] Rule 601(d)(3) states:

In calculating margin for the stock option product group, any premium margin credit and all negative upside or downside variations for the class groups comprising the product group shall be reduced to zero.

[6] Rule 602(d)(3) states:

In calculating product group margin, any premium margin credit and all negative upside or downside variations for the class groups comprising the product group shall be reduced to zero.

[7] Rule 602(d)(4) states:

In calculating the aggregate margin requirement for the positions in non-equity options and IPs [index participations] carried in the account, any class group margin credits shall be reduced to zero, so that the aggregate margin requirement for such positions shall be an amount equal to the sum of the margin requirements for those class groups and product groups as to which a margin requirement exists, without reduction.

[8] TIMSD is designed to calculate a clearing member's margin requirement at a level sufficient to protect OCC against the costs that would be incurred in liquidating that clearing member's open positions in the event of default or insolvency.

[9] A long position is "unsegregated" if OCC has a lien on it (*i.e.*, has recourse to the value of the position if the clearing member does not perform an obligation to OCC). Long positions in firm lien accounts and market-maker's or specialist's accounts are unsegregated. OCC By-Law, art. I, Section 1 U.(3). Long positions in customer's accounts are deemed segregated unless a clearing member submits contrary instructions to OCC in accordance with Rule 611 (*i.e.*, "spread instructions"). Segregated long positions are given no value for margin calculation purposes. OCC Rules 601(d)(1) and 602(d)(1).

[10] A class group consists of all put and call options relating to the same underlying security. A class group also consists of market baskets, commodity options, and futures relating to the same underlying security that are subject to margin at OCC because of cross-margining program with a commodity exchange. OCC Rule 601(b)(2) and Rule 602(b)(2). OCC has proposed to treat Index Participations ("IPs") as part of the same class group as put and call options relating to the same underlying interest. See Securities Exchange Act Release No. 29081 (April 12, 1991), 56 FR 16142 (notice of proposed rule change).

[11] Basically, variation is the net liquidation value or cost of a position in the event of changes in the market price. OCC calculates class group values across the range of exercise prices OCC has determined to examine. Upside and downside variations are the largest projected liquidating deficit or credit.

[12] A product group consists of two or more class groups whose underlying assets exhibit a sufficient price correlation to warrant margining on a combined basis. All class groups of equity options form a single product group. By contrast, class groups for non-equity options are organized into several product groups including those for stock index options and long-term Treasury options.

[13] Premium margin can either be a requirement or a credit. At the product group level, where margin requirements are actually imposed, additional margin is always a margin requirement or zero (*i.e.*, never a margin credit to offset a premium margin requirement). OCC Rules 601(c) (5) and (7) and 602(c)(2) (B) and (D).

[14] Although the proposed change is not expressly limited to unsegregated long positions, only unsegregated longs are recognized under TIMS. TIMS ignores segregated longs. Telephone conversation between Timothy J. Hinkes, Assistant Vice President, Economic Research, OCC; Jeanne M. Cawley, Counsel, OCC; and Richard C. Strasser, Attorney, Division, Commission (December 2, 1991).

[15] The reduction or margin credits to zero at the class group level is residual logic from the margin methodologies used before TIMS. Under those methodologies, product group margin was not calculated and, for customer accounts, class group margin credits were artificially reduced to zero so that they would not be applied against other class group margin requirements. This logic was carried over and incorporated into TIMS during the course of its development without significant analysis. OCC believes that retention of this logic results in the over-margining of positions and is therefore incompatible with one of the purposes of TIMS, which is to reduce the potential for such over-margining.

[16] As described below, this reduction to zero affects only long positions in a customers' account for which a clearing member has submitted spread instructions to OCC in accordance with Rule 611, and which are, by operation of Rule 611, deemed to be unsegregated long positions. Segregated long positions in customers' accounts will continue to be assigned no value for margin purposes.

[17] That is, before a clearing member may instruct OCC to release a long position from segregation, the long position must be spread on a contract-for-contract basis against a short position in the same class of option held for the account of the same customer.

[18] TIMS methodology limits the offset to the amount of the margin imposed. Telephone conversation between Timothy J. Hinkes, Assistant Vice President, Economic Research, James C. Yong, Vice President and Deputy General Counsel, and Jeanne M. Cawley, Counsel, OCC; and Jerry W. Carpenter, Branch Chief and Richard C. Strasser, Attorney, Division, Commission (October 8, 1992).

[19] *E.g.*, long box spreads, call bull spreads, and put bear spreads. Letter from Jean M. Cawley, Counsel, OCC, to Jerry W. Carpenter, Branch Chief, Division, Commission (October 7, 1992).

Similarly, if the calculation of the upside and downside variations in a class group generates a credit, TIMS will reduce that credit to zero, and it cannot be used to offset an additional margin requirement for another class group within the same product group. A clearing member, therefore, may be required to deposit margin collateral in excess of the net risk of spread positions in its customers' account.[20] Therefore, OCC proposes to remove from TIMS the logic which reduces premium margin credits and upside or downside variation credits at the class group level to zero[21] and thereby allow such credits to be used as offsets.[22]

II. Discussion

The Commission believes that OCC's proposal is consistent with the Act and in particular with Section 17A thereunder.[23] Section 17A(b)(3)(F) provides, among other things, that the rules of a clearing agency must be designed "to remove impediments to and perfect the mechanism of a national system for the prompt and accurate clearance and settlement of securities transactions."[24] While adequate clearing margin is necessary for the integrity of the clearance and settlement system, excess margin requirements burden market participants by imposing unnecessary costs. Overmargining also reduces liquidity in the marketplace and thereby impedes the safe and efficient clearance and settlement of securities transactions. OCC has represented that this proposal will promote efficient clearance and settlement by eliminating the deposit of excessive margin collateral in positions carried in clearing members' customers' accounts without adversely affecting the securities and funds under OCC's control or for which it is responsible.

The Commission is satisfied that this modification of TIMS does not increase OCC's risk. The modification is consistent with the treatment of unsegregated long positions in clearing members' customers' accounts under OCC's liquidation rules[25] and is consistent with the TIMS' goal of calculating margin requirements based upon the risk of liquidating options positions carried by a defaulting clearing member. As OCC has represented, the provisions to be omitted by this proposal require margin in excess of what is necessary to assure that clearing members' risks are adequately collateralized. Therefore, the deletion of these provisions should not increase OCC's risk with regard to positions carried in its clearing members" customers' and firm non-lien accounts.

III. Conclusion

On the basis of the foregoing, the Commission finds that the proposed rule change is consistent with the Act and in particular with Section 17A thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change (File No. SR–OCC–91–16) be, and hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[26]

Margaret. H McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC–19146; 812–8092]

Application; Ameritas Variable Life Insurance Co. et al.

December 4, 1992.

AGENCY: Securities and Exchange Commission (the "Commission or the "SEC").

ACTION: Notice of Application for an Order under the Investment Company Act of 1940 (the "1940 Act").

APPLICANTS: Ameritas Variable Life Insurance Company ("Ameritas"), AVLIC Separate Account V ("Ameritas Account"), Fidelity Investments Life Insurance Company ("Fidelity Life"), The Fidelity Investments Variable Life Account I ("Fidelity Account"), Midland National Life Insurance Company ("Midland"), Midland National Life Separate Account A ("Midland Account"), Monarch Life Insurance Company ("Monarch"), The Fidelity Variable Account ("Monarch Account"), Vermont Life Insurance Company ("Vermont"), and Vermont Variable Life Insurance Account ("Vermont Account"), (collectively the "Applicants"). Ameritas Account, Fidelity Account, Midland Account, Monarch Account and Vermont Account are referred to collectively as the "Accounts."

RELEVANT 1940 ACT SECTIONS: Order requested under Section 26(b) of the 1940 Act.[1]

SUMMARY OF APPLICATION: Applicants seek an order approving the substitution of certain securities issued by the Variable Insurance Products Fund ("VIPF") and by the Variable Insurance Products Fund II ("VIPF II"), and held by the Accounts to fund variable life insurance contracts (the "Contracts") issued by Ameritas, Fidelity Life, Midland, Monarch, and Vermont, for securities issued by the Zero Coupon Bond Fund ("ZCBF").

FILING DATE: The application was filed on September 17, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving the Applicants with copies of the request, personally or mail. Hearing requests must be received by the SEC by 5:30 p.m. on December 29, 1992, and should be accompanied by proof of service on the Applicant in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the Secretary of the Commission.

ADDRESS: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549.

Applicants: Ameritas Variable Life Insurance Company, 5900 O Street, Lincoln, NE 68510; Fidelity Investments Life Insurance Company, 82 Devonshire Street, Boston MA 02043; Midland National Life Insurance Company, One Midland Plaza, Sioux Falls, SD 57193; Monarch Life Insurance Company, 361

---

[20] As previously explained, the proposed modification to TIMS logic will affect only the amount of margin that must be deposited with respect to spread positions in a customer's account. Unsegregated longs in a customer's account that are not part of a spread position are not eligible for release under Rule 611 and, therefore, receive no margin value.

[21] As is currently the case, no margin credit will be given for "negative" upside or downside variations at the product group level. See OCC Rules 601(c)(1), (c)(5) and (7) and 602(c)(2)(B) and (D).

[22] In calculating margin requirements or credits at the product group level, any negative upside or downside variation (*i.e.*, a variation credit) for any class group shall be reduced by the percentage OCC has specified for the product group to which that class group belongs. Therefore, the amount of offset allowed for these credits will be reduced in a manner consistent with current margin calculation procedures. OCC Rules 601(c)(1)(C)(4) and 602(c)(2)(A).

[23] 15 U.S.C. 78q–1 (1988).

[24] 15 U.S.C. 78q–1(b)(3)(F) (1988).

[25] In the event of a clearing member default, OCC may liquidate an unsegregated long position and use the proceeds to offset the costs of liquidating short positions whether such short positions are in the same class group or in another class group in the customers' account.

[26] 17 CFR 200.30–3(a)(12) (1992).

[1] The Applicants represent that the application will be amended during the notice period to clarify that they seek an order only under section 26(b) of the 1940 Act.

Whitney Avenue, Holyoke, MA 01040; and Vermont Life Insurance Company, National Life Drive, Montpelier, VT 05604.

FOR FURTHER INFORMATION CONTACT: Patrice M. Pitts, Attorney, or Wendell M. Faria, Deputy Chief, at (202) 272–2060, Office of Insurance Products (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application. The complete application is available for a fee from the SEC's Public Reference Branch.

Applicants' Representations

1. Ameritas is a stock life insurance company organized under the laws of the State of Nebraska. Fidelity Life is a stock life insurance company incorporated under the laws of the Commonwealth of Pennsylvania. Midland is a stock life insurance company incorporated under the laws of the State of South Dakota. Monarch is a stock life insurance company organized under the laws of the Commonwealth of Massachusetts. Vermont is a stock life insurance company incorporated in the State of Vermont.

2. Ameritas Account was established by Ameritas as a separate investment account on August 28, 1985, to fund certain flexible premium variable universal life insurance policies (the "Ameritas Policies"). Fidelity Account was established by Fidelity Life as a separate investment account on July 22, 1987, to fund certain flexible premium variable life insurance policies (the "Fidelity Policies"). Midland Account was established by Midland as a separate investment account on July 20, 1987, to fund certain variable life insurance policies ("Midland Policies"). Monarch Account was established by Monarch as a separate investment account on August 9, 1984, to fund certain variable life insurance policies ("Vermont Policies"). (The Ameritas Policies, the Fidelity Policies, the Midland Policies, the Monarch Policies, and the Vermont Policies are referred to collectively as the "Policies.") Each of the Accounts is organized and registered under the 1940 Act as a unit investment trust.

3. Three management investment companies currently offer their shares to corresponding subaccounts of some or all of the Accounts: VIPF; VIPF II; and ZCBF. Each is registered under the 1940 Act as an open-end management investment company of the series type.

4. VIPF was organized as a Massachusetts business trust on November 13, 1981. VIPF currently offers five portfolios, only one of which, the Money Market Portfolio, is relevant to this application. By investing in high quality U.S. dollar denominated money market securities of domestic and foreign issuers, the Money Market Portfolio seeks to obtain as high a level of current income as is consistent with preserving capital and providing liquidity.

5. VIPF II was organized as a Massachusetts business trust on March 21, 1988. VIPF II currently offers two portfolios; each Account currently invests in one or both of those portfolios. Only one of the VIPF II portfolios, the Investment Grade Bond Portfolio, is relevant to this application. By investing in a broad range of investment-grade fixed-income securities, the Investment Grade Bond Portfolio seeks as high a level of current income as is consistent with the preservation a dollar-weighted average portfolio maturity of ten years or fewer.

6. VIPF and VIPF II currently offer series of shares of beneficial interest in their portfolios not only to the Accounts, but also to other separate accounts established to support variable annuity contracts.

7. ZCBF was organized as a Massachusetts business trust on February 21, 1986. ZCBF currently offers three Portfolios: The 1993 Portfolio, the 1998 Portfolio, and the 2003 Portfolio (collectively, the "Zero Portfolios"). The Zero Portfolios are offered exclusively to the Accounts; three subaccounts of each Account invest exclusively in shares of a specific portfolio of ZCBF.

The Zero Portfolios are not offered to variable annuity separate accounts, because any variable annuity separate account invested in the Zero Portfolios would fail the diversification requirements of section 817(h) of the Internal Revenue Code. Any annuity contract owner with values allocated to the Zero Portfolios would be subject to taxation each year on any increase in contract values.

8. The target maturity date of the 1993 Portfolio is November 15, 1993, that for the 1998 Portfolio is November 15, 1998, and that for the 2003 Portfolio is November 15, 2003. The Zero Portfolios seek to provide a definable return over their lifetime by investing principally in zero coupon U.S. Treasury securities.

9. In the more than four years that the Zero Portfolios have been available as an investment option, policyowners (the "Policyowners") of Ameritas, Fidelity Life, Midland, Monarch, and Vermont have shown little interest in them. As of December 31, 1991, only 372 of the 3,145 Policyowners who might have allocated their contract values to the Zero Portfolios had elected to do so. In addition, as of December 31, 1991, the 1993 Portfolio had net assets of less than $1.3 million, the 1998 Portfolio had net assets of less than $1 million, and the 2003 Portfolio had net assets of less than $1.7 million. Although Fidelity Management & Research Company (the "Adviser") has withdrawn a portion of its initial $1 million investment in each of the Zero Portfolios, its investment in the Zero Portfolios as of June 30, 1992, approximated $274,000. There have been no events during 1992 that would lead the Applicants to believe that either the number of Policyowners invested in, or the amount of the net assets of, the Zero Portfolios ever will increase by a material amount.

10. Aggregate sales of the Policies declined drastically following the enactment of the Technical and Miscellaneous Revenue Act of 1988 ("TAMRA"). Under TAMRA, variable life insurance contracts entered into after June 20, 1988, which do not satisfy the "7-pay test" are generally treated as "modified endowment contracts." Since distributions from modified endowment contracts generally are subject to current federal income taxation, including penalty taxes, such contracts are far less desirable to prospective purchasers. Applicants believe that it is extremely unlikely that significant amounts of new premium will be invested in the Zero Portfolios. In fact, sales of the Policies were so adversely affected by TAMRA that Fidelity Life, Monarch and Vermont no longer offer Policies.

By contrast, the Investment Grade Bond Portfolio and the Money Market Portfolio each are available to approximately twenty variable life and variable annuity separate accounts, and have experienced healthy asset growth since 1988. The Investment Grade Bond Portfolio, which commenced operations on December 5, 1988, had assets of approximately $48 million by December 31, 1991. The Money Market Portfolio, which commenced operations April 1, 1982, had assets of approximately $271 million by December 31, 1991.

11. Since the inception of the Zero Portfolios, their expenses have been voluntarily limited by the Adviser to 1.00% of the average net assets of each Zero Portfolio. The expense of operating the Zero Portfolios is high because many of the expenses (such as those for accounting and outside auditors) are not significantly lower, despite the Zero Portfolios' small sizes and asset bases. The following table shows the expense ratio for each Zero Portfolio for 1991 and the amount of the Adviser's reimbursement.

	1991 expense ratio before reimbursement	Dollar amount of 1991 reimbursement by adviser
1993 Portfolio	8.54%	$89,064
1998 Portfolio	11.20%	90,537
2003 Portfolio	6.13%	93,859
Total Reimbursement		273,460

The total 1991 reimbursement of $273,460 far exceeded the $18,704 in management fees earned by the Adviser for managing the Zero Portfolios.

12. Effective December 5, 1988, the Adviser voluntarily limited the expenses of the Investment Grade Bond Portfolio to 0.80% of Investment Grade Bond Portfolio's average net assets. For 1991, the expense ratio of Money Market Portfolio was 0.38%.

13. Because neither state nor federal law requires expense reimbursement, absent the proposed substitution, it is likely that in the future the Advisor may cease to make expense reimbursements to the Zero Portfolios. Without reimbursement, expenses could increase fivefold or more. Policyowners who through ignorance or inattention do not leave the Zero Portfolios might find themselves with substantially lower, or even negative rates of return.

14. The Applicants propose to substitute shares of the Money Market Portfolio for shares of the 1993 Portfolio and to substitute shares of Investment Grade Bond Portfolio for shares of the 1998 Portfolio and the 2003 Portfolio. The substitution will be effected in the following manner. Each Account will redeem all of its shares of each Zero Portfolio. On the same day, each Account will use the proceeds to purchase the appropriate number of Money Market Portfolio and Investment Grade Bond Portfolio shares. The substitution would take place at relative net asset value with no change in the amount of any policyowner's account value.

15. Policyowners will not incur any fees or charges as a result of the substitution, nor will their rights or the obligations of Ameritas, Fidelity Life, Midland, Monarch or Vermont under the Policies be altered in any way. All expenses incurred in connection with the proposed substitution, including legal, accounting, brokerage and other fees and expenses, will be paid by FMR Corp., the parent company of the Adviser. In addition, the proposed substitution will not impose any tax liability on Policyowners. Further, the proposed substitution will not cause the fees and charges currently being paid by existing Policyowners to be greater after the substitution than before. The Applicants represent that Accounts that impose transfer charges will not count the substitution as a transfer for that purpose.

16. Ameritas, Fidelity Life, Midland, Monarch and Vermont will mail letters to each of its Policyowners informing them: (i) Of the filing of this Application; and (ii) that if an order is issued by the Commission, at the close the next business day, any investment in the 1993 Portfolio will be transferred to the Money Market Portfolio and any investment in the 1998 Portfolio or the 2003 Portfolio will be transferred to the Investment Grade Bond Portfolio. Following the substitution, prospectuses for the Policies that are currently offered will be updated to reflect the fact that the Zero Portfolios are no longer available for investment.

17. All affected Policyowners will be told that, at any time prior to the substitution, they may transfer their account values from subaccounts investing in the Zero Portfolios to any other permissible variable investment option without incurring any transaction fees and without the transfer being counted as one of the free transfers permitted in any policy year. Monarch Policyowners also will be notified that they may elect to exchange their Monarch Policies for fixed benefit life insurance issued by Monarch or one of its affiliates instead of accepting the substitution. In addition, shortly after the substitution, Ameritas, Fidelity Life, Midland, Monarch and Vermont each will notify, in writing, all Policyowners who had remaining account values transferred from the Zero Portfolios of their right to make a "free transfer" for an additional thirty days.

18. Applicants are seeking approval of the proposed substitution from such state insurance regulators as may be necessary or appropriate.

19. After the proposed substitution occurs, the Adviser intends to redeem its investment of seed money in the Zero Portfolios. By making this redemption after the substitution, the Adviser, rather than the Policyowners, will bear any expenses arising from the final liquidation of the investment portfolios of the Zero Portfolios.

20. ZCBF then will apply to the Commission, pursuant to section 8(f) of the 1940 Act, for an order that it has ceased to be an investment company. Upon grant of that order, ZCBF will dissolve itself as a business entity under Massachusetts law.

Applicants' legal Analysis and Conditions

1. Section 26(b) of the 1940 Act provides that: "It shall be unlawful for any depositor or trustee of a registered unit investment trust holding the security of a single issuer to substitute another security for such security unless the Commission shall have approved such substitution. The Commission shall issue an order approving such substitution if the evidence establishes that it is consistent with the protection of investors and the purposes fairly intended by the policy an provisions of this title."

2. Congress intended section 26(b) to provide for Commission scrutiny of proposed substitutions which could, in effect, force shareholders dissatisfied with the substituted security to redeem their shares, thereby possibly incurring either a loss of the sales load deducted from initial purchase payments, an additional sales load upon reinvestment of the proceeds of redemption, or both. The proposed elimination of three subaccounts (*i.e.*, those invested in the Zero Portfolios) of each Account and the automatic transfer or reinvestment of Policy values to two other subaccounts of each Account may involve a substitution of securities within the meaning of section 26(b).

3. Ameritas, Fidelity Life, Midland, Monarch and Vermont each reserved a right of substitution and elimination to protect itself and its Policyowners in a number of situations, including the present circumstances where underlying investment portfolios have failed to grow sufficiently large to achieve the economies of scale needed to achieve viable performance without expense reimbursements.

4. With no recent interest among current Policyowners and very few new sales of the Policies, Ameritas, Fidelity Life, Midland, Monarch and Vermont each believes that the current financial circumstances of the Zero Portfolios will not improve in the foreseeable future. Moreover, they do not expect, and do not believe it is reasonable to expect, that the Adviser will forever remain willing and able to spend large sums of money to maintain the favorable expense ratios that the Zero Portfolios have so far enjoyed.

5. Applicants have determined that under these circumstances it is in the best interest of Policyowners to replace the 1998 and the 2003 Portfolios with the Investment Grade Bond Portfolio, and to replace the 1993 Portfolio with the Money Market Portfolio. The 0.38% expense ratio of the Money Market Portfolio is far lower than the reimbursed 1.00% ratio of the 1993 Portfolio, and the 0.80% reimbursed expense ratio of the Investment Grade Bond Portfolio in lower than the 1.00% reimbursed expense ratio of both the

1998 and the 2003 Portfolios. Applicants expect that in the near future the actual expense ratio of the Investment Grade Bond Portfolio will decline to a level lower than the current reimbursed rate, and that further economies of scale may be achieved as the expense ratio declines as the assets of the Investment Grade Bond Portfolio increase.

6. Applicants submit that the investment objectives and the relative safety of the portfolio holdings of the Investment Grade Bond Portfolio and the Money Market Portfolio make them reasonable substitutes for Policyowners currently invested in the Zero Portfolios.

7. The Investment Grade Bond Portfolio and the Money Market Portfolio both seek to achieve high income levels while preserving capital. On December 31, 1991, over 92% of the Investment Grade Bond Portfolio's holdings were rated investment grade by Standard & Poor's Corporation. The average maturity of the Investment Grade Bond Portfolio's holdings will never exceed ten years, and currently is 5.5 years. At least initially, the Investment Grade Bond Portfolio's exposure to interest rate risk will not be unreasonably dissimilar to that of the 1998 Portfolio, and will be far less than that of the 2003 Portfolio.

8. On December 31, 1991, approximately 92% of the Money Market Portfolio's investments were in commercial paper rated in the highest two categories by Standard & Poor's Corporation. The Money Market Portfolio's average maturity will not exceed 120 days. As the 1993 Portfolio approaches its maturity date of November 15, 1993, its effective maturity will decline so that it continually approaches the effective maturity of The Money Market Portfolio.

9. Section 26(b) was designed to forestall the ability of a depositor or sponsor to present holders of interests in a unit investment trust with situations in which a holder's only choices would be to continue an investment in a suddenly unsuitable, unbargained for underlying security, or to elect a costly, and in effect forced, redemption. The proposed substitution does not present this type of situation. Moreover, under the Policies, each Policyowner now has, and following the substitution will continue to have, the ability to make transfers among a wide range of underlying investments. Each Policyowner, by his or her own actions, can make the proposed substitution temporary, without incurring any cost or suffering any current taxation under a Policy. Further, the Applicants propose to permit free substitution by any Policyowner at any time before, and for thirty days after, the proposed substitution.

Conclusion

The Applicants assert that, for the reasons set forth above, the requested order approving the proposed substitution pursuant to section 26(b) of the 1940 Act is consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

For the Commission, by the Division of Investment Management, under delegated authority.

BILLING CODE 8010-01-M

[Rel. No. IC-19145; 811-3917]

Institutional Diversified Assets; Notice of Application

December 4, 1992.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 (the "Act").

APPLICANT: Institutional Diversified Assets.

RELEVANT ACT SECTION: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be an investment company.

FILING DATE: The application was filed on October 23, 1991 and amended on November 5, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on December 29, 1992, and should be accompanied by proof of service on applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549. Applicant, 4900 Sears Tower, Chicago, Illinois 60606.

FOR FURTHER INFORMATION CONTACT: Marc Duffy, Staff Attorney, (202) 272-2511, or C. David Messman, Branch Chief, (202) 272-3018 (Office of Investment Company Regulation, Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is a Massachusetts business trust and open-end diversified management investment company. On November 23, 1983, applicant registered under the Act and filed a registration statement to register its securities under the Securities Act of 1933. Applicant's registration statement was declared effective on January 27, 1984, and its initial public offering commenced on January 30, 1984.

2. By letter dated June 29, 1984, applicant advised its shareholders of certain changes in the tax law that affected applicant's yield to the disadvantage of its shareholders. At no time were shareholders told that applicant would be liquidated. On various dates between June 29, 1984 and June 1, 1985 (the effective date of the new tax law), all of applicant's public shareholders redeemed their shares at net asset value. Following these redemptions, Goldman Sachs & Co., applicant's investment adviser and distributor ("Goldman Sachs"), was applicant's only remaining shareholder.

3. As of July 1, 1984, applicant had unamortized organizational expenses of approximately $225,000. Applicant originally had contemplated amortizing its organizational expenses over a five year period. Due to the uncertainty of applicant's viability after the tax law change, however, applicant amortized its organizational expenses in their entirely against its income during the period from July 1, 1984 to May 31, 1985.

4. Applicant has remained inactive since 1985. On April 19, 1990, applicant's board of trustees voted to dissolve applicant. On October 15, 1991, applicant's remaining portfolio securities were liquidated, its outstanding expense (including liquidation expenses of approximately $2,500) were paid, and its remaining cash was distributed to Goldman Sachs.

5. Applicant has no assets or liabilities. Applicant has no shareholders and is not a party to any litigation or administration proceeding. Applicant is engaged in only those business activities necessary for the winding-up of its affairs. Applicant intends to file an instrument of

termination with the Secretary of State of the Commonwealth of Massachusetts.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Release No. 35-25693; International Series Release No. 505]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

December 4, 1992.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by December 28, 1992 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requestr will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Maine Yankee Atomic Power Company (70-7638)

Maine Yankee Atomic Power Company ("Maine Yankee"), Edison Drive, Augusta, Maine 04330, a subsidiary company of New England Electric System and Northeast Utilities, both registered holding companies, has filed a post-effective amendment to its declaration under sections 6(a) and 7 of the Act.

By order dated January 26, 1990 (HCAR No. 25031) the Commission authorized Maine Yankee to enter into and borrow up to $35 million under an amended and restated Eurodollar revolving credit agreement ("Credit Agreement") with a syndicate or international banks, for which Union Bank of Switzerland is acting as agent (collectively, "Banks"), through December 31, 1992.

The Credit Agreement provides that Maine Yankee may issue, sell, and renew promissory notes ("Euro Notes") to the Banks in an aggregate principal amount of up to $35 million ("Commitment") at any one time outstanding with maturities of up to one year from the date of issuance. The Credit Agreement further provides that Maine Yankee may select interest periods for each Euro Note of one, three, or six months. The interest rate on each Euro Note is equal to either (i) the London Inter-Bank Offering Rate ("LIBOR") for the interest period selected for such Euro Note or, (ii) if LIBOR cannot be reasonably ascertained, the Banks' actual costs of funding such Euro Note, in each case plus ⅝%. A commitment fee on the unused portion of the Commitment will be .35%. The Euro Notes are secured by a second lien on Maine Yankee's nuclear fuel inventory and its rights to payments under related power contracts and a related Capital Funds Agreement.

Maine Yankee now proposes to extend its authorization to borrow under the Credit Agreement until December 31, 1995. It states that the Credit Agreement remains an important source of funds to finance both planned and unplanned capital needs, and to finance short-term debt balances.

Central and South West Corporation (70-7758)

Central and South West Corporation ("CSW"), a registered holding company, its wholly owned nonutility subsidiary companies, CSW Energy, Inc. ("CSW Energy") and CSW Development-I, Inc. ("Energy Sub"), each of 1616 Woodall Rodgers Freeway, P.O. Box 660164, Dallas, Texas 75202, and ARK/CSW Development Partnership ("ARK Joint Venture"), 23293 South Pointe Drive, Laguna Hills, California 92653 have filed a past-effective amendment under sections 6(a), 7, 9(a), 10 and 12(b) and Rules 43 and 45 to their application-declaration filed under sections 6(a), 7, 9(a), 10, 12(b) and 13(b) of the Act and Rules 43, 45, 86, 87, 90 and 91 thereunder.

By order dated September 28, 1990 (HCAR No. 25162) ("1990 Order"), CSW and CSW Energy were authorized, through December 31, 1995: (1) To spend $75 million ("Aggregate General Authority") to conduct preliminary studies of, to investigate, to research, to develop, to agree to construct (such construction subject to further Commission authorization) and, except with respect to independent power projects ("IPPs"), consult with respect to qualifying cogeneration facilities, qualifying small power production facilities (collectively "QFs") and IPPs; (2) to finance such activities through capital contributions, open account advances and loans up to $75 million; (3) for CSW Energy to form Energy Sub for the purpose of engaging in a joint venture ("ARK Joint Venture") with ARK Energy, Inc. ("ARK"), a nonassociate corporation; and (4) for CSW Energy to use $25 million of the $75 million Aggregate General Authority to finance the ARK Joint Venture through capital contributions and loans ("ARK Joint Venture Authority").

The 1990 Order also authorized CSW to fund the activities of CSW Energy through capital contributions, open account advances and loans in the aggregate amount of $75 million through December 31, 1995. The 1990 Order provided that each such loan would have an interest rate not in excess of the prime commercial lending rate as in effect from time-to-time at Mellon Bank plus 3% per annum and a final maturity not to exceed 30 years.

The 1990 Order also authorized investments in the ARK Joint Venture in the form of capital contributions and loans. The 1990 Order provided that each such loan would bear interest at a rate equal to the prime rate of The Chase Manhattan Bank, N.A. as in effect from time-to-time plus 2%. The 1990 Order provided that the principal of each such loan would be payable no later than 5 years after the date of the making of such loan.

By order dated November 22, 1991 (HCAR No. 25414), CSW Energy was authorized to provide consulting services with respect to IPPs.

CSW, CSW Energy, Energy Sub and the ARK Joint Venture now propose, through December 31, 1995, that: (1) The financing authority originally granted by the 1990 Order be increased from $75 million to $150 million; and (2) the financing authority for the ARK Joint Venture be increased from $25 million to $50 million. In all other respects, the terms and conditions under the 1990 Order shall remain the same.

Central and South West Corporation, et al. (70-8037)

Central and South West Corporation ("CSW"), 1616 Woodall Rodgers Freeway, Dallas, Texas 75202, a

registered holding company, Central Power and Light Company, P.O. Box 2121, Corpus Christi, Texas 78403, a wholly-owned electric utility subsidiary company of CSW, and CSW Credit, Inc. ("Credit"), 1616 Woodall Rodgers Freeway, Dallas, Texas 75202, a wholly-owned nonutility subsidiary company of CSW, have filed an amendment to the application-declaration under sections 6(a), 7, 9(a), and 10 of the Act. An original notice of filing of the application-declaration was issued by the Commission on October 9, 1992 (HCAR No. 25652).

With respect to factoring of utility accounts receivable ("Receivables"), Credit is currently subject to a restriction ("50% Restriction") such that the average amount of utility Receivables from non-associated companies for the preceding 12-month period outstanding as of the end of any calendar month would be less than the average amount of Receivables acquired from associated companies outstanding as of the end of each calendar month during the preceding 12-month period. In connection with the proposal to acquire Receivables of Houston Power & Lighting Company ("HLP"), Credit has requested that the amount of the HLP's Receivables not be subject to the 50% Restriction, or in the alternative, that it be temporarily permitted to exceed the 50% Restriction, because of the special circumstances of litigation with HLP. Credit now states that it will comply with the 50% Restriction after the purchase of HLP's Receivables and requests authorization to sell a sufficient amount of HLP Receivables ("Excess Receivables") acquired by Credit from HLP to unrelated third parties ("Purchasers") so that Credit remains in compliance with the 50% Restriction. Such sales are not effected on an individual account receivable basis, but rather on an undivided interest in, or all of the interest in, a specified pool or group of Excess Receivables. Such sales will be effected either through the direct sale of the Excess Receivables or through sales of market-based participations in the Excess Receivables. Credit sates that such Purchasers may securitize the Excess Receivables acquired from Credit. The Purchasers will have all right and benefit to such Excess Receivables or to the underlying Excess Receivables (in case of participations) and all proceeds thereof. Credit will have no obligation to such Purchaser other than to remit to such Purchaser all proceeds received on account of such Excess Receivables.

Northeast Utilities, et al. (70–8064)

Northeast Utilities ("Northeast"), 107 Selden Street, Berlin, Connecticut 06037, a registered holding company; its wholly owned subsidiary, Charter Oak Energy, Inc. ("Charter Oak"), 107 Selden Street, Berlin, Connecticut 06037; and a wholly owned subsidiary of Charter Oak, COE Development Corporation ("COE Development"), 107 Selden Street, Berlin, Connecticut 06037 have filed an application-declaration under sections 6(a), 7, 9(a), 10 and 12(b) of the Act and Rule 45 thereunder.

The application-declaration seeks authorization for several related transactions relative to (i) the formation of Charter Oak Windpower Corp. ("Charter Oak Windpower"), (ii) the investment therein of $10 million, and (iii) the acquisition by Charter Oak Windpower of 33% interests, through limited partnerships, in two qualifying small power production ("SPP") facilities located in California.

The application-declaration also seeks authorization for expansion of authorities granted by orders dated May 17, 1989 (HCAR No. 24893) ("1989 Order"), January 28, 1992 (HCAR No. 25461) ("January 1992 Order"), and October 16, 1992 (HCAR No. 25655) ("October 1992 Order"). The application-declaration requests that those authorities be expanded to allow the companies to engage in preliminary development activities relative to qualifying SPP facilities throughout the United States.

In the 1989 Order, Northeast was authorized to establish Charter Oak in order to invest and participate in qualifying SPP and cogeneration facilities ("Qualifying Facilities"). The 1989 Order authorized Charter Oak to invest and participate in qualifying cogeneration facilities throughout the nation. However, its investment and participation in qualifying SPP facilities was limited to facilities located in the service territories of Northeast and the New England Power Pool.

In the January 1992 Order, the authorization in the 1989 Order was expanded to authorize Charter Oak to explore the potential for investment and participation in independent power production (IPP) facilities. In the October 1992 Order, Northeast and Charter Oak were authorized to establish and finance COE Development in order to engage in preliminary development of Qualifying Facilities and IPP facilities. Northeast and Charter Oak recently filed, in File No. 70–8062, an application-declaration to request a two-year extension—through December 31, 1994—of the authorities granted under the 1989 Order, the January 1992 Order, and the October 1992 Order ("the Orders").

Under the Orders, Charter Oak is authorized to invest and participate in qualifying SPP facilities located only in the service territories of Northeast and the New England Power Pool. Pursuant to section 713 of the Energy Policy Act of 1992, the application-declaration requests an expansion of authorities granted under the Orders to allow the companies to engage in preliminary development activities relative to qualifying SPP facilities throughout the United States.

The application-declaration also seeks authorization for the incorporation in Connecticut of Charter Oak Windpower as a direct wholly owned subsidiary of Charter Oak. The application-declaration also seeks authorization for (i) Charter Oak Windpower to issue 100 shares of common stock and (ii) Charter Oak to acquire those 100 shares for $10,000 in cash.

The application-declaration requests authorization for Charter Oak Windpower to acquire interests in two wind-fueled qualifying SPP facilities located in California. Each facility is or will be owned by a California limited partnership ("Windpower Partnerships") in which U.S. Windpower, Inc. ("USW"), a Delaware corporation, holds a 1% general partnership interest and KPC Investors, L.P. ("KPCI"), a Delaware limited partnership, holds a 99% limited partnership interest.

The partners of KPCI are (i) USW, which holds a 1% limited partner interest; (ii) Kenetich Project Company ("KPC"), a Delaware corporation and affiliate of USW, which holds a 1% general partner interest; (iii) Kenetich Corporation ("Kenetech"), a Delaware corporation that is the direct parent of USW and the indirect parent of KPC, which holds a 32% limited partners interest; and (iv) an unnamed Delaware limited partnership, in which Kenetech is an indirect general partner, which holds a 66% limited partner interest. Kenetch presently intends to transfer its 32% limited partner interest in KPCI to USW prior to the acquisition of a partnership interest by Charter Oak Windpower.

The application-declaration contemplates that Charter Oak Windpower will acquire from KPCI a 33% limited partner interest in each Windpower Partnership in a transaction scheduled to close on December 30, 1992. The cost of the acquisition will not exceed $10 million. Because it will acquire a limited partner interest in each Windpower Partnership, Charter

Oak Windpower will have no role in the management or control of the Windpower Partnerships. The application-declaration states that Charter Oak will guarantee the obligations of Charter Oak Windpower as a limited partner in the Windpower Partnerships.

The first Windpower Partnership in which Charter Oak Windpower seeks to invest is Windpower Partners 1992–2 L.P., a California limited partnership, which owns a 31–MW windplant that consists of 310 U.S. Windpower Model 56–100 wind tubrine generators located in the Altament Pass in California. The windplant is a qualifying SPP facility. The second Windpower Partnership in which Charter Oak Windpower seeks to invest is Windpower Partners 1992, L.P., a California limited partnership to be formed on or before December 30, 1992. On December 30, 1992, this Windpower Partnership will acquire a 30-MW windplant that consists of 300 U.S. Windpower Model 56–100 wind turbine generators located in the Altamont Pass in California. The windplant is a qualifying SPP facility.

To fund the acquisition of the interests in the Windpower Partnerships, Northeast proposes to invest up to $10 million in Charter Oak, which Charter Oak proposes to invest in Charter Oak Windpower. The investment of Northeast in Charter Oak and the concomitant investment of Charter Oak in Charter Oak Windpower will be in the form of additional acquisitions of common stock, capital contributions, open account advances or subordinated loans.

The application-declaration states that the open account advances or subordinated loans would be for a term of up to ten years and would be at an interest rate based on the cost to Northeast of funds in effect on the date of issue—but in no case in excess of the prime rate of a bank designated by Northeast. The application-declaration also states that the interest rates and terms of the subordinated loans and open account advances from Charter Oak to Charter Oak Windpower would be identical to the interest rates and terms of the subordinated loans and open account advances from Northeast to Charter Coak.

Blackstone Valley Electric Company (70–8093)

Blackstone Valley Electric Company ("Blackstone"), Washington Highway, P.O. Box 1111, Lincoln, Rhode Island 02865, an electric public-utility subsidiary company of Eastern Utilities Associates, a registered holding company, has filed a declaration under sections 6(a) and 7 of the Act.

By order dated December 17, 1984 (HCAR No. 21534), the Commission authorized Blackstone to borrow the proceeds from the sale of $6,500,000 electric facilities revenue bonds (the "Bonds") issued by the Rhode Island Industrial Facilities Corporation. The Bonds are supported by a letter of credit which Blackstone obtained from Citibank N.A. (the "Citibank LOC"). Interest on the Bonds is determined weekly by the Remarketing Agent, which is Citibank Securities Markets, Inc., an affiliate of Citibank, N.A.

Blackstone asserts that the Citibank LOC is adversely affecting the rate of interest paid on the Bonds by Blackstone relative to other potential letter of credit issuers because (i) Citibank's credit rating, which supports the Bonds, has deteriorated and (ii) the Remarketing Agent cannot take a position with respect to the Bonds to attain a more attractive interest rate for Blackstone because its affiliate, Citibank, has issued the letter of credit supporting the Bonds.

Blackstone proposes to enter into an alternate letter of credit and reimbursement agreement (the "Alternate Credit Agreement") with The Bank of New York ("BONY"), which provides for the issuance of a new letter of credit (the "BONY LOC"). Under the Alternate Credit Agreement, BONY will issue the BONY LOC in an amount not to exceed $6,914,643.84. Such amount represents the principal amount of the Bonds and 124 days of interest computed at a rate of 20% per annum, and is the same amount as provided in the Citibank LOC. The BONY LOC will expire three years from its date of issue and may be extended for a period of one year at Blackstone's request, and subject to the consent of BONY.

Blackstone will be required to pay BONY an annual letter of credit commission equal to 0.60% per annum on the amount available to be drawn on the BONY LOC, as compared to a letter of credit commission 0.75% for the Citibank LOC. Blackstone will be subject to business covenants in the Alternate Credit Agreement similar to those in its credit agreement with Citibank.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Aviation Rulemaking Advisory Committee; Transport Airplane and Engine Subcommittee; Propulsion Harmonization Working Group

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of establishment of Propulsion Harmonization Working Group.

SUMMARY: Notice is given of the establishment of the Propulsion Harmonization Working Group of the Transport Airplane and Engine Subcommittee. This notice informs the public of the activities of the Transport Airplane and Engine Subcommittee of the Aviation Rulemaking Advisory Committee.

FOR FURTHER INFORMATION CONTACT: Mr. William J. (Joe) Sullivan, Executive Director, Transport Airplane and Engine Subcommittee, Aircraft Certification Service (AIR–3), 800 Independence Avenue SW., Washington, DC 20591, Telephone: (202) 267–9554; FAX: (202) 267–5364.

SUPPLEMENTARY INFORMATION: The Federal Aviation Administration (FAA) established an Aviation Rulemaking Advisory Committee (56 FR 2190, January 22, 1991) which held its first meeting on May 23, 1991 (56 FR 20492, May 3, 1991). The Transport Airplane and Engine Subcommittee was established at that meeting to provide advice and recommendations to the Director, Aircraft Certification Service, FAA, regarding the airworthiness standards for transport airplanes, engines and propellers in parts 25, 33, and 35 of the Federal Aviation Regulations (14 CFR parts 25, 33, and 35).

The FAA announced at the Joint Aviation Authorities (JAA)—Federal Aviation Administration (FAA) Harmonization Conference in Toronto, Ontario, Canada, (June 2–5, 1992) that it would consolidate within the Aviation Rulemaking Advisory Committee structure an ongoing objective to "harmonize" the Joint Aviation Requirements (JAR) and the Federal Aviation Regulations (FAR). Coincident with that announcement, the FAA assigned to the Transport Airplane and Engine Subcommittee those projects related to JAR/FAR 25, 33, and 35 harmonization which were then in the process of being coordinated between the JAA and the FAA. The harmonization process included the intention to present the results of JAA/

FAA coordination to the public in the form of either a Notice of Proposed Rulemaking or an advisory circular—an objective comparable to and compatible with that assigned to the Aviation Rulemaking Advisory Committee. The transport Airplane and Engine Subcommittee, consequently, established the Propulsion Harmonization Working Group.

Specifically, the Working Group's tasks are the following: The Propulsion Harmonization Working Group is charged with making recommendations to the Transport Airplane and Engine Subcommittee concerning the FAA disposition of the following subjects recently coordinated between the JAA and the FAA:

Task 1—Bird Ingestion: Update turbine engine bird ingestion requirements, including size and number of birds and pass/fail criteria (FAR 33.77)

Task 2—Inclement Weather: Update the inclement weather requirements for rain and hail in turbine engines (FAR 33.77).

Task 3—Vibration Surveys: Determine test requirements and pass/Fail criteria for turbine engine vibration tests (FAR 33.83).

Task 4—Rotor Integrity: Determine test requirements and pass/fail criteria for turbine, compressor, fan, and turbosupercharger rotor overspeed tests (FAR 33.27).

Task 5—Turbine Rotor Overtemperature: Clarify test and pass/fail requirements for turbine engine overtemperature tests to assure consistent certification criteria (FAR 33.88).

Task 6—Windmilling: Exmaine current turbine engine windmilling requirements and specify appropriate test and analysis requirements (FAR 33.92).

Reports:

A. Recommend time line(s) for completion of each task, including rationale, for Subcommittee consideration at the meeting of the subcommittee held following publication of this notice.

B. Give a detailed conceptual presentation on each task to the Subcommittee before proceeding with the work stated under items C and D, below. If task 1–6 require the development of more than one Notice of Proposed Rulemaking, identify what proposed amendments will be included in each notice.

C. Draft a Notice of Proposed Rulemaking for tasks 1–6 proposing new or revised requirements, a supporting economic analysis, and other required analysis, with any other collateral documents (such as Advisory Circulars) the Working Group determines to be needed.

D. Give a status report on each task at each meeting of the Subcommittee.

The Propulsion Harmonization Working Group will be comprised of experts from those organizations having an interest in the tasks assigned. A working Group member need not necessarily be a representative of one of the organizations of the parent Transport Airplane and Engine Subcommittee or of the full Aviation Rulemaking Advisory Committee. An individual who has expertise in the subject matter and wishes to become a member of the Working Group should *write* the person listed under the caption FOR FURTHER INFORMATION CONTACT expressing that desire, describing his or her interest in the task, and the expertise he or she would bring to the Working Group. The request will be reviewed with the Subcommittee and Working Group Chairs and the individual will be advised whether or not the request can be accommodated.

The Secretary of Transportation has determined that the information and use of the Aviation Rulemaking Advisory Committee and its subcommittees are necessary in the public interest in connection with the performance of duties of the FAA by law. Meetings of the full Committee and any subcommittees will be open to the public except as authorized by section 10(d) of the Federal Advisory Committee Act. Meetings of the Propulsion Harmonization Working Group will not be open to the public except to the extent that individuals with an interest and expertise are selected to participate. No public announcement of Working Group meetings will be made.

Issued in Washington, DC, on December 4, 1992.

William J. Sullivan,

Executive Director, Transport Airplane and Engine Subcommittee, Aviation Rulemaking Advisory Committee.

[FR Doc. 92–30113 Filed 12–10–92; 8:45 am]

Aviation Rulemaking Advisory Committee; Transport Airplane and Engine Subcommittee; Seat Testing Harmonization Working Group

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of establishment of Seat Testing Harmonization Working Group.

SUMMARY: Notice is given of the establishment of the Seat Testing Harmonization Working Group of the Transport Airplane and Engine Subcommittee. This notice informs the public of the activities of the Transport Airplane and Engine Subcommittee of the Aviation Rulemaking Advisory Committee.

FOR FURTHER INFORMATION CONTACT: Mr. William J. (Joe) Sullivan, Executive Director, Transport Airplane and Engine Subcommittee, Aircraft Certification Service (AIR–3), 800 Independence Avenue, SW., Washington, DC 20591, Telephone: (202) 267–9554; FAX: (202) 267–5364.

SUPPLEMENTARY INFORMATION: The Federal Aviation Administration (FAA) established an Aviation Rulemaking Advisory Committee (56 FR 2190, January 22, 1991) which held its first meeting on May 23, 1991 (56 FR 20492, May 3, 1991). The Transport Airplane and Engine Subcommittee was established at that meeting to provide advice and recommendations to the Director, Aircraft Certification Service, FAA, regarding the airworthiness standards for transport airplanes, engines and propellers in parts 25, 33 and 35 of the Federal Aviation Regulations (14 CFR parts 25, 33 and 35).

The FAA announced at the Joint Aviation Authorities (JAA)-Federal Aviation Administration (FAA) Harmonization Conference in Toronto, Ontario, Canada (June 2–5, 1992), that it would consolidate within the Aviation Rulemaking Advisory Committee structure an ongoing objective to "harmonize" the Joint Aviation Requirements (JAR) and the Federal Aviation Regulations (FAR). Coincident with that announcement, the FAA assigned to the Transport Airplane and Engine Subcommittee those projects related to JAR/FAR 25, 33 and 35 harmonization which were then in the process of being coordinated between the JAA and the FAA. The harmonization process included the intention to present the results of JAA/FAA coordination to the public in the form of either a Notice of Proposed Rulemaking or an advisory circular—an objective comparable to and compatible with that assigned to the Aviation Rulemaking Advisory Committee. The Transport Airplane and Engine Subcommittee, consequently, established the Seat Testing Harmonization Working Group.

Specifically, the Working Group's task is the following:

The Seat Testing Harmonization Working Group is charged with making

recommendations to the Transport Airplane and Engine Subcommittee concerning the FAA disposition of the following subject recently coordinated between the JAA and the FAA:

Crew Seats: Make recommendations concerning the requirements and guidance material for the certification of flightcrew seats and the associated test conditions (FAR 25.562; AC 25.562A).

Reports:

A. Recommend time line(s) for completion of the task, including rationale, for Subcommittee consideration at the meeting of the subcommittee held following publication of this notice.

B. Give a detailed conceptual presentation on each task to the Subcommittee before proceeding with the work stated under items C, below.

C. Draft a Notice of Proposed Rulemaking the task proposing new or revised requirements, a supporting economic analysis, and other required analysis, with any other collateral documents (such as Advisory Circulars) the Working Group determines to be needed.

D. Give a status report on each task at each meeting of the Subcommittee.

The Seat Testing Harmonization Working Group will be comprised of experts from those organizations having an interest in the tasks assigned. A Working Group member need not necessarily be a representative of one of the organizations of the parent Transport Airplane and Engine Subcommittee or of the full Aviation Rulemaking Advisory Committee. An individual who has expertise in the subject matter and wishes to become a member of the Working Group should write the person listed under the caption **FOR FURTHER INFORMATION CONTACT** expressing that desire, describing his or her interest in the task, and the expertise he or she would bring to the Working Group. The request will be reviewed with the Subcommittee and Working Group Chairs and the individual will be advised whether or not the request can be accommodated.

The Secretary of Transportation has determined that the information and use of the Aviation Rulemaking Advisory Committee and its subcommittees are necessary in the public interest in connection with the performance of duties of the FAA by law. Meetings of the full Committee and any subcommittees will be open to the public except as authorized by section 10(d) of the Federal Advisory Committee Act. Meetings of the Seat Testing Harmonization Working Group will not be open to the public except to the extent that individuals with an interest and expertise are selected to participate. No public announcement of Working Group meetings will be made.

Issued in Washington, DC, on December 4, 1992.

William J. Sullivan,

Executive Director, Transport Airplane and Engine Subcommittee, Aviation Rulemaking Advisory Committee.

BILLING CODE 4910–13–M

Aviation Rulemaking Advisory Committee; Transport Airplane and Engine Subcommittee; Direct View Harmonization Working Group

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of establishment of direct view harmonization working group.

SUMMARY: Notice is given of the establishment of the Direct View Harmonization Working Group of the Transport Airplane and Engine Subcommittee. This notice informs the public of the activities of the Transport Airplane and Engine Subcommittee of the Aviation Rulemaking Advisory Committee.

FOR FURTHER INFORMATION CONTACT: Mr. William J. (Joe) Sullivan, Executive Director, Transport Airplane and Engine Subcommittee, Aircraft Certification Service (AIR–3), 800 Independence Avenue, SW., Washington, DC 20591, Telephone: (202) 267–9554; FAX: (202) 267–5364.

SUPPLEMENTARY INFORMATION: The Federal Aviation Administration (FAA) established an Aviation Rulemaking Advisory Committee (56 FR 2190, January 22, 1991) which held its first meeting on May 23, 1991 (56 FR 20492, May 3, 1991). The Transport Airplane and Engine Subcommittee was established at the meeting to provide advice and recommendations to the Director, Aircraft Certification Service, FAA, regarding the airworthiness standards for transport airplanes, engines and propellers in parts 25, 33 and 35 of the Federal Aviation Regulations (14 CFR parts 25, 33 and 35).

The FAA announced at the Joint Aviation Authorities (JAA)–Federal Aviation Administration (FAA) Harmonization Conference in Toronto, Ontario, Canada, (June 2–5, 1992) that it would consolidate within the Aviation Rulemaking Advisory Committee structure an ongoing objective to "harmonize" the Joint Aviation Requirements (JAR) and the Federal Aviation Regulations (FAR). Coincident with that announcement, the FAA assigned to the Transport Airplane and Engine Subcommittee those projects related to JAR/FAR 25, 33 and 35 harmonization which were then in the process of being coordinated between the JAA and the FAA. The harmonization process included the intention to present the results of JAA/FAA coordination to the public in the form of either a Notice of Proposed Rulemaking or an advisory circular—an objective comparable to and compatible with that assigned to the Aviation Rulemaking Advisory Committee. The Transport Airplane and Engine Subcommittee, consequently, established the Direct View Harmonization Working Group.

Specifically, the Working Group's task is the following:

The Direct View Harmonization Working Group is charged with making recommendations to the Transport Airplane and Engine Subcommittee concerning the FAA disposition of the following subject recently coordinated between the JAA and the FAA:

Cabin Attendant Direct View: Review the proposed guidance material contained in draft Advisory Circular 25.785 for finding compliance with the cabin attendant's direct view requirements of FAR 25.785 and make recommendations for new or revised guidance (FAR 25.785; AC 35.785).

Reports:

A. Recommend time line(s) for completion of each task, including rationale, for Subcommittee consideration at the meeting of the subcommittee held following publication of this notice.

B. Give a detailed conceptual presentation on each task to the Subcommittee before proceeding with the work stated under items C, below.

C. Draft a change to Advisory Circular 25.783 providing appropriate guidance material.

D. Give a status report on each task at each meeting of the Subcommittee.

The Direct View Harmonization Working Group will be comprised of experts from those organizations having an interest in the tasks assigned. A Working Group member need not necessarily be a representative of one of the organizations of the parent Transport Airplane and Engine Subcommittee or of the full Aviation Rulemaking Advisory Committee. An individual who has expertise in the subject matter and wishes to become a member of the Working Group should write the person listed under the caption **FOR FURTHER INFORMATION CONTACT** expressing that desire, describing his or her interest in the task,

and the expertise he or she would bring to the Working Group. The request will be reviewed with the Subcommittee and Working Group Chairs and the individuals will be advised whether or not the request can be accommodated.

The Secretary of Transportation has determined that the information and use of the Aviation Rulemaking Advisory Committee and its subcommittees are necessary in the public interest in connection with the performance of duties of the FAA by law. Meetings of the full Committee and any subcommittees will be open to the public except as authorized by section 10(d) of the Federal Advisory Committee Act. Meetings of the Direct View Harmonization Working Group will not be open to the public except to the extent that individuals with an interest and expertise are selected to participate. No public announcement of Working Group meetings will be made.

Issued in Washington, DC, on December 4, 1992.

William J. Sullivan,

Executive Director, Transport Airplane and Engine Subcommittee, Aviation Rulemaking Advisory Committee.

BILLING CODE 4910-13-M

Aviation Rulemaking Advisory Committee; Transport Airplane and Engine Subcommittee; Electromagnetic Effects Harmonization Working Group

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of establishment of Electromagnetic Effects Harmonization Working Group.

SUMMARY: Notice is given of the establishment of the Electromagnetic Effects Harmonization Working Group of the Transport Airplane and Engine Subcommittee. This notice informs the public of the activities of the Transport Airplane and Engine Subcommittee of the Aviation Rulemaking Advisory Committee.

FOR FURTHER INFORMATION CONTACT: Mr. William J. (Joe) Sullivan, Executive Director, Transport Airplane and Engine Subcommittee, Aircraft Certification Service (AIR–3), 800 Independence Avenue SW., Washington, DC 20591, Telephone: (202) 267–9554; FAX: (202) 267–5364.

SUPPLEMENTARY INFORMATION: The Federal Aviation Administration (FAA) established an Aviation Rulemaking Advisory Committee (56 FR 2190, January 22, 1991) which held its first meeting on May 23, 1991 (56 FR 20492, May 3, 1991). The Transport Airplane and Engine Subcommittee was established at that meeting to provide advice and recommendations to the Director, Aircraft Certification Service, FAA, regarding the airworthiness standards for transport airplanes, engines and propellers in parts 25, 33 and 35 of the Federal Aviation Regulations (14 CFR parts 25, 33 and 35).

The FAA announced at the Joint Aviation Authorities (JAA)-Federal Aviation Administration (FAA) Harmonization Conference in Toronto, Ontario, Canada, (June 2–5, 1992) that it would consolidate within the Aviation Rulemaking Advisory Committee structure an ongoing objective to "harmonize" the Joint Aviation Requirements (JAR) and the Federal Aviation Regulations (FAR). Coincident with that announcement, the FAA assigned to the Transport Airplane and Engine Subcommittee those projects related to JAR/FAR 25, 33 and 35 harmonization which were then in the process of being coordinated between the JAA and the FAA. The harmonization process included the intention to present the results of JAA/FAA coordination to the public in the form of either a Notice of Proposed Rulemaking or an advisory circular—an objective comparable to and compatible with that assigned to the Aviation Rulemaking Advisory Committee. The Transport Airplane and Engine Subcommittee, consequently, established the Electromagnetic Effects Harmonization Working Group.

Specifically, the Working Group's tasks are the following:

The Electromagnetic Effects Harmonization Working Group is charged with making recommendations to the Transport Airplane and Engine Subcommittee concerning the FAA disposition of the following subjects recently coordinated between the JAA and the FAA:

Task-1—High Energy Radiated Fields: Develop new requirements for aircraft exposure to high energy radiated fields (new FAR 25.1316 and 25.1317 and related provisions of FAR parts 23, 27, 29, 33, and 35, as appropriate). The working group should draw members for this task from the interests represented by the General Aviation and Business Airplane, and Rotocraft Subcommittees.

Task 2—Lightning Protection Requirements: Revise advisory material on lightning protection requirements in Advisory Circulars 20–53B and 20–136 (FAR 25.1316 and related provisions of FAR parts 23, 27, 29, 33 and 35, as appropriate; AC 20–53B and 20–136). The working group should draw members for this task from the interests represented by the General Aviation and Business Airplane, and Rotorcraft Subcommittees.

Reports:

A. Recommend time line(s) for completion of each task, including rationale, for Subcommittee consideration at the meeting of the subcommittee held following publication of this notice.

B. Give a detailed conceptual presentation on each task to the Subcommittee before proceeding with the work stated under items C and D, below.

C. Draft a Notice of Proposed Rulemaking for task 1 proposing new requirements, a supporting economic analysis, and other required analysis, with any other collateral documents (such as Advisory Circulars) the Working Group determines to be needed. When the detailed briefing under item B, above, and this report are presented to the subcommittee, the Subcommittee and Working Group Chairs should arrange for a joint meeting with the General Aviation and Business Airplane and Rotorcraft Subcommittees to consider and join in the consensus on the results of those reports.

D. Draft changes to Advisory Circulars 20–53B and 20–136 for task 2 providing appropriate advisory material for the task. When the detailed briefing under item B, above, and this report are presented to the subcommittee, the Subcommittee and Working Group Chairs should arrange for a joint meeting with the General Aviation and Business Airplane and Rotorcraft Subcommittees to consider and join in the consensus on the results of those reports.

E. Give a status report on each task at each meeting of the Subcommittee.

The Installation Harmonization Working Group will be comprised of experts from those organizations having an interest in the tasks assigned. A Working Group member need not necessarily be a representative of one of the organizations of the parent Transport Airplane and Engine Subcommittee or of the full Aviation Rulemaking Advisory Committee. An individual who has exerptise in the subject matter and wishes to become a member of the Working Group should write the person listed under the caption "**FOR FURTHER INFORMATION CONTACT**" expressing that desire, describing his or her interest in the task, and the expertise he or she would bring to the Working Group. The request will be reviewed with the Subcommittee and Working Group Chairs and the individual will be advised whether or not the request can be accommodated.

The Secretary of Transportation has determined that the information and use of the Aviation Rulemaking Advisory Committee and its subcommittee are necessary in the public interest in connection with the performance of duties of the FAA by law. Meetings of the full Committee and any subcommittees will be open to the public except as authorized by section 10(d) of the Federal Advisory Committee Act. Meetings of the Installation Harmonization Working Group will not be open to the public except to the extent that individuals with an interest and expertise are selected to participate. No public announcements of Working Group meetings will be made.

Issued in Washington, DC, on December 4, 1992.

William J. Sullivan,

Executive Director, Transport Airplane and Engine Subcommittee, Aviation Rulemaking Advisory Committee.

[FR Doc. 92–30117 Filed 12–10–92; 8:45 am]

BILLING CODE 4910–13–M

Aviation Rulemaking Advisory Committee; Transport Airplane and Engine Subcommittee; Installation Harmonization Working Group

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of establishment of installation harmonization working group.

SUMMARY: Notice is given of the establishment of the Installation Harmonization Working Group of the Transport Airplane and Engine Subcommittee. This notice informs the public of the activities of the Transport Airplane and Engine Subcommittee of the Aviation Rulemaking Advisory Committee.

FOR FURTHER INFORMATION CONTACT: Mr. William J. (Joe) Sullivan, Executive Director, Transport Airplane and Engine Subcommittee, Aircraft Certification Service (AIR–3), 800 Independence Avenue SW., Washington, DC 20591, Telephone: (202) 267–9554; FAX: (202) 267–5364.

SUPPLEMENTARY INFORMATION: The Federal Aviation Administration (FAA) established an Aviation Rulemaking Advisory Committee (56 FR 2190, January 22, 1991) which held its first meeting on May 23, 1991 (56 FR 20492, May 3, 1991). The Transport Airplane and Engine Subcommittee was established at that meeting to provide advice and recommendations to the Director, Aircraft Certification Service, FAA regarding the airworthiness standards for transport airplanes, engines and propellers in parts 25, 33, and 35 of the Federal Aviation Regulations (14 CFR parts 25, 23 and 35).

The FAA announced at the Joint Aviation Authorities (JAA)-Federal Aviation Administration (FAA) Harmonization Conference in Toronto, Ontario, Canada, (June 2–5, 1992) that it would consolidate within the Aviation Rulemaking Advisory Committee structure an ongoing objective to "harmonize" the Joint Aviation Requirements (JAR) and the Federal Aviation Regulations (FAR). Coincident with that announcement, the FAA assigned to the Transport Airplane and Engine Subcommittee those projects related to JAR/FAR 25, 33 and 35 harmonization which were then in the process of being coordinated between the JAA and the FAA. The harmonization process included the intention to present the results of JAA/FAA coordination to the public in the form of either a Notice of Proposed Rulemaking or an advisory circular—an objective comparable to and compatible with the assigned to the Aviation Rulemaking Advisory Committee. The Transport Airplane and Engine Subcommittee, consequently, established the Installation Harmonization Working Group.

Specifically, the Working Group's tasks are the following:

The Installation Harmonization Working Group is charged with making recommendations to the Transport Airplane and Engine Subcommittee concerning the FAA disposition of the following subjects recently coordinated between the JAA and FAA:

Task 1—Installations (Engines): Develop recommendations concerning new or revised requirements for the installation of engines on transport category airplanes and determine the relationship, if any, of the requirements of FAR 25.1309 to these engine installations (FAR 25.901).

Task 2—Windmilling Without Oil: Determine the need for requirements for turbine engine windmilling without oil (FAR 25.903).

Task 3—Non-contained Failures: Revise advisory material on non-contained engine failure requirements (FAR 25.903 and related provisions of FAR Parts 23, 27, 29, 33, and 35, as appropriate; AC 20–128). The working group should draw members for this task from the interests represented by the General Aviation and Business Airplane, and Rotorcraft Subcommittees.

Task 4—Thrust Reversing Systems: Develop recommendations concerning new or revised requirements and guidance material for turbojet engine thrust reversing systems (FAR 25.933).

Reports:

A. Recommend time line(s) for completion of each task, including rationale, for Subcommittee consideration at the meeting of the subcommittee held following publication of this notice.

B. Give a detailed conceptual presentation on each task to the Subcommittee before proceeding with the work stated under items C and D, below. If tasks 1, 2, and 4 require the development of more than one Notice of Proposed Rulemaking, identify what proposed amendments will be included in each notice.

C. Draft a Notice of Proposed Rulemaking for tasks 1, 2 and 4 proposing new or revised requirements, a supporting economic analysis, and other required analysis, with any other collateral documents (such as Advisory Circulars) the Working Group determines to be needed.

D. Draft a change to Advisory Circular 120–128 for task 3 providing appropriate advisory material for each task. When the detailed briefing under item B, above, and this report are presented to the subcommittee, the Subcommittee and Working Group Chairs should arrange for a joint meeting with the General Aviation and Business Airplane and Rotorcraft Subcommittees to consider and join in the consensus on the results of those reports.

E. Give a status report on each task at each meeting of the Subcommittee.

The Installation Harmonization Working Group will be comprised of experts from those organizations having an interest in the tasks assigned. A Working Group member need not necessarily be a representative of one of the organizations of the parent Transport Airplane and Engine Subcommittee or of the full Aviation Rulemaking Advisory Committee. An individual who has expertise in the subject matter and wishes to become a member of the Working Group should write the person listed under the caption **FOR FURTHER INFORMATION CONTACT** expressing that desire, describing his or her interest in the task, and the expertise he or she would bring to the Working Group. The request will be reviewed with the Subcommittee and Working Group Chairs and the individual will be advised whether or not the request can be accommodated.

The Secretary of Transportation has determined that the information and use of the Aviation Rulemaking Advisory Committee and its subcommittees are necessary in the public interest in connection with the performance of duties of the FAA by law. Meetings of the full Committee and any subcommittees will be open to the public except as authorized by section 10(d) of the Federal Advisory Committee Act. Meetings of the Installation Harmonization Working Group will not be open to the public except to the extent that individuals with an interest and expertise are selected to participate. No public announcement of Working Group meetings will be made.

Issued in Washington, DC, on December 4, 1992.

William J. Sullivan,

Executive Director, Transport Airplane and Engine Subcommittee, Aviation Rulemaking Advisory Committee.

[FR Doc. 92–30118 Filed 12–10–92; 8:45 am]

BILLING CODE 4910–13–M

Aviation Rulemaking Advisory Committee; Transport Airplane and Engine Subcommittee; Cargo Standards Harmonization Working Group

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of establishment of cargo standards harmonization working group.

SUMMARY: Notice is given of the establishment of the Cargo Standards Harmonization Working Group of the Transport Airplane and Engine Subcommittee. This notice informs the public of the activities of the Transport Airplane and Engine Subcommittee of the Aviation Rulemaking Advisory Committee.

FOR FURTHER INFORMATION CONTACT: Mr. William J. (Joe) Sullivan, Executive Director, Transport Airplane and Engine Subcommittee, Aircraft Certification Service (AIR-3), 800 Independence Avenue SW., Washington, DC 20591, Telephone: (202) 267-9554; FAX: (202) 267-5364.

SUPPLEMENTARY INFORMATION: The Federal Aviation Administration (FAA) established an Aviation Rulemaking Advisory Committee (56 FR 2190, January 22, 1991) which held its first meeting on May 23, 1991 (56 FR 20492, May 3, 1991). The Transport Airplane and Engine Subcommittee was established at that meeting to provide advice and recommendations to the Director, Aircraft Certification Service, FAA, regarding the airworthiness standards for transport airplanes, engines and propellers in parts 25, 33 and 35 of the Federal Aviation Regulations (14 CFR parts 25, 33 and 35).

The FAA announced at the Joint Aviation Authorities (JAA)—Federal Aviation Administration (FAA) Harmonization Conference in Toronto, Ontario, Canada, (June 2–5, 1992) that it would consolidate within the Aviation Rulemaking Advisory Committee structure an ongoing objective to "harmonize" the Joint Aviation Requirements (JAR) and the Federal Aviation Regulations (FAR). Coincident with that announcement, the FAA assigned to the Transport Airplane and Engine Subcommittee those projects related to JAR/FAR 25, 33 and 35 harmonization which were then in the process of being coordinated between the JAA and the FAA. The harmonization process included the intention to present the results of JAA/FAA coordination to the public in the form of either a Notice of Proposed Rulemaking or an advisory circular—an objective comparable to and compatible with that assigned to the Aviation Rulemaking Advisory Committee. The Transport Airplane and Engine Subcommittee, consequently, established the Cargo Standards Harmonization Working Group.

Specifically, the Working Group's task is the following:

The Cargo Standards Harmonization Working Group is charged with making recommendations to the Transport Airplane and Engine Subcommittee concerning the FAA disposition of the following subject recently coordinated between the JAA and the FAA:

Main Deck Class B Cargo Compartments: Make recommendations for new or revised requirements for main deck Class B cargo compartments (FAR 25.857).

Reports

A. Recommend time line(s) for completion of each task, including rationale, for Subcommittee consideration at the meeting of the subcommittee held following publication of this notice.

B. Give a detailed conceptual presentation on each task to the Subcommittee before proceeding with the work stated under item C, below.

C. Draft a Notice of Proposed Rulemaking proposing new or revised requirements, a supporting economic analysis, and other required analysis, with any other collateral documents (such as Advisory Circulars) the Working group determines to be needed.

D. Give a status report on each task at each meeting of the Subcommittee.

The Cargo Standards Harmonization Working Group will be comprised of experts from those organizations having an interest in the tasks assigned. A Working Group member need not necessarily be a representative of one of the organizations of the parent Transport Airplane and Engine Subcommittee or of the full Aviation Rulemaking Advisory Committee. An individual who has expertise in the subject matter and wishes to become a member of the Working Group should write the person listed under the caption **FOR FURTHER INFORMATION CONTACT** expressing that desire, describing his or her interest in the task, and the expertise he or she would bring to the Working Group. The request will be reviewed with the Subcommittee and Working Group Chairs and the individual will be advised whether or not the request can be accommodated.

The Secretary of Transportation has determined that the information and use of the Aviation Rulemaking Advisory Committee and its subcommittees are necessary in the public interest in connection with the performance of duties of the FAA by law. Meetings of the full Committee and any subcommittees will be open to the public except as authorized by section 10(d) of the Federal Advisory Committee Act. Meetings of the Cargo Standards Harmonization Working Group will not be open to the public except to the extent that individuals with an interest and expertise are selected to participate. No public announcement of Working Group meetings will be made.

Issued in Washington, DC, on December 4, 1992.

William J. Sullivan,

Executive Director, Transport Airplane and Engine Subcommittee, Aviation Rulemaking Advisory Committee.

BILLING CODE 4910-13-M

Aviation Rulemaking Advisory Committee; Rotorcraft Subcommittee; JAR/FAR 27 and 29 Harmonization Working Group

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of establishment of JAR/FAR 27 and 29 Harmonization Working Group.

SUMMARY: Notice is given of the establishment of the JAR/FAR 27 and 29 Harmonization Working Group of the Rotorcraft Subcommittee. This notice informs the public of the activities of the Rotorcraft Subcommittee of the Aviation Rulemaking Advisory Committee.

FOR FURTHER INFORMATION CONTACT: Mr. William J. (Joe) Sullivan, Executive Director, Rotorcraft Subcommittee, Aircraft Certification Service (AIR-3), 800 Independence Avenue SW., Washington, DC 20591, Telephone: (202) 267-9554; FAX: (202) 267-5364.

SUPPLEMENTARY INFORMATION: The Federal Aviation Administration (FAA) established an Aviation Rulemaking Advisory Committee (56 FR 2190, January 22, 1991) which held its first meeting on May 23, 1991 (56 FR 20492, May 3, 1991). The Rotorcraft Subcommittee was established at that meeting to provide advice and recommendations to the Director, Aircraft Certification Service, FAA, regarding the airworthiness standards for normal and transport category rotorcraft in parts 27 and 29 of the Federal Aviation Regulations (14 CFR parts 27 and 29).

The FAA announced at the Joint Aviation Authorities (JAA)—Federal Aviation Administration (FAA) Harmonization Conference in Toronto, Ontario, Canada, (June 2–5, 1992) that it would consolidate within the Aviation Rulemaking Advisory Committee structure an ongoing objective to "harmonize" the Joint Aviation

Requirements (JAR) and the Federal Aviation Regulations (FAR). Coincident with that announcement, the FAA assigned to the Rotorcraft Subcommittee those projects related to JAR/FAR 27 and 29 Harmonization which were then in the process of being coordinated between the JAA and the FAA. The Harmonization process included the intention to present the results of JAA/FAA coordination to the public in the form of either a Notice of Proposed Rulemaking or an advisory circular—an objective comparable to and compatible with that assigned to the Aviation Rulemaking Advisory Committee. The Rotorcraft Subcommittee, consequently, established the JAR/FAR 27 and 29 Harmonization Working Group.

Specifically, the Working Group's tasks are the following:

The JAR/FAR 27 and 29 Harmonization Working Group is charged with making recommendations to the Rotorcraft Subcommittee concerning the FAA disposition of the following subjects recently coordinated between the JAA and the FAA:

Task 1—Performance: Category A performance of normal category rotorcraft (FAR 27.1 and Appendix C).

Task 2—Rotor Drive System: Design assessment of the rotor drive systems which are consistent with the present state of the design art (FAR 29.547, 29.917, AC 29–2A).

Task 3—Critical Parts: Identification of the critical parts for consideration under design, production and maintenance, according to a critical parts plan to be prepared by the manufacture (FAR 27.602, 29.602).

Task 4—Oil Pressure Indicator: An oil pressure indicator to be provided for pressure-lubricated gear boxes to inform the crew in time that oil pressure is abnormal (FAR 27.1305, 29.1305).

Task 5—Performance & Propulsion: Miscellaneous performance and propulsion requirements for transport category rotorcraft (FAR 29.67, 29.923, 29.1587).

Task 6—Flutter: Update the flutter substantiation methodology and documentation requirements for transport category rotorcraft (FAR 29.629).

Task 7—Lighting and Bonding: Update lighting and bonding requirements for transport category rotorcraft (FAR 29.610, 29.1309).

Task 8—Bird Strike: Determine the need for bird strike protection for transport category rotorcraft (FAR 29.631).

Task 9—Battery Endurance: Reassess battery endurance requirements relative to different modes of operation and to varying environments for transport category rotorcraft (FAR 29.1351).

Task 10—Fire Detection: Reduce probability of false fire detector warning for transport category rotorcraft (AC 29–2A; ref. FAR 29.1203).

Task 11—Vibrations: Update advisory material of Appendix A of FAR 29 to provide guidance on basic vibration data to be provided for service (continuing airworthiness) use (AC 29–2A; ref. FAR 29 Appendix A).

Task 12—Rotor Drive System and Fatigue Gear Substantiation: Identify acceptable compliance methodology for gear teeth fatigue (AC 29–2A; ref. FAR 29.571, 29.901).

Reports

A. Recommend time line(s) for completion of each task, including rationale, for Subcommittee consideration at the meeting of the subcommittee held following publication of this notice.

B. Give a detailed conceptual presentation on each task to the Subcommittee before proceeding with the work stated under items C and D, below. If tasks 1–9 require the development of more than one Notice of Proposed Rulemaking, identify what proposed amendments will be included in each notice.

C. Draft a Notice of Proposed Rulemaking for tasks 1–9 proposing new or revised requirements, a supporting economic analysis, and other required analysis, with any other collateral documents (such as Advisory Circulars) the Working Group determines to be needed.

D. Draft a change to Advisory Circular 29–2A for tasks 2 and 10–12 providing appropriate advisory material for each task.

E. Give a status report on each task at each meeting of the Subcommittee.

The JAR/FAR 27 and 29 Harmonization Working Group will be comprised of experts from those organizations having an interest in the tasks assigned. A Working Group member need not necessarily be a representative of one of the organizations of the parent Rotorcraft Subcommittee or of the full Aviation Rulemaking Advisory Committee. An individual who has expertise in the subject matter and wishes to become a member of the Working Group should write the person listed under the caption **FOR FURTHER INFORMATION CONTACT** expressing that desire, describing his or her interest in the task, and the expertise he or she would bring to the Working Group. The request will be reviewed with the Subcommittee and Working Group Chair, and the individual will be advised whether or not the request can be accommodated.

The Secretary of Transportation has determined that the information and use of the Aviation Rulemaking Advisory Committee and its subcommittees are necessary in the public interest in connection with the performance of duties of the FAA by law. Meetings of the full Committee and any subcommittees will be open to the public except as authorized by section 10(d) of the Federal Advisory Committee Act. Meetings of the JAR/FAR 27 and 29 Harmonization Working Group will not be open to the public except to the extent that individuals with an interest and expertise are selected to participate. No public announcement of Working Group meetings will be made.

Issued in Washington, DC, on December 4, 1992.

William J. Sullivan,

Executive Director, Rotorcraft Subcommittee, Aviation Rulemaking Advisory Committee.

BILLING CODE 4910–13–M

RTCA, Inc., Special Committee 175; Minimum General Specification for Ground Based Electronic Equipment in the National Airspace System; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C., appendix I), notice is hereby given for the fifth meeting of Special Committee 175 to be held December 7–8, 1992, at the RTCA conference room, 1140 Connecticut Avenue, NW., suite 1020, Washington, DC 20036 commencing at 9 a.m.

The agenda for this meeting is as follows: (1) Chairman's introductory remarks; (2) Approval of summary of meeting held October 7–9; (3) Subcommittee review of draft specification; (4) Subcommittees meet in separate sessions; (5) Discuss approach for FAA Comments to Draft Specification; (6) Other business; (7) Date and place of next meeting.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, 1140 Connecticut Avenue, NW., suite 1020, Washington, DC 20036; (202) 833–9339. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on November 25, 1992.

Joyce J. Gillen,

Designated Officer.

[FR Doc. 92-30111 Filed 12-10-92; 8:45 am]

BILLING CODE 4910-13-M

RTCA, Inc., RTCA Technical Management Committee; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463, 5 U.S.C., appendix I), notice is hereby given for the RTCA Technical Management Committee to be held December 16, 1992, at the RTCA conference room, 1140 Connecticut Avenue, N.W., Suite 1020, Washington, DC commencing at 1:30 p.m.

The agenda for this meeting is as follows: (1) Review October 26, 1992, TMC meeting summary (RTCA No. 713-82/TMC-54); (2) Consider/approve the formation of two new Special Committees as requested by the Airports Council International (formerly known as the Airports Association Council International-North America); (a) Form a new Special Committee that will prepare recommended standards for sensors/detectors used to activate runway entrance stop bars. (b) Form a new Special Committee that will prepare recommended standards for software used to control airport lights and other electronic airport surface traffic management systems; (3) Determine the preferred method for addressing the Global Navigation Satellite System Transition and Implementation Strategy Task Force recommendations calling for RTCA action. The TMC should assign tasking and establish appropriate milestones; (4) Concur in the formation of an Ad Hoc Committee on software issues that will sustain the government-industry cooperation developed by RTCA SC-167/EUROCAE WG-12 during the preparation of DO 178B. This new Ad Hoc committee will also lay the foundation for a new Special Committee to prepare "DO-178C" when the accumulation of software technology changes warrant such an effort; (5) Introduce for consideration the formation of new Special committees on: (a) Performance standards for Head Up Displays (HUDs) (b) Performance standards for flight Management Systems (FMSs) (c) Performance standards for enhanced vision components and systems; (6) Other business

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, 1140 Connecticut Avenue, N.W., Suite 1020, Washington, DC 20036; (202) 833-9339. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on November 25, 1992.

Joyce J. Gillen,

Designated Officer.

BILLING CODE 4910-13-M

Research and Special Programs Administration

[Preemption Determination No. PD-1; Docket No. PDA-1(R)]

Application by National Solid Wastes Management Association for a Preemption Determination Concerning Maryland, Massachusetts, and Pennsylvania Bonding Requirements for Vehicles Carrying Hazardous Wastes

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Administrative determination that Maryland, Massachusetts and Pennsylvania bonding requirements for vehicles carrying hazardous wastes are preempted by the Hazardous Materials Transportation Act (HMTA).

APPLICANT: National Solid Wastes Management Association, on behalf of its Chemical Waste Transportation Institute.

STATE LAWS AFFECTED: Annotated Code of Maryland (Md. Code Ann.), Environment § 7-252 and Code of Maryland Regulations (COMAR) 26.13.04.04; 310 Code of Massachusetts Regulations (CMR) 30.411; 35 Pennsylvania Statutes Annotated (Pa. Stat. Ann.) § 6018.505(e) and 25 Pennsylvania Code § 263.32.

APPLICABLE FEDERAL REQUIREMENTS: Hazardous Materials Transportation Act (HMTA), 49 App. U.S.C. 1801 *et seq.*, and the Hazardous Materials Regulations (HMR), 49 CFR parts 171-180.

MODE AFFECTED: Highway.

SUMMARY: The HMTA preempts the following State statutes and regulations which require the posting of a monetary bond as a condition for the issuance of a State permit to transport hazardous wastes:

Maryland: Md. Code Ann., Environment § 7-252(a)(1), COMAR 26.13.04.04;

Massachusetts: 310 CMR 30.411; and

Pennsylvania: 35 Pa. Stat. Ann. § 6018.505(e), 25 Pa. Code § 263.32.

These State bonding requirements are an obstacle to the accomplishment and execution of the HMTA and the HMR, which do not impose bonding, insurance or other financial responsibility requirements on carriers of hazardous materials (including hazardous wastes). The Maryland, Massachusetts, and Pennsylvania bonding requirements are not "otherwise authorized by Federal law" because they are not specifically authorized in the Resource Conservation and Recovery Act (RCRA), 42 U.S.C. 6901 *et seq.*, in the regulations of the Environmental Protection Agency (EPA) under RCRA, or in EPA's authorization of State hazardous waste programs in these three States.

FOR FURTHER INFORMATION CONTACT: Frazer C. Hilder or Kathleen S. Molinar, Office of the Chief Counsel, Research and Special Programs Administration, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590-0001, telephone number (202) 366-4400.

I. Application for Preemption Determination

"[O]n behalf of its Chemical Waste Transportation Institute," the July 17, 1991 petition of the National Solid Wastes Management Association seeks an administrative determination that the HMTA preempts the requirements of three States—Maryland, Massachusetts, and Pennsylvania—for a monetary bond in order to obtain a State license or permit for transporting hazardous wastes. (The applicant is referred to as "CWTI" in the balance of this decision.)

A. Relevant EPA and State Requirements for Transporters

Under EPA's regulations implementing RCRA, each "transporter" of hazardous waste must have "an EPA identification number," 40 CFR 263.11; must comply with manifest requirements, 40 CFR 263.20-263.22; and must take appropriate immediate action if a spill of hazardous waste occurs during transportation. 40 CFR 263.30. "Transporters storing manifested shipments of hazardous wastes in (approved) containers * * *, for a period of ten days or less" need not obtain a RCRA permit. 40 CFR 270.1(c)(2)(vi).

In Maryland, Massachusetts, and Pennsylvania, a transporter who picks up or deliver hazardous waste within the State must also hold a license or permit from the State. Md. Code Ann., Environment § 7-249(a), COMAR

26.13.04.01C(1); 21C Massachusetts General Laws Annotated § 5, 310 CMR 30.402(2); 35 Pa. Stat. Ann. § 6018.501, 25 Pa. Code § 263.11(a). As a prerequisite to obtaining that license or permit, each of these States requires the transporter to obtain a bond.

In Maryland, the Department of the Environment "shall require a person to secure a bond of not less than $50,000 for the purpose of indemnifying the State for abatement of pollution from the improper transportation or spill of" hazardous wastes. COMAR 26.13.04.04. (The requirement of such a "bond or other security that the Department considers sufficient" is contained in Md. Code Ann., Environment § 7–252(a)(1).) In Massachusetts and Pennsylvania, "[t]he amount of the bond shall be $10,000 at a minimum and be in an amount sufficient to assure that the licensee" performs all of the State statutory and regulatory requirements as well as "the terms and conditions of the license and any Department order issued to the licensee." 310 CMR 30.411(3), 25 Pa. Code § 263.32(c). (In Pennsylvania, this requirement is also set forth in Pa. Stat. Ann. § 6018.505(e).)

Each of these regulations specifies only the minimum amount of the bond. CWTI states that in Pennsylvania, the actual amount required "apparently depends upon the type of materials and the volumes transported," and that "the Commonwealth typically requires bonds in amounts up to $60,000 * * *" As noted below, one company submitting comments (D & J Transportation Specialists, Inc.) states that it has posted a $60,000 bond in Pennsylvania.

These States' bonding requirements are in addition to the Federal financial responsibility requirements set forth in 49 CFR 387.7, 387.9, and any separate State insurance requirement. See, e.g., 310 CMR 30.410. Each of these three States allows certain alternate forms of providing the required financial guarantee, such as a letter of credit or the deposit of cash or negotiable securities. However, in each case the beneficiary of the guarantee must be the State, and insurance policies (or evidence of self-insurance) do not qualify. CWTI's petition represents that each of these three States imposes its bonding requirement independently; there is no reciprocity, offset, credit or other recognition for a bond posted in another State. This means that, in each State with a bonding requirement in which a transporter picks up or delivers hazardous waste, it must post a separate bond.

B. Application of the HMTA and HMR to Hazardous Wastes

All hazardous wastes are designated "hazardous substances" under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), 42 U.S.C. 9601(14)(C), and, as such, hazardous wastes are "listed and regulated as * * * hazardous material[s] under the" HMTA. 42 U.S.C. 9656(a). "The term [hazardous materials] includes * * * hazardous wastes, * * *" 49 CFR 171.8 (as amended November 5, 1992, 57 FR 52930, 52935). See also 49 CFR 171.3(a): "No person may offer for transportation or transport a hazardous waste * * * in interstate or intrastate commerce except in accordance with the requirements of" the HMR.

RCRA specifically directs the EPA's regulations applicable to transporters of hazardous wastes "shall be consistent with the requirements of" the HMTA and the HMR. 42 U.S.C. 6923(b). (For purposes of the HMR, hazardous wastes are "hazardous substances" when the contents of a single package equal or exceed the "reportable quantity" for that hazardous substance. 49 CFR 171.8 and 172.101 appendix.)

C. CWTI's Petition and Public Notice

CWTI's petition argues that the three States' bonding requirements are preempted because they constitute an "obstacle" to the accomplishment and execution of the HMTA and the HMR. CWTI relies primarily on RSPA's opinion in IR–25 that the HMTA preempts a city ordinance requiring a $1,000 bond for each vehicle hauling hazardous wastes and similar products. IR–25, Transporting Hazardous Wastes, City of Maryland Heights (Missouri) Ordinance Requiring Bond for Vehicles, 54 FR 16308 (Apr. 21, 1989). In IR–25, RSPA stated that "[a] local government may not impose any insurance, bonding or indemnification requirement as a precondition to the transportation of hazardous materials." 54 FR at 16310.

On August 12, 1991, RSPA published a Public Notice and Invitation to Comment on CWTI's petition. 56 FR 38294. In response to that Notice, three industry associations and two companies submitted comments in support of a finding of preemption. The Massachusetts Department of Environmental Protection (Mass-DEP) opposed the petition. CWTI submitted rebuttal comments plus an additional letter concerning the December 1991 decision in *Colorado Pub. Util. Comm'n* v. *Harmon*, 951 F.2d 1571 (10th Cir. 1991). Mass-DEP responded to CWTI's additional letter on the *Harmon* decision. All these comments are summarized in Part III, below.

II. Preemption Under the HMTA

The HMTA was enacted to give the Department of Transportation greater authority "to protect the Nation adequately against the risks to life and property which are inherent in the transportation of hazardous materials in commerce." 49 App. U.S.C. 1801. It replaced "a patchwork of state and federal laws and regulations concerning hazardous materials with a scheme of uniform, national regulations." *Southern Pac. Transp. Co.* v. *Public Serv. Comm'n*, 909 F.2d 352, 353 (9th Cir. 1990).

As enacted in 1975, the HMTA preempted "any requirement, of a State or political subdivision thereof, which is inconsistent with any requirement set forth in [the HMTA], or in a regulation issued under [the HMTA]." HMTA, Public Law 93–633 section 112(a), 88 Stat. 2161 (1975) (amended 1990, see 49 App. U.S.C. 1811(a)). This provision was intended by Congress "to preclude a multiplicity of State and local regulations and the potential for varying as well as conflicting regulations in the area of hazardous materials transportation." S. Rep. No. 1192, 93rd Cong., 2d Sess. 37 (1974), as quoted in IR–2 (State of Rhode Island Rules and Regulations Governing the Transportation of Liquefied Natural Gas and Liquefied Propane Gas, etc.), 44 FR 75566, 75567 (Dec. 20, 1979).

In 1976, DOT's Materials Transportation Bureau (MTB, whose responsibilities are now delegated to RSPA's Associate Administrator for Hazardous Materials Safety) "published procedures that implement the preemption language of the HMTA by providing for the issuance of inconsistency rulings." IR–2, 44 FR at 75567. Such inconsistency rulings, while advisory in nature, were "an alternative to litigation for a determination of the relationship of Federal and State or local relationships," and also a possible "basis for an application * * * [for] a waiver of preemption pursuant to section 112(b) of the HMTA." *Id.* RSPA's procedures for issuing inconsistency rulings incorporated the following criteria for determining whether a State or local requirement was inconsistent with, and thus preempted by, the HMTA:

(1) Whether compliance with both the State or political subdivision requirement and the Act or the regulations issued under the Act is possible;

(2) The extent to which the State or political subdivision requirement is an

obstacle to the accomplishment and execution of the Act and the regulations issued under the Act.

41 FR 38167, 38171 (Sept. 9, 1976), 49 CFR 107.209(c) (Oct. 1, 1990 ed.) These "dual compliance" and "obstacle" criteria, respectively, are based on U.S. Supreme Court decisions on preemption. *Hines* v. *Davidowitz*, 312 U.S. 52 (1941); *Florida Lime & Avocado Growers, Inc.* v. *Paul*, 373 U.S. 132 (1963); *Ray* v. *Atlantic Richfield, Inc.*, 435 U.S. 151 (1978).

In 1980, a preemption provision relating to hazardous waste was added to the HMR. Subsection (c) of 49 CFR 171.3, unchanged to the present, states that:

> With regard to hazardous waste subject to [the HMR], any requirement of a state or its political subdivision is inconsistent with [the HMR] if it applies because that material is a waste material and applies differently from or in addition to the requirements of [the HMR] concerning:
>
> (1) Packaging, marking, labeling, or placarding;
>
> (2) Format or contents of discharge reports (except immediate reports for emergency response); and
>
> (3) Format or contents of shipping papers, including hazardous waste manifests.

45 FR 34560, 34586 (May 22, 1980). In the preamble to the final rule, RSPA stated that "§ 171.3(c) does not list all the conditions under which it might view a State or local law as 'inconsistent.'" 45 FR at 34567.

The preemption provision in the HMTA was expanded in the Hazardous Materials Transportation Uniform Safety Act of 1990 (HMTUSA), in which Congress found that uniform Federal standards for the transportation of hazardous materials were "necessary and desirable" to solve the problem that:

> many States and localities have enacted laws and regulations which vary from Federal laws and regulations pertaining to the transportation of hazardous materials, thereby creating the potential for unreasonable hazards in other jurisdictions and confounding shippers and carriers which attempt to comply with multiple and conflicting registration, permitting, routing, notification, and other regulatory requirements.

Public Law 101–615 section 2(3), 49 App. U.S.C. 1801 note.

"[U]niformity was the linchpin in the design of" the 1990 HMTUSA amendments. *Colorado Pub. Util Comm'n* v. *Harmon*, 951 F.2d at 1575. These amendments adopted the "dual compliance" and "obstacle" criteria and also provided for preemption when: (1) Non-Federal requirements in five "covered subject" areas are not "substantively the same" as Federal ones, 49 App. U.S.C. 1804(a)(4); (2) a fee imposed by a State, political subdivision or Indian tribe "in connection with the transportation of hazardous materials * * * is not equitable [or] not used for purposes related to the transportation of hazardous materials, * * *" 49 App. U.S.C. 1811(b); (3) non-Federal highway routing requirements fail to satisfy Federal standards to be issued by DOT, 49 App. U.S.C. 1805(b)(4); and (4) as clarified in a further 1992 amendment, State forms and procedures for registration and permitting of motor vehicles which transport hazardous materials are not the same as regulations to be issued by DOT based on recommendations of a State and local government working group. 49 App. U.S.C. 1819(e), as amended by Public Law 102–508 section 507, 106 Stat. 3312 (October 24, 1992).

The 1990 amendments to the HMTA also added requirements that certain motor vehicle transporters of hazardous materials must file a registration statement with DOT, 49 App. U.S.C. 1805(c), and/or obtain a safety permit from DOT. 49 App. U.S.C. 1805(d). Regulations implementing the registration requirement were issued on July 9, 1992 (57 FR 30620; Revisions, 57 FR 37900, August 21, 1992), and apply to transporters of (1) certain high risk hazardous materials, (2) hazardous materials in bulk containers (with a capacity of 3,500 or more gallons or more than 468 cubic feet), and (3) hazardous materials shipments of 5,000 lbs. or more in non-bulk packagings for which placarding is required. 49 CFR 107.601; see also Public Law 102–508 section 503, 106 Stat. 3311 (October 24, 1992). Regulations implementing the safety permit requirement has not yet been issued, but Congress directed that they must cover carriers of certain high risk hazardous materials and that DOT must issue a permit if it "finds that the carrier is fit, willing, and able—* * * to comply with any applicable Federal motor carrier safety laws and regulations and any applicable Federal minimum financial responsibility laws and regulations." 49 App. U.S.C. 1805(d)(2).

Since DOT's regulations on State motor carrier registration and permits have not yet been issued, CWTI's petition must be considered under the preemption provisions in 49 App. U.S.C. 1811 (a) and (b). The latter subsection prohibits fees in connection with the transportation of hazardous materials which are not "equitable" or "used for purposes related to the transportation of hazardous materials * * *" Subsection 1811(a) provides that, "unless otherwise authorized by Federal law" or unless a waiver of preemption is granted by DOT, "any requirement of a State or political subdivision or Indian tribe is preempted" when:

> (1) Compliance with both the State or political subdivision or Indian tribe requirement and any requirement of [the HMTA] or of any regulation issued under [the HMTA] is not possible,
>
> (2) The State or political subdivision or Indian tribe requirement as applied or enforced creates an obstacle to the accomplishment and execution of [the HMTA] or the regulations issued under [the HMTA], or
>
> (3) It is preempted under section 1804(a)(4) [describing the five "covered subject" areas] * * * or section 1805(b) [with respect to highway routing requirements] * * *

The five "covered subject" areas in which a non-Federal rule is preempted unless it is "substantively the same" (or "otherwise authorized by Federal law") are:

> (i) The designation, description, and classification of hazardous materials.
>
> (ii) The packing, repacking, handling, labeling, marking, and placarding of hazardous materials.
>
> (iii) The preparation, execution, and use of shipping documents pertaining to hazardous materials and requirements respecting the number, content, and placement of such documents.
>
> (iv) The written notification, recording, and reporting of the unintentional release in transportation of hazardous materials.
>
> (v) The design, manufacturing, fabrication, marking, maintenance, reconditioning, repairing, or testing of a package or container which is represented, marked, certified, or sold as qualified for use in the transportation of hazardous materials.

In a final rule published in the **Federal Register** on May 13, 1992 (57 FR 20424, 20428), RSPA defined "substantively the same" to mean "conforms in every significant respect to the Federal requirement. Editorial and other similar *de minimis* changes are permitted." 49 CFR 107.202(d).

The 1990 amendments to the HMTA also authorize any directly affected person to apply to the Secretary of Transportation for a determination whether a State, political subdivision or Indian tribe requirement is preempted by the HMTA, 49 App. U.S.C. 1811(c)(1). This administrative determination replaced RSPA's process for issuing inconsistency rulings. The Secretary of Transportation has delegated to RSPA the authority to make determinations of preemption, except for those concerning highway routing which were delegated to the Federal Highway Administration. 49 CFR

1.53(b). Under RSPA's regulations, see 49 CFR 107.201–107.211, preemption determinations are issued by RSPA's Associate Administrator for Hazardous Materials Safety.

Preemption determinations do not address issues of preemption arising under the Commerce Clause of the Constitution or under statutes other than the HMTA unless it is necessary to do so in order to determine whether a requirement is "otherwise authorized by Federal law." A State, local or Indian tribe requirement is not "otherwise authorized by Federal law" merely because it is not preempted by another Federal statute. *Colorado Pub. Util. Comm'n* v. *Harmon*, above, 951 F.2d at 1581 n.10.

In making determinations regarding preemption under the HMTA, RSPA is guided by the principles and policy set forth in Executive Order No. 12,612, entitled "Federalism" (52 FR 41685, Oct. 30, 1987). Section 4(a) of that Executive Order authorizes preemption of State laws only when a statute contains an express preemption provision, there is other firm and palpable evidence of Congressional intent to preempt, or the exercise of State authority directly conflicts with the exercise of Federal authority. The HMTA contains express preemption provisions, which RSPA has implemented through its regulations.

III. Public Comments

A. Comments Supporting Preemption

The five commenters who support CWTI's petition argue that the Maryland, Massachusetts, and Pennsylvania bonding requirements are an "obstacle" to the accomplishment and execution of the HMTA and the HMR.

The Hazardous Materials Advisory Council (HMAC), National Tank Truck Carriers, Inc. (NTTC), and Edison Electric Institute (EEI) contend that the prior decision in IR–25 should dispose of this case. EEI specifically notes that, since Congress codified the "obstacle" test in the 1990 amendments, previous inconsistency rulings are valid precedent. EEI acknowledges that Congress failed to "include bonding requirements in the list of [covered] subjects" in section 1804(a)(4). However, it asserts that this ommission should not "undermine DOT's prior determination that '[t]he subject of bonding, insurance and indemnity requirements for hazardous materials transportation is exclusively Federal,'" as RSPA stated in IR–25 and repeated in IR–31, State of Louisiana; Statutes and Regulations on Hazardous Materials Transportation, 55 FR 25572, 25582 (June 21, 1990).

Both NTTC and EEI quote Congressional statements regarding the need for consistency in hazardous materials transportation. NNTC argues RSPA should "weigh such non-Federal actions against Congressional intent as codified in HMTUSA." EEI states that "the likelihood that numerous state and local governments will seek to impose bonding and similar requirements," and the impact of such requirements, are factors which "could serve as a basis for a finding of preemption under the obstacle test."

HMAC alludes to differences between the three States' bonding requirements on "amounts, financial instruments, terms and conditions of the escrows, forfeiture terms and procedures, and terms of release * * *" Both HMAC and NTTC assert that the States fail to recognize each others' bonding requirements, and HMAC points out that they also ignore the Federal insurance requirements, in 49 CFR part 387, providing financial responsibility in case of an accident. HMAC contends that "few businesses [which operate in several States] can afford to repeatedly tie up substantial amounts of working capital. The effect, as other states assert their requirements in this area, will surely be to hinder the movement of hazardous waste."

Two companies allege the practical effect of these bonding requirements. D & J Transportation Specialists, Inc. reports that it:

> is presently permitted in forty (40) states to transport hazardous waste, including Massachusetts, Maryland, and Pennsylvania. We have posted bonds of $10,000, $50,000 and $60,000 respectively, in these states.
>
> As a private corporation it has been necessary in each case to provide a letter of credit to secure this bonding. Should each state of the forty (40) we are registered in require a $50,000 bond, letters of credit in the amount of $2,000,000 would be required.
>
> As we could not possibl[y] obtain letters of credit in this amount, we would be unable to operate in a large number of states. If you add to this the almost unlimited number of possibilities which exist if municipalities started the same thing, it is obvious how restrictive this practice would become.

An official of Bandag, Inc. states that, before the Pennsylvania bonding requirement, his previous employer had regularly shipped waste materials to a processing facility in Western Pennsylvania for recycling. However, after the requirement for a bond became effective, "we could not find a hauler to get our material to the processing facility."

Only NTTC argues that it is impossible to comply with both the HMR and these three State's bonding requirements. Although it notes that these requirements are in addition to (rather than instead of) the Federal insurance requirements in 49 CFR 387.7 and 387.9, NTTC contends that "[t]here are any number of direct conflicts between the states[']] requirements and" the HMR, essentially based on differences between bonding and insurance as means of providing financial responsibility. NTTC further argues that, since posting a bond is a requirement for obtaining a permit, these are more in the nature of permit requirements. The delay "built into" the procedures in Massachusetts and Pennsylvania, such as for negotiating the amount of the bond and receiving approval, "creates the potential for unnecessary delays, [which] violates the dual compliance test and is 'inconsistent.'"

B. Comments Opposing Preemption

Only Mass-DEP has opposed a determination of preemption on CWTI's petition; no Maryland or Pennsylvania agency—or any other person—submitted comments in support of those States' bonding requirements. Although Mass-DEP addresses only the Massachusetts regulation, its comments appear to apply, and have been considered, with respect to all three States' requirements.

Mass-DEP alleges that CWTI failed to comply with RSPA's procedural regulations by failing to "[s]pecify each requirement of the Act or the regulations issued under the Act with which the applicant wishes the State * * * requirement to be compared; * * *" 49 CFR 107.203(b)(3). Mass-DEP asserts that, since "[i]t clearly is possible for transporters to comply with the [HMTA] and 310 CMR 30.411," the "dual compliance" test is satisfied. It contends that the Massachusetts bonding requirement also meets the "obstacle" test, inasmuch as:

(1) "The HMTA does not concern itself with financial assurance requirements," but "[a]ll subject matters regulated under HMTA concern the physical transportation activity";

(2) The HMTA specifically allows States to charge hazardous materials transporters "fees" which are "equitable" and "for purposes related to the transportation of hazardous materials * * *," 49 APP. U.S.C. 1811(b);

(3) RSPA's opinion in IR–25 does not support a determination of preemption because IR–25 was based on a "different preemption standard," was only "advisory" and "would not apply to our very different set of facts and law"

(including that the Massachusetts bonding requirement is a State law, rather than a local ordinance, and does not apply to through transporters);

(4) The reference in IR–25 to the insurance requirements in 49 CFR part 387 "is irrelevant to our facts and law," since part 387 is part of the Federal Motor Carrier Safety Regulations and not the HMR, and the Massachusetts bonding requirement "covers contingencies" such as willful acts and "acts of God or other situations typically excluded from insurance policies";

(5) Commerce Clause arguments are irrelevant to issues of statutory preemption under the HMTA; and

(6) Crankcase oil, "the largest single wastestream * * * in Massachusetts," is not classified as a hazardous material and therefore is "not subject to HMTA regulation."

Mass-DEP further asserts that its bonding requirement is part of its EPA-approved program implementing RCRA. As such, it claims that 310 CMR 30.411 is "otherwise authorized by Federal law" and, therefore, not preempted under the terms of 49 App. U.S.C. 1811(a).

C. Rebuttal Comments

In rebuttal comments, CWTI ignores Mass-DEP's arguments on the "dual compliance" test, but it disputes each of the other points raised by Mass-DEP. It argues that it is unnecessary to point to a specific section in the HMTA or the HMR when "the challenged non-Federal requirement is as a whole inconsistent with the accomplishment and execution of the goals of the Act and the HMRs." Citing its own testimony before a Congressional committee in 1988 and 1989, CWTI disagree that a bond is a "fee" under 49 App. U.S.C. 1811(b). CWTI also contends, even if the posting of a bond is considered a "fee," there is nothing to show that the bond is "equitable" or that it is used for purposes related to the transportation of hazardous materials, as required by the HMTA.

CWTI further asserts that its petition relies on the "obstacle" test, not on a claim of preemption under the Commerce Clause, and that each of the points on which Mass-DEP purports to distinguish IR–25 is unpersuasive. The fact that crankcase oil is not classified as a hazardous material simply means that its petition does not seek "relief from state bonding requirements imposed on motor carriers * * * [of] crankcase oil."

CWTI also disputes Mass-DEP's argument that its bonding requirement is "otherwise authorized by Federal law." It refers to RCRA's mandate that EPA regulations for hazardous waste "shall be consistent with the requirements of" the HMTA and the HMR, 42 U.S.C. 6923(b), and that a State program shall be "equivalent to" and "consistent with" Federal programs. 42 U.S.C. 6926(b). CWTI contends that RCRA's authorization in 42 U.S.C. 6929 for States to impose "more stringent" requirements than set forth in EPA's regulations applies only to "technical, design or performance standards for treatment, storage or disposal facilities, not standards that relate to transportation."

Approximately one month after CWTI's rebuttal comments, the decision in *Colorado Pub. Util Comm'n* v. *Harmon*, above, was issued. Six weeks later, CWTI submitted a further letter to point out the statement in footnote 10 of the *Harmon* opinion that the failure of a Federal statute to specifically preempt a State or local rule "cannot be construed as an authorization of the regulation." Mass-DEP filed additional comments, stating that the *Harmon* case footnote was irrelevant since Mass-DEP "did not argue that failure of a non-HMTA federal statute to preempt the DEP's bonding requirement should be equated with authorization of the bonding requirement."

IV. Discussion

The comments submitted on CWTI's petition, together with the petition itself, well frame the two main issues to be resolved in this decision. These are whether bonding requirements for carriers of hazardous waste, such as those of Maryland, Massachusetts and Pennsylvania, (1) create an "obstacle to the accomplishment and execution of" the HMTA and the HMR, especially in light of the separate financial responsibility requirements contained in the Federal Motor Carrier Safety Regulations (FMCSR), and (2) are "otherwise authorized by Federal law" when a State administers an EPA-approved State hazardous waste program under 42 U.S.C. 6926(b).

A. The "Dual Compliance" Test

NTTC's assertion that the challenged requirements fail to meet the "dual compliance" test does not require lengthy discussion. NTTC's argument here is that "the states require 'bonding'; while the Secretary [of Transportation, in 49 CFR part 387] permits 'insurance,'" and there are differences between the two. Those differences, however, do not make it impossible for a transporter of hazardous waste to fulfill both Federal and State requirements at the same time. Indeed, 49 CFR 387.7 allows surety bonds as an alternative to insurance policies (or evidence of self-insurance). The representation by D & J Transportation Specialists, Inc., that it has posted bonds in all three of the States whose requirements are challenged here, establishes that it is possible to comply with these bonding requirements as well as the DOT requirement. The Maryland, Massachusetts, and Pennsylvania bonding requirements are not preempted under 49 App. U.S.C. 1811(a)(1).

B. The "Obstacle" Test

A non-Federal requirement is preempted if it is an obstacle to "the goals and purposes" of the HMTA. *Colorado Pub. Util. Comm'n* v. *Harmon*, above, 951 F.2d at 1580. Under the test, the Court of Appeals explained in the *Harmon* case (*id.*),

> the Supreme Court has examined whether the state law "'stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress.'" *Hillsborough County* v. *Automated Medic. Labs.*, 471 U.S. 707, 713 (1985) (quoting Hines v. Davidowitz, 312 U.S. 52, 67 (1941)) (emphasis added); see also *National Tank Truck Carriers, Inc.* v. *City of New York*, 677 F.2d 270, 275 (2d Cir 1982). Further, "[a] state law also is preempted if it interferes with the methods by which the federal statute was designed to reach this goal." *International Paper Co.* v. *Quellette*, 479 U.S. 481, 494 (1987); *Michigan Canners & Freezers Ass'n* v. *Agricultural Marketing & Bargaining Bd.*, 467 U.S. 461, 477 (1984).

As already discussed in Part II, above, in enacting the 1990 amendments to the HMTA, Congress believed that uniform Federal standards, instead of multiple and conflicting State and local requirements, would provide for increased safety in the transportation of hazardous materials. See 49 App. U.S.C. 1801 note. See also the discussion in the *Harmon* decision of the legislative history of the 1990 amendments. 951 F.2d at 1580–81.

As amended in 1990, the HMTA contains Federal registration and safety permit requirements for carriers of certain high risk hazardous materials (and others to be determined by DOT). Transporters covered by the safety permit requirement must satisfy the Federal financial responsibility requirements in 49 CFR part 387. The HMTA requires the establishment of a working group to make recommendations for uniform State registration and permit requirements and provides that, following issuance of Federal regulations on these subjects, a State may not "establish, maintain, or enforce any requirement which relates to the subject matter of such regulation unless such requirement is the same as

such regulation." 49 App. U.S.C. 1819(e).

Congress set forth in the 1990 amendments its concern about "multiple and conflicting registration, permitting, * * * and other regulatory requirements." 49 App. U.S.C. 1801 note. It specifically referred to the Federal financial responsibility requirements in 49 App. U.S.C. 1805(d), and, with the further 1992 amendment to 49 App. U.S.C. 1819, it has mandated uniformity and consistency in both permitting and registration requirements of States and local government. These permitting requirements include the bonding requirements at issue here, since each of these three States makes the bond a condition for the issuance of a permit to transport hazardous wastes.

In light of Congress's specific attention in the HMTA to multiple and conflicting State permitting requirements, RSPA cannot accept the argument of Mass-DEP that: "All subject matters regulated under HMTA concern the physical transportation activity." For the same reason, resolution of the issues presented here cannot rest on a 1985 decision that the bonding requirement in 35 Pa. Stat. Ann. § 6018.505(e) is not preempted by the HMTA. That decision, by the Commonwealth Court of Pennsylvania, *Chemclene Corp.* v. *Pennsylvania Dep't of Environ. Res.*, 497 A.2d 268, 272 (Pa. Commonw. Ct. 1985), was based on a finding that "the scope of the [HMTA] * * * is narrow, devoted principally to matters of labeling, packaging standards, testing procedures, and training and safety practices." Any validity which this description might have had in 1985 has vanished with the 1990 and 1992 amendments to the HMTA.

In its petition, CWTI complains that these three States' bonding requirements go beyond the requirements of the HMR and the financial responsibility mandates in 49 CFR part 387. Mass-DEP notes that part 387 is not part of the HMR, and it argues that no preemption should be found because CWTI failed to "[s]pecify each requirement of the [HMTA] or the regulations issued under the [HMTA] with which the applicant seeks the State * * * requirement to be compared * * *" 49 CFR 107.203(b)(3).

There are two answers to this objection. First, as already mentioned, the Federal financial responsibility requirements are not ignored in the HMTA, but specifically mentioned in connection with the Federal safety permit requirement. 49 App. U.S.C. 1805(d)(2)(C). Second, when preemption under the HMTA is arguably grounded upon the absence of a comparable requirement in the HMR, as CWTI contends here, a petition will not be summarily decided on the ground that it "fails to cite to any requirement in HMTA or its regulations" with which the non-Federal requirement should be compared. The existence of the Federal financial responsibility requirements may advance the goals and purposes of the HMTA, even without specific incorporation of those requirements in the HMR.

In 1978, the FMCSR consisted of only parts 390–397 of 49 CFR In that year, virtually the entire FMCSR, "49 CFR parts 390 through 397 (excluding § 397.3 and § 397.9)," were incorporated into the HRM "to make civil penalties and other enforcement tools of the HMTA applicable to those hazardous materials carriers already subject to Parts 390–397." 43 FR 4858 (Feb. 6, 1978). See 49 CFR 177.804.

The financial responsibility requirements in 49 CFR part 387 were added to the FMCSR in 1981, pursuant to section 30 of the Motor Carrier Act of 1980 (see 46 FR 30974, June 11, 1981), which can be found in the note to 49 U.S.C. 10927. Section 30(b) required DOT to establish levels of financial responsibility, "covering public liability, property damage, and environmental restoration for the transportation of hazardous materials * * *, oil or hazardous substances * * *, or hazardous wastes * * *." Section 30(d) provided civil penalties for violation of the Federal financial responsibility requirements. See also 49 CFR 387.17. Thus, unlike the situation with those parts of the FMCSR in 49 CFR parts 390–397, incorporation into the HMR was unnecessary to provide civil penalties for violations of part 387.

Section 30 of the Motor Carrier Act of 1980 also sets the required level of financial responsibility, under CERCLA, for all motor vehicles transporting hazardous substances (including hazardous wastes). 42 U.S.C. 9608(b)(5), 9601(14)(C). For purposes of CERCLA, the term "facility" includes motor vehicles, 42 U.S.C. 9601(9)(A), and a separate section of CERCLA, 42 U.S.C. 9614(d), precludes additional State or local financial responsibility laws:

> Except as provided in [CERCLA], no owner or operator of a * * * facility who establishes and maintains evidence of financial responsibility in accordance with [CERCLA] shall be required under any State or local law, rule, or regulation to establish or maintain any other evidence of financial liability in connection with liability for the release of a hazardous substance from such * * * facility.

Pursuant to section 30(b), 49 CFR 387.9 specifies either $5,000,000 or $1,000,000 in insurance, surety bonds, or evidence of self-insurance for virtually all transporters of hazardous wastes. (Excluded are only those transporters of hazardous wastes other than Class A or B explosives, poison gas or highway route controlled quantity radioactive materials who either (1) are intrastate carriers in nonbulk, or (2) use only small vehicles, less than 10,000 lbs. GVWR.)

In a series of inconsistency rulings (IRs) between 1984 and 1989, RSPA found that State insurance or other financial responsibility requirements specifically applicable to hazardous materials transportation, beyond those prescribed in 49 CFR part 387 or other Federal law, were in conflict with the purposes and objectives of the HMTA and the HMR.

Three of nine consolidated decisions in November 1984 dealt with State or local insurance requirements applicable to shipments of radioactive materials. 49 FR 46632 (Nov. 27, 1984). IR–10 concerned the position of the New York State Thruway Authority (NYSTA) that "radioactive shipments will be permitted on the Thruway when we are properly indemnified for any exposure." 49 FR at 46645. RSPA found that closing the Thruway "to any radioactive materials shipment not offering what the NYSTA considers to be proper indemnification * * *.

> directly results in the diversion of such shipments into other jurisdictions and the increase of overall time in transit. In other words, the overall exposure to the risks of radioactive materials transportation is increased and exported. For this reason, the NYSTA rule necessarily poses an obstacle to the accomplishment of the Congressional objective of enhancing hazardous materials safety.
>
> * * * * *
>
> Applying this to the instant case, if any one State may use insurance requirements to deflect interstate carries of hazardous materials into other jurisdictions, then all States may do so. The logical result would be, if not a total cessation of a Congressionally recognized form of interstate transportation[,] then the very patchwork of varying and conflicting State and local regulations which Congress sought to preclude.

49 FR at 46646–47. Based on the decision in IR–10, RSPA also found that the HMTA preempted similar insurance or indemnification requirements of the Ogdensburg (NY) Bridge and Port Authority (IR–11, 49 FR at 46649), and the State of Vermont (IR–15, 49 FR at 46663–64). In the latter case, RSPA noted that, in the course of promulgating rules on highway routing of radioactive materials, MTB had "examined the issue of indemnification

and concluded that Federal law provided adequate coverage. State adoption of higher insurance coverage requirements can operate as barriers to transportation." 49 FR at 46664. A similar finding was made in IR–18, concerning a radioactive materials transportation bonding requirement of Prince Georges County, MD. 52 FR 200, 204 (January 2, 1987).

IR–25 involved an ordinance of Maryland Heights, Missouri, which required "a bond in the amount of One Thousand Dollars ($1,000) per vehicle for each vehicle, hauling or to haul sewage, sludge, human excrement, special, hazardous or infectious wastes." 54 FR 16308. Quoting from the decision on Vermont's appeal of IR–15, 52 FR 13062, 13063 (Apr. 21, 1987), RSPA reaffirmed its earlier conclusion that: "'The indemnification level established through the HMR, coupled with the indemnification provisions of the Price-Anderson Act (42 U.S.C. 2210), provides the exclusive standard for radioactive materials transportation indemnification.'" 54 FR at 16310. As to non-radioactive waste, RSPA found that:

> no such requirement is necessary—particularly because 49 CFR 387.7 and 387.9 already require insurance or surety bonds of between $1,000,000 and $5,000,000 for motor vehicles transporting hazardous wastes, hazardous substances and other hazardous materials.
>
> If OHMT later determines that a bonding, insurance, or indemnity requirement is necessary under the HMTA for the transportation of non-radioactive hazardous materials, it will amend the HMR accordingly. Until such time, the absence of such a requirement in the HMR is a reflection of OHMT's determination that no such requirement is necessary and that any such requirement imposed at the state or local level is inconsistent with the HMR.
>
> The subject of bonding, insurance and indemnity requirements for hazardous materials transportation is exclusively Federal. The existence in the U.S. of more than 30,000 local jurisdictions, each having the potential to impose such requirements, demonstrates the havoc which could be created if even a small percentage of them were to impose such requirements (with their inevitable differences). It would be extremely difficult for carriers to learn about, let alone comply with, such local requirements.

54 FR at 16311.

In separate rulings, RSPA also found that non-Federal requirements to provide evidence of insurance were also inconsistent with the HMTA. For example, in IR–27 RSPA stated that "[r]equirements for information or documentation in excess of the HMR create potential delay, constitute an obstacle to execution of the HMTA and the HMR, and thus are inconsistent." IR–27, Colorado Regulations on Transportation of Radioactive Materials, 54 FR 16326, 16330 (April 21, 1989). Such information requirements included proof of liability insurance (as required by 49 CFR part 387) in order for the issuance of a State permit.

Specifically approving RSPA's finding in IR–27, the Court of Appeals for the Tenth Circuit held in the Harmon case that:

> Because Colorado's regulation forces transporters of hazardous materials to generate and maintain additional documentation and information, we conclude that it is likely to confound shippers and carriers and to increase the potential for hazards in other jurisdictions. Colorado's regulations simply do not further the federal purpose of promoting safety through uniformity. Therefore, we hold that [this requirement] is preempted.

951 F.2d at 1582 (footnote omitted). Similarly, the Court of Appeals for the Ninth Circuit agreed with RSPA's determination that the potential "great expense and delay" in meeting State requirements for information and documentation, beyond that in the HMR, amounted to "an obstacle to the accomplishment or execution of those requirements." *Southern Pac. Transp. Co.* v. *Public Serv. Comm'n*, above, 909 F.2d at 358, 359 (approving IR–19, 52 FR 24404, June 30, 1987, and decision on appeal, 53 FR 11600, April 7, 1988).

These two Court of Appeals decisions show that RSPA may properly look to the absence of a particular requirement in the HMR in determining the "goals and purposes" of the HMTA. Moreover, in holding that a requirement to provide proof of the insurance required by 49 CFR part 387 is preempted, the *Harmon* decision virtually compels the finding that a requirement to establish and prove financial responsibility beyond that required by 49 CFR part 387 is also preempted.

The reasoning behind RSPA's ruling in IR–25 remains applicable to CWTI's petition, notwithstanding differences pointed out by Mass-DEP. The *Harmon* and *Southern Pacific* cases involved State regulations, as did IR–10 and IR–15. The 50 States, plus the District of Columbia and other territories and possessions defined as "States" in the HMTA, 49 App. U.S.C. 1802(14), are more than sufficient to create "multiple and conflicting" requirements that would frustrate the HMTA's goal of uniformity. The fact that these three States' bonding requirements apply only to hazardous wastes being picked up or delivered within each State does not prevent the potential for expense and delay associated with meeting these requirements, as well as the diversion of traffic to other States when the hazardous waste transporter cannot or does not post the required bond. To the extent that these States' bonding requirements cover "contingencies which insurance does not," as Mass-DEP asserts (but CWTI disputes in part), that difference is merely additional proof that these non-Federal requirements exceed what RSPA has found to be sufficient in 49 CFR part 387.

Mass-DEP's assertion that IR–25 was decided under a "different preemption standard," is not correct. RSPA's ruling in IR–25, while advisory, was based on the "obstacle" test which was specifically incorporated into the HMTA in the 1990 amendments. It was not "made in part on dormant Commerce Clause grounds," as Mass-DEP argues. The "procedural safeguards" which apply to CWTI's petition here, see 49 App. U.S.C. 1811(c)(1) and 49 CFR 107.201–107.211, are virtually identical to the procedures which applied to RSPA's consideration of the local ordinance in IR–25. Mass-DEP has not shown that any "more thorough analysis of the facts and law" justifies a different finding than set forth in IR–25, or that the prior ruling "is unpersuasive and unreliable."

While these State bonding requirements appear to impose substantial costs on transporters of hazardous wastes, such costs cannot be considered a State "fee" authorized by 49 App. U.S.C. 1811(b). Any sums which a transporter pays for a surety bond, a letter of credit, or cash or negotiable securities placed on deposit, are separate and apart from fees paid for a license or permit itself.

The bonding requirements of Maryland, Massachusetts and Pennsylvania create an obstacle to the accomplishment and execution of the HMTA and the HMR and, accordingly, are preempted by the HMTA under 49 App. U.S.C. 1811(a)(2).

C. Effect of EPA-Authorized State Hazardous Waste Plan

Mass-DEP also argues that the State's bonding requirement is part of the Massachusetts hazardous waste program authorized by EPA under RCRA and, therefore, is not preempted by the HMTA because it is "otherwise authorized by Federal law." 49 App. U.S.C. 1811(a). This argument is considered with respect to the Maryland and Pennsylvania bonding requirements as well, since those States also have EPA-authorized hazardous waste programs.

RCRA provides for EPA to issue "regulations requiring each person

owning or operating a facility for the treatment, storage or disposal of hazardous waste identified or listed under this subtitle (RCRA, title II, subtitle C, 42 U.S.C. 6921 *et seq.*), to have a permit * * *" 42 U.S.C. 6925(a). In addition, the EPA Administrator may authorize a State to carry out its own hazardous waste program "in lieu of the Federal program under this subtitle in such State and to issue and enforce permits for the storage, treatment and disposal of hazardous wastes * * *" 42 U.S.C. 6926(b).

To be so authorized, a State hazardous waste program must be "equivalent to the Federal program under this subtitle, * * * consistent with the Federal or State programs applicable in other States, * * * [and] provide adequate enforcement of compliance with the requirements of this subtitle." Id. "Any action taken by a State under a hazardous waste program authorized under this section shall have the same force and effect as action taken by the Administrator under this subtitle." 42 U.S.C. 6926(d).

RCRA does not prohibit any State from imposing requirements which are more stringent than those imposed by EPA regulations. See 42 U.S.C. 6929. EPA regulations further provide that a State may operate a State program that has a greater scope of coverage than required by Federal law, but the additional coverage is not part of the Federally-approved program. 40 CFR 271.1(i)(2).

Also within subtitle C of RCRA is the authorization for EPA to "promulgate regulations * * * applicable to transporters of hazardous waste * * *," subject to the limitation that any such regulations "shall be consistent with the requirements of [the Hazardous Materials Transportation] Act and the regulations thereunder." 42 U.S.C. 6923(a), (b).

EPA has promulgated regulations at 40 CFR part 263 which require that a transporter obtain an EPA identification number, comply with manifest requirements, and take immediate action to protect human health and the environment if a discharge of hazardous waste occurs during transportation. EPA regulations do not impose bonding requirements on transporters, nor do they require a transporter of hazardous wastes to obtain a permit, unless the transporter is also operating a storage facility. See 40 CFR 263.12, 270.1(c)(2)(vii); see also 40 CFR 262.34 (temporary storage by generators prior to transportation). Mass-DEP has not rebutted industry comments that the State bonding requirements at issue here may violate the mandate, in 42 U.S.C. 6926(b) and 40 CFR 271.4, that a State hazardous waste program be consistent with the Federal RCRA program.

EPA has recently clarified that its authorization of a State hazardous waste program does not resolve issues of HMTA preemption of non-Federal requirements. In granting final authorization to California's hazardous waste program, EPA stated:

> [I]f there are preemption issues under other Federal laws, they do not affect the State's RCRA authorization. In addition, EPA does not believe that an individual State's authorization application is the appropriate forum to resolve problems which clearly affect a large number of states. * * * [A] process is already in place intended to address the problem pursuant to the HMTUSA.

California, Final Authorization of State Hazardous Waste Management Program, 57 FR 32726, 32728 (July 23, 1992).

In sum, EPA's review of a State hazardous waste program, as part of the authorization process, provides neither the forum for consideration of HMTA preemption issues nor the specific Federal authorization that will preclude HMTA preemption of these States' bonding requirements. EPA bears responsibility for ensuring that its hazardous waste transportation standards, in 40 CFR part 263, are consistent with DOT's regulations under the HMR. However, EPA does not review State regulations that go beyond the part 263 standards for consistency with the HMTA and the HMR. Such review remains within the purview of DOT and its procedures under the HMTA.

The Maryland, Massachusetts, and Pennsylvania bonding requirements for transporters of hazardous wastes are not "otherwise authorized by Federal law," within the meaning of 49 App. U.S.C. 1811(a), because there has not been any specific authorization of those State requirements. *Colorado Pub. Util. Comm'n* v. *Harmon*, above, 951 F.2d at 1581 n.10.

V. Ruling

To the extent that they impose bonding requirements on transporters of hazardous wastes regulated by the HMR, the following State laws and regulations are preempted by the HMTA, 49 App. U.S.C. 1811(a)(2), because they create an obstacle to the accomplishment and execution of the HMTA and the HMR, and they are not "otherwise authorized by Federal law":

Maryland: Md. Code Ann., Environment section 7–252(a)(1) and COMAR 26.13.04.04;
Massachusetts: 310 CMR 30.411; and
Pennsylvania: 35 Pa. Stat. Ann. section 6018.505(e) and 25 Pa. Code section 263.32.

VI. Petition for Reconsideration/ Judicial Review

In accordance with 49 CFR 107.211(a), "[a]ny person aggrieved" by this decision may file a petition for reconsideration within 20 days of service of this decision. Any party to this proceeding may seek review of RSPA's decision "by the appropriate district court of the United States * * * within 60 days after such decision becomes final." 49 App. U.S.C. 1811(e).

This decision will become RSPA's final decision 20 days after service if no petition for reconsideration is filed within that time. The filing of a petition for reconsideration is not a prerequisite to seeking judicial review of this decision under 49 App. U.S.C. 1811(e).

If a petition for reconsideration of this decision is filed within 20 days of service, the action by RSPA's Associate Administrator for Hazardous Materials Safety on the petition for reconsideration will be RSPA's final decision. 49 CFR 107.211(d).

Issued in Washington, DC, on December 4, 1992.

Alan I. Roberts,

Associate Administrator for Hazardous Materials Safety.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Date: December 7, 1992.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, room 3171 Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: 1545–0531.
Form Number: IRS Form 706NA.
Type of Review: Extension.

Title: United States Estate (and Generation-Skipping Transfer) Tax Return, Estate of a Nonresident Not a Citizen of the United States.

Description: Under section 6018, executors must file estate tax returns or nonresident noncitizens who had property in the U.S. Executors use Form 706NA for this purpose. IRS uses the information to determine correct tax and credits.

Respondents: Individuals or households.

Estimated Number of Respondents/ Recordkeepers: 300.

Estimated Burden Hours Per Respondent/Recordkeeper:

Recordkeeping—1 hour, 38 minutes.

Learning about the law or the form—30 minutes.

Preparing the form—1 hour, 46 minutes.

Copying, assembling, and sending the form to the IRS—41 minutes.

Frequency of Response: On occasion. (Generally, form is only filed once).

Estimated Total Reporting/ Recordkeeping Burden: 1,295 hours.

OMB Number: 1545–0704.

Form Number: IRS Form 5471 and Schedules M, N, and O.

Type of Review: Revision.

Title: Information Return of U.S. Persons with Respect to Certain Foreign Corporations.

Description: Form 5471 and related schedules are used by U.S. persons that have an interest in a foreign corporation. The form is used to report income from the foreign corporation. The form and schedules are used to satisfy the reporting requirements of sections 6035 and 6046 and the regulations thereunder pertaining to the involvement of U.S. person with foreign corporations.

Respondents: Individuals or households, businesses or other for-profit, small businesses or organizations.

Estimated Number of Respondents/ Recordkeepers: 88,000.

Estimated Burden Hours Per Respondent/Recordkeeper:

Form/sched.	Recordkeeping	Learning about the law or the form	Preparing and sending the form to the IRS
5471	78 hrs., 41 min	24 hrs., 20 min	30 hrs., 18 min.
Sched. M	26 hrs., 33 min	18 min	44 min.
Sched. N	8 hrs., 22 min	3 hrs., 35 min	3 hrs., 52 min.
Sched. O	10 hrs., 46 min	12 min	23 min.

Frequency of Response: Annually.

Estimated Total Reporting/ Recordkeeping Burden: 6,846,545 hours.

OMB Number: 1545–1155.

Regulation ID Number: PS–74–89 (T.D. 8282) Final.

Type of Review: Extension.

Title: Election of Reduced Research Credit.

Description: These regulations prescribe the procedure for making the election described in section 280C(c)(3) of the Internal Revenue Code. Taxpayers making this election must reduce their section 41(a) research credit, but are not required to reduce their deductions for qualified research expenses, as required in paragraphs (1) and (2) of section 280C(c).

Respondents: Individuals or households, businesses or other for-profit, small businesses or organizations.

Estimated Number of Respondents: 200.

Estimated Burden Hours Per Respondent: 15 minutes.

Frequency of Response: Annually.

Estimated Total Reporting Burden: 50 hours.

Clearance Officer: Garrick Shear, (202) 622–3869, Internal Revenue Service, room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.

OMB Reviewer: Milo Sunderhauf, (202) 395–6880, Office of Management and Budget, room 3001, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports, Management Officer.

Sunshine Act Meetings

Federal Register
Vol. 57, No. 239
Friday, December 11, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

DEPARTMENT OF ENERGY
FEDERAL ENERGY REGULATORY COMMISSION

The following notice of meeting is published pursuant to Section 3(a) of the Government in the Sunshine Act (Pub. L. 94–409), 5 U.S.C. 552b:

DATE AND TIME: December 17, 1992, 9:00 a.m.

PLACE: 825 North Capitol Street NE., Room 9306, Washington, DC 20426.

STATUS: Open.

MATTERS TO BE CONSIDERED: FERC and State Public Utility Commissioners will discuss issues concerning the implementation of Order No. 636.

CONTACT PERSON FOR MORE INFORMATION: Judy Moesta or Jackie Flora, Division of Public and Intergovernmental Affairs, Telephone (202) 208–1088.

Dated: December 8, 1992.

Lois D. Cashell,
Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 10:00 a.m. on Tuesday, December 15, 1992, to consider the following matters:

Summary Agenda

No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Reports of actions approved by the standing committees of the Corporation and by officers of the Corporation pursuant to authority delegated by the Board of Directors.

Memorandum re: Procurement of additional disk storage.

Memorandum and resolution re: Revisions to the Corporation's delegations of authority with respect to regulation and supervision expenditures.

Discussion Agenda

Memorandum re: Review of the Corporation's 1993 Business Plan.

Memorandum and resolution re: Proposed amendments to Part 327 of the Corporation's rules and regulations, entitled "Assessments," which would implement a permanent risk-related premium system.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 – 17th Street, N.W., Washington, D.C.

The FDIC will provide attendees with auxiliary aids (e.g., sign language interpretation) required for this meeting. Those attendees needing such assistance should contact Llauger Valentin, Equal Employment Opportunity Manager, at (202) 898–6745 (Voice); (202) 898–3509 (TTY), to make necessary arrangements.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898–6757.

Dated: December 8, 1992.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,
Executive Secretary.

BILLING CODE 6714–01–M

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:30 a.m. on Tuesday, December 15, 1992, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b(c)(2), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B, and (c)(10) of Title 5, United States Code, to consider the following matters:

Summary Agenda

No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured depository institutions or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of depository institutions authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)((8), and (c)(9)(A)(ii)).

Note: Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Matters relating to the Corporation's corporate activities.

Discussion Agenda

Matters relating to the possible closing of certain insured depository institutions:

Names and locations of depository institutions authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550–17th Street, N.W., Washington, D.C.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898–6757.

Dated: December 8, 1992.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,
Executive Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Changes in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its open meeting held at 10:04 a.m. on Tuesday, December 8, 1992, the Corporation's Board of Directors determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Director Stephen R. Steinbrink (Acting Comptroller of the Currency), concurred in by Acting Chairman Andrew C. Hove, Jr. and Director Jonathan L. Fiechter (Acting Director, Office of Thrift Supervision), that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matters:

Memoradum re: Modification of contract with AT&T for enhancements to the new wide area network.

Memorandum re: Management Education Curriculum Project: Recommendation for Award of Contract.

By the same majority vote, the Board determined that no earlier notice of these changes in the subject matter of the meeting was practicable.

The Board also determined, by the same majority vote, that Corporation business required the withdrawal from the agenda for consideration at the meeting on less than seven day's notice to the public, of the following matters:

Memordanum and resolution re: Proposed amendments to Part 362 of the Corporation's rules and regulations, entitled "Activities and Investments of Insured State Banks," which would require insured state banks to obtain the prior consent of the Corporation before directly, or indirectly through a subsidiary, engaging "as principal" in any activity that is not permissible for a national bank.

Memorandum and resolution re: Proposed amendments to Part 333 of the Corporation's rules and regulations, entitled "Extension of Corporate Powers," which would eliminate section 333.3 which makes certain prohibitions applicable to state chartered savings associations to state banks that are members of the Savings Association Insurance Fund.

Memorandum and resolution re: Proposed amendments to the Corporation's rules and regulations, which would eliminate Part 332, entitled "Powers Inconsistent with Purposes of Federal Deposit Insurance Law."

By the same majority vote, the Board further determined that no notice of these changes in the subject matter of the meeting earlier than December 2, 1992, was practicable.

The meeting was held in the Board Room of the FDIC Building located at 550—17th Street, NW., Washington, DC.

Dated: December 8, 1992.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

BILLING CODE 6714–01–M

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Changes in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2), notice is hereby given that at its closed meeting held at 10:38 a.m. on Tuesday, December 8, 1992, the Corporation's Board of Directors determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Acting Chairman Andrew C. Hove, Jr., concurred in by Director Stephen R. Steinbrink (Acting Comptroller of the Currency) and Director Jonathan L. Fiechter (Acting Director, Office of Thrift Supervision), that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matters:

Matters relating to the Corporation's corporate activities.

Application of Devon Bank, Chicago, Illinois, an insured State nonmember bank, for consent to purchase certain assets of and assume the liability to pay deposits made at Deerbrook State Bank, Deerfield, Illinois, and for consent to establish a temporary branch until a permanent branch is established at 70 South Waukegan Road, Deerfield, Illinois.

The Board further determined, by the same majority vote, that no earlier notice of the changes in the subject matter of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii) and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: December 8, 1992.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

FEDERAL RETIREMENT THRIFT INVESTMENT BOARD

TIME AND DATE: 10 a.m., December 21, 1992.

PLACE: 4th Floor, Conference Room, 1250 H Street, NW., Washington, DC.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. Approval of the minutes of the last meeting.
2. Thrift Savings Plan activity report by the Executive Director.
3. Review of KPMG Peat Marwick audit reports:

"Pension and Welfare Benefits Administration Survey of Federal Retirement Thrift Savings Plan Inactive Accounts and Proposed Abandoned Account Policies at the United States Department of Agriculture, Office of Finance and Management, National Finance Center."

"Pension and Welfare Benefits Administration Review of the Thrift Savings Plan Billing Process at the United States Department of Agriculture, Office of Finance and Management, National Finance Center."

4. Review of Hewitt Associates "Defined Contribution Outsourcing Feasibility Study."
5. Ethics briefing.
6. Executive Director's compensation.

CONTACT PERSON FOR MORE INFORMATION: Tom Trabucco, Director, Office of External Affairs, (202) 523–5660.

Dated: December 9, 1992.

Francis X. Cavanaugh,

Executive Director, Federal Retirement Thrift Investment Board.

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

TIME AND DATE: 9:30 a.m., Wednesday, December 16, 1992.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

STATUS: Open.

MATTERS TO BE CONSIDERED:

Summary Agenda

Because of their routine nature, no substantive discussion of the following items is anticipated. These matters will be voted on without discussion unless a member of the Board requests that an item be moved to the discussion agenda.

1. Publication for comment of proposed criteria for sponsoring Telecommunications Service Priority (TSP) assignments.
2. Cost of Federal Reserve notes in 1993.
3. Proposed amendments to Regulation O (Loans to Executive Officers, Directors, and Principal Shareholders of Member Banks) to implement amendments contained in the Housing and Community Development Act of 1992.
4. Implementation of section 7(h)(1) of the International Banking Act: Activities of State-Licensed Branches and Agencies.

Discussion Agenda

5. Implementation of section 7(e)(7) of the International Banking Act: Guidelines for Foreign Banks.
6. Proposed 1993 Federal Reserve Bank budgets.

Note: This meeting will be recorded for the benefit of those unable to attend. Cassettes will be available for listening in the Board's Freedom of Information Office, and copies may be ordered for $5 per cassette by calling (202) 452–3684 or by writing to:

Freedom of Information Office, Board of Governors of the Federal Reserve System, Washington, DC 20551.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204.

Dated: December 9, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

TIME AND DATE: Approximately 11:00 a.m., Wednesday, December 16, 1992, following a recess at the conclusion of the open meeting.

PLACE: Marriner S. Eccles Federal Reserves Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Federal Reserve Bank and Branch director appointments.
2. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
3. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204. You may call (202) 452–3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: December 9, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

Corrections

Federal Register
Vol. 57, No. 239
Friday, December 11, 1992

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF ENERGY

Energy Information Administration

Agency Information Collections Under Review by the Office of Management and Budget

Correction

In notice document 92–28835 beginning on page 56575 in the issue of Monday, November 30, 1992, make the following correction: On page 56575, in the third column, in the 15th paragraph, "FERC–508" should read "FERC–585".

BILLING CODE 1505–01–D

FARM CREDIT ADMINISTRATION

12 CFR Part 614

RIN 3052–AB34

Loan Policies and Operations; Collateral Evaluation Requirements, Actions on Applications, and Review of Credit Decisions

Correction

In rule document 92–27961 beginning on page 54683 in the issue of Friday, November 20, 1992, make the following corrections:

1. On page 54684, in the 2d column, under **I. General**, in the 1st paragraph, in the 21st line, "54" should read "56".

2. On page 54687, in the second column, in the first full paragraph, in the eighth line, "evaluation" should read "evaluations".

3. On page 54690, in the second column, in the third full paragraph, in the fifth line, "encourage" should read "encouraged".

§ 614.4245 [Corrected]

4. On page 54696, in the third column, in § 614.4245(a), in the third line, "leading" should read "lending".

§ 614.4265 [Corrected]

5. On page 54698, in the second column, in § 614.4265(b), in the fourth line, after "comparison" insert "approach".

§ 614.4440 [Corrected]

6. On page 54699, in the first column, in § 614.4440(f), the ninth line should follow immediately after "evaluated".

Department of Housing and Urban Development

Office of the Secretary

24 CFR Part 92

Home Investment Partnerships Program; Interim Rule

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

24 CFR Part 92

[Docket No. R-92-1808; FR-3242-I-02]

RIN 2501-AB42

Home Investment Partnerships Program

AGENCY: Office of the Secretary, HUD.

ACTION: Interim rule.

SUMMARY: This interim rule implements recent statutory amendments concerning insular areas participating in the HOME Investment Partnerships Program. The rule provides the formula for determining allocations to insular areas (Guam, the Northern Mariana Islands, the United States Virgin Islands, and American Samoa). It also provides other requirements for the insular area component of the Program.

EFFECTIVE DATE: January 11, 1993.

FOR FURTHER INFORMATION CONTACT: Mary Kolesar, Director, Program Policy Division, Office of Affordable Housing, 451 Seventh Street SW., Washington, DC 20410, telephone (202) 708-2470, TDD (202) 708-2565. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

I. Information Collections

The information collection requirements contained in this interim rule have been approved by the Office of Management and Budget, under section 3504(h) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501-3520), and assigned OMB control number 2501-0013.

II. Background

This interim rule implements section 211 of the Housing and Community Development Act of 1992. (HCDA 1992) (Pub. L. 102-550, approved October 28, 1992), which amended the National Affordable Housing Act (NAHA) to provide for reserving a portion of HOME funds for grants to insular areas. Section 104 of NAHA, as amended, defines "insular areas" to mean Guam, the Commonwealth of the Northern Mariana Islands (CNMI), the United States Virgin Islands, and American Samoa.

A proposed rule to implement the HOME program for the insular areas was published on August 5, 1992 (57 FR 34640). Although the Department had determined, in accordance with 24 CFR 10.1, that it would be in the public interest to omit public comment on this rule because a formula allocation for insular areas must be in place by the time of the 1993 Fiscal Year (FY) appropriation for the HOME Program, it was not necessary to omit a comment period altogether in order to promulgate an effective rule in time for FY 1993. To give interested parties an opportunity to comment before putting a rule into effect, a comment period of 30 days was permitted.

Comments were received from three of the insular areas: the Commonwealth of the Northern Mariana Islands, the United States Virgin Islands, and American Samoa. In addition, on August 21, 1992, a meeting was held at the Department's Honolulu Office with HOME Coordinators from the insular areas of Guam, CNMI, and American Samoa to discuss and comment on the proposed rule. The following issues were identified by the comments and meeting:

The comments urged that a final rule be promulgated as quickly as possible in time for FY 1993 funding. The Department agrees that a rule must be in effect for FY 1993 purposes. However, this rule will be made effective as an interim rule rather than a final rule. This is because the HOME Investment Partnerships Program, which this rule amends, is currently implemented by an interim rule, published on December 6, 1991 (56 FR 65313). Because comments have already been received and considered for this rule, in accordance with the procedure explained above, comments are not being solicited here as they ordinarily are for interim rules. At the time that the rule for the entire HOME program is made final, the sections of it that deal with insular areas will also be made final.

Several of the comments pointed out that because of differences in the way land is held in some of the insular areas, the definition of "Homeownership" at § 92.2 would have to be amended for the HOME program to be effective. For example, leases are limited to 55 years in both CNMI and American Samoa. Guam has no lease limitations. In American Samoa, 97 percent of the land is communally held, and therefore residents cannot own land on a fee-simple basis; the only basis for homeownership would be on a lease basis.

It is claimed that problems arise in this regard because "Homeownership" is currently defined, in pertinent part, as, "ownership in fee simple title or a 99 year leasehold interest in a one- to four-unit dwelling or in a condominium unit, ownership or membership in a cooperative, or equivalent form of ownership approved by HUD." For this reason, "Homeownership" will be redefined in this interim rule to include a lease of 40 years or more in the insular areas. This approach is consistent with FHA mortgage insurance requirements, which permit mortgage insurance for leases if the term of the lease is not less than ten years beyond the maturity date of the mortgage.

Several suggestions concerning the funding allocation formula for the insular areas at § 92.50(b)(3) of the proposed rule were made in the comments. That formula was based on section 1 of Pub. L. 102-230, which provided that the Secretary shall reserve for grants to the insular areas an amount that reflects their share of the total population of eligible jurisdictions, and any adjustments that the Secretary determines are reasonable in light of available data that are related to the statutory factors for the basic formula allocation to States and to units of general local government that are metropolitan areas, urban counties, and consortia.

The use of the number of rental units as a part of the allocation formula was criticized by the comments because some insular areas have only recently been producing rental units for the general population and have a limited stock. It was also recommended that the number of households paying more than 30% of their gross income for shelter be used as a factor in the allocation formula. Some comments recommended that the allocation formula should take into account the need for HOME assistance and the unique social and cultural factors present in the insular areas.

The discussion of the Department's proposed funding allocation formula for insular areas has been rendered moot by the recent legislative amendments made to the allocation formula by section 211 of HCDA 1992. The new statutory formula requires the greater of $750,000 or 0.2 percent of HOME funds appropriated to be provided for insular areas, and this rule at § 92.50(b)(3) has been amended accordingly.

Although the formula for allocating funds to the insular areas is changed in this interim rule, number of rental units will continue to be used as a part of the formula for allocating HOME funds among the insular areas. The Department has determined not to make any changes at this time in this allocation formula. As stated in the preamble of the proposed rule, the Department has used share of occupied rental housing as a measure of need based on rental occupancy data. Four of the six formula allocation factors used in determining relative need (see 24 CFR 92.50) are measures of subsets of

occupied rental housing. The Department's experience indicates that there is a reasonably close correspondence between the relative need determined by using these factors, and the relative need determined by using share of occupied rental household. However, these allocation issues will continue to receive consideration as the Department gains experience in administering the HOME program. They will also be considered as a part of an allocation formula study of the entire HOME program that will be performed by the Department this coming year.

The definition in § 92.2 of "unit of general local government" has also been amended to conform to the amendments made by section 211 of HCDA 1992.

Comments also focused on the program requirements, imposed by the proposed rule on insular areas, which differed from those applicable to participating jurisdictions. Comments were received on the provisions at § 92.60(c) that made funding allocations contingent on previous HUD audit findings and outstanding monetary obligations. The concerns expressed on this issue were similar to those made regarding the specific program description requirements of § 92.61(b), the requirement at § 92.62(a) that the program description must be consistent with the approved housing strategy, and the program description amendment procedures of § 92.63, in asking why these requirements were imposed on insular areas but not on participating jurisdictions.

The Department believes that, based on its experience, these provisions provide an appropriate control mechanism for the allocation of program funds to insular areas. This rule represents a considered balancing of options in which some requirements applicable to participating jurisdictions, such as those relating to matching funds or the prohibition on using program funds for administration, are removed, and others, such as those under discussion here, are added. Of course, like other aspects of the rule, these issues will be reexamined at the time that a final rule is promulgated.

With regard to the program description requirements, there was also concern that the 60 days permitted for submission in the proposed rule was insufficient. This interim rule amends § 92.61(a) to permit an additional 30 days for the program description submission.

One comment also requested that the percent of HOME funds that may be used for administration be increased to 20 percent. The Department believes that the 15 percent limit included in the proposed rule, which is the same percentage permitted only for the Indian HOME program (participating jurisdictions may not use any program funds for administration), strikes an appropriate balance between making funds available for administrative purposes while ensuring that the program's housing purposes, which are paramount, are maximized.

III. Findings and Certifications

Environmental Review

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR part 50 that implement section 102(2)(C) of the National Environmental Policy Act of 1969. The finding of No Significant Impact is available for public inspection between 7:30 a.m. and 5:30 p.m. weekdays in the Office of the Rules Docket Clerk at the above address.

Impact on the Economy

This rule does not constitute a "major rule" as that term is defined in section 1(b) of the Executive Order on Federal Regulations issued by the President on February 17, 1981. Analysis of the rule indicates that it would not: (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Impact on Small Entities

In accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), the undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities, because only the four statutorily defined "insular areas" are affected by this rule.

Regulatory Agenda

This rule was listed as item 1370 in the Department's Semiannual Agenda of Regulations published on November 3, 1992 (57 FR 51392) pursuant to Executive Order 12291 and the Regulatory Flexibility Act.

Federalism Impact

The General Counsel has determined, as the Designated Official for HUD under section 6(a) of Executive Order 12612, Federalism, that this proposed rule does not have federalism implications concerning the division of local, state, and federal responsibilities. The rule affects the four Federal territories included within the term "insular areas."

Impact on the Family

The General Counsel, as the designated official under Executive Order 12606, The Family, has determined that this rule would not have significant impact on family formation, maintenance, and general well-being. Assistance provided under the rule can be expected to support family values, by helping families achieve security and independence; by enabling them to live in decent, safe, and sanitary housing; and by giving them the means to live independently in mainstream American society. The rule would not, however, affect the institution of the family, which is requisite to coverage by the Order. Even if the rule had the necessary family impact, it would not be subject to further review under the Order, since the provision of assistance under the rule is required by statute, and is not subject to agency discretion.

List of Subjects in 24 CFR Part 92

Grant programs—housing and community development, Manufactured homes, Rent subsidies, Reporting and recordkeeping requirements.

Accordingly, the Department amends part 92 of title 24 of the Code of Federal Regulations as follows:

PART 92—HOME INVESTMENT PARTNERSHIPS PROGRAM

1. In part 92, the authority citation continues to read as follows:

Authority: 42 U.S.C. 3535(d) and 12701–12839.

2. In § 92.2, the definitions of *homeownership* and *unit of general local government* are revised, and the newly defined term *insular areas* is added, to read as follows:

§ 92.2 Definitions.

* * * * *

Homeownership means ownership in fee simple title or a 99 year leasehold interest in a one- to four-unit dwelling or in a condominium unit, ownership or membership in a cooperative, or equivalent form of ownership approved by HUD. The ownership interest may be subject only to the restrictions on resale required under § 92.254(a); mortgages, deeds of trust, or other liens or instruments securing debt on the property as approved by the

participating jurisdiction; or any other restrictions or encumbrances that do not impair the good and marketable nature of title to the ownership interest. For purposes of the insular areas, homeownership includes leases of 40 years or more.

* * * * *

Insular areas means Guam, the Northern Mariana Islands, the United States Virgin Islands, and American Samoa.

* * * * *

Unit of general local government means a city, town, township, county, parish, village, or other general purpose political subdivision of a State; the Federal States of Micronesia and Palau, the Marshall Islands, or a general purpose political subdivision thereof; a consortium of such political subdivisions recognized by HUD in accordance with § 92.101; and any agency or instrumentality thereof that is established pursuant to legislation and designated by the chief executive to act on behalf of the jurisdiction with regard to provisions of this part. When a county is an urban county, the urban county is the unit of general local government for purposes of the HOME Investment Partnerships Program.

* * * * *

3. The heading for subpart B is revised and an undesignated heading is added immediately after the heading for subpart B, to read as follows:

Subpart B—Allocation Formula and Insular Areas Program Allocation Formula

4. In § 92.50, paragraph (b) is revised to read as follows:

§ 92.50 Formula allocation.

* * * * *

(b) *Amounts available for allocation; state and local share.* The amount of funds that are available for allocation by the formula under this section is equal to the balance of funds remaining after reserving:

(1) For grants to Indian tribes, one percent (or such other percentage or amount, as authorized by Congress) of the total funds appropriated;

(2) Up to such amounts as may be authorized by law for housing education and organization support and for coordinated federal support activities; and

(3) For allocations to insular areas, an amount that is the greater of $750,000 or 0.2 percent of the total funds appropriated.

* * * * *

5. At the end of subpart B, an undesignated heading and new §§ 92.60 through 92.66 are added, to read as follows:

Subpart B—Allocation Formula and Insular Areas Program

Insular Areas Program

92.60 Allocation amounts for insular areas.
92.61 Program description and housing strategy.
92.62 Review of program description and certifications.
92.63 Amendments to program description.
92.64 Applicability of requirements to insular areas.
92.65 Funding sanctions.
92.66 Reallocation.

§ 92.60 Allocation amounts for insular areas.

(a) *Initial allocation amount for each insular area.* The initial allocation amount for each insular area is determined based upon the insular area's population and occupied rental units compared to all insular areas.

(b) *Threshold requirements.* The responsible HUD Field Office shall review each insular area's progress on outstanding allocations made under this section, based on the insular area's performance report, the timeliness of close-outs, and compliance with fund management requirements and pertinent regulations, taking into consideration the size of the allocation and the degree and complexity of the program. If HUD determines from this review that the insular area does not have the capacity to administer effectively a new allocation, or a portion of a new allocation, in addition to allocations currently under administration, HUD may reduce the insular area's initial allocation amount.

(c) *Previous audit findings and outstanding monetary obligations.* HUD shall not make an allocation to an insular area that has either an outstanding audit finding for any HUD program, or an outstanding monetary obligation to HUD that is in arrears, or for which a repayment schedule has not been established and agreed to. This restriction does not apply if the Field Office manager finds that the insular area has made a good faith effort to clear the audit and, when there is an outstanding monetary obligation to HUD, the insular area has made a satisfactory arrangement for repayment of the funds due HUD and payments are current.

(d) *Increases to the initial allocation amount.* If funds reserved for the insular areas are available because HUD has decreased the amount for one or more insular area in accordance with paragraphs (b) or (c) of this section, or for any other reason, HUD may increase the allocation amount for one or more of the remaining insular areas based upon the insular area's performance in committing HOME funds within the 24 month deadline, producing housing units described in its program description, and meeting HOME program requirements. Funds that become available but which are not used to increase the allocation amount for one or more of the remaining insular areas will be reallocated to the states as provided in accordance with the requirements in subpart J for reallocating funds initially allocated to a state.

(e) *Notice of allocation amounts.* HUD will notify each insular area, in writing, as to the amount of its HOME allocation that HUD has determined for the insular area in accordance with this section.

§ 92.61 Program description and housing strategy.

(a) *Submission requirement.* Not later than 90 days after HUD notifies the insular area of the amount of its allocation, the insular area must submit a program description to HUD containing the information described in paragraph (b) of this section.

(b) *Content of program description.* The program description must provide the following information:

(1) An executed Standard Form 424;

(2) The estimated use of HOME funds (consistent with needs identified in its approved housing strategy) and a description of projects and eligible activities, including number of units to be assisted, estimated costs, and tenure type (rental or owner occupied) and, for tenant assistance, households assisted;

(3) A timetable for the implementation of the projects or eligible activities;

(4) If the insular area intends to use HOME funds for first-time homebuyers, the guidelines for resale, as required in § 92.254(a)(4);

(5) If the insular area intends to use HOME funds for tenant-based rental assistance, a description of how the program will be administered consistent with the minimum guidelines described in § 92.211;

(6) If an insular area intends to use other forms of investment not described in § 92.205(b), a description of the other forms of investment;

(7) A statement of the policy and procedures to be followed by the insular area to meet the requirements for affirmative marketing, and establishing and overseeing a minority and women business outreach program under §§ 92.350 and 92.351, respectively.

(c) The following certifications must accompany the program description:

(1) A certification that, before committing funds to a project, the insular area will evaluate the project in accordance with guidelines that it adopts for this purpose and will not invest any more HOME funds in combination with other federal assistance than is necessary to provide affordable housing;

(2) If the insular area intends to provide tenant-based assistance, the certification required by § 92.211;

(3) A certification that the submission of the program description is authorized under applicable law and the insular area possesses the legal authority to carry out the HOME Investment Partnerships Program, in accordance with the HOME regulations;

(4) A certification that it will comply with the acquisition and relocation requirements of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended, implementing regulations at 49 CFR part 24 and the requirements of § 92.353;

(5) A certification that the insular area will use HOME funds pursuant to the insular area's approved housing strategy and in compliance with all requirements of this part;

(6) The certification with regard to the drug-free workplace required by 24 CFR part 24, subpart F; and

(7) The certification required with regard to lobbying required by 24 CFR part 87, together with disclosure forms, if required by part 87.

(8) A certification that the insular area agrees to assist HUD to comply with 24 CFR part 50 and shall:

(i) Supply HUD with all available, relevant information necessary for HUD to perform for each property any environmental review required by part 50;

(ii) Carry out mitigating measures required by HUD or select alternate eligible property; and

(iii) Not acquire, rehabilitate, convert, lease, repair or construct property, or commit HUD or local funds to such program activities with respect to any eligible property, until HUD approval is received.

(Approved by the Office of Management and Budget under control number 2501–0013)

§ 92.62 Review of program description and certifications.

(a) *Review of program description.* The responsible HUD Field Office will review an insular area's program description and will approve the description unless it is not consistent with the insular area's approved housing strategy, or if the insular area has failed to submit information sufficient to allow HUD to make the necessary determinations required by § 92.61 (b)(4), (b)(6), and (b)(7), if applicable, or if the level of proposed projects or eligible activities is not within the management capability demonstrated by past performance in housing and community development programs. If the information submitted is not consistent with the approved housing strategy, or the insular area has not submitted information on § 92.61 (b)(4), (b)(6), and (b)(7), if applicable, or if the level of proposed projects or eligible activities is not within the management capability demonstrated by past performance in housing and community development programs, the insular area may be required to furnish such further information or assurances as HUD may consider necessary to find the program description and certifications satisfactory. The HUD Field Office shall work with the insular area to achieve a complete and satisfactory program description.

(b) *Review period.* The HUD Field Office will notify the insular area if its program description is not consistent with its approved housing strategy, or determinations cannot be made under § 92.61 (b)(4), (b)(6), or (b)(7), or if the proposed projects or activities are beyond currently demonstrated capability, within 30 days of receipt. The insular area will have a reasonable period of time, agreed upon mutually, to submit the necessary supporting information to show it is consistent or to revise the proposed projects or activities in its program description.

(c) *HOME Investment Partnership Agreement.* After Field Office approval under this section, a HOME funds allocation is made by HUD execution of the agreement, subject to execution by the insular area. The funds are obligated on the date HUD notifies the insular area of HUD's execution of the agreement in accordance with this section and § 92.501.

§ 92.63 Amendments to program description.

An insular area must submit to HUD for approval any substantial change in its HUD-approved program description that it makes during the fiscal year and must document any other changes in its file. A substantial change involves a change in the guidelines for resale (§ 92.61(b)(4)), other forms of investment (§ 92.61(b)(6)), minority and women business outreach program (§ 92.61(b)(7)), or a change in tenure type of the project or activities, or a funding increase to a project or activity of $100,000 or 50% (whichever is greater). The HUD Field Office will notify the insular area if its program description, as amended, is not consistent with its approved housing strategy, or determinations cannot be made under § 92.61(b) (b)(4), (b)(6), or (b)(7), or if the level of proposed projects or eligible activities is not within the management capability demonstrated by past performance in housing and community development programs, within 30 days of receipt. The insular area will have a reasonable period of time, agreed upon mutually, to submit the necessary supporting information to show it is consistent or to revise the proposed projects or activities in its program description.

§ 92.64 Applicability of requirements to insular areas.

(a) Insular areas are subject to the same requirements in subpart E (Program Requirements), subpart F (Project Requirements), subpart K (Program Administration), and subpart L (Performance Reviews and Sanctions) of this part as participating jurisdictions, except for the following.

(1) Subpart E (Program Requirements): Sections 92.208 through 210 do not apply. The prohibition, in § 92.214(a) against using HOME funds to defray administrative cost does not apply, and in addition to the costs listed in § 92.206, administrative costs of an insular area not to exceed 15 percent of the HOME funds provided to the insular area are eligible costs. The matching contribution requirements in §§ 92.218 through 92.221 do not apply.

(2) Subpart K (Program Administration):

(i) Section 92.500 (The HOME Investment Trust Fund) does not apply. HUD will establish a HOME account in the United States Treasury for each insular area and the HOME funds must be used for approved activities. A local account must be established for repayment, interest and other return of investment of HOME funds. Each insular area may use either a separate local HOME account or a subsidiary account within its general fund (or other appropriate fund) as the local HOME account. HUD will recapture HOME funds in the HOME Treasury account by the amount of:

(A) Any funds that are not committed within 24 months after the last day of the month in which the funds were deposited in the account;

(B) Any funds that are not expended within five years after the last day of the month in which the funds were deposited in the account; and

(C) Any penalties assessed by HUD under § 92.552.

(ii) Section 92.502 (Cash and Management Information System) applies, except that references to the HOME Investment Trust Fund mean HOME account and the reference to 24 CFR part 58 does not apply. In addition, § 92.502(c) does not apply, and compliance with Treasury Circular No. 1075 (31 CFR part 205) is required.

(iii) Section 92.503 (Repayment of investment) applies, except that repayments, interest and other return on investment of HOME funds may be retained provided the funds are used for eligible activities in accordance with the requirements of this section.

(3) Section 92.504 (Participating jurisdiction responsibilities; written agreements; monitoring) applies, except that the written agreement must ensure compliance with the requirements in this section.

(4) Section 92.508 (Recordkeeping) applies with respect to the records that relate to the requirements of this section.

(5) Section 92.509 (Performance reports) applies, except that a performance report is required only after completion of the approved projects.

(6) Subpart L (Performance Reviews and Sanctions): Section 92.522 does not apply. Instead, § 92.65 applies.

(b) The requirement of subpart H (Other Federal Requirements) of this part apply as follows: § 92.352 Environmental review and § 92.359 Executive Order 12372 apply as written, and the requirements of the remaining sections which apply to participating jurisdictions are applicable to the insular areas. In addition, an insular area must advise HUD when it proposes specific properties to be used in its program, and HUD will perform an environmental review with respect to those properties in accordance with 24 CFR part 50. The insular area will supply HUD with available, relevant information necessary for that review, will carry out mitigating measures required by HUD or select alternate eligible property, and will not acquire, rehabilitate, convert, lease, repair or construct property, or commit HUD or local funds to these program activities with respect to any eligible property, until HUD approval is received.

(c) Subpart B (Allocation Formula), subpart C (Participating Jurisdiction: Designation and Revocation of Designation—Consortia), subpart D (Program Description), and subpart G (Community Housing Development Organizations) of this part do not apply.

§ 92.65 Funding sanctions.

Following notice and opportunity for informal consultation, HUD may withhold, reduce or terminate the assistance where any corrective or remedial actions taken under § 92.551 fail to remedy a recipient's performance deficiencies, and the deficiencies are sufficiently substantial, in the judgment of HUD, to warrant sanctions.

§ 92.66 Reallocation.

HUD will reallocate to the states any HOME funds reduced or recaptured from an insular area, and which are not used to increase the allocation amount for one or more of the remaining insular areas as provided in § 92.60 of this part, in accordance with the requirements in subpart J for reallocating funds initially allocated to a state.

(Approved by the Office of Management and Budget under control number 2501–0013)

Dated: December 3, 1992.

Jack Kemp,

Secretary.

[FR Doc. 92–29941 Filed 12–10–92; 8:45 am]

BILLING CODE 4210-32-M

federal register

Friday
December 11 1992

Part III

Department of the Interior

Bureau of Indian Affairs

Indian Gaming; Notice of Approved Tribal-State Compact

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Indian Gaming

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of approved tribal-state compact.

SUMMARY: Pursuant to 25 U.S.C. 2710, of the Indian Gaming Regulatory Act of 1988 (Pub. L. 100–497), the Secretary of the Interior shall publish, in the **Federal Register**, notice of approved Tribal-State Compacts for the purpose of engaging in Class III (casino) gambling on Indian reservations. The Assistant Secretary—Indian Affairs, Department of the Interior, through his delegated authority has approved the Gaming Compact Between the Three Affiliated Tribes and the State of North Dakota, which was enacted on October 7, 1992.

DATES: This action is effective upon date of publication.

FOR FURTHER INFORMATION CONTACT: Hilda Manuel, Interim Staff Director, Indian Gaming Management Staff, Bureau of Indian Affairs, Washington, DC 20240, (202) 219–0994.

Dated: December 3, 1992.

Eddie F. Brown,

Assistant Secretary—Indian Affairs.

Department of the Interior

Bureau of Indian Affairs

Petition for Federal Acknowledgment of Existence as an Indian Tribe; Waccamaw-Siouan Indian Association; Notice

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Receipt of Petition for Federal Acknowledgment of Existence as an Indian Tribe; Waccamaw-Siouan Indian Assoc.

November 27, 1992.

This is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.

Pursuant to 25 CFR 83.8(a) (formerly 25 CFR 54.8(a)) notice is hereby given that the

Waccamaw-Siouan Indian Association, of South Carolina, Inc., 1110 28th Avenue South, Myrtle Beach, South Carolina 29582.

has filed a petition for acknowledgment by the Secretary of the Interior that the group exists as an Indian tribe. The petition was received by the Bureau of Indian Affairs (BIA) on October 16, 1992, and was signed by members of the group's governing body.

This is a notice of receipt of petition and does not constitute notice that the petition is under active consideration. Notice of active consideration will be sent by mail to the petitioner and other interested parties at the appropriate time.

Under § 83.8(d) (formerly 54.8(d)) of the Federal regulations, interested parties may submit factual and/or legal arguments in support of or in opposition to the group's petition. Any information submitted will be made available on the same basis as other information in the BIA's files. Such submissions will be provided to the petitioner upon receipt by the BIA. The petitioner will be provided an opportunity to respond to such submissions prior to a final determination regarding the petitioner's status.

The petition may be examined by appointment in the Department of the Interior, Bureau of Indian Affairs, Branch of Acknowledgment and Research, room 1362–MIB, 1849 C Street, NW., Washington, DC 20240, Phone: (202) 208–3592.

Eddie F. Brown,

Assistant Secretary, Indian Affairs.

Part V

Department of Energy

Strategic Petroleum Reserve; Standard Sales Provisions; Notice

DEPARTMENT OF ENERGY

Strategic Petroleum Reserve; Standard Sales Provisions

AGENCY: Office of Strategic Petroleum Reserve.

ACTION: Notice.

SUMMARY: In the event of a severe energy supply interruption or in order to meet obligations of the United States under the Agreement on an International Energy Program (IEP), the Department of Energy (DOE) may draw down from the Strategic Petroleum Reserve (SPR) and conduct a price competitive sale of SPR petroleum under the Energy Policy and Conservation Act, as amended. 42 U.S.C. 6201 et seq. Today, DOE is publishing Standard Sales Provisions (SSPs) which may be attached to a Notice of Sale issued pursuant to SPR implementing regulations. The SSPs contain or describe contract clauses, terms and conditions of sale, and performance and financial responsibility measures, which may be used in connection with future sales. Today's version is based on experience gained in the late 1990 Test Sale and the 1991 drawdown during "Operation Desert Storm." DOE reserves the option of revising the SSPs at any time prior to issuance of a Notice of Sale.

FOR FURTHER INFORMATION CONTACT:

Nancy Marland, FE–422, Strategic Petroleum Reserve, Office of Technical Management, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–4691.

Gary Landry, FE–4451, Strategic Petroleum Reserve Project Management Office, Acquisition and Sales Division, U.S. Department of Energy, 900 East Commerce Road, New Orleans, Louisiana 70123, (504) 734–4660.

Jocelyn Guarisco, FE–441, Strategic Petroleum Reserve Project Management Office, Office of Chief Counsel, U.S. Department of Energy, 900 East Commerce Road, New Orleans, Louisiana 70123, (504) 734–4294.

Issued in Washington, DC, November 30, 1992.

Berton J. Roth,

Deputy Director, Office of Procurement, Assistance and Program Management.

Until further notice, the SSPs for price competitive sales of petroleum from the SPR are as follows:

STANDARD SALES PROVISIONS

Index

Section A—General Pre-Sale Information

A.1 List of abbreviations
A.2 Definitions
A.3 Standard Sales Provisions
A.4 Periodic revisions of the Standard Sales Provisions
A.5 Sales Offerors' Mailing List
A.6 Publicizing the Notice of Sale
A.7 Penalty for false statements in offers to buy SPR petroleum

Section B—Sales Solicitation Provisions

B.1 Requirements for a valid offer—caution to offerors
B.2 Price indexing
B.3 Certification of independent price determination
B.4 Requirements for vessels—caution to offerors
B.5 "Superfund" tax on SPR petroleum—caution to offerors
B.6 Export limitations and licensing—caution to offerors
B.7 Issuance of the Notice of Sale
B.8 Submission of offers and modification of previously submitted offers
B.9 Acknowledgment of amendments to a Notice of Sale
B.10 Late offers, modifications of offers, and withdrawal of offers
B.11 Offer guarantee
B.12 Explanation requests from offerors
B.13 Currency for offers
B.14 Language of offers and contracts
B.15 Proprietary data
B.16 SPR crude oil streams and delivery points
B.17 Notice of Sale line item schedule—petroleum quantity, quality, and delivery method
B.18 Line item information to be provided in the offer
B.19 Mistake in offer
B.20 Evaluation of offers
B.21 Procedures for evaluation of offers
B.22 Financial statements and other information
B.23 Resolicitation procedures on unsold petroleum
B.24 Offeror's certification of acceptance period
B.25 Notification of Apparently Successful Offeror
B.26 Contract documents
B.27 Purchaser's representative
B.28 Procedures for selling to other U.S Government agencies

Section C—Sales Contract Provisions

C.1 Delivery of SPR petroleum
C.2 Compliance with the "Jones Act" and the U.S. export control laws
C.3 Storage of SPR petroleum
C.4 Environmental compliance
C.5 Delivery and transportation scheduling
C.6 Contract modification—alternate delivery line items
C.7 Application Procedures for "Jones Act" waivers
C.8 Vessel loading procedures
C.9 Vessel laytime and demurrage
C.10 Vessel loading expedition options
C.11 Purchaser liability for excessive berth time
C.12 Pipeline delivery procedures
C.13 Title and risk of loss
C.14 Acceptance of crude oil
C.15 Delivery acceptance and verification
C.16 Price adjustments for quality differentials
C.17 Determination of quality
C.18 Determination of quantity
C.19 Delivery documentation
C.20 Contract amounts
C.21 Payment
C.22 Payment and performance letters of credit—general requirements
C.23 Billing and payment—with purchaser's letter of credit
C.24 Billing and payment—with purchaser's advance payment
C.25 Replacement of funds in the payment and performance guarantee
C.26 Method of payment—general
C.27 Interest
C.28 Government options if payment is not received
C.29 Termination
C.30 Other Government remedies
C.31 Liquidated damages
C.32 Failure to perform under SPR contracts
C.33 Government options in case of impossibility of performance
C.34 Limitation of Government liability
C.35 Notices
C.36 Disputes
C.37 Assignment
C.38 Order of precedence
C.39 Gratuities
C.40 Officials not to benefit

Section A—General Pre-Sale Information

A.1 List of Abbreviations

(a) *ASO:* Apparently Successful Offeror
(b) *DLI:* Delivery Line Item
(c) *DOE:* U.S. Department of Energy
(d) *MLI:* Master Line Item
(e) *NA:* Notice of Acceptance
(f) *NS:* Notice of Sale
(g) *SSPs:* Standard Sales Provisions
(h) *SPR:* Strategic Petroleum Reserve
(i) *SPRCODR:* SPR Crude Oil Delivery Report (Exhibit H)
(j) *SPR/PMO:* Strategic Petroleum Reserve/Project Management Office

A.2. Definitions

(a) *Affiliate.* The term "affiliate" means associated business concerns of individuals if, directly or indirectly, (1) either one controls or can control the

other, or (2) a third party controls or can control both.

(b) *Business Day.* The term "business day" means any day except Saturday, Sunday or a U.S. Government holiday.

(c) *Contract.* The term "contract" means the contract under which DOE sells SPR petroleum. It is composed of the NS, the NA, the successful offer, and the SSPs incorporated by reference.

(d) *Contracting Officer.* The term "Contracting Officer" means the person executing sales contracts on behalf of the Government, and any other Government employee properly designated as Contracting Officer. The term includes the authorized representative of a Contracting Officer acting within the limits of his authority.

(e) *Government.* The term "Government", unless otherwise indicated in the text, means the United States Government.

(f) *Head of the Contracting Activity.* The term "Head of the Contracting Activity" means Project Manager, Strategic Petroleum Reserve Project Management Office.

(g) *Notice of Acceptance (NA).* The term "Notice of Acceptance" means the document that is sent by DOE to accept the purchaser's offer to create a contract.

(h) *Notification of Apparently Successful Offeror (ASO).* The term "notification of apparently successful offeror" means the notice, written or oral, by the Contracting Officer to an offeror that it will be awarded a contract if it is determined to be responsible.

(i) *Notice of Sale (NS).* The term "Notice of Sale" means the document announcing the sale of SPR petroleum, the amount, characteristics and location of the petroleum being sold, the delivery period and the procedures for submitting offers. The NS will specify what contractual provisions and financial and performance responsibility measures are applicable to that particular sale of petroleum and provide other pertinent information. (See Exhibit B, Sample Notice of Sale)

(j) *Offeror.* The term "offeror" means any person or entity (including a government agency) that submits an offer in response to a NS.

(k) *Petroleum.* The term "petroleum" means crude oil, residual fuel oil, or any refined product (including any natural gas liquid, and any natural gas liquid product) owned or contracted for by DOE and in storage in any permanent SPR facility, temporarily stored in other storage facilities, or in transit to such facilities (including petroleum under contract but not yet delivered to a loading terminal).

(l) *Project Management Office (SPR/PMO).* The term "Project Management Office" means the DOE personnel and DOE contractors located in New Orleans, Louisiana responsible for the operation of the SPR.

(m) *Purchaser.* The term "purchaser" means any person or entity (including a government agency) that enters into a contract with DOE to purchase SPR petroleum.

(n) *Standard Sales Provisions (SSPs).* The term "Standard Sales Provisions" means this set of terms and conditions of sale applicable to price competitive sales of SPR petroleum. These SSPs constitute the "standard sales agreement" referenced in the Strategic Petroleum Reserve "Drawdown" (Distribution) Plan, Amendment No. 4 (December 1, 1982, DOE/EP 0073) to the SPR Plan.

(o) *Strategic Petroleum Reserve (SPR).* The term "Strategic Petroleum Reserve" means that DOE program established by title I, part B of the Energy Policy and Conservation Act, 42 U.S.C. 6201, *et seq.*

(p) *Vessel.* The term "vessel" means a tankship, an integrated tug-barge (ITB) system, a self-propelled barge, or other barge.

A.3 Standard Sales Provisions

(a) These SSPs contain pre-sale information, sales solicitation provisions, and sales contract clauses setting forth terms and conditions of sale, including purchaser financial and performance responsibility measures, or descriptions thereof, which may be applicable to price competitive sales of petroleum from the SPR in accordance with the SPR Sales Rule, 10 CFR part 625. The NS will specify which of these provisions shall apply to a particular sale of such petroleum, and it may specify any revisions therein and any additional provisions which shall be applicable to that sale. (See Exhibit B, Sample Notice of Sale)

(b) All offerors must, as part of their offers for SPR petroleum in response to a NS, agree without exception to all sales provisions of that NS. The Government will not award a contract to an offeror that has failed to so agree. Offerors shall indicate their agreement by signing the Sales Offer Form (Exhibit A) or an offer form printed out by a computerized system from a diskette provided by the Government.

A.4 Periodic Revisions of the Standard Sales Provisions

DOE will review the SSPs periodically and republish them in the **Federal Register**, with any revisions. When a NS is issued, it will cite the **Federal Register** and the Code of Federal Regulations (if any) in which the latest version of the SSPs was published. Offerors are cautioned that the Code of Federal Regulations may not contain the latest version of the SSPs published in the **Federal Register**. Interested persons may obtain a copy of the current SSPs by writing to the address set forth in Provision No. A.5.

A.5 Sales Offerors' Mailing List

(a) The SPR/PMO will maintain a list of those potential offerors that wish to receive a NS whenever one is issued. In order to assure that prospective offerors will receive the NS or offer forms in a timely fashion, all potential offerors are encouraged to submit the information in (d) as soon as possible. A NS may be issued with a week or less allowed for the receipt of offers. While DOE will use its best efforts to timely supply copies of the NS to persons not on the list who request the NS at the time an SPR petroleum sale is announced, this may not always be feasible in light of the short amount of time available before offers must be received.

(b) Any firm or individual may request to be on the list by sending the following information by letter, telex, telephone or facsimile to: U.S. Department of Energy, Strategic Petroleum Reserve, Project Management Office, Acquisition and Sales Division, Mail Stop FE–4451, 900 Commerce Road East, New Orleans, Louisiana 70123. Telephone Number (504) 734–4660; Telex 8109516267 CHODT; Facsimile (504) 734–4947.

The envelope should be marked "SPR Sales Offerors' Mailing List."

(c) Copies of the SSPs and the NS, when one is issued, may also be obtained from this address.

(d) A request to be placed on the mailing list should include the following information:

Name of firm
Mailing address (Street and P.O. Box)
City, State, Zip Code
Name of authorized agent and alternate authorized agent
Telephone numbers for agent and alternate including area code
Agent address, if different from firm represented
Telex number/code
Telephone number for facsimile transmission, including area code
Telephone number for verification of message receipt, including area code
Dun's number

As DOE may use express mail, which cannot be delivered to a Post Office Box, failure to provide a street address could result in untimely receipt of the NS and will be at the offeror's risk.

A.6 Publicizing the Notice of Sale

(a) The NS will be sent to names on the Sales Offerors' Mailing List

referenced in Provision No. A.5. Interested persons may send a representative to the address in Provision No. A.5 to obtain a copy of the NS.

(b) In addition to those on the Sales Offerors' Mailing List, the NS will also be sent to anyone requesting it when a sale is announced. Firms may request the NS by telephone or in writing (letter, telex or facsimile) to the telephone number or address in Provision No. A.5 above.

(c) A DOE press release, which will include the salient features of the NS, will be made available to all news agencies.

(d) At the option of the Contracting Officer, advertisements may be placed in publications likely to reach interested parties. The advertisements will contain the salient features of the NS and a name and telephone number at the SPR/PMO to call for further information.

A.7 Penalty for False Statements in Offers to Buy SPR Petroleum

A penalty for making false statements is imposed in the False Statements Act, 18 U.S.C. 1001, which provides:

Whoever, in any matter within the jurisdiction of any department or agency of the United States knowingly and willfully falsifies, conceals or covers up by any trick, scheme, or device a material fact, or makes any false, fictitious or fraudulent statements or representations, or makes or uses any false writing or document knowing the same to contain any false, fictitious or fraudulent statement or entry, shall be fined not more than $10,000 or imprisoned not more than 5 years, or both.

Section B—Sales Solicitation Provisions

B.1 Requirements for a Valid Offer—Caution to Offerors

A valid offer to purchase SPR petroleum must meet the following conditions:

(a) The offer guarantee (see Provision No. B.11) must be received no later than the time set for the receipt of offers;

(b) The offer must include a completed Sales Offer Form, i.e., Exhibit A or other form generated by a personal computer disk supplied by DOE for submitting offers, and signed Standard Form 33 (Exhibit C) or other forms as specified in the NS;

(c) The offer must be received no later than the time set for receipt of offers;

(d) Any amendments to the NS that explicitly require acknowledgment of receipt must be properly acknowledged as provided for on Exhibit C; and

(e) The offeror must agree without exception to all provisions of the SSPs that the NS makes applicable to a particular sale, as well as to all provisions in the NS.

B.2 Price Indexing

The Government, at its discretion, may make use of a price indexing mechanism to effect contract price adjustments based on petroleum market conditions, e.g., crude oil market price changes between the times of offer price submissions and physical deliveries. The NS will set forth the provisions applicable to any such mechanism.

B.3 Certification of Independent Price Determination

(a) The offeror certifies that:

(1) The prices in this offer have been arrived at independently, without, for the purposes of restricting competition, any consultation, communication, or agreement with any other offeror or competitor relating to: (i) those prices; (ii) the intention to submit an offer; or (iii) the methods or factors used to calculate the prices offered.

(2) The prices in this offer have not been and will not be knowingly disclosed by the offeror, directly or indirectly, to any other offeror or to any competitor before the time set for receipt of offers, unless otherwise required by law; and

(3) No attempt has been made or will be made by the offeror to induce any other concern to submit or not to submit an offer for the purpose of restricting competition.

(b) Each signature on the offer is considered to be a certification by the signatory that the signatory:

(1) Is the person within the offeror's organization responsible for determining the prices being offered, and that the signatory has not participated, and will not participate, in any action contrary to (a)(1) through (a)(3) above; or

(2) (i) Has been authorized in writing to act as agent for the persons responsible for such decision in certifying that such persons have not participated, and will not participate, in any action contrary to (a)(1) through (a)(3) above; (ii) as their agent does hereby so certify; and (iii) as their agent has not participated, and will not participate, in any action contrary to (a)(1) through (a)(3) above.

(c) An offer will not be considered for award where (a)(1), (a)(3), or (b) above has been deleted or modified. If the offeror deletes or modifies (a)(2) above, the offeror must furnish with the offer a signed statement setting forth in detail the circumstances of the disclosure.

B.4 Requirements for Vessels—Caution to Offerors

(a) The "Jones Act", 46 U.S.C. 883, prohibits the transportation of any merchandise, including SPR petroleum, by water or land and water, on penalty of forfeiture thereof, between points within the United States (including Puerto Rico, but excluding the Virgin Islands) in vessels other than vessels built in and documented under laws of the United States, and owned by United States citizens, unless the prohibition has been waived by the Secretary of Treasury. Further, certain U.S.-flag vessels built with Construction Differential Subsidies (CDS) are precluded by Section 506 of the Merchant Marine Act of 1936 (46 U.S.C. 1156) from participating in U.S. coastwise trade, unless such prohibition has been waived by the Secretary of Transportation, the waiver being limited to a maximum of 6 months in any given year. CDS vessels may also receive Operating Differential Subsidies, requiring separate permission from the Secretary of Transportation for domestic operation, under Section 805(a) of the same statute. The NS will advise offerors of any general waivers allowing use of non-coastwise qualified vessels or vessels built with Construction Differential Subsidies for a particular sale of SPR petroleum. If there is no general waiver, purchasers may request waivers in accordance with Provision No. C.7, but remain obligated to complete performance under this contract regardless of the outcome of that waiver process.

(b) The Department of Transportation's interim rule concerning Reception Facility Requirements for Waste Materials Retained on Board (33 CFR parts 151 and 158) implements the reception facility requirements of the International Convention for the Prevention of Pollution from Ships, 1973, as modified by the 1978 Protocol relating thereto (MARPOL 73/78). This rule prohibits any oceangoing tankship, required to retain oil or oily mixtures on-board while at sea, from entering any port or terminal unless the port or terminal has a valid Certificate of Adequacy as to its oily waste reception facilities. SPR marine terminals (see Exhibit E, SPR Delivery Point Data) have Certificates of Adequacy and reception facilities for vessel sludge and oily bilge water wastes, all costs for which will be borne by the vessel. The terminals, however, may not have reception facilities for oily ballast. Accordingly, tankships without segregated ballast systems will be required to make arrangements for and

be responsible for all costs associated with appropriate disposal of such ballast, or they will be denied permission to load SPR petroleum at terminals that lack reception facilities for oily ballast.

(c) By submission of an offer, the offeror certifies that it will comply with the "Jones Act" and all applicable ballast disposal requirements.

B.5 "Superfund" Tax on SPR Petroleum—Caution to Offerors

(a) Sections 4611 and 4612 of the Internal Revenue Code, which imposed a tax on domestic and imported petroleum to support the Hazardous Substance Response Fund (the "Superfund"), were revised by the Superfund Amendments and Reauthorization Act of 1986, Public Law 99–499; and the Omnibus Budget Reconciliation Act of 1986, Public Law 99–509; the Steel Trade Liberalization Program Implementation Act, Public Law 101–221; and the Omnibus Budget Reconciliation Act of 1989, Public Law 101–239. As amended, these sections impose taxes to finance the Hazardous Substance Superfund and the Oil Spill Liability Trust Fund ("Trust Fund").

(b) Section 4611 imposes taxes on domestic crude oil and on imported crude oil to support the Superfund and the Trust Fund. The taxes are imposed on (1) crude oil received at a United States refinery and (2) petroleum products (including crude oil) entered into the United States for consumption, use, or warehousing. Section 4612 provides that no tax is imposed if it is established that a prior tax imposed by section 4611 has already been paid with respect to a barrel of oil. Additionally, as determined by the Secretary of Treasury, the Hazardous Substance Superfund tax and the Oil Spill Liability Trust Fund tax may not be imposed during certain periods when the unobligated balances of the funds reach particular statutorily-prescribed levels.

(c) DOE has already paid the Superfund and Trust Fund taxes on some of the oil imported and stored in the SPR. However, no Superfund or Trust Fund tax has been paid on imported oil stored prior to the effective dates of these Acts or on any domestic oil stored in the SPR. Because domestic and imported crude oil for which no taxes have been paid and crude oils for which Superfund and Trust Fund taxes have been paid have been commingled in the SPR, upon drawdown of the SPR, the NS will advise purchasers of the tax liability.

B.6 Export Limitations and Licensing—Caution to Offerors

(a) Offerors for SPR petroleum are put on notice that SPR crude oils subject to different export control laws have been commingled in storage. Export of SPR crude oil is subject to U.S. export control laws, the provisions of which differ depending on the source of the crude oil and the nature of the proposed export transaction. For example, imported crude oil stored in the SPR may be exported pursuant to applicable Department of Commerce "Short Supply Controls," 15 CFR part 777, if: the export is part of a transaction resulting in the importation of refined products of a quantity and quality not less than would be derived from domestic refining; the products are to be sold at prices no higher than the lowest prices at which they could have been sold by the nearest capable U.S. refinery; and for compelling economic or technological reasons beyond the exporter's control, the crude oil cannot reasonably be processed in the U.S. (15 CFR 777.6(d)(1)(vii)). However, there are somewhat more stringent, independent statutory tests to be met as preconditions to the export of certain other crude oils stored in the SPR, including Alaskan North Slope (ANS) and Naval Petroleum Reserves (NPR) oil. See 7(d) of the Export Administration Act of 1979, 50 U.S.C. App. 2406(d) (ANS oil) and 10 U.S.C. 7430(e) (NPR oil); see also 30 U.S.C. 185(u) (oil shipped across a Mineral Lands Leasing Act Section 28(u) right-of-way) and 43 U.S.C. 1354(a) (OCS oil).

(b) The Department of Commerce "Short Supply Controls" also contain special export provisions for the export of crude oil, including certain Alaskan crude oil, to and for consumption in Canada. See 15 CFR 777.6(d)(1) (viii), (x) and 777(f).

(c) Section 10 of Public Law 101–383 (42 U.S.C. 6241C) provides the President discretionary authority to waive the export control laws with regard to SPR crude oil for the purpose of obtaining refined product for the U.S. market.

(d) By submission of an offer, the offeror certifies that it will comply with any applicable U.S. export control laws.

B.7 Issuance of the Notice of Sale

In the event petroleum is sold from the SPR, DOE will issue a NS containing all of the pertinent information necessary for the offeror to prepare a priced offer. A NS may be issued with a week or less allowed for the receipt of offers. Offerors are expected to examine the complete NS document, and to become familiar with the SSPs cited therein. Failure to do so will be at the offeror's risk.

B.8 Submission of Offers and Modification of Previously Submitted Offers

(a) Unless otherwise provided in the NS, offers must be submitted to the SPR/PMO in New Orleans, Louisiana, by mail or hand-delivery. Any direct cash deposits as offer guarantees shall be sent by wire in accordance with Provision No. C.26.

(b) Unless otherwise provided in the NS, offers may be modified or withdrawn by hand delivery, mail, telegram, or telex, provided that the hand delivery, mail, telegram, or telex is received at the designated office prior to the time specified for receipt of offers.

(c) Envelopes containing offers and any material related to offers shall be plainly marked on the outside; "RE: NS # ____ FOR SALE OF PETROLEUM FROM STRATEGIC PETROLEUM RESERVE. OFFERS ARE DUE (insert time of opening), LOCAL NEW ORLEANS, LA TIME ON (insert date of opening). MAIL ROOM MUST MARK DATE AND TIME OF RECEIPT ON FACE OF THE ENVELOPE." Envelopes containing modified offers or any material related to supplements or modifications of offers, shall be plainly marked on the outside: "RE: NS # ____ FOR SALE OF PETROLEUM FROM STRATEGIC PETROLEUM RESERVE. OFFER MODIFICATION. MAIL ROOM MUST MARK DATE AND TIME OF RECEIPT ON FACE OF THE ENVELOPE."

(d) All envelopes shall be marked with the full name and return address of the offeror.

(e) Offers being sent by mail and modifications being sent by hand delivery, mail, telegram, or telex must be received at the address specified in the NS.

(f) Handcarried offers brought during normal business hours on the day set for receipt of offers, or any day prior to that day, shall be taken by the offeror to the place specified in the NS. This includes mail being delivered by a delivery service.

(g) Public opening of offers is not anticipated unless otherwise indicated in the NS. DOE will not release to the general public the identities of the offerors, or their offer quantities and prices, until the Apparently Successful Offerors have been determined. DOE will inform simultaneously all offerors and other interested parties of the successful and unsuccessful offerors and their offer data by means of public "offer posting." The offer posting will

normally occur within a week of receipt of offers and will provide all interested parties access to offer data as well as any DOE changes in the petroleum quantities or quality to be sold. DOE will announce the date, time, and location of the offer posting as soon as practicable.

B.9 Acknowledgment of Amendments to a Notice of Sale

When an amendment to a NS requires acknowledgment of receipt, receipt by an offeror must be acknowledged either by (a) signing and returning the amendment; (b) identifying the amendment number and date in the space provided for this purpose on Standard Form 33 (Exhibit C); or (c) letter, telegram, telex or facsimile sent to the address specified in the NS. Such acknowledgment must be received prior to the time specified for receipt of offers.

B.10 Late Offers, Modifications of Offers, and Withdrawal of Offers

(a) Any offer received at the office designated in the NS after the time specified for receipt will be considered only if it is received before award is made and only under the following conditions:

(1) It was sent by registered or certified mail not later than the fifth calendar day prior to the date specified for the receipt of offers (e.g., an offer submitted in response to a NS requiring receipt of offers by the 20th of the month must have been mailed by the 15th or earlier); or,

(2) It was sent by mail, telegram or telex if authorized, and it is determined by the Contracting Officer that the late receipt was due solely to mishandling by the SPR/PMO after receipt at the address specified in the NS.

(b) Any modification or withdrawal of an offer is subject to the same conditions as in (a) above, except that it shall be mailed not less than the third calendar day prior to the date specified for receipt of offers. An offer may also be withdrawn in person by an offeror or its authorized representative, provided the representative's identity is made known and the representative signs a receipt for the offer, but only if the withdrawal is made prior to the time set for receipt of offers.

(c) The only acceptable evidence to establish:

(1) The date of mailing of a late offer, modification, or withdrawal sent either by registered or certified mail is the U.S. Postal Service postmark on either (i) the envelope or wrapper, or (ii) the original receipt from the U.S. Postal Service. If neither postmark shows a legible date, the offer, modification or withdrawal shall be deemed to have been mailed late. Postmark means a printed, stamped, or otherwise placed impression, exclusive of a postage meter machine impression, that is readily identifiable without further action as having been supplied and affixed on the date of mailing by employees of the U.S. Postal Service. Therefore, offerors should request the postal clerk to place a hand cancellation "bull's-eye" postmark on both the receipt and the envelope or wrapper.

(2) The time of receipt at the address specified in the NS is the time/date stamp at such address on the offer's wrapper or other documentary evidence of receipt maintained at the place of receipt.

(d) Notwithstanding (a) and (b) of this provision, a late modification of an otherwise successful offer that makes its terms more favorable to the Government will be considered at any time it is received and may be accepted.

B.11 Offer Guarantee

(a) Each offeror must submit an acceptable offer guarantee for each offer submitted. Each offer guarantee must be received at the place specified for receipt of offers no later than the time and date set for receipt of offers.

(b) An offeror's failure to submit a timely, acceptable guarantee will result in rejection of its offer.

(c) The amount of each offer guarantee is $10 million or 5 percent of the maximum potential contract amount, whichever is less. The maximum potential contract amount is the sum of the products determined by multiplying the offer's maximum purchase quantity for each master line item, times the highest offer prices that the offeror would have to pay for that master line item if the offer were to be successful. To assist in this calculation, instructions and a worksheet are available at Exhibit J. Submission of the worksheet is not desired.

(d) Each offeror must submit one of the following types of offer guarantees with each offer:

(1) A certified check payable to the U.S. Department of Energy, drawn on a U.S. Bank;

(2) A cash wire deposit to the account of the U.S. Treasury in accordance with Provision No. C.26, all wire deposit costs to be borne by the offeror; or

(3) A standby letter of credit from a U.S. depository institution conforming without exception to the contents required by Exhibit F, Offer Standby Letter of Credit, all letter of credit costs to be borne by the offeror. If the standby letter of credit is from a single depository institution (hereinafter referred to as "bank"), including a branch or an agency of a foreign bank, that bank must maintain an account with any Federal Reserve Bank or Branch (Fed) and be a participant in the Fed's on-line FEDWIRE funds transfer system. If the standby letter of credit is issued by a syndicate of banks, only the institution acting as agent for the syndicate and responsible for honoring the drafts drawn under the letter of credit must maintain a Fed account and be a participant in the on-line FEDWIRE system. DOE reserves the right to request evidence that the bank official signing the letter of credit is authorized to do so, such as a confirming telex, telephone call, or letter from another bank official, or other appropriate evidence as determined by the Contracting Officer.

(e) If the offeror elects to make an offer guarantee by cash wire deposit, the Sales Offer Form shall be annotated with the statement "Offer guarantee made by cash wire deposit." The amount wired shall be annotated on the bottom of the first page of the offer form. In addition, the information identified in Exhibit I, Instruction Guide for Return of Offer Guarantees by Electronic Transfer or Treasury Check, shall be provided with the offer.

(f) If the offeror or bank forwards the letter of credit separately from the offer, the envelope shall clearly be marked "Offer Standby Letter of Credit (Name of Company)" and also marked in accordance with Provision No. B.8(c). Offerors are cautioned that if they provide more than one Offer Standby Letter of Credit for multiple offers and, due to the absence of clear information from the offeror, the Government is unable to identify which Letter of Credit applies to which offer, the Contracting Officer in his sole discretion may assign the Letters of Credit to specific offers.

(g) The offeror shall be liable for any amount lost by DOE due to the difference between the offer and the resale price, and for any additional resale costs incurred by DOE in the event that the offeror:

(1) Withdraws its offer within 10 days following the time set for receipt of offers;

(2) Withdraws its offer after having agreed to extend its acceptance period; or

(3) Having received a notification of ASO, fails to furnish an acceptable payment and performance guarantee within the time limit specified by the Contracting Officer.

The offer guarantee shall be used toward offsetting such price difference or additional resale costs. Use of the offer guarantee for such recovery shall

not preclude recovery by DOE of damages in excess of the amount of the offer guarantee caused by such failure of the offeror.

(h) Letters of credit furnished as offer guarantees must be valid for at least 60 calendar days after the date set for the receipt of offers.

(i) Offer guarantees (except letters of credit) will be returned to an unsuccessful offeror 5 business days after expiration of the offeror's acceptance period, except as provided in (j) below, and to a successful offeror upon receipt of a satisfactory payment and performance guarantee. All certified checks will be deposited by the Government. Cash offer guarantees (wire transfer or deposited certified check) will be subsequently returned to unsuccessful offerors via electronic transfer or Treasury check. To facilitate this, offerors submitting guarantees by certified check or wire transfer must provide with their offer the information as delineated in Exhibit I. Letters of credit will be returned only upon request. Where the offer guarantee was a cash wire deposit or a certified check, a successful offeror may apply it toward advance payment.

(j) If an offeror defaults on its offer, DOE will hold the offer guarantee so that damages can be assessed against it.

B.12 Explanation Requests From Offerors

Offerors may request explanations regarding meaning or interpretation of the NS from the individual at the telephone number indicated in the NS. On complex and/or significant questions, DOE reserves the right to have the offeror put the question in writing; explanation or instructions regarding these questions will be given as an amendment to the NS.

B.13 Currency for Offers

Prices shall be stated and invoices shall be paid in U.S. dollars.

B.14 Language of Offers and Contracts

All offers in response to the NS and all modifications of offers shall be in English. All correspondence between offerors or purchasers and DOE shall be in English.

B.15 Proprietary Data

If any information submitted in connection with a sale is considered proprietary, that information should be so marked, and an explanation provided as to the reason such data should be considered proprietary. Any final decision as to whether the material so marked is proprietary will be made by DOE. DOE's Freedom of Information Act regulations governing the release of proprietary data shall apply.

B.16 SPR Crude Oil Streams and Delivery Points

(a) The geographical locations of the terminals and docks interconnected with permanent SPR storage locations, the SPR crude oil streams available at each location and the delivery points for those streams are as follows, (See also Exhibit D, SPR Crude Oil Stream Characteristics, and Exhibit E, SPR Delivery Point Data):

Geographical location	Delivery points	Crude oil stream
Freeport, Texas	Phillips Terminal or Phillips Terminal No. 2 Docks.	SPR Bryan Mound Sweet, SPR Bryan Mound Sour, SPR Bryan Mound Maya.
Texas City, Texas.	ARCO Terminal or ARCO Docks.	SPR Bryan Mound Sweet, SPR Bryan Mound Sour.
Nederland, Texas.	Sun Terminal or Sun Docks.	SPR West Hackberry Sweet, SPR West Hackberry Sour.
Lake Charles, Louisiana.	Texaco 22-Inch/ DOE Lake Charles Pipeline Connection.	SPR West Hackberry Sweet, SPR West Hackberry Sour.
St. James, Louisiana.	Capline Terminal, LOCAP Terminal or DOE St. James Terminal Docks.	SPR Weeks Island Sour, SPR Bayou Choctaw Sweet, SPR Bayou Choctaw Sour.

(b) The NS may change delivery points and it may also include additional terminals, temporary storage facilities or systems utilized in connection with petroleum in transit to the SPR. Alternatively, DOE or its contractor may provide the transportation to the purchaser's facility, for example, when the petroleum is in transit to the SPR at time of sale.

(c) The NS may contain additional information supplementing Exhibit E, SPR Delivery Point Data.

B.17 Notice of Sale Line Item Schedule—Petroleum Quantity, Quality, and Delivery Method

(a) Unless the NS provides otherwise, the possible master line items (MLI) and delivery line items (DLI) that may be offered are as provided in Exhibit A, SPR Sales Offer Form. Currently, there are eight MLIs in Exhibit A, one for each of the eight crude oil streams that the SPR has in storage. The NS may offer fewer than the eight possible MLIs.

(b) Each MLI contains several DLIs, each of which specifies an available delivery method and the nominal delivery period. Offerors are cautioned that the NS may alter the period of time covered by each DLI. This is most likely to occur in the first sales period of a drawdown if the period of sale does not correspond to a calendar month.

(1) DLI–A covers petroleum to be transported by pipeline, either common carrier or local. The nominal delivery period is one month.

(2) DLI–B, DLI–C and DLI–D cover petroleum to be transported by tankships: DLI–B, covering tankships to be loaded from the 1st through the 10th of the month; DLI–C, tankships to be loaded from the 11th through the 20th; and DLI–D, tankships to be loaded from the 21st through the last day of the month.

(3) DLI–E, DLI–F and DLI–G cover petroleum to be transported by barges (Caution: These DLIs are currently only applicable to deliveries of West Hackberry Sweet and Sour crude oil streams from Sun Docks): DLI–E, covering barges to be loaded from the 1st through the 10th of the month; DLI–F, barges to be loaded from the 11th through the 20th; and DLI–G, barges to be loaded from the 21st through the last day of the month.

(4) Where the storage site is connected to more than one terminal or pipeline, additional DLIs will be offered. The additional DLIs will include DLI–H, covering petroleum to be transported by pipeline over the period of a month; DLI–I, covering tankships to be loaded from the 1st through the 10th; DLI–J, tankships to be loaded from the 11th through the 20th; and DLI–K, tankships to be loaded from the 21st through the last day of the month. The Notice of Sale will specify which DLIs are offered on each MLI.

(c) The NS will state the total estimated number of barrels to be sold on each MLI. An offeror may offer to buy all or part of the petroleum offered on an MLI. In making awards, the Contracting Officer shall attempt to achieve award of the exact quantities offered by the NS, but may sell a quantity of petroleum in excess of the quantity offered for sale on a particular MLI in order to match the DLI offers received. In addition, the Contracting Officer may reduce the MLI quantity available for award by any amount and reject otherwise acceptable offers, if he determines, in his sole discretion after consideration of the offers received on all of the MLIs, that award of those quantities is not in the best interest of

the Government because the prices offered for them are not reasonable, or that, in light of market conditions after offers are received, a lesser quantity than that offered should be sold.

(d) The NS will specify a minimum contract quantity for each DLI. To be responsive, an offer on a DLI must be for at least that quantity.

(e) The NS will specify the maximum quantity that could be sold on each of the DLIs. The maximum quantity is not an indication of the amount of petroleum that, in fact, will be sold on that DLI. Rather, it represents DOE's best estimate of the maximum amount of the particular SPR crude oil stream that can be moved by that transportation system over the delivery period. The total DOE estimated DLI maximums may exceed the total number of barrels to be sold on that MLI, as the NS DLI estimates represent estimated transportation capacity, not the amount of petroleum offered for sale. In order to avoid a competitive advantage for local pipeline owners, e.g., if there are only one or two likely offerors, the NS may omit a pipeline DLI. If this occurs, offerors may bid against vessel DLIs and, if successful, request a contract modification under Provision No. C.6, to permit delivery of the awarded oil to a pipeline.

(f) The NS will not specify what portion of the petroleum that DOE offers on a MLI will, in fact, be sold on any given DLI. Rather, the highest priced offers received on the MLI will determine the DLIs against which the offered petroleum is sold.

(g) DOE will not sell petroleum on a DLI in excess of the DLI maximum; however, DOE reserves the right to revise its estimates at any time and to award or modify contracts in accordance with its revised estimates. Offerors are cautioned that: DOE cannot guarantee that such transportation capacity is available; offerors should undertake their own analyses of available transportation capacity; and each purchaser is wholly responsible for arranging all transportation other than terminal arrangements at the terminals listed in Provision No. B.16, which shall be made in accordance with Provision No. C.5. A purchaser against one DLI cannot change a transportation mode without prior written permission from DOE, although such permission will be given whenever possible, in accordance with Provision No. C.6.

(h) Exhibit D, SPR Crude Oil Stream Characteristics, contains nominal characteristics for each SPR crude oil stream. Prospective offerors are cautioned that these data will likely change as more crude oil is stored in the SPR. The NS will provide, to the maximum extent practicable, the latest data on each stream offered.

B.18 Line Item Information To Be Provided in the Offer

(a) Each offeror, if determined to be an ASO on a DLI, agrees to enter into a contract under the terms of its offer for the purchase of petroleum in the offer and to take delivery of that petroleum (plus or minus 10 percent as provided for in Provision No. C.20) in accordance with the terms of that contract.

(b) An offeror may submit an offer which is for more than one MLI. However, offerors are cautioned that alternate offers on different MLIs are not permitted. For example, an offeror may offer to purchase 1,000,000 barrels of SPR West Hackberry Sweet and 1,000,000 barrels of SPR West Hackberry Sour, but may not offer to purchase, in the alternative, either 1,000,000 barrels of sweet or 1,000,000 barrels of sour.

(c) An offeror may submit multiple offers. However, separate offer forms and offer guarantees must be submitted and each offer will be evaluated on an individual basis.

(d) The following information will be provided to DOE by the offeror on the form in Exhibit A or other forms as required by the NS:

(1) MLI quantity. ("MAXQ" on the Exhibit A offer form) The offeror shall state the maximum quantity of each crude oil stream that the offeror is willing to buy.

(2) DLI quantity. ("DESQ") The offer shall state the number of barrels that the offeror will accept on each DLI, i.e., by the delivery mode and during the delivery period specified. The quantity stated on a single DLI shall not exceed the MAXQ for the MLI. The offeror shall designate a quantity on at least one DLI for the MLI, but may designate quantities on more than one DLI. If the offeror is willing to accept alternate DLIs, the total of its designated DLI quantities would exceed its maximum MLI quantity; otherwise, the total of its designated DLI quantities should equal its maximum MLI quantity.

(3) DLI unit price ("UP$$") and total price. The offer shall state the price per barrel for each DLI for which the offeror has designated a desired quantity, as well as the total price (quantity times unit price). Where offers have indicated quantities on more than one DLI with a different price on each, DOE will award the highest priced DLI first. If the offeror has the same price for two or more DLIs, it may indicate its first choice, second choice, etc., for award of those items; if the offeror does not indicate a preference, or indicates the same preference for more than one DLI, DOE may select the DLIs to be awarded at its discretion. Prices may be stated in hundredths of a cent ($0.0001). DOE shall drop from the offer and not consider any numbers of less than one one-hundredth of a cent.

(4) Minimum DLI quantity acceptable. ("MINQ") The offeror must choose whether to accept only the stated DLI quantity (DESQ) or, in the alternative, to accept any quantity awarded between the offer's stated DLI quantity and the minimum contract quantity for the DLI (indicated by the "N" and "Y" blocks respectively under "MINQ" on the offer form). However, DOE will award less than the DESQ only if the quantity available to be awarded is less than the DESQ. If the offer fails to indicate the offeror's choice, the offer will be evaluated as though the offeror has indicated willingness to accept the minimum contract quantity.

(5) Any other data required by the NS.

B.19 Mistake in Offer

(a) After opening and recording offers, the Contracting Officer shall examine all offers for mistakes. If the Contracting Officer discovers any price discrepancies or quantity discrepancies, he may obtain from the offeror oral or written verification of the offer actually intended, but in any event, he shall proceed with offer evaluation applying the following procedures:

(1) Price discrepancy: An offer for a DLI must contain the unit price per barrel being offered, the desired quantity of barrels to which the unit price applies, and an extension price which is the total of the quantity desired multiplied by the unit price offered. If there is a discrepancy between the unit price and the extension price, the unit price will govern and be recorded as the offer, unless it is clearly apparent on the face of the offer that there has been a clerical error, in which case the Contracting Officer may correct the offer.

(2) Quantity discrepancy: In case of conflict between the maximum MLI quantity and the stated DLI quantities (for example, if a single stated DLI quantity exceeds the corresponding maximum MLI quantity), the lesser quantity will govern in the evaluation of the offer. In the event that the offer fails to specify a maximum MLI quantity, the offer will be evaluated as though the largest stated DLI quantity is the offer's maximum MLI quantity.

(b) In cases where the Contracting Officer has reason to believe a mistake not covered by the procedures set forth in (a) may have been made, he shall

request from the offeror a verification of the offer, calling attention to the suspected mistake. The Contracting Officer may telephone the offeror and confirm the request by telex or facsimile. The Contracting Officer may set a limit of as little as 6 hours for telephone response, with any required written documentation to be received within as little as 2 business days. If no response is received, the Contracting Officer may determine that no error exists and proceed with offer evaluation.

(c) The Head of the Contracting Activity will make administrative determinations described in (1) and (2) below if an offeror alleges a mistake after opening of offers and before award.

(1) The Head of the Contracting Activity may refuse to permit the offeror to withdraw an offer, but permit correction of the offer if clear and convincing evidence establishes both the existence of a mistake and the offer actually intended. However, if such correction would result in displacing one or more higher acceptable offers, the Head of the Contracting Activity shall not so determine unless the existence of the mistake and the offer actually intended are ascertainable substantially from the NS and offer itself.

(2) The Head of the Contracting Activity may determine that an offeror shall be permitted to withdraw an offer in whole, or in part if only part of the offer is affected, without penalty under the offer guarantee, when the offeror requests permission to do so and clear and convincing evidence establishes the existence of a mistake, but not the offer actually intended.

(d) In all cases where the offeror is allowed to make verbal corrections to the original offer, confirmation of these corrections must be received in writing within the time set by the Contracting Officer or the original offer will stand as submitted.

B.20 Evaluation of Offers

(a) The Contracting Officer will be the determining official as to whether an offer is responsive to the SSPs and the NS. DOE reserves the right to reject any or all offers and to waive minor informalities or irregularities in offers received.

(b) A minor informality or irregularity in an offer is an inconsequential defect the waiver or correction of which would not be prejudicial to other offerors. Such a defect or variation from the strict requirements of the NS is inconsequential when its significance as to price, quantity, quality or delivery is negligible.

B.21 Procedures for Evaluation of Offers

(a) Award on each DLI will be made to the responsible offerors that submit the highest priced offers responsive to the SSPs and the NS and that have provided the required payment and performance guarantee as required by Provision No. C.21.

(b) DOE will array all offers on an MLI from highest price to lowest price for award evaluation regardless of DLI. However, DOE will award against the DLIs and will not award a greater quantity on a DLI than DOE's estimate (which is subject to change at any time) of the maximum quantity that can be moved by the delivery method. Selection of the apparently successful offers involves the following steps:

(1) Any offers below the minimum acceptable price, if any minimum price has been established for the sale, will be rejected as nonresponsive.

(2) All offers on each MLI will be arrayed from highest price to lowest price.

(3) The highest priced offers will be reviewed for responsiveness to the NS.

(4) In the event the highest priced offer does not take all the petroleum available on the MLI, sequentially, the next highest priced offer will be selected until all of the petroleum offered on the MLI is awarded or there are no more acceptable offers. In the event that acceptance of an offer against an MLI or a DLI would result in the sale of more petroleum on an MLI than DOE has offered or the sale of more petroleum on a DLI than DOE estimates can be delivered by the specified delivery method, DOE will not award the full amount of the offer, but rather the remaining MLI quantity or DLI capacity, provided such portion exceeds DOE's minimum contract quantity. In the event that the quantity remaining is less than the offeror is willing to accept, but more than DOE's minimum contract quantity, the Contracting Officer shall proceed to the next highest priced offer.

(5) In the event of tied offers and an insufficient remaining quantity available on the MLI or insufficient remaining capacity on the DLI to fully award all tied offers, the Contracting Officer shall apply an objective random methodology for allocating the remaining MLI quantity or DLI capacity among the tied offers, taking into consideration the quantity the offeror is willing to accept as indicated in its offer. When making this allocation, the Contracting Officer in his sole discretion may do one or more of the following:

(i) Make an additional quantity or capacity available;

(ii) Contact an offeror to determine whether alternative delivery arrangements can be made; or

(iii) Not award all or part of the remaining quantity of petroleum.

(6) The Contracting Officer may reduce the MLI quantity available for award by any amount and reject otherwise acceptable offers if in his sole discretion he determines, after consideration of the offers received on all of the MLIs, that award of those quantities is not in the best interest of the Government because the prices offered for them are not reasonable; or if the Government determines, in light of market conditions after offers are received, to sell less than the overall quantity of SPR petroleum offered for sale.

(7) Determinations of ASO responsibility will be made by the Contracting Officer before each award. All ASOs will be notified by telephone and advised to provide to the Contracting Officer, within five business days or such other longer time as the Contracting Officer shall determine, a letter of credit (See Exhibit G, Payment and Performance Letter of Credit) or advance payment as specified in Provision No. C.21. Compliance with required payment and performance guarantees will effectively assure a finding of responsibility of offerors, except where: (i) an offeror is on either DOE's or the Federal Government's list of debarred, ineligible and suspended bidders; or (ii) evidence, with respect to an offeror, comes to the attention of the Contracting Officer of conduct or activity that represents a violation of law or regulation (including an Executive Order); or (iii) evidence is brought to the attention of the Contracting Officer of past activity or conduct of an offeror that shows a lack of integrity (including actions inimical to the welfare of the United States) or willingness to perform, so as to substantially diminish the Contracting Officer's confidence in the offeror's performance under the proposed contract.

B.22 Financial Statements and Other Information

(a) As indicated in Provision No. B.21(b)(7) above, compliance with the required payment and performance guarantee will in most instances effectively assure a finding of responsibility. Therefore, DOE does not intend to ask for financial information from all offerors. However, after receipt of offers, but prior to making award, DOE reserves the right to ask for the audited financial statements for an offeror's most recent fiscal year and

unaudited financial statements for any subsequent quarters. These financial statements must include a balance sheet and profit and loss statement for each period covered thereby. A certification by a principal accounting officer that there have been no material changes in financial condition since the date of the audited statements, and that these present the true financial condition as of the date of the offer, shall accompany the statements. If there has been a change, the amount and nature of the change must be specified and explained in the unaudited statements and a principal accounting officer shall certify that they are accurate. The Contracting Officer shall set a deadline for receipt of this information.

(b) DOE also reserves the right to require the submission of information from the offeror regarding its plans for use of the petroleum, the status of requests for export licenses, and plans for complying with the Jones Act. The Contracting Officer shall set a deadline for receipt of this information.

B.23 Resolicitation Procedures on Unsold Petroleum

(a) In the event that petroleum offered on an MLI remains unsold after evaluation of all offers, the Contracting Officer, at his option, may issue an amendment to the NS, resoliciting offers from all interested parties. DOE reserves the right to alter the MLIs and/or offer different MLIs in the resolicitation.

(b) In the event that for any reason petroleum that has been awarded or allotted for award becomes available to DOE for resale, the following procedures will apply:

(1) If priced offers remain valid in accordance with Provision No. B.24, the petroleum may go to the next highest ranked offer.

(2) If offers have expired in accordance with Provision No. B.24, the Contracting Officer at his option may offer the petroleum to the highest offeror for that MLI. The pertinent offeror may, at its option, accept or reject that petroleum at the price it originally offered. If that offeror rejects the petroleum, it may be offered to the next highest offeror. This process may continue until all the remaining petroleum has been allotted for award.

(3) If the petroleum is not then resold, the Contracting Officer may at his option proceed to amend the NS to resolicit offers for that petroleum or add the petroleum to the next sales cycle.

B.24 Offeror's Certification of Acceptance Period

(a) By submission of an offer, the offeror certifies that its priced offer will remain valid for 10 calendar days after the date set for the receipt of offers, and further that the successful line items of its offer will remain valid for an additional 30 calendar days should it receive a notification of ASO either by telephone or in writing during the initial 10-day period.

(b) By mutual agreement of DOE and the offeror, an individual offeror's acceptance period may be extended for a longer period.

B.25 Notification of Apparently Successful Offeror

The following information concerning its offer will be provided to the apparently successful offeror by DOE in the notification of ASO:

(a) Identification of SPR crude oil streams to be awarded;

(b) Total quantity to be awarded on each MLI and on each DLI;

(c) Price in U.S. dollars per barrel for each DLI;

(d) Extended total price offer for each DLI;

(e) Provisional contract number;

(f) Any other data necessary.

B.26 Contract Documents

If an offeror is successful, DOE will make award using an NA signed by the Contracting Officer. The NA will identify the items, quantities, prices and delivery method which DOE is accepting. Attached to the NA will be the NS and the successful offer. Provisions of the SSPs will be made applicable through incorporation by reference in the NS. The Contracting Officer also shall provide the purchaser with an information copy of the then-current SSPs as published in the Federal Register. DOE may accept the offeror's offer by an electronic notice, such as telegram or telex, and the contract award shall be effective upon the issue of such notice. The electronic notice will be followed by a mailing of the full documentation as described above.

B.27 Purchaser's Representative

As part of its offer, each offeror shall designate an agent as a point of contact for any telephone calls or correspondence from the Contracting Officer. Any such agent shall have a U.S. address and telephone number and must be conversant in English.

B.28 Procedures for Selling to Other U.S. Government Agencies

(a) If a U.S. Government agency submits an offer for petroleum in a price competitive sale, that offer will be arrayed for award consideration in accordance with Provision No. B.21. If a U.S. Government agency is an ASO, award and payment will be made exclusively in accordance with statutory and regulatory requirements governing transactions between agencies, and the U.S. Government agency will be responsible for complying with these requirements within the time limits set by the Contracting Officer.

(b) U.S. Government agencies are exempt from all guarantee requirements, but must make all necessary arrangements to accept delivery of and transport SPR petroleum as set out in Provision No. C.1. Failure by a U.S. Government agency to comply with any of the requirements of these SSPs shall not provide a basis for challenging a contract award to that agency.

Section C Sales Contract Provisions

C.1 Delivery of SPR Petroleum

(a) The purchaser, at its expense, shall make a necessary arrangements to accept delivery of and transport the SPR petroleum, except for terminal arrangements which shall be coordinated with the SPR/PMO. The DOE will deliver and the purchaser will accept the petroleum at delivery points listed in the NS. The purchaser also shall be responsible for meeting any delivery requirements imposed at those points including complying with the rules, regulations, and procedures contained in applicable port/terminal manuals, pipeline tariffs or other applicable documents.

(b) For petroleum in the SPR's permanent storage sites, DOE shall provide, at no cost to the purchaser, transportation by pipeline from the SPR to the supporting SPR distribution terminal facility specified for the MLI and, for vessel loadings, a safe berth and loading facilities sufficient to deliver petroleum to the vessel's permanent hose connection. The purchaser agrees to assume responsibility for, to pay for, and to indemnify and hold DOE harmless for any other costs associated with terminal, port, vessel and pipeline services necessary to receive and transport the petroleum, including but not limited to demurrage charges assessed by the terminal, ballast and oily waste reception services other than those provided by DOE or its agent, mooring and line-handling services, tank storage charges and port charges incurred in the delivery of SPR petroleum to the purchaser. The purchaser also agrees to assume responsibility for, to pay for and to indemnify and hold DOE harmless for any liability, including consequential or other damages, incurred or occasioned by the purchaser, its agent,

BEST COPY AVAILABLE

subcontractor at any tier, assignee or any subsequent purchaser, in connection with movement of petroleum sold under a contract incorporating this provision.

C.2 Compliance With the "Jones Act" and the U.S. Export Control Laws

Failure to comply with the "Jones Act," 46 U.S.C. 883, regarding use of U.S.-flag vessels in the transportation of oil between points within the United States, or with any applicable U.S. export control laws affecting the export of SPR petroleum will be considered to be a failure to comply with the terms of any contract containing these SSPs and may result in termination for default in accordance with Provision No. C.29. Purchasers who have failed to comply with the "Jones Act" or the export control laws in SPR sales may be found to be non-responsible in the evaluation of offers in subsequent sales under Provision No. B.21 of the SSPs. Those purchasers may also be subject to proceedings to make them ineligible for future awards in accordance with 10 CFR part 625.

C.3 Storage of SPR Petroleum

Continued storage of purchasers' oil in the SPR facilities after the end of the contract delivery periods is not permitted, unless specifically authorized by the Secretary of Energy and provided for in the NS. Allowing petroleum to remain in storage as the result of failure to complete delivery arrangements may result in assessment of liquidated damages under Provision Nos. C.29 through C.31 unless such failure is excused pursuant to those provisions.

C.4 Environmental Compliance

(a) Vessels to be used for the transportation of petroleum purchased from the SPR will comply with all applicable rules and regulations, including The Ports and Waterways Safety Act, The Federal Water Pollution Control Act of 1972, The Oil Pollution Control Act of 1961, and other applicable statutes, rules and regulations, including the following: Parts 151, 153, 157, 158 and 159 of title 33, and parts 30–38 and 547 of title 46 of the Code of Federal Regulations.

(b) In the event tankships are used in the performance of this contract, the purchaser will employ only tankships whose owners are parties to the Tanker Owners Voluntary Agreement Concerning Liability for Oil Pollution (TOVALOP) or who carry equivalent, as determined by the Contracting Officer, liability coverage.

(c) A purchaser using ocean-going tankships or barges for carriage of SPR petroleum must warrant that it has in place the maximum available amount of standard oil pollution insurance coverage through, as applicable, the International Group of Protection and Indemnity Clubs, Water Quality Insurance Syndicate, and membership with the Contract Regarding the Interim Supplement to Tanker Liability for Oil Pollution (CRISTAL), or equivalent coverage. The purchaser must further warrant that such coverage will remain in effect for the duration of each voyage involving the carriage of SPR petroleum.

(d) All petroleum transfer operations in performance of the contract will be in accordance with the guidelines detailed in the International Oil Tanker Safety Guide, U.S. Coast Guard Regulations, and the "Ship to Ship Transfer Guide" of the International Chamber of Shipping Oil Companies International Marine Forum.

(e) Failure of the purchaser or the purchaser's subcontractors to comply with all applicable rules and regulations in the transportation of SPR petroleum will be considered a failure to comply with the terms of any contract containing these SSPs, and may result in termination for default, unless, in accordance with Provision No. C.29, such failure was beyond the control and without the fault or negligence of the purchaser, its affiliates, or subcontractors.

C.5 Delivery and Transportation Scheduling

(a) Unless otherwise instructed in the notification of ASO, each purchaser shall submit a proposed vessel lifting program and/or pipeline delivery schedule to the SPR/PMO by hand-delivery, mail, telex, or facsimile, no later than the fifteenth day prior to the earliest delivery date offered by the NS. The vessel lifting program shall specify the requested three-day loading window for each tanker and the quantity to be lifted. The pipeline schedule will specify the dates for which deliveries are to be tendered to the pipeline and the quantity to be tendered for each date. In the event conflicting requests are received, preference will be given to such requests in descending order, the highest offered price first. The SPR/PMO will respond to each purchaser no later than the tenth day prior to the start of deliveries, either confirming the schedule as originally submitted or proposing alterations. The purchaser is deemed to have received a mailed notice on the second day after its dispatch and a telex, facsimile or express mail notice on the day after dispatch. The purchaser shall be deemed to have agreed to those alterations unless the purchaser requests the SPR/PMO to reconsider within two days after receipt of such alterations. The SPR/PMO will use its best efforts to accommodate such requests, but its decision following any such reconsideration shall be final and binding.

(b) Telex and facsimile telephone numbers, as well as the address to which mailed and hand-carried proposed schedules should be delivered, will be provided in the notification of ASO.

(c) In order to expedite the scheduling process, at the time of submission of each vessel lifting program or pipeline delivery schedule, each purchaser shall provide the DOE Contracting Officer's Representative with a written notice of the intended destination for each cargo scheduled, if such destination is known at that time. For DLIs A or H (pipeline deliveries), the purchaser shall also include, if known, the name of each pipeline in the routing to the final destination.

(d) Notwithstanding paragraph (a) above, ASOs and purchasers may request early deliveries, i.e., deliveries commencing prior to the contractual delivery period. DOE will use its best efforts to honor such requests, unless unacceptable costs might be incurred or SPR schedules might be adversely affected or other circumstances make it unreasonable to honor such requests. DOE's decision following any such consideration for a change shall be final and binding. Requests accepted by DOE will be handled on a first-come, first-served basis, except that where conflicting requests are received on the same day, the highest-priced offer will be given preference. Requests that include both a change in delivery method and an early delivery date may also be accommodated subject to Provision No. C.6. DOE may not be able to confirm requests for early deliveries until 24 hours prior to the load date.

(e) Notwithstanding paragraphs (a) and (d) above, in no event will schedules be confirmed prior to award of contracts.

C.6 Contract Modification—Alternate Delivery Line Items

(a) A purchaser may request a change in delivery method after the issuance of the NA. Such requests may be made either orally (to be confirmed in writing within 24 hours) or in writing, but will require written modification of the contract by the Contracting Officer. Such modification shall be permitted by DOE, provided, in the sole judgment of

BEST COPY AVAILABLE

DOE, the change is viewed as reasonable and would not interfere with the delivery plans of other purchasers, and further provided that the purchaser agrees to pay all increased costs incurred by DOE because of such modification. The NS shall establish per barrel rates for such increased costs.

(b) Changes in delivery method will only be considered after the initial confirmation of schedules described in Provision C.5(a) above.

C.7 Application Procedures for "Jones Act" Waivers

(a) Unless otherwise specified in the Notice of Sale, an ASO or purchaser seeking a waiver of the "Jones Act" should submit a request by letter, telegram or telex to: U.S. Customs Service, Chief, Carrier Rulings Branch, 1301 Constitution Avenue, NW., Washington, DC 20229, Telephone No. (202) 566–5706, Telex (710) 822–9525.

Copies of the request should also be sent to:

(1) Assistant Secretary of Defense (Acquisition and Logistics), Department of Defense, Washington, DC 20301–8000;

(2) Associate Administrator for Marketing, Maritime Administration, Department of Transportation, Mail Stop MAR–800, Washington, DC 20590, Telex (710) 822–9426;

(3) Department of Energy, ATTN: Deputy Assistant Secretary for Strategic Petroleum Reserve/ Director, Office of Emergency Planning and Operations, Mail Stop FE–40, Washington, DC 20585, Telex (710) 822–0176.

(4) Contracting Officer, FE–4451, Strategic Petroleum Reserve Project Management Office, 900 Commerce Road East, New Orleans LA 70123, Telex (810) 951–6267 CHODT.

(b) A purchaser seeking a waiver to use a vessel built with a Construction Differential Subsidy (and if applicable, operated with Operating Differential Subsidy) should have the owner of that vessel submit a request by letter, telegram, or telex for such waiver(s) to: Maritime Administrator, Maritime Administration, U.S. Department of Transportation, Washington, DC 20590, Telex (710) 822–9426.

Copies of the request shall be sent to:

(1) U.S. Department of Energy, ATTN: Deputy Assistant Secretary for Strategic Petroleum Reserve/ Director, Office of Emergency Planning and Operations, Mail Stop FE–40, Washington, DC 20585, Telex (710) 822–0176.

(2) Chief, Carriers Rulings Branch, U.S. Customs Service, Department of the Treasury, Washington, DC 20229, Telex (710) 822–9525.

(3) Contracting Officer, FE–4451, Strategic Petroleum Reserve Project Management Office, 900 Commerce Road East, New Orleans, LA 70123, Telex (810) 951–6267 CHODT.

For speed and brevity, the request may incorporate by reference appropriate contents of any earlier "Jones Act" waiver request by the purchaser. Under section 805(a) of the Merchant Marine Act of 1936, a hearing is also required for any intervenor, and a waiver may not be approved if it will result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or intercoastal service.

(c) Any request for waiver should include the following information:

(1) Name, address and telephone number of requestor;

(2) Purpose for which waiver is sought, e.g., to take delivery of so many barrels of SPR crude oil, with reference to the SPR NS number and the provisional or assigned contract number;

(3) Name and flag of registry of vessel for which waiver is sought, if known at the time of waiver request, and either the scheduled 3-day delivery window(s), if available, or 10-day delivery period applicable to the contract;

(4) The intended number of voyages, including the ports for loading and discharging;

(5) Estimated period of time for which vessel will be employed; and

(6) Reason for not using qualified U.S.-flag vessel, including documentary evidence of good faith effort to obtain suitable U.S.-flag vessel and responses received from that effort. Such evidence would include copies of correspondence, telexes, telegrams, and telephone conversation summaries. Use of commercial brokers and the Transportation News Ticker (TNT) is suggested for maximum market coverage. Requests for waivers by telegram or telex may reference such documentary evidence, with copies to be provided by mail, postmarked no more than one business day after transmittal of the telegram or telex requesting the waiver.

(7) For waivers to use Construction Differential Subsidy vessels, the request must also contain a specific agreement for Construction Differential Subsidies payback pursuant to section 506 of the Merchant Marine Act of 1936 and must be signed by an official of the vessel owner authorized to make a payback commitment.

(d) If there are shown to be "Jones Act" vessels available and in a position to meet the loading dates required, no waivers may be approved.

(e) The names of any vessel(s) to be employed under a "Jones Act" waiver must be provided to the U.S. Customs Service no later than 3 days prior to the beginning of the 3-day loading window scheduled in accordance with Provision No. C.5.

C.8 Vessel Loading Procedures

(a) After notification of ASO, each ASO shall provide the SPR/PMO a proposed schedule of vessel loading windows in accordance with Provision No. C.5.

(b) The length of the scheduled loading window shall be 3 days. If the purchaser schedules more than one window, the average quantity to be lifted during any single loading window will be no less than DOE's minimum contract quantity.

(c) Tankships, ITBs, and self-propelled barges shall be capable of sustaining a minimum average load rate commensurate with receiving an entire full cargo within a twenty-four (24) hour pumping time. Barges with a load rate of not less than 4,000 BPH shall be permitted at the Sun Terminal barge docks. With the consent of the SPR/ PMO, lower loading rates and the use of barges at the Sun and Phillips Terminals' suitably equipped tankship docks may be permitted if such do not interfere with DOE's obligations to other parties.

(d) At least 7 days in advance of the beginning of the scheduled loading window, the purchaser shall furnish the SPR/PMO with vessel nominations specifying: (i) name and size of vessel or advice that the vessel is "To Be Nominated" at a later date (such date to be no later than 3 days before commencement of the loading window); (ii) estimated date of arrival (to be narrowed to a firm date not later than 72 hours prior to the first day of the vessel's 3-day window, as provided in paragraph (f) below); (iii) quantity to be loaded and contract number; and (iv) other relevant information requested by the SPR/PMO including but not limited to a copy of the crew list, ship's specifications, last three ports and cargoes, vessel owner/operator and flag, any known deficiencies, and on board quantities of cargo and slops. The listing of all required vessel information shall be provided in the Notice of SDOE will advise the purchaser, in writing, of the acceptance or rejection of the nominated vessel within 24 hours of such nomination. If no advice is furnished within 24 hours, the nomination will be

firm. Once established, changes in such nomination details may be made only by mutual agreement of the parties, to be confirmed by DOE in writing. The purchaser shall be entitled to substitute another vessel of similar size for any vessel so nominated, subject to DOE's approval. DOE must be given at least 3 days' notice prior to the first day of the 3-day loading window of any such substitution. DOE shall make a reasonable effort to accept any nomination for which notice has not been given in strict accordance with the above provisions.

(e) In the event the purchaser intends to use more than one vessel to take delivery of the contract quantity scheduled to be delivered during a loading window, the information in (d) above and (f) below shall be provided for each vessel.

(f) The vessel or purchaser shall notify the SPR/PMO of the expected day of arrival 72 hours before the beginning of his scheduled 3-day loading window. This notice establishes the firm agreed-upon date of arrival which is the 1-day window for the purposes of vessel demurrage (see Provision No. C.9). If the purchaser fails to make notification of the expected day of arrival, the 1-day window will be deemed to be the middle day of the scheduled 3-day window. The vessel shall also notify the SPR/PMO of the expected hour of arrival 72, 48 and 24 hours in advance of arrival, and after the first notice, to advise of any variation of more than 4 hours. With the first notification of the hour of arrival, the Master shall advise the SPR/PMO: (i) Quantity of oily bilge wastes or sludge requiring discharge ashore; (ii) cargo loading rate requested; (iii) number, size, and material of vessel's manifold connections; and (iv) defects in vessel or equipment affecting performance or maneuverability.

(g) Notice of Readiness shall be tendered upon arrival at berth or at customary anchorage which is deemed to be any anchorage within 6 hours vessel time to the SPR dock. The preferred anchorages are identified in Exhibit E. The Notice of Readiness shall be confirmed promptly in writing to the SPR/PMO and the terminal responsible for coordination of crude oil loading operations. Such notice shall be effective only if given during customary port operating hours. If notice is given after customary business hours of the port, it shall be effective as of the beginning of customary business hours on the next business day.

(h) DOE shall use its best efforts to berth the purchaser's vessel as soon as possible after receipt of the Notice of Readiness.

(i) Standard hose and fittings (American Standard Association standard connections) for loading shall be provided by DOE. Purchasers must arrange for line handling, deballasting, tug boat and pilot services, both for arrival and departure, through the terminal or ship's agent, and bear all costs associated with such services.

(j) Tankships, ITBs, and self-propelled barges shall be allowed berth time of 36 hours. Barges loading at Sun Terminal barge dock facilities shall be allowed berth time of three (3) hours plus the quotient determined by dividing the cargo size (gross standard volume barrels) by four thousand (4,000). Vessels loading cargo quantities in excess of 500,000 barrels shall be allowed berth time of 36 hours plus 1 hour for each 20,000 barrels to be loaded in excess of 500,000 barrels. Conditions below excepted, however, the vessel shall not remain at berth more than 6 hours after completion of cargo loading unless hampered by tide or weather.

(1) Berth time shall commence with the vessel's first line ashore and shall continue until loading of the vessel, or vessels in case more than one vessel is loaded, is completed and the last line is off. In addition, allowable berth time will be increased by the amount of any delay occurring subsequent to the commencement of berth time and resulting from causes due to adverse weather, labor disputes, force majeure and the like, decisions made by port authorities affecting loading operations, actions of DOE, its contractors and agents resulting in delay of loading operations (providing this action does not arise through the fault of the purchaser or purchaser's agent), and customs and immigration clearance. The time required by the vessel to discharge oily wastes or to moor multiple vessels sequentially into berth shall count as used berth time.

(2) For all hours of berth time used by the vessel in excess of allowable berth time provided for above, the purchaser shall be liable for dock demurrage and also shall be subject to the conditions of Provision No. C.11.

C.9 Vessel Laytime and Demurrage

(a) The laytime allowed DOE for handling of the purchaser's vessel shall be 36 running hours. For vessels with cargo quantities in excess of 500,000 barrels, laytime shall be 36 running hours plus 1 hour for each 20,000 barrels of cargo to be loaded in excess of 500,000 barrels. Vessel laytime shall commence when the vessel is moored alongside (all fast) the loading berth or 6 hours after receipt of a Notice of Readiness, whichever occurs first. It shall continue 24 hours per day, seven days per week without interruption from its commencement until loading of the vessel is completed and cargo hoses or loading arms are disconnected. Any delay to the vessel in reaching berth caused by the fault or negligence of the vessel or purchaser, delay due to breakdown or inability of the vessel's facilities to load, decisions made by vessel owners or operators or by port authorities affecting loading operations, discharge of ballast or slops, customs and immigration clearance, weather, labor disputes, force majeure and the like shall not count as used laytime. In addition, movement in roads shall not count as used laytime.

(b) If the vessel is tendered for loading on a date earlier than the firm agreed-upon arrival date, established in accordance with Provision No. C.8, and other vessels are loading or have already been scheduled for loading prior to the purchaser's vessel, the purchaser's vessel shall await its turn and vessel laytime shall not commence until the vessel moors alongside (all fast), or at 0600 hours local time on the firm agreed-upon date of arrival, whichever occurs first. If the vessel is tendered for loading later than 2400 hours on the firm agreed-upon date of arrival, DOE will use its best efforts to have the vessel loaded as soon as possible in its proper turn with other scheduled vessels, under the circumstances prevailing at the time. In such instances, vessel laytime shall commence when the vessel moors alongside (all fast).

(c) For all hours or any part thereof of vessel laytime that elapse in excess of the allowed vessel laytime for loading provided for above, demurrage shall be paid by DOE, for U.S.-flag vessels, at the lesser of the demurrage rate in the tanker voyage or charter party agreement, or the most recently available United States Freight Rate Average (USFRA) for a hypothetical tanker with a deadweight in long tons equal to the weight in long tons of the petroleum loaded, multiplied by the most recent edition of the American Tanker Rate Schedule rate for such hypothetical tanker. For foreign flag vessels, demurrage shall be as determined above, except that the London Tanker Brokers' Panel Average Freight Rate Assessment (AFRA) and most recent edition of the New Worldwide Tanker Nominal Freight Scale "Worldscale" shall be used as appropriate, if less than the charter party rate. For all foreign flag vessel loadings that commence during a particular calendar month, the applicable AFRA shall be the one that

is determined on the basis of freight assessments for the period ended on the 15th day of the preceding month. The demurrage rate for barges will be the hourly rate contained in the charter of a chartered barge, or if it is not a chartered barge, at a rate determined by DOE as a fair rate under prevailing conditions. If demurrage is incurred because of breakdown of machinery or equipment of DOE or its contractors (other than the purchaser), the rate of demurrage shall be reduced to one-half the rate stipulated herein per running hour and pro rata of such reduced rate for part of an hour for demurrage so incurred. Demurrage payable by DOE, however, shall in no event exceed the actual demurrage expense incurred by the purchaser as the result of the delay.

(d) In the event the purchaser is using more than one vessel to load the contract quantity scheduled to be delivered during a single loading widow, the terms of this provision and the Government's liability for demurrage apply only to the first vessel presenting its Notice of Readiness in accordance with (a) above.

(e) The primary source document and official record for demurrage calculations is the SPRCODR (see Provision No. C.19).

C.10 Vessel Loading Expedition Options

(a) Notwithstanding Provision No. C.8(j)(1) above, in order to avoid disruption in the SPR distribution process, the Government may limit berthing time for any vessel receiving SPR petroleum to that period required for loading operations and the physical berthing/unberthing of the vessel. At the direction of the Government, activities not associated with the physical loading of the vessel (e.g., preparing documentation, guaging, sampling, etc.) may be required to be accomplished away from the berth. Time consumed by these activities will not be for the Government's account. If berthing time is to be restricted, the Government will so advise the vessel prior to berthing of the vessel.

(b) In addition to (a) above, the Government may limit vessels calling at SPR terminals to a total of 24 hours for petroleum transfer operations. In such an event, the loading will be considered completed if the vessel has loaded 95 percent or more of the nominated quantity within a total of 24 hours. If the vessel has loaded less than 95 percent of its nominated quantity, then Provision C.11 shall apply.

C.11 Purchaser Liability for Excessive Berth Time

The Government reserves the right to direct a vessel loading SPR petroleum at a delivery point specified in the NS, to vacate its SPR berth, and absorb all costs associated with this movement, should such vessel, through its operational inability to receive oil at the average rates provided for in Provision No. C.8, cause the berth to be unavailable for an already scheduled follow-on vessel. Furthermore, should a breakdown of the vessel's propulsion system prevent its getting under way on its own power, the Government may cause the vessel to be removed from the berth with all costs to be borne by the purchaser.

C.12 Pipeline Delivery Procedures

(a) No later than the last day of the month preceding the month of delivery, the purchaser shall furnish the SPR/PMO with the following information: (i) confirmation of the pipeline's acceptance of the amount of the petroleum proposed to be delivered in the delivery month; (ii) an estimated schedule (consistent with the terms of the contract) for delivery of the petroleum to the pipeline; and (iii) the name and telephone number of the pipeline point of contact with whom the SPR/PMO should coordinate the petroleum delivery.

(b) Once established, the pipeline delivery schedule can only be changed with DOE's prior written consent. Should the schedule provided by the purchaser in accordance with (a) of this provision vary from the original schedule established in accordance with the provision contained in Provision No. C.5, the Government will provide its best efforts to accommodate this revised schedule but will incur no liability for failure to provide delivery on the dates requested.

(c) The date of delivery, which will be recorded on the CODR (see Provision No. C.19), is the date delivery commenced to the custody transfer point, as identified in the NS.

(d) The purchaser shall receive pipeline deliveries at a minimum average rate of 100,000 barrels per day. The purchaser is solely responsible for making the necessary arrangements with pipeline carriers, including storage, to achieve the stated minimum.

C.13 Title and Risk of Loss

Unless otherwise provided in the NS, title to and risk of loss for SPR petroleum will pass to the purchaser at the delivery point as follows:

(a) For vessel shipment—when the petroleum passes from the dock loading equipment connections to the vessel's permanent hose connection.

(b) For pipeline shipment—as identified in the NS.

(c) For in-transit shipments—when the petroleum passes the permanent flange of the discharging vessel manifold upon discharge into the purchaser's designated marine terminal facility or vessel.

C.14 Acceptance of Crude Oil

(a) When practical, the NS shall update the SPR crude oil stream characteristics shown in Exhibit D, SPR Crude Oil Stream Characteristics. However, the purchaser shall accept the crude oil delivered regardless of characteristics. Except as provided below, DOE assumes no responsibility for deviations in quality.

(b) In the event that the crude oil stream delivered both has a total sulfur content (by weight) in excess of 3.5 percent if Bryan Mound Maya, 2.0 percent if any other sour crude oil stream, or 0.50 percent if a sweet crude oil stream, and, in addition, has an API gravity less than 20°API if Bryan Mound Maya, 26°API if any other sour crude oil stream, or 32°API if a sweet crude oil stream, the purchaser shall accept the crude oil delivered and either pay the contract price adjusted in accordance with Provision No. C.16, or request negotiation of the contract price. Unless the purchaser submits a written request for negotiation of the contract price to the Contracting Officer within 10 days from the date of delivery, the purchaser shall be deemed to have accepted the adjustment of the price in accordance with Provision No. C.16. Should the purchaser request a negotiation of the price and the parties be unable to agree as to that price, the dispute shall be settled in accordance with Provision No. C.36.

C.15 Delivery Acceptance and Verification

(a) The purchaser shall provide written confirmation to SPR/PMO, no later than 72 hours prior to the scheduled date of the first delivery under the contract, the name(s) of the authorized agent(s) given signature authority to sign/endorse the delivery documentation (CODR, etc.) on the purchaser's behalf. Any changes to this listing of names must be provided to the SPR/PMO in writing no later than 72 hours before the first delivery to which such change applies. In the event that an independent surveyor (separate from the authorized signatory agent) is appointed by the purchaser to witness the delivery operation (guaging, sampling, testing, etc.), written

notification must be provided to SPR/PMO, no later than 72 hours prior to the scheduled date of each applicable cargo delivery.

(b) Absence of the provision of the name(s) of bona fide agent(s) and the signature of such agent on the delivery documentation constitutes acceptance of the delivery quantity and quality as determined by DOE and/or its agents.

C.16 Price Adjustments for Quality Differentials

(a) The NS will specify quality price adjustments applicable to the crude oil streams offered for sale. Unless otherwise specified by the NS, quality price adjustments will be applied only to the amount of variation by which the API gravity of the crude oil delivered differs by more than plus or minus five-tenths of one degree API (+/–0.5 °API) from the API gravity of the crude oil stream contracted for as published in the NS.

(b) Price adjustments for SPR crude oil are expected to be similar to one or more commercial crude oil postings for equivalent quality crude oil. The contract price per barrel shall be increased by that amount if the API gravity of the crude oil delivered exceeds the published API gravity by more than 0.5 °API and decreased by that amount if the API gravity of the crude oil delivered falls below the published API gravity by more than 0.5 °API.

C.17 Determination of Quality

(a) The quality of the crude oil delivered to the purchaser will be determined from samples taken from the delivery tanks in accordance with API Manual of Petroleum Measurement Standards, Chapter 8.1, Manual Sampling of Petroleum and Petroleum Products (ASTM D4057), latest edition; or from a representative sample collected by an automatic sampler whose performance has been proven in accordance with the API Manual of Petroleum Measurement Standards, Chapter 8.2, Automatic Sampling of Petroleum and Petroleum Products (ASTM D4177), latest edition. Preference will be given to samples collected by means of an automatic sampler when such a system is available and operational. Tests to be performed by DOE or its authorized contractor are:

(1) Sediment and Water

Primary methods: API Manual of Petroleum Measurement Standards, Chapter 10.1, Determination of Sediment in Crude Oils and Fuel Oils by the Extraction Method (ASTM D473) (IP53), latest edition; or API Manual of Petroleum Measurement Standards, Chapter 10.8, Sediment in Crude Oil by Membrane Filtration (ASTM D4807), latest edition; and API Manual of Petroleum Measurement Standards, Chapter 10.2, Determination of Water in Crude Oil by Distillation (ASTM D4006) (IP358), latest edition; or API Manual of Petroleum Measurement Standards, Chapter 10.9, Water in Crude Oil by Coulometric Karl Fischer Titration (ASTM D4928), latest edition.

Alternate methods: API Manual of Petroleum Measurement Standards, Chapter 10.3, Determination of Water and Sediment in Crude Oil by the Centrifuge Method (Laboratory Procedure) (ASTM D4007) (IP 359), latest edition; or API Manual of Petroleum Measurement Standards, Chapter 10.4, Standard Methods of Test for Water and Sediment in Crude Oils, (API Pub. 2542) (ASTM D96), latest edition; or API Manual of Petroleum Measurement Standards, Chapter 10.7, Water in Crude Oil by Karl Fischer Titration (Volumetric) (ASTM D4377), latest edition.

(2) Sulfur

Primary method: ASTM D1552, Sulfur in Petroleum Products (High Temperature Method), latest edition.

Alternate methods: ASTM D2622, Sulfur in Petroleum Products (X-ray Spectographic Method), latest edition; or ASTM D4294, Sulfur in Petroleum Products by Non-Dispersive X-ray Fluorescence Spectrometry, latest edition.

(3) API Gravity

API Manual of Petroleum Measurement Standards, Chapter 9.1, Hydrometer Test Method for Density, Relative Density (Specific Gravity), or API Gravity of Crude Petroleum and Liquid Petroleum Products (ASTM D1298), latest edition; or API Gravity of Crude Petroleum and Petroleum Products (Hydrometer Method) (ASTM D287), latest edition.

To the maximum extent practicable, the primary methods will be used for determination of SPR crude oil quality characteristics. However, because of conditions prevailing at the time of delivery, it may be necessary to use alternate methods of test for one or more of the quality characteristics. The Government's test results will be binding in any dispute over quality characteristics of SPR petroleum.

(b) The purchaser or his representative may arrange to witness and verify testing simultaneously with the Government Quality Assurance Representatives. Such services, however, will be for the account of the purchaser. Any disputes will be settled in accordance with Provision No. C.36. Should the purchaser opt not to witness the testing, then the Government findings will be binding on the purchaser.

C.18 Determination of Quantity

(a) The quantity of crude oil delivered to the purchaser will be determined by opening and closing tank gauges with adjustment for opening and closing free water and sediment and water as determined from shore tank samples where an automatic sampler is not available, or delivery meter reports. All volumetric measurements will be corrected to net standard volume in barrels at 60 °F, using the API Manual of Petroleum Measurement Standards, Chapter 11.1, Volume 1, Volume Correction Factors (ASTM D1250) (IP 200); Table 5A—Generalized Crude Oils, Correction of Observed API Gravity to API Gravity at 60 °F; Table 6A—Generalized Crude Oils, Correction of Volume to 60 °F Against API Gravity at 60 °F, latest edition, and by deducting the tanks' free water, and the entrained sediment and water as determined by the testing of composite all-levels samples taken from the delivery tanks; or by deducting the sediment and water as determined by testing a representative portion of the sample collected by a certified automatic sampler, and also corrected by the applicable pressure correction factor and meter factor.

(b) The quantity determination shall be made and certified by the DOE contractor responsible for loading operations, and witnessed by the Government Quality Assurance Representative at the delivery point. The purchaser shall have the right to have representatives present at the gauging/metering, sampling, and testing. Should the purchaser arrange for additional inspection services, such services will be for the account of the purchaser. Any disputes shall be settled in accordance with Provision No. C.36. Should the purchaser not arrange for additional services, then DOE's quantity determination shall be binding on the purchaser.

C.19 Delivery Documentation

The quantity and quality determination shall be documented on the SPR/PMO Crude Oil Delivery Report (SPRCODR), SPRPMO–F–6110.2–14b (Rev 8/91) (see Exhibit H for copy of this form). The SPRCODR will be signed by the purchaser's agent to acknowledge receipt of the quantity and quality of crude oil indicated. In addition, for vessel deliveries, the time statement on

the SPRCODR will be signed by the vessel's Master when loading is complete. Copies of the completed SPRCODR, with applicable supporting documentation (i.e., metering or tank gauging tickets and appropriate calculation worksheets), will be furnished to the purchaser and/or the purchaser's authorized representative after completion of delivery. They will serve as the basis for invoicing and/or reconciliation invoicing for the sale of petroleum as well as for any associated services that may be provided.

C.20 Contract Amounts

The contract quantities and dollar value stated in the NA are estimates. The per barrel unit price is subject to adjustment due to variation in the API gravity from the published characteristics, changes in delivery mode and price index values, if applicable. In addition, due to conditions of vessel loading and shipping or pipeline transmission, the quantity actually delivered may vary by +/−10 percent for each shipment. However, a purchaser is not required to engage additional transportation capacity if sufficient capacity to take delivery of at least 90 percent of the contract quantity has been engaged.

C.21 Payment

(a) Payment for petroleum delivered shall be due on the date stated on the invoice.

(b) Payment shall be made by the payment and performance guarantee which must be either:

(1) A letter of credit conforming without exception to requirements of Provision No. C.22 and Exhibit G, Payment and Performance Letter of Credit and equal to 100 percent of the contract amount; or

(2) An advance payment by cash wire deposit, made in accordance with the wire transfer instructions in Provision No. C.26 and equal to 110 percent of the contract amount.

(c) The purchaser must furnish an acceptable payment and performance guarantee before DOE will execute the NA. The Contracting Officer will inform the ASO by telephone that the guarantee is due within a period which may be as short as 5 business days. The Contracting Officer may, at his discretion, send a confirming telegram of the notification, but the timeliness of receipt for the guarantee is determined by the date of the telephone call.

(d) All wire deposit and letter of credit costs will be borne by the purchaser.

(e) The Contracting Officer (who may act through the SPR/PMO Planning and Financial Management Division) may draw against this payment and performance guarantee at any time after the first delivery for any monies due under the contract for petroleum delivered and at any time for any other monies owing to DOE under the contract, no matter how the debt arose.

C.22 Payment and Performance Letters of Credit—General Requirements

(a) Each letter of credit must conform without exception to the standard letter of credit provided as Exhibit G.

(b) DOE does not require information concerning the issuing bank's agreement with its customer. Any language in the letter of credit in addition to that specified in Exhibit G shall make the letter of credit unacceptable and shall be cause for rejection of the offer.

(c) As set forth in Exhibit G, the letter of credit provides for payment to DOE by wire transfer of funds over FEDWIRE. The banking institutional requirements required for the Payment and Performance Letters of Credit are the same as those required for the Offer Standby Letters of Credit (See Provision No. B.11).

C.23 Billing and Payment—With Purchaser's Letter of Credit

(a) After delivery of the SPR petroleum and completion of the delivery documentation, DOE shall prepare an invoice in accordance with the contract and the delivery documentation.

(b) Upon completion of the invoice, DOE shall prepare a draft requesting a wire transfer of funds in accordance with the letter of credit and transmit that message to the bank issuing the letter of credit by express mail or telex, or via the FEDWIRE system. On the date specified in the draft, the bank shall use the wire transfer procedures specified in the letter of credit to transfer the invoiced funds to the account of the U.S. Treasury. A purchaser is deemed to have received mailed invoices on the second day after their dispatch and telex and express mail invoices on the day after dispatch.

(c) If the draft message is sent to the bank by mail, DOE shall provide both the bank and purchaser copies of the draft message, the invoice, and the CODR. If the draft message is sent to the bank by FEDWIRE or telex, DOE shall provide the bank by mail a copy of the invoice and the CODR, and the purchaser a copy of the draft message, invoice, and the CODR.

(d) In the event that the bank refuses to honor the draft against the letter of credit, the purchaser shall be responsible for paying the principal and any interest due (see Provision No. C.27) from the due date specified in the draft.

(e) Within 30 calendar days after final payment under the contract, the Contracting Officer shall authorize the cancellation of the letter of credit and shall return it to the bank or financial institution issuing the letter of credit. A copy of the notice of cancellation will be provided to the purchaser.

C.24 Billing and Payment—With Purchaser's Advance Payment

(a) If the offeror elects to pay in advance, delivery documentation will be provided to the purchaser after each delivery. After the last delivery under the contract, a reconciliation billing will be made. If money is due from the purchaser to DOE, an invoice will be issued to the purchaser (see paragraph (b) below). If money is due the purchaser, funds will be returned via electronic transfer or Treasury check. Purchasers should provide the SPR/PMO the information as delineated in Exhibit I. See Provision B.11(i) for return of funds via electronic transfer or Treasury check.

(b) In accordance with the delivery documentation and the contract, DOE shall determine the amount of any reconciliation invoice and transmit it to the purchaser by express mail, mail or telex. A purchaser is deemed to have received mailed invoices on the second day after their dispatch and telex and express mail invoices on the day after dispatch. Reconciliation invoices must be paid in accordance with provision No. C.26 by the date stated in the invoice.

C.25 Replacement of Funds in the Payment and Performance Guarantee

(a) Payment and performance guarantees must be maintained in full force and effect to the Contracting Officer's satisfaction at the following minimum levels until final payment under the contract:

(1) Letter of credit at 100 percent of the contract price of the petroleum remaining to be paid for; and

(2) Advance payment at 110 percent of the contract price of the petroleum remaining to be delivered.

(b) If the Contracting Officer draws against the letter of credit, or makes charges against the advance payment, for monies owed DOE for oil delivered, for liquidated damages or for other funds due DOE, the purchaser shall be notified within 24 hours by express mail, mail or telex of the fact of such withdrawal or charge and the amount thereof. Purchaser is deemed to have received a mailed notice on the second business day after its dispatch and a

telex or express mail notice the next business day after its dispatch.

(c) In the event a draw against the payment and performance guarantee causes its amount to fall below the levels specified in (a) above, the purchaser shall, within two business days after it is deemed to have received notification in (b) above, replenish the payment and performance guarantee to those levels. Such replenishment shall be made either by the wire transfer of funds in accordance with Provision No. C.26, or by the provision of a new letter of credit or amendment of the old letter of credit. If such replenishment is not made within two business days, the Contracting Officer may, on the 3rd business day, without prior notice to the purchaser withhold deliveries under the contract and/or terminate the contract in whole or in part for default under Provision No. C.29.

(d) Notwithstanding (a) above, the Contracting Officer shall exercise discretion as to when the letter of credit or advance payment must be increased because of the effect of the price indexing mechanism provided for by Provision No. B.2. The Purchaser shall increase the guarantee level within two business days of being notified of a deficiency by the Contracting Officer by telex, express mail or facsimile. The purchaser shall be deemed to have received notice of the deficiency the next business day after the dispatch of the telex, express mail, or facsimile. If such replenishment is not made within two business days after purchaser is deemed to have received the notice of deficiency, the Contracting Officer may, without prior notice to the purchaser, withhold deliveries, in whole or in part, under the contract and/or terminate the contract in whole or in part under Provision No. C.29.

C.26 Method of Payments—General

(a) Notwithstanding any other contract provision, DOE may via a draft message request a wire transfer of funds at any time for payment of monies due under the contract. These would include but not be limited to, interest, liquidated damages, demurrage, amounts owing for any services provided for under the contract, and the difference between the contract price and price received on the resale of undelivered petroleum as defined in Provision No. C.29. If the invoice is for delinquent payments, interest shall accrue from the payment due date.

(b) All amounts payable by the purchaser shall be paid by wire transfer as a deposit to the account of the U.S. Treasury through FEDWIRE. The NS will specify the information which must be included on each wire transfer.

(c) DOE may designate another place, different timing, or another method of payment after reasonable written notice to the purchaser.

(d) No payment due DOE hereunder shall be subject to reduction or set-off for any claim of any kind against the United States arising independently of the contract.

(e) If a purchaser disagrees with the amounts invoiced by DOE, the purchaser immediately shall pay the amount invoiced, and notify the Contracting Officer of the basis for its disagreement. The Contracting Officer will receive and act upon any such objection asserted at any time prior to final payment under this contract. Failure to agree to any adjustment shall be a dispute, and purchaser shall file a claim promptly in accordance with Provision No. C.36.

C.27 Interest

(a) Amounts due and payable by the purchaser or its bank that are not paid in accordance with the provisions governing such payments shall bear interest from the date due until the date payment is received by the Government.

(b) Interest shall be computed on a daily basis. The interest rate shall be in accordance with the Current Value of Funds rate as established by the Department of the Treasury in accordance with the Debt Collection Act of 1982 and published periodically in Bulletins to the Treasury Fiscal Requirements Manual and in the **Federal Register**.

C.28 Government Options if Payment Is Not Received

(a) If any amount owed to DOE is not paid within the time deadlines specified by the applicable provisions, the Contracting Officer may, at his discretion, take the following actions either simultaneously or in any sequence he deems appropriate, with or without prior notice to the purchaser:

(1) Invoice the purchaser for the amount on which payment is delinquent or provide written notice that payment is delinquent;

(2) Draw against the letter of credit for all amounts due and delinquent;

(3) Apply any advance payment received against the amount due and delinquent;

(4) Withhold all or any part of future deliveries under the contract; and/or

(5) Terminate the contract, in whole or in part, for purchaser default, in accordance with Provision No. C.29.

(b) Any disputes will be settled by the Contracting Officer in accordance with Provision No. C.36.

C.29 Termination

(a) Immediate Termination.

(1) The Contracting Officer may terminate this contract in whole or in part, without liability of DOE, by written notice to the purchaser effective upon its being deposited in the U.S. Postal System addressed to the purchaser as provided in Provision No. C.35 in the event that the purchaser either notifies the Contracting Officer that it will not be able to accept, or fails to accept, any delivery line item in accordance with the terms of the contract. Such notice shall invite the purchaser to submit information to the Contracting Officer as to the reasons for the failure to accept the delivery line item in accordance with the terms of the contract.

(2) Within 10 business days after the issuance of the notice of termination, the Contracting Officer may determine that such termination was a termination for default under subparagraph (b)(1)(ii) of this provision. In the absence of information which persuades the Contracting Officer that the purchaser's failure to accept the delivery line item was excusable, the fact of such failure may be the basis for the Contracting Officer determining the purchaser to be in default, without first determining under subparagraphs (b)(2) and (b)(3) whether such failure was excusable under the terms of the contract. The Contracting Officer shall promptly give the purchaser written notice of such determination.

(3) Any immediate termination other than one determined to be a termination for default in accordance with subparagraph (a)(2) and paragraph (b) of this provision shall be a termination for the convenience of DOE without liability of the Government.

(b) Termination for Default.

(1) Subject to the provisions of subparagraphs (b)(2) and (b)(3), the Contracting Officer may terminate the contract in whole or in part for purchaser default, without liability to DOE, by written notice to the purchaser, effective upon its being deposited in the U.S. Postal System, addressed to the purchaser as provided in Provision No. C.35 in the event that:

(i) The Government does not receive payment in accordance with any payment provision of the contract;

(ii) The purchaser fails to accept delivery of petroleum in accordance with the terms of the contract; or

(iii) The purchaser fails to comply with any other term or condition of the

contract within 5 business days after the purchaser is deemed to have received written notice of such failure from the Contracting Officer.

(2) Except with respect to defaults of subcontractors, the purchaser shall not be determined to be in default or be charged with any liability to DOE under circumstances which prevent the purchaser's acceptance of delivery hereunder due to causes beyond the control and without the fault or negligence of the purchaser as determined by the Contracting Officer. Such causes shall include but are not limited to:

(i) Acts of God or the public enemy;

(ii) Acts of the Government acting in its sovereign or contractual capacity;

(iii) Fires, floods, earthquakes, explosions, unusually severe weather, or other catastrophes; or

(iv) Strikes.

(3) If the failure to perform is caused by the default of a subcontractor, the purchaser shall not be determined to be in default or to be liable for any excess costs for failure to perform, unless the supplies or services to be furnished by the subcontractor were obtainable from other sources in sufficient time to permit the purchaser to meet the delivery schedule, if:

(i) Such default arises out of causes beyond the control of the purchaser and its subcontractor, and without the fault or negligence of either of them; or

(ii) Such default arises out of causes within the control of a transportation subcontractor, not an affiliate of the purchaser, hired to transport the purchaser's petroleum by vessel or pipeline, and such causes are beyond the purchaser's control, without the fault or negligence of the purchaser, and notwithstanding the best efforts of the purchaser to avoid default.

(4) In the event that the contract is terminated in whole or in part for default, the purchaser shall be liable to DOE for:

(i) The difference between the contract price on the contract termination date and any lesser price the Contracting Officer obtained upon resale of the petroleum; and

(ii) Liquidated damages as specified in Provision No. C.31 as fixed, agreed, liquidated damages for each day of delay until the petroleum is delivered to a purchaser under either a resolicitation for the sale of the quantities of oil defaulted on, or an NS issued after the date of default that specifies that it is for the sale of quantities of oil defaulted on. In no event shall liquidated damages be assessed for more than 30 days.

(5) In the event that the Government exercises its right of termination for default, and it is later determined that the purchaser's failure to perform was excused in accordance with subparagraphs (2) and (3), the rights and obligations of the parties shall be the same as if such termination was a termination for convenience without liability of the Government under paragraph (c).

(c) Termination for Convenience.

(1) In addition to any other right or remedy provided for in the contract, the Government may terminate this contract at any time in whole or in part whenever the Contracting Officer shall determine that such termination is in the best interest of the Government. Such termination shall be without liability of the Government if such termination arises out of causes specified in (a)(1) or (b)(1) above, acts of the Government in its sovereign capacity, or causes beyond the control and without the fault or negligence of the Government, its contractors (other than the purchaser of SPR crude oil under this contract) and agents. For any other termination for convenience, the Government shall be liable for such reasonable costs incurred by the purchaser in preparing to perform the contract, but under no circumstances shall the Government be liable for consequential damages or lost profits as the result of such termination.

(2) The purchaser will be given immediate written notice of any decrease of petroleum deliveries greater than 10 percent, or of termination, under this paragraph (c). The termination or reduction shall be effective upon its notice being deposited in the U.S. Postal System unless otherwise specified in the notice. The purchaser is deemed to have received a mailed notice on the second day after its dispatch and a telex or express mail notice on the day after dispatch.

(3) Termination for the convenience of the government shall not excuse the purchaser from liquidated damages accruing prior to the effective date of the termination.

(d) Nothing herein contained shall limit the Government in the enforcement of any legal or equitable remedy that it might otherwise have, and a waiver of any particular cause for termination shall not prevent termination for the same cause occurring at any other time or for any other cause.

(e) In the event that the Government exercises its right of termination, as provided in paragraphs (a), (b), or (c)(1) above, the Contracting Officer may sell any undelivered petroleum under such terms and conditions as he deems appropriate.

(f) DOE's ability to deliver petroleum on the date on which the defaulted purchaser was scheduled to accept delivery, under another contract awarded prior to the date of the contractor's default, shall not excuse a purchaser that has been terminated for default from either liquidated damages or the difference between the contract price and any lesser price obtained on resale.

(g) Any disagreement with respect to the amount due the Government for either resale costs or liquidated damages shall be deemed to be a dispute and will be decided by the Contracting Officer pursuant to Provision No. C.36.

(h) The term *subcontractor* or *subcontractors* includes subcontractors at any tier.

C.30 Other Government Remedies

(a) The Government's rights under this provision are in addition to any other right or remedy available to it by law or by virtue of this contract.

(b) The Government may, without liability on its part, withhold deliveries of petroleum under this contract or any other contract the purchaser may have with DOE if payment is not made in accordance with this contract.

(c) If the purchaser fails to take delivery of petroleum in accordance with the delivery schedule developed under the terms of the contract, and such tardiness is not excused under the terms of Provision No. C.29, but the Government does not elect to terminate that item for default, the purchaser nonetheless shall be liable to the Government for liquidated damages in the amount established by Provision No. C.31 for each calendar day of delay or fraction thereof until such time as it accepts delivery of the petroleum. In no event shall such damages be assessed for longer than 30 days. No purchaser that fails to perform in accordance with the terms of the contract shall be excused from liability for liquidated damages by virtue of the fact that DOE is able to deliver petroleum on the date on which the non-performing purchaser was scheduled to accept delivery, under another contract awarded prior to the date of default.

C.31 Liquidated Damages

(a) In case of failure on the part of the purchaser to perform within the time fixed in the contract or any extension thereof, the purchaser shall pay to the Government liquidated damages in the amount of 1 percent of the contract price of the undelivered petroleum per calendar day of delay or fraction thereof in accordance with paragraph (b) of

Provision No. C.29 and paragraph (c) of Provision No. C.30.

(b) As provided in (a) above, liquidated damages will be assessed for each day or fraction thereof a purchaser is late in accepting delivery of petroleum in accordance with this contract, unless such tardiness is excused under Provision No. C.29. For petroleum to be lifted by vessel, damages will be assessed in the event that the vessel has not commenced loading by 11:59 p.m. on the second day following the last day of the 3-day delivery window established under Provision No. C.5, unless the vessel has arrived in roads and its Master has presented a notice of readiness to the Government or its agents. Liquidated damages shall continue until the vessel presents its notice of readiness. For petroleum to be moved by pipeline, if delivery arrangements have not been made by the last day of the month prior to delivery, liquidated damages shall commence on the 3rd day of the delivery month until such delivery arrangements are completed; if delivery arrangements have been made, then liquidated damages shall begin on the 3rd day after the scheduled delivery date if delivery is not commenced and shall continue until delivery is commenced.

(c) Any disagreement with respect to the amount of liquidated damages due the Government will be deemed to be a dispute and will be decided by the Contracting Officer pursuant to Provision No. C.36.

C.32 Failure to Perform Under SPR Contracts

In addition to the usual debarment procedures, 10 CFR 625.3 provides procedures to make purchasers that fail to perform in accordance with these provisions ineligible for future SPR contracts.

C.33 Government Options in Case of Impossibility of Performance

(a) In the event that DOE is unable to delivery petroleum contracted for to the purchaser due either to events beyond the control of the Government, including actions of the purchaser, or to acts of the Government, its agents, its contractors or subcontractors at any tier, the Government at its option may do either of the following:

(1) Terminate for the convenience of the Government under Provision No. C.29; or

(2) Offer different SPR crude oil streams or delivery times to the purchaser in substitution for those specified in the contract.

(b) In the event that a different SPR crude oil stream than originally contracted for is offered to the purchaser, the contract price will be negotiated between the parties. In no event shall the negotiated price be less than the minimum acceptable price, if established for the same or similar crude oil streams in the most recent NS or determined after the opening of offers.

(c) DOE's obligation in such circumstances is to use its best efforts, and DOE under no circumstances shall be liable to the purchaser for damages arising from DOE's failure to offer alternate SPR crude oil streams or delivery times.

(d) If the parties are unable to reach agreement as to price, crude oil streams or delivery times, DOE may terminate the contract for the convenience of the Government under Provision No. 29.

C.34 Limitation of Government Liability

DOE's obligation under these SSPs and any resultant contract is to use its best efforts to perform in accordance therewith. The Government under no circumstances shall be liable thereunder to the purchaser for the conduct of the Government's contractors or subcontractors or for indirect, consequential, or special damages arising from its conduct, except as provided herein; neither shall the Government be liable thereunder to the purchaser for any damages due in whole or in part to causes beyond the control and without the fault or negligence of the Government, including but not restricted to, acts of God or public enemy, acts of the Government acting in its sovereign capacity, fires, floods, earthquakes, explosions, unusually severe weather, other catastrophes, or strikes.

C.35 Notices

(a) Any notices required to be given by one party to the contract to the other in writing shall be forwarded to the addressee, prepaid, by U.S. registered, return receipt requested mail, express mail, telegram, or telex. Parties shall give each other written notice of address changes.

(b) Notices to the purchaser shall be forwarded to the purchaser's address as it appears in the offer and in the contract.

(c) Notices to the Contracting Officer shall be forwarded to the following address: U.S. Department of Energy, Strategic Petroleum Reserve, Project Management Office, Acquisition and Sales Division, Mail Stop FE–4451, 900 Commerce Road East, New Orleans, Louisiana 70123.

C.36 Disputes

(a) This contract is subject to the Contract Disputes Act of 1978 (41 U.S.C. 601 *et seq.*). If a dispute arises relating to the contract, the purchaser may submit a claim to the Contracting Officer, who shall issue a written decision on the dispute in the manner specified in 48 CFR 1–33.211.

(b) *Claim* means:

(1) A written request submitted to the Contracting Officer;

(2) For payment of money, adjustment of contract terms, or other relief;

(3) Which is in dispute or remains unresolved after a reasonable time for its review and disposition by the Government; and

(4) For which a Contracting Officer's decision is demanded.

(c) In the case of dispute requests or amendments to such requests for payment exceeding $50,000, the purchaser shall certify at the time of submission as a claim, as follows:

I certify that the claim is made in good faith, that the supporting data are current, accurate and complete to the best of my knowledge and belief and that the amount requested accurately reflects the contract adjustment for which the purchaser believes the Government is liable.

Purchaser's Name _____
Signature _____
Title _____

(d) The Government shall pay to the purchaser interest on the amount found due to the purchaser on claims submitted under this provision at the rate established by the Department of the Treasury from the date the amount is due until the Government makes payment. The contract Disputes Act of 1978 and the Prompt Payment Act adopt the interest rate established by the Secretary of the Treasury under the Renegotiation Act as the basis for computing interest on money owed by the Government. This rate is published semiannually in the **Federal Register**.

(e) The purchaser shall pay to DOE, interest on the amount found due to the Government and unpaid on claims submitted under this provision at the rate specified in Provision No. C.27 from the date the amount is due until the purchaser makes payment.

(f) The decision of the Contracting Officer shall be final and conclusive and shall not be subject to review by any forum, tribunal, or Government agency unless an appeal or action is commenced within the times specified by the Contract Disputes Act of 1978.

(g) The purchaser shall comply with any decision of the Contracting Officer and at the direction of the Contracting Officer shall proceed diligently with

performance of this contract pending final resolution of any request for relief, claim, appeal, or action related to this contract.

C.37 Assignment

The purchaser shall not make or attempt to make any assignment of a contract that incorporates these SSPs or any interest therein contrary to the provisions of Federal law, including the Anti-Assignment Act (41 U.S.C. 15), which provides:

No contract or order, or any interest therein, shall be transferred by the party to whom such contract or order is given to any other party, and any such transfer shall cause the annulment of the contract or order transferred, so far as the United States is concerned. All rights of action, however, for any breach of such contract by the contracting parties, are reserved to the United States.

C.38 Order of Precedence

In the event of an inconsistency between the terms of the various parts of this contract, the inconsistency shall be resolved by giving precedence in the following order:

(a) The NA and written modifications thereto;

(b) The NS;

(c) Those provisions of the SSPs (as published in the **Federal Register**) made applicable to the contract by the NS;

(d) The instructions to the SPR Sales Offer Form; and

(e) The successful offer.

C.39 Gratuities

(a) The Government, by written notice to the purchaser, may terminate the right of the purchaser to proceed under this contract if it is found, after notice and hearing, by the Secretary of Energy or his duly authorized representative, that gratuities (in the form of entertainment, gifts, or otherwise) were offered by or given by the purchaser, or any agent or representative of the purchaser, to any officer or employee of the Government with a view toward securing a contract or securing favorable treatment with respect to the awarding, amending, or making of any determinations with respect to the performing of such contract; *provided*, that the existence of the facts upon which the Secretary of Energy or his duly authorized representative makes such findings shall be in issue and may be reviewed in any competent court.

(b) In the event that this contract is terminated as provided in paragraph (a) hereof, the Government shall be entitled (1) to pursue the same remedies against the purchaser as it could pursue in the event of a breach of the contract by purchaser, and (2) as a penalty in addition to any other damages to which it may be entitled by law, to exemplary damages in an amount (as determined by the Secretary of Energy or his duly authorized representative) which shall not be less than three nor more than 10 times the cost incurred by the purchaser in providing any such gratuities to any such officer or employee.

(c) The rights and remedies of the Government provided in this clause shall not be exclusive and are in addition to any other rights and remedies provided by law or under this contract.

C.40 Officials Not to Benefit

No member of or delegate to Congress, or resident commissioner, shall be admitted to any share or part of this contract, or to any benefit that may arise therefrom; but this provision shall not be construed to extend to this contract if made with a corporation for its general benefit.

Strategic Petroleum Reserve Sales Offer Form

INSTRUCTIONS

1. Maximum MLI Quantity (MAXQ)

For each MLI offered against, offers shall state here, in thousands of barrels, the number of barrels which the offeror seeks to purchase on the MLI, regardless of delivery method. The maximum MLI quantity shall be not less than the DOE's minimum quantity as stated in the Notice of Sale (NS).

2. Delivery Line Items (DLI)

Applicable DLI delivery methods are as follows:

DLI A	Pipeline delivery from first terminal
DLI B, C, D	Tanker delivery from first terminal
DLI E, F, G	Barge delivery from first terminal
DLI H	Pipeline delivery from second terminal
DLI I,J,K	Tanker delivery from second terminal

DLI A and H nominally have a 30-day delivery period. Vessel DLIs B, E, and I have ten day delivery periods nominally from the 1st to the 10th; C, F, and J cover the 11th to the 20th; and D, G, and K cover the 21st to the last day of the period of sale. Not all DLIs may be available on a particular MLI. For example, barges are allowed only at the Sun Terminal barge docks (with certain limited exceptions, see SSP No. C.8). Therefore, only MLI 004 and MLI 005 have DLIs E, F, and G. Buyers are cautioned to read the NS carefully as it may alter the period of time covered by each DLI if the period of sale does not correspond to a calendar month.

3. Unit Price (UP$)

The offer shall state the offered price per barrel on each DLI for which the offer indicates a desired DLI quantity. The offer may state either the same unit price for different DLIs or different unit prices. DOE will award the highest price first. Prices may be stated to one-hundredths of a cent ($0.0001), but in no smaller fraction thereof.

4. Delivery Preference (P)

Where the offer has the same unit price for two or more DLIs on the same MLI, the offer may indicate the offerors order of preference for delivery method and period (1st, 2nd, 3rd, etc.). If the offer does not indicate a preference, DOE will select the DLIs to be awarded at its discretion.

5. Desired DLI Quantity (DESQ)

Offers must indicate at least one desired DLI, stating (in thousands of barrels) the number of barrels which the offeror will accept by the delivery method and during the delivery period established for that DLI. An offeror may indicate a willingness to accept alternate delivery methods or delivery periods. An offeror may request all, part or none of the offer's maximum MLI quantity on any particular DLI. A total of all the offeror's desired DLI quantities should total at least the maximum MLI quantity, but could exceed the maximum MLI quantity if the offeror is willing to accept alternate delivery methods or periods. For example, the offer could state:

MLI: 001
Maximum MLI Quantity: 1,000
Desired DLI Quantities:
DLI 001B: 1,000
DLI 001C: 1,000
DLI 001D: 1,000

This would indicate the offeror would be willing to accept one million barrels of Bryan Mound sweet to be delivered to its vessels either from the 1st through the 10th, the 11th through the 20th, or 21st through the end of the month.

6. Minimum Contract Quantity (MINQ)

For each DLI on which an offer is made, the offeror should indicate his willingness to accept as little as DOE's specified minimum contract quantity for that DLI by marking the 'Y' block, or unwillingness to accept less than the DESQ for that DLI by marking the 'N' block. If neither 'Y' or 'N' is indicated, the offer will be evaluated as though the offeror had indicated a 'Y'. DOE only will award less than the offeror's desired DLI quantity if an offer is otherwise successful, but the quantity which DOE has available for award is less than said desired DLI quantity or award of the desired quantity would cause the offeror's MAXQ on the MLI to be exceeded.

7. Total Price

The offer shall calculate the total price (desired DLI quantity times unit price) for each DLI on which an offer is made. The offeror is reminded that DESQ is stated in thousands of barrels.

8. Offer Guarantee

The amount of the offer guarantee is $10 million dollars or 5 percent of the maximum potential contract amount, whichever is less. The maximum potential contract amount is the sum of the products determined by multiplying the offer's maximum purchase quantity for each MLI times the highest offer prices that the offeror would have to pay for that MLI if the offer is successful. To assist in this calculation, instructions and a worksheet are available at Exhibit J. Submission of the worksheet is not mandatory.

Exhibit A

Exhibit B - Sample Notice of Sale (NS)

1 NS No. DE-NS96-92P0x000x is issued (date) for sale of Strategic Petroleum Reserve (SPR) crude oil. All references to "Provision No." refer to the Standard Sales Provisions (SSPs) published in the Federal Register (date). All provisions are applicable to this sale except that provision No(s). (give number or numbers) are supplemented or modified to read: (give changes). Additional requirements applicable to this sale are as follows: (give text).

(Note: Should the SSPs be extensively changed, the Notice of Sale (NS) may include, for information purposes only, a complete text of the SSPs as modified for the sale. Offerors are cautioned, however, that these complete text SSPs have no contractual status and that in the event of any inconsistencies, the published SSPs and the NS shall establish the terms and conditions for the sale.)

2. Mailed and handcarried offers and offer guarantees must be received by 1:00 p.m. local time on (date) at (address). Offer guarantees sent by wire transfer must also be received at the U.S. Treasury by the time stated above.

3. Offerors must give names, addresses and telephone numbers, including area codes, for authorized representative of the offeror with whom the Government may conduct any necessary discussions, including financial.

4. Direct questions regarding NS to (name of individual), telephone (504) 734-4660. Collect calls will not be accepted.

5. Master Line Item (MLI) numbers given herein refer to those schedules attached as Exhibit A of the SSPs. The quantities for each MLI offered for sale are as follows:

MLI 001: _____ bbls; MLI 002 not offered this sale; MLI 003: _____ bbls; MLI 004: _____ bbls; MLI 005 not offered this sale; MLI 006 not offered this sale; MLI 007: _____ bbls; MLI 008: _____ bbls.

6. Offered delivery line items (DLI) and their maximums, i.e., offered DLIs and the Department of Energy's best estimates of the maximum amount of petroleum that can be moved by each delivery line item transportation system over the delivery period, are as follows (see provision No. B.17 of the SSPs):

7. Minimum quantities which will be awarded for each delivery line item (DLI) are as follows:

8. Delivery line item A, for pipeline delivery, is not offered under MLI 001. Offerors wishing to take delivery of MLI 001 by pipeline should offer to purchase quantities under delivery line items B, C, and D. If successful, purchasers may modify delivery method under Provision No. C.6.

9. Consideration to be paid for alteration of contract delivery modes in accordance with provision No. C.6 is as follows:

10. Applicable quality differentials are plus or minus _____¢ per degree API gravity, or part thereof, for sweet crude oil streams, and plus or minus _____ per one-tenth degree API gravity for sour crude oil streams. These quality adjustments will only be applied to the amount of variation by which the API gravity of the crude oil delivered differs by more than plus or minus five-tenths of one degree API (+/- 0.5° API) from the API gravity of the crude oil stream contracted for as published in this Notice of Sale.

11. The following information is provided in connection with SSP Provision No. B.4 "'Superfund' tax on SPR petroleum - caution to offerors":

12. All offerors and purchasers are cautioned that, if the letters of credit contained in Exhibits F and G to the SSPs are altered in any manner, no matter how minor, such alterations are at the peril of the offerors/purchasers and may lead torejection of a letter of credit. It is recommended, therefore, that offerors/purchasers review and proofread letters of credit issued on their behalf, to assure their full compliance with the above cited Exhibits.

EXHIBIT C

Exhibit E - SPR Delivery Point Data

PHILLIPS TERMINAL
(Formerly Seaway Terminal)

(Data as of November 1, 1991)

LOCATION: Brazoria County, Texas (three miles southwest of Freeport, Texas on the Old Brazos River, four miles from the sea buoy)

CRUDE OIL STREAMS: Bryan Mound Sweet, Bryan Mound Sour, and Bryan Mound Maya

DELIVERY POINTS: Phillips Terminal marine dock facility number 2

MARINE DOCK FACILITIES AND VESSEL RESTRICTIONS:

TANKSHIP DOCKS: 3 Docks: Nos. 1, 2 and 3

MAXIMUM LENGTH LENGTH OVERALL (LOA): 750 feet during daylight and 615 feet during hours of darkness.

MAXIMUM BEAM: 107 feet

MAXIMUM DRAFT: 37.5 feet; subject to change due to weather and silting conditions

MAXIMUM AIR DRAFT: None

MAXIMUM DEADWEIGHT TONS (DWT): Maximum DWT at Dock No. 1 is 50,000 DWT. Dock Nos. 2 and 3 can accommodate up to 80,000 DWT. Maximum DWT is theoretical berth handling capability; however, purchasers are cautioned that varying harbor and channel physical constraints are the controlling factors as to vessel size, and they are responsible for confirming that proposed vessels can be accommodated.

BARGE LOADING CAPABILITY: Dock No. 1 has the capability to load barges of a minimum 30,000-barrel capacity. Its use, however, is contingent upon the consent of the Government and non-interference with the Government's obligations to other parties.

OILY WASTE RECEPTION FACILITIES: Facilities are available for oily bilge water and sludge wastes. Purchasers are responsible for making arrangements with the terminal and for bearing costs associated with such arrangements.

CUSTOMARY ANCHORAGE: Freeport Harbor sea buoy approximately 4.5 miles from the terminal.

ARCO PIPELINE COMPANY

TEXAS CITY TERMINAL

(Data as of November 1, 1991)

LOCATION: Docks 11 and 12, Texas City Harbor, Galveston County, Texas

CRUDE OIL STREAMS: Bryan Mound Sweet and Bryan Mound Sour

DELIVERY POINTS: ARCO Pipe Line Company Marine Docks (11 and 12) and connections to local commercial pipelines

MARINE DOCK FACILITIES AND VESSEL RESTRICTIONS:

TANKSHIP DOCKS: 2 Docks: Nos. 11 and 12

MAXIMUM LENGTH OVERALL (LOA): 1,020 feet. Maximum bow to manifold centerline distance is 468 feet.

MAXIMUM BEAM: Dock 11 - 108 feet; Dock 12 - 220 feet

MAXIMUM DRAFT: 39.6 feet; subject to change due to weather and silting conditions

MAXIMUM AIR DRAFT: None

MAXIMUM DEADWEIGHT TONS (DWT): 150,000 DWT each. Terminal permission is required for less than 30,000 DWT or greater than 150,000 DWT. Vessels larger than 120,000 DWT are restricted to daylight transit. Purchasers are cautioned that varying harbor and channel physical constraints are the controlling factors as to vessel size, and they are responsible for confirming that proposed vessels can be accommodated.

BARGE LOADING CAPABILITY: None

OILY WASTE RECEPTION FACILITIES: Facilities are available for oily bilge water and sludge wastes. Purchasers are responsible for making arrangements with the terminal and for bearing all costs associated with such arrangements.

CUSTOMARY ANCHORAGE: Bolivar Roads (breakwater) or Galveston sea buoy.

SUN TERMINAL

(Data as of November 1, 1991)

LOCATION: Nederland, Texas (on the Neches River at Smiths Bluff in southwest Texas, 47.6 nautical miles from the bar)

CRUDE OIL STREAMS: West Hackberry Sweet, West Hackberry Sour

DELIVERY POINTS: Sun Terminal marine dock facility and Sun Terminal connections to local commercial pipelines

MARINE DOCK FACILITIES AND VESSEL RESTRICTIONS:

TANKSHIP DOCKS: 5 Docks: Nos. 1, 2, 3, 4 and 5

MAXIMUM LENGTH OVERALL (LOA): 1000 feet

MAXIMUM BEAM: 150 feet

MAXIMUM DRAFT: 40 feet fresh water

MAXIMUM AIR DRAFT: 136 feet

MAXIMUM DEADWEIGHT TONS (DWT): Maximum DWT at Dock No. 1 is 85,000 DWT. Dock Nos. 2, 3, 4 and 5 can accommodate up to 150,000 DWT. Vessels larger than 85,000 DWT are restricted to daylight transit. Maximum DWT is theoretical berth handling capability; however, purchasers are cautioned that varying harbor and channel physical constraints are the controlling factors as to vessel size, and they are responsible for confirming that proposed vessels can be accommodated.

BARGE LOADING CAPABILITY: 3 Barge Docks: A, B and C. Each is capable of handling barges up to 25,000 barrels capacity.

OILY WASTE RECEPTION FACILITIES: Facilities are available for oily bilge water and sludge wastes. Purchasers are responsible for making arrangements with the terminal and for bearing costs associated with such arrangements.

CUSTOMARY ANCHORAGE: South of Sabine Bar Bouy, also at Sabine Bar for vessels with draft of 39 feet or less. Short-term anchorage for vessels of less than 40 foot draft in turning basin.

TEXACO 22-INCH/DOE LAKE CHARLES PIPELINE CONNECTION

(Data as of November 1, 1991)

LOCATION: Lake Charles Upper Junction, located in Section 36, Township 10 South, Range 10 West, Calcasie Parish, (Lake Charles) Louisiana

CRUDE OIL STREAMS: West Hackberry Sweet, West Hackberry Sour

DELIVERY POINT: Texaco 22-Inch/DOE Lake Charles Pipeline Connection

MARINE DISTRIBUTION FACILITIES: None

DOE ST. JAMES TERMINAL

(Data as of November 1, 1991)

LOCATION: St. James Parish, Louisiana (30 miles southwest of Baton Rouge on the west bank of the Mississippi River at mile-marker 158.3)

CRUDE OIL STREAMS: Bayou Choctaw Sweet, Bayou Choctaw Sour, Weeks Island Sour

DELIVERY POINTS: St. James Terminal marine dock facility and LOCAP and Capline Terminals (connections to Capline interstate pipeline system and local commercial pipelines)

MARINE DOCK FACILITIES AND VESSEL RESTRICTIONS:

TANKSHIP DOCKS: 2 Docks: Nos. 1 and 2

MAXIMUM LENGTH OVERALL (LOA): 940 feet

MAXIMUM BEAM: None

MAXIMUM DRAFT: 45 feet

MAXIMUM AIR DRAFT: 153 feet less the river stage

MAXIMUM DEADWEIGHT TONS (DWT): 100,000 DWT. Maximum DWT is theoretical berth handling capability; however, purchasers are cautioned that varying harbor and channel physical constraints are the controlling factors as to vessel size, and they are responsible for confirming that proposed vessels can be accommodated.

BARGE LOADING CAPABILIITY: None

OILY WASTE RECEPTION FACILITIES: Facilities are available for oily bilge water and sludge wastes. Purchasers are responsible for making arrangements and for bearing all costs associated with such arrangements. Terminal can provide suitable contacts.

CUSTOMARY ANCHORAGE: Grandview Reach approximately 11 miles from the terminal.

EXHIBIT F

OFFER

STANDBY LETTER OF CREDIT

DATE: _____

Acquisition and Sales Division
Mail Stop FE-4451
Project Management Office
Strategic Petroleum Reserve
U.S. Department of Energy
900 Commerce Road East
New Orleans, Louisiana 70123

To the Strategic Petroleum Reserve Sales Contracting Officer:

By order of our customer _____ we hereby establish in the U.S. Department of Energy's favor, an irrevocable Letter of Credit, Numbered _____, for an amount not to exceed U.S. $_____ (_____) effective immediately on account of our customer in response to the U.S. Department of Energy's Notice of Sale No. _____, including any amendments thereto, for the sale of Strategic Petroleum Reserve petroleum. This Letter of Credit expires 60 days from the date of issuance of this Letter of Credit.

This Letter of Credit is available by wire payment to the U.S. Department of Energy against presentation of a demand on us of a manually signed statement (with blanks filled in) containing the following:

> "THIS DRAWING OF U.S. $_____ (_____) AGAINST YOUR LETTER OF CREDIT NUMBERED _____, DATED _____, IS DUE THE U.S. GOVERNMENT BECAUSE OF THE FAILURE OF _____ TO HONOR ITS OFFER TO ENTER INTO A CONTRACT FOR THE PURCHASE OF PETROLEUM FROM THE STRATEGIC PETROLEUM RESERVE, IN ACCORDANCE WITH THE U.S. GOVERNMENT'S NOTICE OF SALE NO. _____, INCLUDING ANY AMENDMENTS THERETO."

Upon receipt of the U.S. Department of Energy's demand by hand, mail express delivery, or other means, at our office located

at _____, we will honor the demand and make payment, by 3 p.m. Eastern Time of the next business day following receipt of the demand, by wire transfer through the Federal Reserve Communications System to the U.S. Treasury (Code 021030004) for credit to Department of Energy Account 89000201. Each wire transfer shall be formatted in accordance with prescribed Treasury requirements.

This Letter of Credit is subject to the Uniform Customs and Practice for Documentary Credits (1983 Revision, International Chamber of Commerce Publication No 400) and except as may be inconsistent therewith, to the Uniform Commercial Code in effect on the date of issuance of this Letter of Credit in the State in which the issuer's head office within the United States is located.

Address all communications regarding this Letter of Credit to _____.

Yours truly,

INSTRUCTIONS FOR OFFER LETTER OF CREDIT

1. If issued from a single depository institution, including a branch or an agency of a foreign bank, (hereinafter referred to as "bank") that bank must maintain an account with any Federal Reserve Bank or Branch (Fed) and be a participant (on line) in the Fed's FEDWIRE funds transfer system. If issued by a syndicate of banks, only the institution acting as paying agent for the syndicate and responsible for honoring the drawing under the letter of credit must maintain a Fed account and be a participant (on line) in FEDWIRE.

2. If Offeror (bank's customer) or bank forwards letter of credit separately from the offer, the envelope shall clearly say "Offer Standby Letter of Credit (Name of Company)" and shall be clearly marked in accordance with Standard Sales Provision B.7(c).

3. Letters of Credit shall conform without exception to this attachment.

4. Insert date of issuance of Letter of Credit.

5. Insert dollar amount of Letter of Credit in numbers and in words.

6. Banks shall fill in all blanks except those in drawing statement. The drawing statement is in bold print with double lines for the blanks. Do not fill in the double-lined blanks.

7. Attachment E to Notice of Sale No. DE-NS96-91PO51012 provides an instruction guide for funds transfer deposit messages to other Federal agencies through Treasury, and the current wire transfer format.

8. If available, please include your American Bank Association Number on Letter of Credit.

9. Type name under authorized signature.

PAYMENT AND PERFORMANCE
LETTER OF CREDIT

Date: _____

Acquisition and Sales Division
Mail Stop FE-4451
Strategic Petroleum Reserve
Project Management Office
U.S. Department of Energy
900 Commerce Road East
New Orleans, LA 70123

To the Strategic Petroleum Reserve Sales Contracting Officer:

By order of our customer _____ we hereby establish in the U.S. Department of Energy's favor an irrevocable Letter of Credit, Numbered _____, for about U.S. $_____ (_____) effective immediately and expiring at our office located at _____ one hundred and twenty (120) days from the date of issuance of this Letter of Credit.

This Letter of Credit is available by wire payment to the U.S. Department of Energy against presentation of a demand on us. If transmitted by telex, mail, express delivery, or means other than FEDWIRE, it shall contain either a statement (with blanks filled in) that:

"THIS DRAWING IS DUE THE U.S. DEPARTMENT OF ENERGY UNDER YOUR LETTER OF CREDIT NUMBER _____ FOR (CUSTOMER'S NAME). PAYMENT OF U.S. $_____ TO BE MADE BY WIRE TRANSFER TO U.S. DEPARTMENT OF ENERGY ON (DATE) UNDER CONTRACT NUMBER _____, INVOICE NO. _____. THE WIRE TRANSFER MUST INCLUDE OUR FEDWIRE NUMBER AND OTHER WIRE INFORMATION AS FOLLOWS: TRANSFER TREAS CODE 021030004 TREAS NYC/(89000201) DEPT OF ENERGY (SPRO) U.S. $_____ PAYMENT FOR THE SALE OF CRUDE OIL UNDER CONTRACT NO. _____, INVOICE NO._____."

or a statement (with blanks filled in) that:

"THIS DRAWING IS DUE TO THE U.S. DEPARTMENT OF ENERGY UNDER YOUR LETTER OF CREDIT NUMBER _____ FOR (CUSTOMER'S NAME). PAYMENT OF U.S. $_____ TO BE MADE BY WIRE TRANSFER TO U.S. DEPARTMENT OF ENERGY BECAUSE OF FAILURE TO PERFORM IN ACCORDANCE WITH CONTRACT NUMBER _____ RESULTING IN PAYMENT DUE UNDER THE CONTRACT IN THAT AMOUNT. THE WIRE TRANSFER MUST INCLUDE OUR FEDWIRE NUMBER AND OTHER WIRE INFORMATION AS FOLLOWS: TRANSFER TO

TREAS CODE 021030004 TREAS NYC/(89000201) DEPT OF ENERGY (SPRO) U.S. $_____ PAYMENT FOR FAILURE TO PERFORM IN ACCORDANCE WITH CONTRACT NUMBER_____."

or both.

We also will honor demands presented over the Federal Reserve Bank's FEDWIRE system, provided that each such demand contains (with blanks filled in) the substance of either of the following statements:

"THIRD PARTY SENDER, RE YOUR LOC# ___(LETTER OF CREDIT NO.)___ FOR ___(CUSTOMER'S NAME)___ THIRD PARTY RECEIVER, TRANSFER TO TREAS CODE 021030004 TREAS NYC/(89000201) DEPT OF ENERGY (SPRO) $_____ PAYMENT DUE ON ___(DATE)___ FOR SALE OF OIL UNDER CONTRACT NO._____, INVOICE NO. _____."

or a statement (with blanks filled in) that:

"THIRD PARTY SENDER, RE YOUR LOC# ___(LETTER OF CREDIT NO.)___ FOR ___(CUSTOMER'S NAME)___ THIRD PARTY RECEIVER, TRANSFER TO TREAS CODE 021030004 TREAS NYC/(89000201) DEPT OF ENERGY (SPRO) $_____ PAYMENT DUE FROM FAILURE TO PERFORM IN ACCORDANCE WITH CONTRACT NO. _____."

The U.S. Department of Energy may make multiple drawings totalling up to 110 percent of the amount of funds indicated in the first paragraph as available under this Letter of Credit.

Upon receipt of the U.S. Department of Energy's demand, we will honor the demand and make payment by 3 p.m. Eastern Time on the date stated in the demand or, if the demand is not received before the stated date, then no later than one day after presentation (or the next business day thereafter if the stated date or day after presentation does not fall on a regular business day). Payment will be by wire transfer of funds over FEDWIRE to the U.S. Treasury (Code 021030004) for credit to the Department of Energy Account 89000201. Each wire transfer of funds shall be formatted in accordance with prescribed U.S. Treasury requirements.

This Letter of Credit is subject to the Uniform Customs and Practice for Documentary Credits (1983 Revision, International Chamber of Commerce Publication No. 400) and except as may be inconsistent therewith, to the Uniform Commercial Code in effect on the date of issuance of this Letter of Credit in the state in which the issuer's head office within the United States is located.

Address all communications regarding this Letter of Credit to

INSTRUCTION GUIDE FOR RETURN OF OFFER GUARANTEES
BY ELECTRONIC TRANSFER OR TREASURY CHECK

Offer guarantees will be returned at the option of the Government by either check of electronic funds transfer through the Treasury Fedline Payment System (FEDLINE). Offerors shall designate a financial institution for receipt of electronic funds transfer payments and provide the following information:

(1) Name and address of the financial institution receiving payment.

(2) The American Bankers Association 9-digit identifying number for wire transfers of the financing institution receiving payment if the institution has access to FEDLINE.

(3) Payee's account number at the financial institution where funds are to be transferred.

(4) If the financial institution does not have access to FEDLINE, name and address of the correspondent financial institution through which the financial institution receiving payment obtains wire transfer activity. Provide the American Bankers Association identifying number for the correspondent institution.

5		$				$	x50	$
6		$				$	x50	$
7		$				$	x50	$
8		$				$	x50	$
9		$				$	x50	$
10		$				$	x50	$
11		$				$	x50	$
Total								

1. Using a separate worksheet for each MLI offered against, from the SPR Sales Offer Form, enter the MLI maximum quantity offered on (expressed in thousands of barrels) in Column (A), Row 1.

2. Starting with the highest DLI unit price offered on the MLI from the SPR Sales Offer Form (and the highest preference if the unit prices of two or more DLIs are the same) enter the unit price in Row 1, Column (B); the DLI letter in Row 1, Column (C); the DLI desired quantity is Row 1, Column (D) (in thousands of barrels) and the minimum quantity in Row 1, Column (E). (The minimum quantity is either the Government's minimum contract quantity, if the offer indicates the offeror will accept as little as that amount, or the desired quantity, if the offeror indicates he will accept no less than that amount. See instructions for the SPR Sales Offer Form.)

3. If either the desired quantity in Column (D), or the minimum quantity in Column (E) exceeds the maximum quantity in Column (A), you have made an error either on this form or the offer form and should recheck your figures.

4. Multiply the price in Row 1, Column (B) times the desired quantity in Column (D) (as expressed in thousands) and enter the total DLI price in Column (F).

5. Multiply the total DLI price in Column (F) times the factor in Column (G) and enter the product in Column (H). The factor is 5% of 1000.

6. Subtract the DLI desired quantity in Row 1, Column (D) from the maximum quantity in Row 1, Column (A). Enter the result in Row 2, Column (A). If the result is zero, go to step 11.

7. Enter the next highest unit price for the MLI from the offer form in Row 2, Column (B). Enter the DLI letter, desired quantity, and minimum quantity in their respective columns. If there is a maximum quantity remaining in Row 2, Column (A), but no more DLI offers, or the minimum quantity in Row 2, Column (E) exceeds the maximum quantity, you may have made an error and should recheck your figures.

8. Multiply the lesser of the remaining maximum quantity in Column (A) (even if this quantity is less than MINQ), or the desired quantity in Column (D) times the unit price and enter the resulting total DLI price in Column (F).

9. Multiply Column (F) times the factor in Column (G) and enter the product in Column (H).

10. Repeat steps 6-9 for the next higher unit price until the maximum quantity remaining is zero, then go to step 11.

11. Sum the amounts in Column (H) and enter the total in Row 8, Column (H). Sum this amount for all the worksheets. If the sum of all the worksheets is less than $10,000,000, enter the sum in the spaces marked offer bond on the SPR Sales Offer Form. If the sum exceeds $10,000,000, then enter $10,000,000 on the offer form. Send with the offer or wire concurrently to the U.S. Treasury (refer to instructions in the Notice of Sale) an offer guarantee in the amount indicated on the offer form. These worksheets need not be submitted with the offer and should be retained for your files.

Part VI

Department of the Interior

Fish and Wildlife Service
50 CFR Part 32
Refuge-Specific Hunting and Fishing Regulations; Proposed Rule

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 32

FIN 1018–AA71

Refuge-Specific Hunting and Fishing Regulations

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed Rule.

SUMMARY: The Fish and Wildlife Service (Service) proposes to amend certain regulations that pertain to migratory game bird hunting, upland game hunting, big game hunting and sport fishing on individual national wildlife refuges. Refuge hunting and fishing programs are reviewed annually to determine whether the individual refuge regulations governing these programs should be modified, deleted or have additions made to them. Changing environmental conditions, State and Federal regulations, and other factors affecting wildlife populations and habitat may warrant modifications to insure the continued compatibility of hunting and fishing with the purposes for which the individual refuges were established. Modifications are designed, to the extent practical, to make refuge hunting and fishing programs consistent with State regulations. In addition, these refuge-specific regulations are consistent with the proposed new format which reorganizes all hunting and fishing regulations under one part as proposed in another document published in the **Federal Register** on November 25, 1992.

DATES: Comments must be received on or before December 28, 1992. See SUPPLEMENTARY INFORMATION below for discussion of comment periods.

ADDRESSES: Address comments to: Assistant Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, 1849 C Street, NW., MS 670 ARLSQ, Washington, DC 20240; Telephone (703) 358-2043.

FOR FURTHER INFORMATION CONTACT: Duncan L. Brown, Division of Refuges, U.S. Fish and Wildlife Service, 1849 C Street NW., MS 670 ARLSQ, Washington, DC 20240; Telephone (703) 358-2043.

SUPPLEMENTARY INFORMATION: 50 CFR part 32 contains provisions governing hunting and fishing on national wildlife refuges. Hunting and fishing are regulated on refuges to (1) insure compatibility with refuge purposes, (2) properly manage the wildlife resource, (3) protect other refuge values and (4) insure refuge user safety. On many refuges, the Service policy of adopting State hunting regulations is adequate in meeting these objectives. On other refuges, it is necessary to supplement State regulations with more restrictive Federal regulations to insure that the Service meets its management responsibilities, as outlined under the section entitled "Conformance with Statutory and Regulatory Authorities." Refuge-specific hunting and fishing regulations may be issued only after a wildlife refuge is opened to migratory game bird hunting, upland game hunting, big game hunting or sport fishing through publication in the **Federal Register**. These regulations may list the wildlife species that may be hunted or are subject to sport fishing, seasons, bag limits, methods of hunting or fishing, descriptions of open areas, and other provisions as appropriate. Previously issued refuge-specific regulations for hunting and fishing are contained in 50 CFR part 32. Many of the proposed amendments to these sections are being promulgated to standardize and clarify the existing language of these regulations.

The policy of the Department of the Interior is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. It is, therefore, the purpose of this proposed rulemaking to seek public input regarding these proposed amendments. Special circumstances in the reformatting of the hunting and fishing regulations as proposed to be revised at 57 FR 55686 on November 25, 1992, limit the amount of time that the Service can allow for public comment. Accordingly, interested persons may submit written comments to the Assistant Director, Refuges and Wildlife (ADDRESSES above) by the end of the comment period. All substantive comments regarding content or format will be considered by the Department prior to issuance of a final rule.

Conformance With Statutory and Regulatory Authorities

The National Wildlife Refuge System Administration Act (NWRSAA) of 1966, as amended (16 U.S.C. 668dd), and the Refuge Recreation Act of 1962 (16 U.S.C. 460k) govern the administration and public use of national wildlife refuges. Specifically, section 4(d)(1)(A) of the NWRSAA authorizes the Secretary of the Interior to permit the use of any area within the Refuge System for any purpose, including but not limited to, hunting, fishing and public recreation, accommodations and access, when he determines that such uses are compatible with the major purpose(s) for which the area was established.

The Refuge Recreation Act authorizes the Secretary to administer areas within the Refuge System for public recreation as an appropriate incidental or secondary use only to the extent that it is practicable and not inconsistent with the primary purpose(s) for which the areas were established. The Refuge Recreation Act also authorizes the Secretary to issue regulations to carry out the purposes of the Act. Hunting and sport fishing plans are developed for each refuge prior to opening it to hunting or fishing. In many cases, refuge-specific hunting and fishing regulations are included in the hunting and sport fishing plans to ensure the compatibility of the hunting and sport fishing programs with the purposes for which the refuge was established. Initial compliance with the NWRSAA and Refuge Recreation Act is ensured when hunting and sport fishing plans are developed, and the determinations required by these acts are made prior to the addition of refuges to the lists of areas open to hunting and fishing in 50 CFR. Continued compliance is ensured by annual review of hunting and sport fishing programs and regulations.

Economic Effect

Executive Order 12291 requires the preparation of regulatory impact analyses for major rules. A major rule is one likely to result in an annual effect on the economy of $100 million or more; or a major increase in costs or prices for consumers, individual industries, government agencies or geographic regions. The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) further requires the preparation of flexibility analyses for rules that will have a significant effect on a substantial number of small entities, which include small businesses, organizations or governmental jurisdictions.

The proposed amendments to the codified refuge-specific hunting and fishing regulations would make relatively minor adjustments to existing hunting programs. The regulations are not expected to have any gross economic effect and will not cause an increase in costs or prices for consumers, individual industries, Federal, State, or local governments, agencies, or geographic regions. The benefits accruing to the public are expected to exceed by a large margin the costs of administering this rule. Accordingly, the Department of the Interior has determined that this proposed rule is not a "major rule" within the meaning of E.O. 12291 and

would not have a significant economic effect on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

Paperwork Reduction Act

The information collection requirements for part 32 are found in 50 CFR part 25 and have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1018–0014. The information is being collected to assist the Service in administering these programs in accordance with statutory authorities which require that recreational uses be compatible with the primary purposes for which the areas were established. The information requested in the application form is required to obtain a benefit.

The public reporting burden for the application form is estimated to average six (6) minutes per response, including time for reviewing instructions, gathering and maintaining data, and completing the form. Direct comments on the burden estimate or any other aspect of this form to the Service Information Collection Clearance Officer, U.S. Fish and Wildlife Service, 1849 C Street NW., MS 224 ARLSQ, Washington, DC 20240; and the Office of Management and Budget, Paperwork Reduction Project (1018–0014), Washington, DC 20503.

Environmental Considerations

Compliance with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4332(C)) and the Endangered Species Act of 1973 (16 U.S.C. 1531–1543) is ensured when hunting and sport fishing plans are developed, and the determinations required by these acts are made prior to the addition of refuges to the lists of areas open to hunting and fishing in 50 CFR. Refuge-specific hunting and fishing regulations are subject to a categorical exclusion from the NEPA process if they do not significantly alter the existing use of a particular national wildlife refuge. The changes proposed in this rulemaking would not substantially alter the existing uses of the refuges involved. Information regarding hunting and fishing permits and the conditions that apply to individual refuge hunts, sport fishing activities and maps of the respective areas are available at refuge headquarters or can be obtained from the regional offices of the U.S. Fish and Wildlife Service at the addresses listed below:

Region 1—
California, Hawaii, Idaho, Nevada, Oregon, and Washington.
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Eastside Federal Complex, Suite 1692, 911 NE. 11th Avenue, Portland, Oregon 97232–4181; Telephone (503) 231–6214.

Region 2—
Arizona, New Mexico, Oklahoma and Texas.
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Box 1306, Albuquerque, New Mexico 87103; Telephone (505) 766–1829.

Region 3—
Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio and Wisconsin.
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111; Telephone (612) 725–3507.

Region 4—
Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, Tennessee, South Carolina, Puerto Rico and the Virgin Islands.
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Richard B. Russell Federal Building, 75 Spring Street, SW, Atlanta, Georgia 30303; Telephone (404) 331–0833.

Region 5—
Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia and West Virginia.
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, 300 W. Gate Center Drive, Hadley, Massachusetts 01035; Telephone (413) 253–8200.

Region 6—
Colorado, Kansas, Montana, Nebraska, North Dakota, South Dakota, Utah and Wyoming.
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Box 25486, Denver Federal Center, Denver, Colorado 80225; Telephone (303) 236–8145.

Region 7—
Alaska (Hunting and fishing on Alaska refuges is in accordance with State regulations. There are no refuge-specific hunting and fishing regulations for these refuges).
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, 1011 E. Tudor Rd., Anchorage, Alaska 99503; Telephone (907) 786–3538.

Duncan L. Brown, Division of Refuges, U.S. Fish and Wildlife Service, Washington, DC 20240, is the primary author of this proposed rulemaking document.

List of Subjects in 50 CFR Part 32

Hunting, Fishing, Reporting and recordkeeping requirements, Wildlife, Wildlife refuges.

Accordingly, it is proposed to amend Part 32, as proposed to be revised at 57 FR 22686 on November 25, 1992, of chapter I of title 50 of the Code of Federal Regulations as set forth below:

PART 32—[AMENDED]

1. The authority citation for part 32 would continue to read as follows:

Authority: 5 U.S.C. 301; 16 U.S.C. 460k, 664, 668dd, and 715i.

2. Section 32.20 Alabama is amended by revising paragraph C. of the Choctaw National Wildlife Refuge; by revising paragraphs A., B., and C. of Eufaula National Wildlife Refuge to read as follows:

§ 32.20 Alabama.

* * * * *

Choctaw National Wildlife Refuge

* * * * *

C. Big Game Hunting. Hunting of white-tailed deer and feral hogs is permitted on designated areas of the refuge subject to the following condition: Permits are required.

* * * * *

Eufaula National Wildlife Refuge

A. Hunting of Migratory Game Birds. Hunting of geese, ducks, coots, mourning doves, snipe and woodcock is permitted on designated areas of the refuge subject to the following condition: Permits are required.

B. Upland Game Hunting. Hunting of quail and rabbit is permitted on designated areas of the refuge subject to the following condition: Permits are required.

C. Big Game Hunting. Hunting of white-tailed deer is permitted on designated areas of the refuge subject to the following condition: Permits are required.

* * * * *

3. Section 32.22 *Arizona* is amended by revising paragraph C. of Buenos Aires National Wildlife Refuge to read as follows:

§ 32.22 Arizona.

* * * * *

Buenos Aires National Wildlife Refuge

* * * * *

C. Big Game Hunting. Hunting of mule deer and white-tailed deer, javelina and feral hogs is permitted on designated areas of the refuge.

* * * * *

4. Section 32.23 Arkansas is amended by revising paragraph B. of Big Lake National Wildlife Refuge to read as follows:

§ 32.23 Arkansas.

* * * * *

Big Lake National Wildlife Refuge

* * * * *

B. Upland Game Hunting. Hunting of squirrel, rabbit, raccoon, beaver and opossum is permitted on designated areas of the refuge subject to the following condition: Permits are required.

* * * * *

5. Section 32.24 California is amended by removing paragraph A.4. and revising paragraph A.3. of Delevan National Wildlife Refuge; by revising paragraphs A.3. and paragraph B.2. of Lower Klamath National Wildlife Refuge; by revising paragraph A.3., and removing paragraph A.4., and by redesignating paragraph A.5. as paragraph A.4. of Sacramento National Wildlife Refuge; and by revising paragraphs A.4. and B.2. of Tule Lake National Wildlife Refuge to read as follows:

§ 32.24 California.

* * * * *

Delevan National Wildlife Refuge

A. Hunting of Migratory Game Birds. * * *

* * * * *

3. Hunters assigned to the spaced blind unit are restricted to within 100 feet of their assigned hunt site except for retrieving downed birds, placing decoys, or traveling to and from the parking area.

* * * * *

Lower Klamath National Wildlife Refuge

A. Hunting of Migratory Game Birds. * * *

* * * * *

3. Only unloaded firearms may be carried on hunter access routes open to motor vehicles or when taken through posted retrieving zones when traveling to and from the hunting areas.

* * * * *

B. Upland Game Hunting. * * *

* * * * *

2. Only unloaded firearms may be carried on hunter access routes open to motor vehicles or when taken through posted retrieving zones when traveling to and from the hunting areas.

* * * * *

Sacramento National Wildlife Refuge

A. Hunting of Migratory Game Birds.

* * *

* * * * *

3. Hunters assigned to the spaced blind unit are restricted to within 100 feet of their assigned hunt site except for retrieving downed birds, placing decoys, or traveling to and from the parking area.

* * * * *

Tule Lake National Wildlife Refuge

A. Hunting of Migratory Game Birds.

* * *

* * * * *

4. Only unloaded firearms may be carried on hunter access routes open to motor vehicles or when taken through posted retrieving zones when traveling to and from the hunting areas.

* * * * *

B. Upland Game Hunting. * * *

* * * * *

2. Only unloaded firearms may be carried on hunter access routes open to motor vehicles or when taken through posted retrieving zones when traveling to and from the hunting areas.

* * * * *

6. Section 32.27 Delaware is amended by removing paragraph A.8. and redesignating paragraph A.9. as paragraph A.8. of Bombay Hook National Wildlife Refuge; and by removing paragraph A.7. and redesignating paragraphs A.8. and A.9. as A.7. and A.8., respectively, revising paragraphs C. introductory text, C.2., C.3., and C.4., and adding new paragraphs C.7. and C.8. of Prime Hook National Wildlife refuge to read as follows:

§ 32.27 Delaware.

* * * * *

Prime Hook National Wildlife Refuge

* * * * *

C. Big Game Hunting. Hunting of deer and turkey is permitted on designated areas of the refuge subject to the following conditions:

* * * * *

2. Deer hunting on Area A must be from designated stands only, unless actively tracking or retrieving wounded deer.

3. Hunting Areas A and B and the North Hunting Area are open to shotgun and muzzleloader deer hunting.

4. Archery deer hunting is permitted on the North Hunting Area only.

* * * * *

7. A shotgun only turkey hunt is permitted during the State spring season in Unit 1 north of Fowler's Beach Road and west of Slaughter Canal.

8. Hunters during firearms deer season must wear in a conspicuous manner on head, chest and back a minimum of 400 square inches of solid-colored hunter orange clothing or material.

* * * * *

7. Section 32.32 Illinois is amended by revising paragraph A.1., removing A.2. and redesignating A.3. as A.2., and adding a sentence at the end of newly designated A.2., revising paragraphs B.1., B.2. and C.3. and adding a new paragraph C.4. to Crab Orchard National Wildlife Refuge to read as follows:

§ 32.32 Illinois.

* * * * *

Crab Orchard National Wildlife Refuge

A. Hunting of Migratory Game Birds. * * *

1. Waterfowl hunting is permitted on the controlled areas of Grassy Point, Carterville and Greenbriar land areas, plus Orchard, Turkey, and Sawmill and Grassy Islands, from sunrise to posted closing times each day during the goose season. Waterfowl hunting in these areas, including lake shorelines, is permitted only from existing refuge blinds. Hunters must comply with the special rules posted at the blind drawing site. Only waterfowl hunting is permitted in the controlled goose hunting areas during goose season.

2. * * * No person may establish or use a goose blind or pit within 100 yards of roads, right-of-ways, easements, and refuge public use boundaries.

B. Upland Game Hunting. * * *

1. Upland game hunting is not permitted in the controlled goose hunting areas during goose season.

2. No rifles or pistols with ammunition larger than .22 caliber rim fire, except black powder firearms up to and including .40 caliber may be used.

C. Big Game Hunting * * *

* * * * *

3. Deer hunting is not permitted in the controlled goose hunting areas during goose season.

4. Hunting stands must be removed at the end of each day's hunt.

* * * * *

8. Section 32.33 Indiana is amended by adding a new paragraph C.5. to Muscatatuck National Wildlife Refuge to read as follows:

§ 32.33 Indiana.

* * * * *

Muscatatuck National Wildlife Refuge

* * * * *

C. Big Game Hunting. * * *

* * * * *

5. Non-hunters must stay in vehicles when entering the hunt area during the second state deer muzzleloader season.

* * * * *

9. Section 32.37 Louisiana is amended by revising paragraph B. for Atchafalaya National Wildlife Refuge; by revising paragraph B.2. and adding a new paragraph B.5., by revising paragraph C. D'Arbonne National Wildlife Refuge; by revising paragraphs A., B., and C. of Delta National Wildlife Refuge; by revising paragraphs B.2. and B.4., and adding a new paragraph B.5., by revising paragraph C. for Upper Ouachita National Wildlife Refuge to read as follows:

§ 32.37 Louisiana.

* * * * *

Atchafalaya National Wildlife Refuge

* * * * *

B. Upland Game Hunting. Hunting of squirrel, rabbit, raccoon, opossum, nutria, muskrat, mink, fox, bobcat, beaver and otter is permitted on designated areas of the refuge

subject to the following condition: Hunting shall be in accordance with Sherburne Wildlife Management Area regulations.

* * * * *

D'Arbonne National Wildlife Refuge

* * * * *

B. Upland Game Hunting. * * *

* * * * *

2. Feral hogs, coyotes and beaver may be taken during all refuge hunts.

* * * * *

5. Dogs are allowed for hunting squirrels, rabbits and raccoon only from the end of the last refuge gun deer hunt to the end of small game season.

C. Big Game Hunting. Hunting of white-tailed deer is permitted on designated areas of the refuge subject to the following conditions:

1. Either-sex deer hunting with firearms is permitted during the second consecutive Saturday and Sunday and fourth consecutive Friday and Saturday in November only.

2. Feral hogs, coyotes, and beaver may be taken during all refuge hunts.

3. Only still hunting is permitted.

4. Deer stands may not be left unattended.

5. All deer must be checked at a designated check station.

* * * * *

Delta National Wildlife Refuge

A. Hunting of Migratory Game Birds. Hunting of migratory game birds is permitted on designated areas of the refuge subject to the following condition: Permits are required.

B. Upland Game Hunting. Hunting of rabbit is permitted on designated areas of the refuge subject to the following condition: Permits are required.

C. Big Game Hunting. Hunting of white-tailed deer is permitted on designated areas of the refuge subject to the following condition: Permits are required.

* * * * *

Upper Ouachita National Wildlife Refuge

* * * * *

B. Upland Game Hunting. * * *

* * * * *

2. Feral hogs, coyotes and beaver may be taken during all refuge hunts.

* * * * *

4. Nontoxic shot is required while hunting upland game species.

5. Dogs are allowed for hunting squirrels, rabbits and raccoon only from the end of the last refuge gun deer hunt to the end of small game season.

C. Big Game Hunting. Hunting of white-tailed deer is permitted on designated areas of the refuge subject to the following conditions:

1. Either-sex deer hunting with firearms is permitted during the second consecutive Saturday and Sunday and fourth consecutive Friday and Saturday in November only.

2. Feral hogs, coyotes, and beaver may be taken during all refuge hunts.

3. Firearms must be unloaded while being transported in a vehicle or boat.

4. Only still hunting is permitted.

5. Deer stands may not be left unattended.

* * * * *

10. Section 32.38 Maine is amended by revising paragraph C.2. for Moosehorn National Wildlife Refuge; by adding new paragraph B.1. and by adding a new paragraph C.1. to Rachel Carson National Wildlife Refuge; and by revising paragraph C.1. of Sunkhaze Meadows National Wildlife Refuge to read as follows:

§ 32.38 Maine.

* * * * *

Moosehorn National Wildlife Refuge

* * * * *

C. Big Game Hunting. * * *

2. Hunters during firearms big game season must wear in a conspicuous manner on head, chest and back a minimum of 400 square inches of solid-colored hunter orange clothing or material.

* * * * *

Rachel Carson National Wildlife Refuge

* * * * *

B. Upland Game Hunting. * * *

1. Hunters during firearms big game season must wear in a conspicuous manner on head, chest and back a minimum of 400 square inches of solid-colored hunter orange clothing or material.

C. Big Game Hunting. * * *

1. Hunters during firearms big game season must wear in a conspicuous manner on head, chest and back a minimum of 400 square inches of solid-colored hunter orange clothing or material.

* * * * *

Sunkhaze Meadows National Wildlife Refuge

* * * * *

C. Big Game Hunting. * * *

1. Hunters during firearms big game season must wear in a conspicuous manner on head, chest and back a minimum of 400 square inches of solid-colored hunter orange clothing or material.

* * * * *

11. Section 32.39 Maryland is amended by revising paragraph C.4. for Blackwater National Wildlife Refuge; and by revising paragraph C.5. for Eastern Neck National Wildlife Refuge to read as follows:

§ 32.39 Maryland.

* * * * *

Blackwater National Wildlife Refuge

* * * * *

C. Big Game Hunting. * * *

* * * * *

4. Hunters during firearms big game season must wear in a conspicuous manner on head, chest and back a minimum of 400 square inches of solid-colored hunter orange clothing or material.

* * * * *

Eastern Neck National Wildlife Refuge

* * * * *

C. Big Game Hunting. * * *

* * * * *

5. Hunters during firearms big game season must wear in a conspicuous manner on head, chest and back a minimum of 400 square inches of solid-colored hunter orange clothing or material.

* * * * *

12. Section 32.40 Massachusetts is amended by removing paragraph A.1. and redesignating paragraph A.2. as paragraph A.1., and removing paragraph B.3. of Oxbow National Wildlife Refuge; by removing paragraphs A.2. and A.5. and redesignating paragraphs A.3. and A.4. as paragraphs A.2. and A.3., and removing paragraph C.7. and redesignating paragraph C.8. as paragraph C.7. of Parker River National Wildlife Refuge.

13. Section 32.42 Minnesota is amended by revising paragraphs A. and C. of the Minnesota Valley National Wildlife Refuge; and by adding a new paragraph C.4. to Rice Lake National Wildlife Refuge to read as follows:

§ 32.42 Minnesota.

* * * * *

Minnesota Valley National Wildlife Refuge

A. Hunting of Migratory Game Birds. Hunting of geese, ducks, and coots is permitted on designated areas of the refuge.

* * * * *

C. Big Game Hunting. Hunting of white-tailed deer is permitted on designated areas of the refuge subject to the following conditions:

1. Archery hunting is permitted.

2. All stands must be removed from the refuge at the end of each day's hunt.

Part VII

Department of the Interior

Bureau of Indian Affairs

Stockbridge-Munsee Alcohol Beverage Control Law; Notice

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Stockbridge-Munsee Alcohol Beverage Control Law

December 4, 1992.

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: This Notice is published in accordance with authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8, and in accordance with the Act of August 15, 1953, 67 Stat. 586, 18 U.S.C. 1161. This Notice certifies that Resolution No. 1317, the Stockbridge-Munsee Liquor Ordinance was duly adopted by the Stockbridge-Munsee Council on May 22, 1992. The ordinance provides for the regulation of the activities of the manufacture, distribution, sale and consumption of liquor in the area of Indian Country under the jurisdiction of the Stockbridge-Munsee Tribe, Wisconsin.

DATES: This Ordinance is effective as of December 11, 1992.

FOR FURTHER INFORMATION CONTACT: Chief, Branch of Judicial Services, Division of Tribal Government Services, 1849 C Street, NW., MS 2611–MIB, Washington, DC 20240; telephone (202) 208–4400.

SUPPLEMENTARY INFORMATION: The Stockbridge-Munsee Liquor Ordinance [No. 1317] is to read as follows:

Liquor Control Ordinance—Stockbridge-Munsee Community of Wisconsin

Whereas, Public Law 277, 83rd Congress, 1st Session, approved August 15, 1953, and codified at section 1161 of title 18, United States Code, provides that sections 1154, 1156, 3113, 3488, 3618 of Title 18 of the United States Code shall not apply within any area that is not Indian Country, nor to any act or transaction within any area of Indian Country, provided such act or transaction is in conformity both with the laws of the State in which such act or transaction occurs and with an ordinance duly adopted by the tribe having jurisdiction over such area of Indian Country, certified by the Secretary of the Interior, and published in the **Federal Register**.

Whereas, It is the desire of the Tribal Council of the Stockbridge-Munsee Community of Wisconsin to adopt a liquor control ordinance in the Indian Country that lies within the jurisdiction of the community; and

Whereas, The Tribal Council of the Stockbridge-Munsee Community of Wisconsin has the authority to adopt ordinances regulating liquor in the Indian Country that lies within the jurisdiction of the Community, by virtue of the provisions of Article VII, sections 1(a), (e) and (h) of the Constitution of the Stockbridge-Munsee Community of Wisconsin, adopted October 30, 1937;

Now therefore be it resolved, That the Tribal Council of the Stockbridge-Munsee Community of Wisconsin authorizes the issuance of licenses for on-premises sale of alcohol beverages within the Indian Country that lies within the jurisdiction of the Community, provided:

1. Licenses

A. Licenses for the sale of alcohol beverages may be issued only for the sale of such beverages within buildings used for casinos and restaurant-bar operations owned and regulated by the Stockbridge-Munsee Community.

B. Any restaurant-bar operation must produce more than 50% of its gross sales from food service in order to be licensed after the first year of operation.

C. Licenses issued to businesses owned by the Stockbridge-Munsee Community for the sale of alcohol beverages shall be issued by the Tribal Council of the Community, upon the receipt by the Tribal Council of a proper application containing the following information:

(1) The name of the entity that regulates the Community business at which the sale of alcohol beverages would take place. Such entity shall be the license applicant. No individual or private entity may apply for or receive a license under this Ordinance.

(2) A copy of the Community ordinance or resolution under which the applicant entity is organized.

(3) A description of the land or building owned by the Community and regulated by the applicant entity at which the applicant entity wishes to sell alcohol beverages.

(4) A statement that the applicant entity will conform to all requirements of applicable Tribal, State and Federal law, as they relate to the purchase and sale of alcohol beverages.

D. Upon receipt of a proper application under this Ordinance, licenses for the sale of alcohol beverages may be issued by the Tribal Council of the Community to a Tribal casino or restaurant-bar of the Community if the Tribal Council finds, in its sound discretion, on the basis of the facts disclosed by the application and by such additional information as the Tribal Council may deem relevant, that such issuance is in the interest of the Community.

E. Licenses for the sale of alcohol beverages issued by the Tribal Council shall contain the following requirements:

(1) Each license shall require its holder to conform its operations to the laws of the Community, the State of Wisconsin and the United States of America;

(2) No license shall be effective for a term of more than one year from the date of its issuance, and each renewal thereof shall be subject to the same procedures that apply to the initial issuance of a license.

(3) Each license shall explicitly state that its continued validity is dependent upon the compliance of its holder with all the provisions of this Ordinance and other applicable law.

(4) No licensee may give away or sell alcohol beverages at a loss.

F. The Tribal Council of the Community shall have the authority to suspend or revoke any license issued under this Ordinance, under the following procedures:

(1) Upon receiving information suggesting that the holder of a license under this Ordinance may have violated the terms of the license or applicable law, the Tribal Council shall give the license holder written notice that the Tribal Council intends to suspend or revoke the holder's license. Such notice shall be sent by certified mail, return receipt requested, to the agent of the license holder and shall specify the grounds for the proposed suspension or revocation.

(2) Any license holder who receives a notice of a proposed suspension or revocation may request a hearing by the Tribal Council, by sending a written request therefor, certified mail, return receipt requested, to the Chairman of the Stockbridge-Munsee Community, at the Community's Tribal Center, within seven (7) days of the license holder's receipt of the notice.

(3) Upon receipt of the request for a hearing under this Ordinance, the Tribal Council shall set a date for a hearing, which shall be no later than thirty days from the receipt of the hearing request.

(4) At a hearing held under this Ordinance, the holder of a license under this Ordinance shall be permitted to present evidence with respect to the holder's compliance with the terms of its license and applicable law. In reaching its decision, the Tribal Council may consider such evidence, together with all other evidence it deems relevant. Following a hearing, if in the judgment of the Tribal Council the license holder has not complied with

the terms of its license and applicable law, the Tribal Council shall suspend or revoke its license; and if in the judgment of the Tribal Council the terms of the license and applicable law have been complied with, the proceedings shall be dismissed. In either case, the decision of the Tribal Council shall be final.

G. The Tribal Council of the Stockbridge-Munsee Community may reject any application for a license, or for a renewal of a license, under this Ordinance, if the applicant previously has committed acts which have resulted in the suspension or revocation of a license under this Ordinance.

2. Agent

Any Tribally owned entity licensed under this Ordinance shall appoint, subject to the approval and confirmation of the Tribal Council, an agent who shall have full authority and control of the premises and of the conduct of all business on the premises relative to alcohol beverages. This person shall also be the person designated by Wis. Stats. § 125.04(6) requiring the appointment of agents.

3. Authority of the Tribal Council

A. The Tribal Council, or any individual member thereof or any person acting with prior written authorization of the Tribal Council may enter any premises licensed under this ordinance at any time to observe the activities taking place.

B. Written authorization may be enacted at a closed session of the Tribal Council and remain confidential until any report made by such person is before the Tribal Council for action or until such person seeks to gain access to the premises of any Tribally licensed facility during normal closed hours in which case it shall be presented to the manager on duty at the time, and said manager shall immediately admit the person to the premises.

C. Tribal Council members do not need such written authorization and may enter any Tribally licensed facility at any time upon identifying themselves if such admission is sought during normal closed hours.

4. Separate Licenses for Each Facility

Each Tribally owned entity licensed under this Ordinance shall be required to file a separate application and hold a separate license for each facility it operates.

5. Transfer of Licenses Prohibited

No license issued under this Ordinance may be transferred to any other entity or person.

6. State Law Applicable

The Stockbridge-Munsee Community recognizes the applicability of general State Law governing the sales of alcohol beverages.

7. State Law Adopted

The Stockbridge-Munsee Community hereby adopts for purposes of Tribal enforcement against any entity licensed by the Tribe under this ordinance the following provisions, as modified, of chapter 125 of the Wisconsin Statutes:

125.02	Definitions. Except as otherwise provided, in this ordinance.
125.02(1)	*Alcohol beverages* means fermented malt beverages, wine and intoxicating liquor as defined below.
125.02(6)	*Fermented malt beverage* means any beverage made by the alcohol fermentation of an infusion in potable water of barley, malt and hops, with or without unmalted grains or decorticated and degerminated grains or sugar containing 0.5% or more alchol by volume.
125.02(8)	*Intoxicating liquor* means all ardent, spirituous, distilled or vinous liquors, liquids or compounds, whether medicated, proprietary, patented or not, and by whatever name called, containing 0.5% or more of alcohol by volume, which are beverages, but does not include "fermented malt beverages".
125.02(22)	*Wine* means products obtained from the normal alcohol fermentation of the juice or must of sound, ripe grapes, other fruits or other agriculture products, imitation wine, compounds sold as wine, vermouth, cider, perry, mead and sake, if such products contain 0.5% or more of alcohol by volume.
125.02(8m)	*Legal drinking age* means 21 years of age.
125.02(14)	*Person* means natural person, sole proprietorship, partnership, corporation or association.
125.02(14m) ...	*Premises* means the area described in a license issued by the Tribal Council.
125.02(17)	*Regulation* means any rule or ordinance adopted by the Tribal Council.
125.02(20)	*Sell, sold, sale* or *selling* means any transfer of alcohol beverages with consideration or any transfer without consideration if knowingly made for purposes of evading the law relating to the sale of alcohol beverages or any device, scheme or transaction for obtaining alcohol beverages, including the solicitation of orders for, or the sale of future delivery of, alcohol beverages.
125.02(20)	*Underage person* means a person who has not attained the legal drinking age.
125.04(1)	General licensing requirement. No person may sell, manufacture, rectify, or brew any alcoholic beverage, or engage in any other activity for which this ordinance provides a license without holding the appropriate license.
125.04(2)	No license to be issued in violation of this ordinance. No license may be issued to any person except as provided in this ordinance. Any license issued in violation of this ordinance is void.
125.04(10)	License to be framed and posted. (a) Frame. Licenses for the sale of alcohol beverages shall be enclosed in frame having a transparent front which allows the license to be clearly read. (b) Display. Licenses shall be conspicuously displayed for public inspection at all times in the room or place where the sale of alcohol beverages is carried on.
125.07	Underage and intoxicated persons; presence on licensed premises; possession; penalties. (a) Alcohol beverages; Restrictions relating to underage persons. 1. No person may procure for, sell, dispense or give away any alcohol beverages to any underage person not accompanied by his or her parent, guardian or spouse who has attained the legal drinking age. 2. No licensee may sell, vend, deal or traffic in alcohol beverages to or with any underage person not accompanied by his or her parent, guardian or spouse who has attained the legal drinking age. 3. No adult may knowingly permit or fail to take action to prevent the illegal consumption of alcohol beverages by an underage person on premises under the adult's control. 4. No adult may intentionally encourage or contribute to a violation of this section.
125.07(2)	(b) Sales of alcohol to intoxicated persons. 1. No person may procure for, sell, dispense or give away alcohol beverages to a person who is intoxicated. 2. No licensee may sell, vend, deal or traffic in alcohol beverages to or with a person who is intoxicated.

125.065 ..... Any tribal entity selling alcohol beverages shall require the proof of age specified by this section.

(a) Definition. In this section, "official identification card" means a valid operator's license issued under chapter 343 of the Wisconsin Statutes that contains the photograph of the holder, an identification card issued under section 343.50 of the Wisconsin Statutes or an identification card issued under section 125.08 of the Wisconsin Statutes.

(b) Use. No card other than the identification card authorized under this section may be recognized as an official identification card by the Tribe for purposes of obtaining alcohol beverages at any Tribally licensed entity.

8. Closing Hours

Every entity licensed by the Stockbridge-Munsee Community shall observe the closing hours established by Wisconsin Statutes governing Class B Retail State licenses. Failure to do so shall be the basis for the revocation of licenses issued by the Tribal Council.

David J. Matheson,

Acting Assistant Secretary—Indian Affairs.

21 CFR Parts 314 and 601

[Docket No. 91N-0278]

RIN 0905-AD66

New Drug, Antibiotic, and Biological Drug Product Regulations; Accelerated Approval

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing final regulations under which the agency will accelerate approval of certain new drugs and biological products for serious or life-threatening illnesses, with provisions for any necessary continued study of the drugs' clinical benefits after approval or with restrictions on use, if necessary. These new procedures are intended to provide expedited marketing of drugs for patients suffering from such illnesses when the drugs provide meaningful therapeutic benefit compared to existing treatment. Accelerated approval will be considered in two situations: (1) When approval can be reliably based on evidence from adequate and well-controlled studies of the drug's effect on a surrogate endpoint that reasonably suggests clinical benefit or on evidence of the drug's effect on a clinical endpoint other than survival or irreversible morbidity, pending completion of studies to establish and define the degree of clinical benefits to patients; and (2) when FDA determines that a drug, effective for the treatment of a disease, can be used safely only if distribution or use is modified or restricted. Drugs or biological products approved under these procedures will have met the requisite standards for safety and effectiveness under the Federal Food, Drug, and Cosmetic Act (the act) or the Public Health Service Act (the PHS Act) and, thus, will have full approval for marketing.

EFFECTIVE DATE: January 11, 1993.

FOR FURTHER INFORMATION CONTACT: Marilyn L. Watson, Center for Drug Evaluation and Research (HFD-360), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301-295-8038.

SUPPLEMENTARY INFORMATION:

I. Background

In the Federal Register of April 15, 1992 (57 FR 13234), FDA published proposed procedures under which the agency would accelerate approval of certain new drugs and biological products for serious or life-threatening illnesses, with provision for required continued study of the drugs' clinical benefits after approval or for restrictions on distribution or use, where those are necessary for safe use of the drugs. FDA provided 60 days for public comment, and, upon request, in the Federal Register of June 18, 1992 (57 FR 27202), extended the comment period for an additional 30 days until July 15, 1992. The final rule incorporates all of the provisions of the proposed rule and provides additional clarification regarding both timing and content of the submissions of promotional materials and regarding the nature of required postmarketing studies. The agency has added a new provision clarifying when certain postmarketing requirements of the rule will be terminated.

Highlights of the final rule are summarized below, followed by a summary and discussion of the comments.

II. Highlights of the Final Rule

This final rule establishes procedures under parts 314 and 601 (21 CFR parts 314 and 601) under which FDA will accelerate approval of certain new drugs and biological products for serious or life-threatening illnesses, with provision for required continued study of the drugs' clinical benefits after approval or for restrictions on distribution or use, where those are necessary for safe use of the drugs. These procedures are intended to provide expedited marketing of drugs for patients suffering from such illnesses when the drugs provide meaningful therapeutic advantage over existing treatment. The preamble of the proposed rule (57 FR 13234) provides a description of other mechanisms available to facilitate access, speed development, and expedite review of therapeutic products (e.g., treatment investigational new drug applications (IND's), subpart E, parallel track). Where appropriate, these mechanisms can be utilized in concert with accelerated approval. The major provisions of the final rule are as follows:

A. Scope

The new procedures apply to certain new drug, antibiotic, and biological products used in the treatment of serious or life-threatening diseases, where the products provide meaningful therapeutic advantage over existing treatment (21 CFR 314.500 and 601.40).

B. Criteria for Approval

Accelerated approval will be considered in two situations: (1) When approval can be reliably based on evidence of the drug's effect on a surrogate endpoint that reasonably suggests clinical benefit or on evidence of the drug's effect on a clinical endpoint other than survival or irreversible morbidity, pending completion of studies to establish and define the degree of clinical benefits to patients; and (2) when FDA determines that a drug, effective for the treatment of a disease, can be used safely only if distribution or use is modified or restricted. Drugs or biological products approved under this final rule will have met the requisite standards for safety and effectiveness under the act or the PHS Act and, thus, will have full approval for marketing (21 CFR 314.510, 314.520, 601.41, and 601.42). Ordinarily, products used to treat serious or life-threatening illnesses, for which approval is based on a surrogate endpoint that is recognized as validated by definitive studies, will be considered for approval under the traditional process rather than under accelerated approval.

C. Postmarketing Studies

Where a drug's approval under these provisions is based on a surrogate endpoint or on an effect on a clinical endpoint other than survival or irreversible morbidity, the applicant will be required to conduct clinical studies necessary to verify and describe the drug's clinical benefit and to resolve remaining uncertainty as to the relation of the surrogate endpoint upon which approval was based to clinical benefit, or the observed clinical benefit to ultimate outcome. The requirement for any additional study to demonstrate actual clinical benefit will not be more stringent than those that would normally be required for marketing approval; it is expected that the studies will usually be underway at the time of approval. The proposed regulations have been revised to clarify that required postmarketing studies must also be adequate and well-controlled (21 CFR 314.510 and 601.41).

D. Restrictions on Use After Marketing

FDA may grant marketing approval of a drug or biological product shown to be effective where safe use can only be assured if distribution or use is restricted. Under this final rule, FDA may: (1) Restrict distribution to certain facilities or to physicians with special training or experience, or (2) condition distribution on the performance of

specified medical procedures. The restrictions on use will be tailored to the specific safety issue raised by the particular drug or biological product and agreed to by the applicant at the time of approval (21 CFR 314.520 and 601.42). FDA expects that the imposition of these restrictions on distribution will be rare.

E. Promotional Materials

The final rule requires submission of planned promotional materials, including promotional labeling and advertisements, both prior to approval (reflecting the initial campaign), and following approval, unless informed by the agency that such submission is no longer necessary, at least 30 days before the intended time of initial dissemination of the promotional labeling or initial publication of the advertisement (21 CFR 314.550 and 601.45).

F. Withdrawal of Approval

The final rule establishes an expedited procedure for the withdrawal of approval if: (1) Postmarketing clinical studies fail to verify clinical benefit; (2) the applicant fails to perform the required postmarketing study with due diligence; (3) use after marketing demonstrates that postmarketing restrictions are inadequate to ensure safe use of the drug or biological product; (4) the applicant fails to adhere to the postmarketing restrictions agreed upon; (5) the promotional materials are false or misleading; or (6) other evidence demonstrates that the drug or biological product is not shown to be safe or effective under its conditions of use (21 CFR 314.530 and 601.43).

G. Termination of Requirements

In response to comments, the final rule provides that the requirements set forth in §§ 314.520, 314.530, and 314.550 for new drugs and antibiotics and §§ 601.42, 601.43, and 601.45 for biological products ordinarily will terminate when FDA determines that the results of required postmarketing studies have demonstrated that the drug or biological product has clinical benefit, or, where restrictions on distribution or use have been imposed, when FDA determines that safe use of the drug or biological product can be ensured without such restrictions, e.g., through appropriate labeling. FDA will notify the applicant when these requirements no longer apply (21 CFR 314.560 and 601.46).

III. Effective Date

This regulation will become effective on January 11, 1993.

IV. Comments on the Proposed Rule

FDA received 54 comments on the proposed rule. The comments came from individuals, specific disease organizations, universities, pharmaceutical manufacturers, trade associations, health professionals, and professional societies. The comments reflect broad support and acceptance of the goal of expediting the approval of drugs intended for the treatment of serious and life-threatening illnesses. A number of comments asked that the proposal be finalized expeditiously without change. Many comments posed specific questions and raised important concerns.

A. General Comments

1. One comment suggested that the term "conditional approval" was less confusing and ambiguous than the term "accelerated approval." The comment also referred to the statement in the proposal that "Drugs * * * approved under this proposal will have met the requisite standards * * * under the (act)" and argued that because postmarketing conditions may be imposed, this statement can only be read to say that the requisite standards under the act can only be met by a lower standard of evidence in hand, combined with assurance that further evidence will be obtained.

Another comment expressed concern that the proposal appears to establish a standard for the evaluation of drug product effectiveness that is inconsistent with the substantial evidence requirement of section 505(d) of the act (21 U.S.C. 355(d)), which means "evidence consisting of adequate and well-controlled investigations, including clinical investigations, by experts qualified by scientific training and experience to evaluate the effectiveness of the drug involved, on the basis of which it could fairly and responsibly be concluded by such experts that the drug will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling or proposed labeling * * *." The comment argued that, with few exceptions, the agency has consistently interpreted the "substantial evidence" requirement as an instruction that determinations of effectiveness be based on data unambiguously reflecting the clinical status of subjects evaluated under controlled conditions in bona fide clinical experiments. In the absence of compelling empirical evidence documenting that a drug-induced change in a surrogate measure reliably and consistently predicts improved clinical outcome, a surrogate indicator is no more than a hypothetical construct. The comment asserted that the proposed rule's endorsement of the use of unvalidated surrogate endpoints, therefore, appears to represent a significant departure from traditional agency interpretations of "substantial evidence" within the meaning of the act because it allows belief rather than evidence to serve as the basis for a conclusion about the effectiveness of a new drug.

Three comments asserted that the new regulations are not needed to approve drugs intended to treat serious or life-threatening illnesses. Two comments cited FDA's approval, without new regulations, of didanosine (formerly called ddi) and zalcitabine (formerly called ddc) in combination with zidovudine (formerly called AZT) based on a surrogate marker, i.e., an increase in CD4 cell counts and the "subpart E" procedures at 21 CFR part 312, which address the need for expediting the development, evaluation, and marketing of new therapies intended to treat life-threatening or severely debilitating illnesses as examples of existing mechanisms for the expedited approval of important new drugs. One comment argued that the act requires that drugs be shown to be "safe" and "effective," and proof of effectiveness is not limited by the act to demonstration of an effect on "survival or irreversible morbidity," as the proposed rule seems to assume. The comment further argued that FDA has considerable statutory discretion to define what type of data constitutes proof of effectiveness, and demonstration of an effect on a surrogate marker is one type of such proof.

The agency believes that what the procedures are called is much less important than what the procedures are. The shorthand term selected by the agency reflects the intent of the rule, especially that part related to use of surrogate markers, which is to make drugs that provide meaningful improvement over existing therapies for serious illnesses widely available (through marketing) at the earliest time consistent with the law. The essence of the proposal is thus acceleration, not the imposition of conditions. Approval under these procedures is dependent on compliance with certain additional requirements, such as timely completion of studies to document the expected clinical benefit. The evidence available at the time of approval under this rule will meet the statutory standard, in that there must be evidence from adequate and well-controlled studies showing that the drug will have

the effect it is represented to have in its labeling. That effect will, in this case, be an effect on a surrogate endpoint that is reasonably likely to predict a clinical benefit and labeling will refer to the effect on the surrogate, not to effect on clinical outcome.

While the act does not refer to particular endpoints or state a preference for clinical, as opposed to surrogate, endpoints, it is well established that the effect shown in well-controlled studies, must, in the judgment of the agency, be clinically meaningful. Moreover, the safety standard in the act, that a drug must be shown to be safe for its intended use, implies a risk/benefit judgment. The effect shown must be such as to outweigh the risks of the treatment under the conditions of use. Approval under this rule requires, therefore, that the effect shown be, in the judgment of the agency, clinically meaningful, and of such importance as to outweigh the risks of treatment. This judgment does not represent either a "lower standard" or one inconsistent with section 505(d) of the act, but rather an assessment about whether different types of data show that the same statutory standard has been met.

Approval based on surrogate endpoints is not new, although the issue has not previously been considered in regulations. The agency has, in a number of instances, approved drugs based on surrogate endpoints. For example, drugs for hypertension have been approved based on their effects on blood pressure rather than on survival or stroke rate. Similarly, drugs for hypercholesterolemia have been approved based on effects on serum cholesterol rather than on coronary artery disease (angina, heart attacks). But, in those cases there was very good evidence from clinical trials (in the case of hypertension) and from epidemiologic and animal studies (in the case of hypercholesterolemia) that improving the surrogate would lead to or is associated with the desired effects on morbidity and mortality. Even so, there is still today considerable debate about who will benefit from cholesterol lowering. Controlled trials assessing effects on clinical endpoints of morbidity and mortality from use of cholesterol-lowering drugs have been, and are being, conducted.

Reliance on a surrogate endpoint almost always introduces some uncertainty into the risk/benefit assessment, because clinical benefit is not measured directly and the quantitative relation of the effect on the surrogate to the clinical effect is rarely known. The expected risk/benefit relationship may fail to emerge because: (1) The identified surrogate may not in fact be causally related to clinical outcome (even though it was thought to be) or (2) the drug may have a smaller than expected benefit and a larger than expected adverse effect that could not be recognized without large-scale clinical trials of long duration. Reliance on surrogate markers therefore requires an additional measure of judgment, not only weighing benefit versus risk, as always, but also deciding what the therapeutic benefit is based upon the drug effect on the surrogate.

The sections of the final rule that address approval based upon a drug effect on a surrogate endpoint specifically clarify the regulatory approval criteria when the agency relies on a surrogate endpoint that, while "reasonably likely" to predict clinical benefit, is not so well established as the surrogates ordinarily used as bases of approval in the past. Postmarketing studies required to verify and describe actual clinical benefits would also be required to be adequate and well-controlled studies. Sections 314.510 and 601.41 have been revised to clarify this point. If, on completion of required postmarketing studies, the effect on the surrogate is not shown to correspond to a favorable effect on clinical benefit, the rule provides an expedited means of removing the drug from the market.

Approval of didanosine and zalcitabine under current procedures does not show that the rule is of no value. Although approval did rely on a surrogate endpoint that is of the kind specifically addressed by the rule, the fact that studies to define clinical benefit were nearly complete and were being conducted under the auspices of the National Institute of Allergy and Infectious Diseases made it less crucial to have additional guarantees that such studies would be conducted promptly. Moreover, the sponsors of didanosine and zalcitabine agreed prior to approval to expedited withdrawal of the drug from the market if benefit were not shown. The provisions of the final rule will ensure that appropriate safeguards exist for timely generation of data on actual clinical benefit, for appropriate promotional information about labeled indications, and for prompt withdrawal of the drug from the market if clinical benefit is not confirmed.

2. Pointing to a statement in the preamble to the proposed rule that it is in the public interest to make promising new treatments available at the earliest possible point in time for use in life-threatening and serious illnesses, one comment expressed concern that the proposed rule may lead to the marketing of large numbers of clinically ineffective, but pharmacologically active, drugs and this may not be in the interest of the public health. The comment argued that early access to so-called "promising" drugs is not the same as early access to safe and effective drugs, and the number of potential markers that may be advanced as surrogates of clinical outcome is exceedingly large. The comment suggested that it may be more appropriate to seek adoption of the proposed requirements through an amendment to the act.

FDA agrees with the contention that providing people who have serious or life-threatening illnesses with numerous clinically ineffective drugs would not be helpful. However, the agency does not agree that the rule can be expected to have this result. Although studies using surrogate endpoints may provide less assurance of clinical benefit than studies using clinical endpoints, FDA believes compliance with all of the elements of the accelerated approval program will not result in the marketing of large numbers of clinically ineffective drugs. The new procedures apply to a limited group of circumstances, namely, to drugs intended for serious or life-threatening illnesses when the drugs provide a meaningful therapeutic benefit over existing therapy. Reliance on a surrogate endpoint is not equivalent to reliance on any evidence of pharmacologic activity. The endpoint must be reasonably likely, based on epidemiologic, therapeutic, pathophysiologic, or other evidence, to predict clinical benefit.

Whether a given endpoint is, in fact, reasonably likely to predict clinical benefit is inevitably a matter of judgment. FDA, using available internal and external expertise, will have to make informed judgments in each case presented, just as it does now. The agency acknowledges that there are well-recognized reasons for caution when surrogate endpoints are relied on. Certain putative surrogates have ultimately been shown not to correspond to clinical benefit. Perhaps the most noteworthy example is the failure of antiarrhythmic agents in the Cardiac Arrhythmia Suppression Trial (CAST) to improve survival by depressing ventricular ectopic beats; effective suppression of ectopic beats was associated with increased mortality.

A sponsor must persuasively support the reasonableness of the proposed surrogate as a predictor and show how the benefits of treatment will outweigh the risks. Such presentations are likely to be persuasive only when the disease to be treated is particularly severe (so

that considerable risk is acceptable) and/or when the surrogate endpoint is well supported. In addition, it will be the sponsor's clear obligation to resolve any doubts as to clinical value by carrying out definitive studies.

FDA does not agree that it would be more appropriate to seek an amendment to the act than to adopt the proposed requirements. As discussed in the preamble to the proposed rule as well as elsewhere in this preamble to the final rule, existing provisions of the act and the PHS Act authorize promulgation of the requirements in the final regulations.

3. One comment expressed concern that because the proposed rule would establish conditions on a drug's approval, third-party payors may decline reimbursement because the so-called approval would have attributes of investigational status.

The agency expects that, because drugs approved under the accelerated approval process meet the statutory standards for safety and effectiveness, they would be eligible for reimbursement under State Medicaid programs or other third-party plans. Drug products granted accelerated approval will not be, under the law, investigational, as suggested by the comment.

4. One comment asked if all drugs considered for accelerated approval must be reviewed by an advisory committee. The comment stated that because advisory committees meet infrequently, waiting for the next meeting may slow down the approval process.

FDA is not required to consult with an advisory committee before approving an application under these accelerated approval regulations, or any other regulation. However, FDA intends to consult the appropriate committee in most instances. Advisory committee meetings can usually be scheduled to avoid significant delays in the review process. The agency will consider any request by an applicant for referral of the application to an advisory committee.

B. Scope

5. Four comments asked for further clarification of what diseases are covered by the rule. One comment stated that the terms "serious," and "life-threatening," are defined in the proposal by reference to 21 CFR 312.34, followed by a brief statement explaining the role of judgment and examples of diseases that are currently judged to be serious. The comment asked that FDA also describe: (1) Diseases that are not currently included in the category of "serious," (2) examples of diseases that are currently judged "life-threatening," and (3) examples of diseases that are not currently included in the category "life-threatening."

One comment contended that the statement in the preamble that "seriousness of a disease is a matter of judgment, but generally is based on its impact on such factors as survival, day-to-day functioning, or the likelihood that the disease, if left untreated, will progress from a less severe condition to a more serious one" too narrowly limits diseases covered by the proposed rule (57 FR 13234 at 13235). The comment argued that some "less severe" diseases, even if treated, may progress to a more serious state, and that these diseases should also be covered by the rule. On the other hand, two comments argued that the language in the preamble that classifies diseases as "serious" was overly broad and subjective and far too large a number of illnesses could be eligible as being "serious."

FDA discussed the meaning of the terms "serious" and "life-threatening" in its final rules on "treatment IND's" (52 FR 19466 at 19467, May 22, 1987) and "subpart E" procedures (54 FR 41516 at 41518–41519, October 21, 1988). The use of these terms in this rule is the same as FDA defined and used the terms in those rulemakings. It would be virtually impossible to name every "serious" and "life-threatening" disease that would be within the scope of this rule. In FDA's experience with "treatment IND's" and drugs covered by the "subpart E" procedures there have not been problems in determining which diseases fall within the meaning of the terms "serious" and "life-threatening," and FDA would expect no problems under this accelerated approval program. The likelihood of progression to a serious condition with available treatments would also be considered in assessing whether the disease is within the scope of the final rule. The preamble to the proposed rule (57 FR 13234 at 13235) referred to chronic illnesses that are generally well managed by available therapy, but can have serious outcomes for certain populations or in some or all of their phases. Applicants are encouraged to consult with FDA's reviewing divisions early in the drug development process if they have questions about whether their specific product is within the scope of this rule.

The concerns expressed in these and other comments about considering too many illnesses eligible for consideration under the accelerated approval procedures may arise from the underlying fear that reliance on surrogate endpoints will become routine, the "normal" way drugs are brought to the market. This fear is groundless. The vast majority of drugs are directed at symptomatic or short-term conditions (pain, heart failure, acute infections, gastrointestinal complaints) whose response to drugs, if it occurs, is readily measured and where there is no need to consider or accept surrogate endpoints. Surrogates, with few exceptions, are of interest in the following situations: (1) Where the clinical benefit, if there is one, is likely to be well in the future; and (2) where the implications of the effect on the surrogate are great because the disease has no treatment at all or the drug seems to treat people with no alternative (e.g., because they cannot tolerate the usual effective treatment). In the first case, great care is needed, and would be given, as there would generally be no experience linking an effect on the surrogate to clinical success, and there have been conspicuous examples of lack of linkage (CAST, referred to above; drugs that increase cardiac output in patients with heart failure but that decrease survival; imperfect agreement of effects on coronary artery patency and effects on survival in patients with myocardial infarction; lack of beneficial effect on bone fracture rate despite favorable effects on bone density in patients with osteoporosis). FDA and outside experts will be aware of these examples as proposed surrogates are considered. The implications are especially great when considering prophylactic therapy, i.e., treatments to prevent chronic illness (coronary artery disease, cancer), in an essentially well population. In the second case, there will generally have been experience (with the standard therapy) to evaluate in considering linkage of the surrogate to benefit; this was, for example, the case with didanosine, where evidence from zidovudine studies of the relationship of an effect on CD4 lymphocytes and clinical outcome could be assessed. Similarly, there is considerable experience to show that durable complete responses in many cancers correspond to improved survival, so that an agent inducing them in refractory illness or in primary

disease that had previously been poorly responsive would generally be seen as reasonably likely to provide a clinical benefit.

6. One comment stated that epilepsy is a serious and life-threatening condition and asked that it be included within the scope of the proposal. The preamble cited, among other illnesses, depression and psychoses as examples of chronic illnesses that can have serious outcomes even if they are generally well managed. One comment asserted that neither depression nor psychosis is a disease, nor is either one serious or life-threatening. The comment stated that depression and psychosis are diagnoses. The comment urged the agency to remove them from the definition of life-threatening "illnesses" or "diseases."

With respect to epilepsy, FDA notes that in the "treatment IND" final rule (52 FR 19466 at 19467, May 22, 1987), the agency listed "certain forms of epilepsy" as an example of a disease or stage of disease that would normally be considered "serious." Certain forms of epilepsy may also be considered "serious" under the accelerated approval program. It is unlikely, however, that a surrogate endpoint would be utilized in such a case, as seizure frequency, a clinical endpoint, is readily measured.

FDA's reference to depression and psychoses was intended to give examples of conditions or diseases that can be serious for certain populations or in some or all of their phases. While drugs for the treatment of depression and psychosis would be examples of those that could be covered by the accelerated approval program, it is not the use of surrogate endpoints that would be expected; the symptoms and signs of these diseases are readily studied. On the other hand, some of these drugs have been quite toxic (e.g., clozapine for refractory psychoses) and might be considered for approval with restrictions to ensure safe use.

7. Two comments asked how FDA will decide that a drug is eligible for accelerated approval. One comment asserted that the decision should be an option for the applicant to consider, not a decision for FDA to make unilaterally. Pointing to a statement in the preamble (57 FR 13234 at 13235) that FDA reserves the right not to apply accelerated approval procedures when it believes in good faith that the drug's foreseeable use is reasonably likely to be outside the scope of "life-threatening diseases without meaningful therapeutic benefit over existing therapy," the comments argued that, if there are patients with life-threatening conditions that can benefit from expedited approval, the needs of the patients should determine the procedures used to approve the drug. One comment contended that applicants of products considered candidates for accelerated approval may have their drug or biological product "forced" into the accelerated approval process and be forced to conduct a program of studies to substantiate that surrogate endpoints actually predict significant clinical benefits.

The medical reviewing divisions within FDA's Center for Drug Evaluation and Research (CDER) and Center for Biologics Evaluation and Research (CBER) will determine the type of regulatory review that FDA may apply to an application. FDA encourages sponsors to meet with FDA early in the drug development process to discuss the applicability of the accelerated approval program to their product; however, FDA reserves the discretion to determine whether these procedures are applicable to a specific product.

With respect to the preamble statement cited by one comment, the comment misreads the preamble statement, which does not say that FDA will, in all cases, apply FDA's traditional approval mechanisms rather than this accelerated process for drugs where a majority of the drug's foreseeable uses are outside the scope of "life-threatening" diseases without meaningful therapeutic benefit over existing therapy. The statement merely informs applicants that FDA will consider the possible impact of widespread use of a drug for uses other than the one supporting accelerated approval; drugs approved under this program would often have only small safety data bases so that widespread off-label use might have serious implications. The agency does not believe that such a situation would regularly lead to exclusion from these provisions.

FDA does not agree that applicants seeking approval to market drug and biological products that would be candidates for accelerated approval will be forced to use the accelerated approval mechanism. It is true, however, that some proposed surrogate endpoints would not be considered acceptable bases for approval without assurance that the clinical studies to show clinical benefit will be conducted. A sponsor that wishes the application to be considered under the traditional approval process may request and receive such consideration.

The agency wishes to clarify the circumstances in which the accelerated approval regulations will apply. Sections 314.500 and 601.40 describe aspects of the scope of these regulations. Moreover, these regulations are intended to apply to applications based on surrogate endpoints whose validity is not fully established, to applications based on clinical endpoints that leave unanswered major questions about the product's effect on ultimate outcome, and to applications for products whose safe and effective use requires limitations on distribution or use. In all other situations, accelerated approval requirements will not apply.

Where approval is based on a surrogate endpoint that is accepted as validated to predict or correlate with clinical benefit, the product will be considered under the traditional process, and the postmarketing requirements under accelerated approval will not apply. Approvals of products for serious or life-threatening illnesses based on clinical endpoints other than survival or irreversible morbidity will usually also be considered under traditional procedures. Approvals based on such clinical endpoints will be considered under the accelerated approval regulations only when it is essential to determine effects on survival or irreversible morbidity in order to confirm the favorable risk/benefit judgment that led to approval. Applications for products for serious or life-threatening illnesses that provide a meaningful therapeutic benefit over existing therapy will receive a priority rating and expedited review, even when not considered under the accelerated approval procedures.

The agency also wishes to clarify that whenever an application is approved under § 314.510 or § 601.41, postmarketing studies confirming the product's clinical benefit will thus be required. Therefore, in order to eliminate potential confusion, the agency has amended §§ 314.510 and 601.41 to clarify these points.

FDA also recognizes that over time a particular surrogate, once acceptable as a basis for approval only under the accelerated approval regulations, could become recognized as validated by definitive studies (just as high blood pressure, for example, over time became validated as a surrogate with clinical significance). In such cases, a future application relying on such a surrogate would not require postmarketing studies confirming the surrogate's clinical benefit and the application would be considered under traditional procedures.

8. Two comments asked for clarification of the phrase "meaningful

therapeutic benefit over existing therapy" as used in the description of what drugs the accelerated approval program should apply to. Specifically, pointing to an example described in the preamble that a new therapy would be eligible for accelerated approval if there was "a clear improvement" over existing therapy in being more effective or better tolerated, one comment urged FDA to clarify the meaning of "clear improvement" to discourage applicants of "me-too" products from wasting the agency's time and resources by applying for accelerated approval of such products. The comment also asked that FDA specify that if a new drug is approved under the accelerated approval provisions because the drug exhibits a "clear improvement" over an existing drug that was also granted accelerated approval, then specific restrictions will be placed on the prior approved drug to limit its use only to patients who cannot tolerate the new drug, or whose physicians assess that a change to the new drug might involve significant risks to the patient that outweigh the benefits. One comment asked that the term "meaningful therapeutic benefit over existing therapy" be interpreted and consistently applied to both drugs and biological products.

FDA believes that the examples given to help clarify the phrase "meaningful therapeutic benefit over existing therapy" (ability to treat unresponsive or intolerant patients or improved response compared to available therapy) are readily understood illustrations of the intent of the requirement. A drug that is essentially the same as available treatment (what the comment refers to as a "me too" drug) will not have a credible claim to a meaningful therapeutic benefit over that existing treatment and this should be easily detected.

With respect to restricting use of a drug previously approved under accelerated approval procedures when a new drug granted accelerated approval is a clear improvement over the prior approved drug, this would rarely be appropriate. Although, in some instances, certain therapies are identified as "second-line," this requires essentially unequivocal evidence of an advantage of alternative therapy, not likely on the basis of a surrogate endpoint. Labeling for both drugs will be accurate, however, allowing physicians to prescribe both the newly approved drug and the prior drug properly.

9. One comment asked if a change in the route of administration would be considered as a meaningful benefit and within the scope of the proposal.

A change in the route of administration may be a candidate for accelerated approval depending upon the particular evidence presented.

10. One comment asked if subpart E drugs currently under investigation will be considered for accelerated approval. The comment assumed that new drug applications (NDA's) and supplemental NDA's considered for accelerated approval will have the highest priority for review.

Subpart E drugs will be considered for accelerated approval if they satisfy both eligibility criteria for accelerated approval, i.e., if they are being developed for the treatment of serious or life-threatening illnesses and the products will provide meaningful therapeutic benefits to patients over existing treatment. As discussed above, applicants should consult with FDA early in the development process to determine the nature of the regulatory review. Early consultations are a critical part of subpart E procedures. Drugs being reviewed under accelerated approval procedures will receive high priority review. However, applications for drugs for acquired immunodeficiency syndrome (AIDS) and human immunodeficiency virus (HIV)-related conditions will receive the highest priority review.

C. Criteria for Approval

11. Two comments expressed concern that the proposal did not provide enough detail on what constitutes an appropriate surrogate endpoint. One comment recommended that FDA adopt specific criteria for what constitutes an appropriate surrogate endpoint. The comment suggested that such criteria should include: (1) The surrogate endpoint must be biologically plausible in that it must be consistent with what is known about the pathophysiology and pathogenesis of the disease; (2) the surrogate endpoint must be present or abnormal in a large percentage of people who have the disease; (3) the surrogate endpoint must be a good predictor of the disease progression and should correlate closely with the significant clinical endpoint; (4) there should be a correlation between the quantitative aspect of the surrogate endpoint and the progression of the disease (e.g., the more severe the disease, the more deviant the surrogate endpoint from normal); (5) the regression of the surrogate endpoint should be significantly associated with clinical improvement (e.g., those with the greatest improvement in the surrogate endpoint should also show the greatest clinical effects); conversely, the lack of regression of the surrogate endpoint should be commonly associated with a lack of clinical improvement; and (6) the incidence of regression or improvement in the surrogate endpoint should be significantly greater in treated than untreated patients.

One comment asked if the use of microalbuminuria data is a surrogate for diabetic nephropathy and if all drugs relying on surrogate endpoints would be eligible for accelerated approval, e.g., an angiotensin receptor antagonist with potential utility for treatment of congestive heart failure. The comment also asked what would happen if postmarketing studies demonstrate beneficial changes of surrogate endpoints but not beneficial clinical endpoints. The comment also asked if FDA will consider publishing guidelines on which surrogate endpoints would be appropriate for the diseases that may be affected by the proposed rule. Another comment expressed the belief that there is no evidence that surrogate endpoints are necessarily good indicators of therapeutic benefit. The comment stated that a drug may have an effect on a surrogate endpoint, but will not make any clinical difference because the advanced stage of the patient's disease precludes any effective therapy or the surrogate marker is not synchronous with the patient's clinical condition.

Another comment asserted that the requirement to base an approval on a surrogate endpoint that is "reasonably likely, based on epidemiologic, therapeutic, pathophysiologic, or other evidence, to predict clinical benefit other than survival or irreversible morbidity" is not restrictive enough to assure adequate consumer protection. Terms like "reasonably likely" and "or other evidence" allow drug manufacturers too much latitude for claiming that there is a correlation between surrogate endpoints affected by their drugs and clinical endpoints. The comment argued that until a correlation between a surrogate endpoint and a clinical endpoint has been established, a particular surrogate endpoint should only be used to approve subsequent drugs, without adequate clinical evidence, if there is a very strong effect of the drug on the surrogate marker or, if the effect is not sufficiently strong, there is an additional surrogate marker which corroborates the results of the first.

FDA intends to publish informal guidance concerning surrogate endpoints, but does not believe specific requirements for an appropriate surrogate should be specified by

regulation. Any given specifications may not be applicable to a particular case. For example, the thoughtful suggested criteria supplied by the comment would rarely, if ever, be applicable to the first effective drug for a disease, because criterion 5 requires that regression of the surrogate endpoint be associated quantitatively with clinical improvement. If there had never been effective treatment, this would never be known. Yet the surrogate could be persuasive on other grounds, such as a well-documented etiologic relation. In general, it is likely that one or another strongly supportive piece of evidence might outweigh gaps in other areas.

In developing informal guidance on surrogate endpoints, FDA will consider the suggestions in this comment. Interested persons will have an opportunity to comment on any guidance documents in this area developed by the agency. In some cases, new or revised drug class, or disease-specific, clinical guidelines may refer to surrogate endpoints. FDA is not prepared, at this time, to comment on the acceptability of an endpoint that it has not specifically considered, e.g., microalbuminuria.

The final regulations make it clear that not all drugs submitted for approval based on surrogate endpoint data are eligible for accelerated approval (§§ 314.500 and 601.40). The drug in question must be for a serious or life-threatening condition and must provide meaningful therapeutic benefit over existing therapy. In the case of an angiotensin receptor antagonist posed by the comment, there is existing documented life-prolonging treatment for congestive heart failure. An application for a new agent, to be eligible for accelerated approval, would have to show potential benefit over available therapy as well as identify a reasonable surrogate endpoint. This is problematic since no accepted surrogate endpoint for studies to treat congestive heart failure has been identified to date. For example, some drugs with favorable effects on hemodynamic measures in heart failure patients have been clinically ineffective.

The regulations are clear in requiring that, for drugs approved under these provisions based on surrogate endpoints, the postmarketing studies must show clinical benefit, not just the previously shown effect on the surrogate (§§ 314.510, 314.530, 601.41, and 601.43).

Surrogates, or proposed surrogates, are not always good, nor necessarily bad, indicators of therapeutic benefit and must be judged on a case-by-case basis. Even very good surrogates may not be perfect: Blood pressure lowering has been a better predictor of effect on stroke than on coronary artery disease, cholesterol lowering has had a clearer effect on coronary artery disease than on survival. Moreover, a surrogate may be persuasive for a phase of disease with short expected survival but much less so in an earlier phase of the disease. Caution is always appropriate in evaluating surrogate endpoints and the particular therapeutic setting should always be considered. The agency believes that the evaluation of surrogate endpoint data and the safeguards built into these accelerated approval procedures will provide adequate consumer protection.

12. One comment expressed concern that if there is no accepted surrogate endpoint, an applicant's only option is to conduct a study using some clinical event as an endpoint, which may result in long, large studies that delay approval to the detriment of patients and sponsors. One comment suggested as an alternative that FDA permit approval of a drug based on a study using a clinical endpoint, but accept a less rigorous standard of statistical significance, e.g., 0.20 or 0.15 instead of 0.05. The comment further suggested that the sponsor could then complete postmarketing studies to establish statistical significance at conventional levels. The comment argued that this alternative is totally consistent with FDA's willingness to accept greater uncertainty in approving drugs for serious and life-threatening illnesses.

The intent of the rule is to allow FDA to utilize a particular kind of evidence, an effect on a surrogate endpoint, as a basis for approval, and, where appropriate, to ensure that remaining doubts about the relationship of the effect on the surrogate to clinical benefit are resolved by additional adequate and well-controlled studies with clinical endpoints. The rule is not intended to place into the market drugs with little evidence of usefulness. Although there is no statutory requirement for significance testing of any particular value, there are well-established conventions for assessing statistical significance to support the statutorily required conclusion that the well-controlled studies have demonstrated that a drug will have the effect it is represented to have. There is nothing about serious or life-threatening diseases that make them uniquely difficult to study. A meaningful effect on survival or morbidity where there is no effective therapy should be readily discerned. Such studies need be long and large only when the effect is small or difficult to detect. In that event, proper assessment of benefit, and valid weighing of its relation to risk, is especially critical.

13. One comment asked that FDA clarify that one study could be the basis of approval and that one postmarketing study should be all that is needed to establish the link between the endpoint used for approval and some relevant clinical benefit.

FDA interprets the statute, and good science, as requiring at least two adequate and well-controlled studies to establish effectiveness. In some instances, drugs have been approved on the basis of a single well-controlled study; this has been done where the study was of excellent design, showed a high degree of statistical significance, involved multiple study centers, and showed some evidence of internal replicability, e.g., similar effects in major study subsets. FDA encourages applicants to discuss with FDA early in a drug's development the basis for the applicant's choice of a specific endpoint and, where applicable, the basis for its belief that a single study would be a sufficient basis for approval. With respect to postmarketing studies, FDA anticipates that the requirement will usually be met by studies already underway at the time of approval. As stated in the proposed rule, the requirement for any additional study to demonstrate actual clinical benefit will not be more stringent than those that would normally be required for marketing approval of the same drug for the same claim.

14. One comment expressed concern that the preamble to the proposed rule implied that a sponsor of an AIDS drug might have to do a postmarketing study to establish an effect on survival after showing an effect on such endpoints as weight or incidence of opportunistic infection (57 FR 13234 at 13235–13236). The comment stated that FDA's own advisory committee indicated that it was pleased to see an effect from a nucleoside analogue on the incidence of opportunistic infections with AIDS patients but did not suggest that further work should be done to show an effect on mortality. The comment argued that in some cases direct correlation with clinical endpoints such as mortality is difficult to prove and urged FDA to be flexible on this issue to encourage sponsors to go through the accelerated approval process.

Ordinarily, an effect on a meaningful clinical endpoint, e.g., on rate of opportunistic infections in AIDS, is a sufficient basis for approval without need for followup studies. Other endpoints, however, might leave major questions unanswered. For example, a

modest effect on weight gain in AIDS without other demonstrated benefit, if considered an adequate basis for approval, while a clinical endpoint, might leave sufficient doubt as to the ultimate value of the effect so that further studies would be necessary. FDA intends to interpret this provision of the regulations with flexibility. This provision should also serve as a reminder, however, that for life-threatening diseases, the ultimate aim of therapy is improved survival as well as improved symptoms.

15. One comment asked FDA to clarify what a sponsor's obligation is to continue supplying medication on a compassionate basis if clinical efficacy is not demonstrated to FDA's satisfaction in postmarketing studies but individual patients appear to be benefiting from use of the drug.

Sponsors are not obligated to supply drugs on a "compassionate basis." Whether, if clinical studies did not show effectiveness, further availability of the drug would be appropriate under any mechanism would be determined case-by-case.

D. Promotional Materials

16. Three comments asserted that requiring advance submissions of promotional materials is both beyond FDA's statutory authority and is unnecessary. Although FDA stated in the proposal that it does not intend specifically to approve promotional materials, two comments contended that is the likely effect of advance submission. The comment cited section 502(n) of the act (21 U.S.C. 352(n)), which provides that no regulation promulgated under that provision shall require prior FDA approval of the content of any advertisement "except in extraordinary circumstances," and asserted that the "extraordinary circumstances" language would not apply to drugs approved under the accelerated approval program. One comment argued that submission of promotional material prior and subsequent to approval is unwarranted when dealing with treatments for serious or life-threatening illnesses where dissemination of the most current and timely information is important to the treating physician. One comment questioned why there would be any greater likelihood of misleading promotional claims for products approved under the proposed accelerated approval process than for drugs intended to treat serious or life-threatening diseases that are approved under the normal NDA procedures. The comment also expressed the hope that the proposed requirement for advance submission of promotional materials was not based upon an assumption that promotional materials for drugs intended to treat serious diseases are more likely to be misleading than promotional materials for other types of drugs because any such assumption would be unfounded. One comment argued that if an advertisement or labeling is inaccurate, the product is misbranded and FDA could then obtain injunctive relief, seize the product, and/or initiate criminal proceedings. Another comment considered requiring advance submission of promotional materials unreasonable because companies are not required to do so now. One comment questioned the legal authority for requiring presubmission of promotional material following approval of a drug product, and the reason for the requirement.

The agency believes that the requirements for submission of promotional materials in the context of accelerated approval are authorized by statute. Subsections 505(d)(4) and (d)(5) of the act provide that, in determining whether to approve a drug as safe and effective, the agency may consider not only information such as data from clinical studies but also "any other information" relevant to safety and effectiveness under the proposed conditions of use. Such information would include information about how the drug would be promoted. In determining whether the drug's proposed labeling would be "false or misleading" under section 505(d)(7) of the act, the agency is similarly authorized to evaluate "all material facts" during the approval process, including the facts about promotion.

FDA is also authorized by section 505(k) of the act to require reporting of information subsequent to approval necessary to enable the agency to determine whether there may be grounds for withdrawing the approval. Among the grounds for withdrawal specified in section 505(e) of the act are that the evidence reveals the drug is not shown to be safe and effective under its conditions of use. In addition, drug approval may be withdrawn if information shows the labeling to be false or misleading. Information on how the drug will be promoted is again relevant to whether the drug's marketing approval should be withdrawn. Section 701(a) of the act (21 U.S.C. 371(a)) generally authorizes FDA to promulgate regulations for the efficient enforcement of the act.

For biological products, additional authority in section 351 of the PHS Act (42 U.S.C. 262) authorizes the promulgation of regulations designed to ensure the continued safety, purity, and potency of the products. The content of promotional materials is important to the continued safe and effective use of biologicals.

Therefore, the provisions of the final rule requiring submission of promotional materials prior to approval under the accelerated approval procedures and subsequent to such approval are authorized by statutory provisions. FDA might also invoke the authority of section 502(n) of the act (21 U.S.C. 352(n)) to require prior approval of the content of any prescription drug advertisement in "extraordinary circumstances." Whether FDA could appropriately rely on section 502(n) of the act in promulgating §§ 314.550 and 601.45 need not be determined, however, because FDA is not relying upon section 502(n) of the act as legal authority for these (or any other) sections of the accelerated approval regulations.

The agency believes that advance submissions of promotional materials for accelerated approval products are warranted under the accelerated approval circumstances. The special circumstances under which drugs will be approved under these provisions and the possibility that promotional materials could adversely affect the sensitive risk/benefit balance justify review of promotional materials before and after approval. For example, if the promotional materials exaggerate the known benefits of the drug, wider and inappropriate use of the drug could be encouraged, with harmful results.

Similarly, high risk drugs that are approved based on postmarketing restrictions would not have been approved for use without those restrictions because the risk/benefit balance would not justify such approval. If promotional materials were to undermine the postmarketing restrictions, the health and safety of patients could be greatly jeopardized.

Although there is potential harm from any misleading promotion, and there is no reason to believe improper promotion is more likely in this setting than in others, the risk/benefit balance is especially sensitive in this setting. The relatively small data base available and the minimal published information available also can contribute to making the physician and patient populations particularly vulnerable under accelerated approval circumstances.

Reliance on court actions (such as seizures, injunctions, and criminal prosecutions) can be effective in ending false promotions, but can only be initiated after the fact, when harm has already occurred. Corrective efforts can

be helpful but are always somewhat delayed. Under the circumstances of accelerated approval, FDA believes that it is far preferable to avoid problems by reviewing the promotional materials in advance of drug approval and of dissemination of the materials.

17. Two comments supported the provision about submission of promotional materials. One comment urged the agency to require that specific patient information be included in promotional materials to indicate the fact that the drug's clinical benefit has not yet been established. For drugs approved under the restricted use provision, the comment recommended that the labeling specify in detail the exact restrictions placed on the drug. In both cases, the comment recommended that this patient information appear as boxed warnings.

Section 502(n) of the act and regulations at § 202.1(e)(1) (21 CFR 202.1(e)(1)) require prescription drug advertisements (promotional material) to contain, among other things, a true statement of information in brief summary relating to side effects, contraindications, and effectiveness, which would include warnings, precautions, and limitations on use. The information in brief summary relating to side effects, contraindications, and effectiveness is required to be based solely on the approved labeling. Therefore, to the extent that a drug's labeling reflects the extent of clinical exposure and includes appropriate warnings, a drug's promotional material would also include this information.

FDA regulations governing prescription drug labeling (21 CFR 201.56 and 201.57) require that serious adverse reactions and potential safety hazards, as well as limitations in use imposed by them, be included in the "Warning" section of the labeling. In the case of approval based upon effect on a surrogate endpoint, the "Indications and Usage" section of the labeling would reflect the nature of the demonstrated effect. If the approval is based on use restrictions, the label would also specify the restrictions.

FDA may require boxed warnings if there are special problems associated with a drug, particularly those that may lead to death or serious injury (21 CFR 201.57(e)). The agency does not agree that information related to clinical benefit or use restrictions for accelerated approval drugs would necessarily always require a boxed warning.

As indicated by §§ 314.550 and 601.45 of the final rule, applicants will be required to submit promotional materials prior to approval and in advance of dissemination subsequent to approval whether the product is a new drug, an antibiotic, or a biological product.

18. One comment contended that FDA review and approval of all promotional pieces before their use will indefinitely delay product marketing campaigns and other patient and physician educational activities, which are essential to market a product, thereby significantly diminishing the advantage of securing an early approval for the applicant. The comment further contended that the requirement to submit "all promotional materials * * * intended for dissemination or publication upon marketing approval" will be overly burdensome for FDA and will unnecessarily slow down the process for review of all materials, not just those for products subject to this proposed rule. The comment recommended that FDA only request for review the primary advertising pieces, such as the introductory letter to physicians, the main detail piece, and the main journal advertisement, but not the secondary materials, e.g., a letter to pharmacists, of the initial promotional campaign.

As previously discussed in this preamble, FDA will be reviewing an applicant's planned promotional materials both prior to approval of an application (reflecting the initial campaign) and subsequent to approval to ascertain whether the materials might adversely affect the drug's sensitive risk/benefit balance. Because all promotional materials, including those referred to by the comment as "secondary" materials, can have significant adverse effects if they are misleading, the agency does not agree that such materials should, as a matter of course, not be requested for review. Insofar as such materials may be directly derived from the introductory letter to physicians, or other materials characterized by the comment as "primary" materials, the additional time to review the derivative materials should not be extensive.

The agency does not agree with the comment's contention that the requirement to submit all promotional materials prior to and subsequent to approval will indefinitely delay marketing campaigns and educational activities or be overly burdensome to FDA reviewers. FDA is committed to rapid review and evaluation of all drugs considered for approval under this rule and will promptly review the promotional materials.

19. One comment suggested a passive, time-limited clearance system for review of advertising after the initial promotional campaign such as that used for review of IND's, which would allow the sponsor to proceed to use promotional materials after an allotted timeframe, such as 30 days, unless otherwise notified by FDA.

As indicated by this comment and others, additional clarification regarding both timing and content of the submissions of promotional materials seems useful. Therefore, the agency is revising proposed §§ 314.550 and 601.45 to make it clear that, unless otherwise informed by the agency, applicants must submit during the preapproval review period copies of all promotional materials intended for dissemination or publication within the first 120 days following marketing approval. The initial promotional campaign, sometimes referred to as the "launch campaign," often has a significant effect on the climate of use for a new product. As discussed elsewhere in this preamble, the risk/benefit balance of accelerated approval products is especially sensitive, and inappropriate promotion may adversely affect the balance with resulting harm.

There may be some instances in which promotional materials that had not been completed and submitted by the applicant prior to approval would be beneficial in fostering safe and effective use of the product during the first 120 days. Under revised §§ 314.550 and 601.45, FDA would have the discretion to consider such materials at a later time. An applicant who requested permission to include additional materials among those disseminated within the first 120 days following product approval would be notified of FDA's determination. If FDA agreed that dissemination of such materials was acceptable, the materials could then be disseminated or published upon notification.

For promotional materials intended for dissemination subsequent to the initial 120 days under §§ 314.550 and 601.45 FDA would review the submitted materials within 30 days of receipt. This 30-day period is meant to be time-limited, so that the applicant will be assured of no unnecessary delay. It will be important for the applicant to identify the materials being submitted appropriately, so that it is clear that the materials are subject to the 30-day review period. The agency intends to review all such materials promptly, and to notify the applicant of any identified problems as soon as possible. The agency expects that, if the agency notifies the applicant of significant objections to the proposed materials, no materials will be disseminated or published until the agency's objections are resolved. The applicant should plan to allow sufficient time after receiving

FDA's comments for resolving differences and incorporating requested changes in the submitted materials prior to dissemination or publication.

When FDA removes the requirement for advance submission of promotional material, the agency will continue to offer a prompt review of all voluntarily submitted promotional material.

E. Postmarketing Restrictions

FDA received many comments on the proposed requirement to limit distribution to certain facilities or physicians with special training or experience, or condition distribution on the performance of specified medical procedures if such restrictions are needed to counterbalance the drug's known safety concerns.

20. Several comments questioned FDA's authority to impose restrictions on distribution or use after an approved drug is marketed. Two comments disagreed with the statutory provisions cited by FDA in the proposed rule as its authority to impose restrictions on distribution or use stating that they refer only to FDA's general authority to ensure that drugs are not misbranded, which is an entirely separate issue. Another comment argued that section 503(b) of the act (21 U.S.C. 353(b)) contemplates that the issues warranting a restriction as to distribution are not factors in whether a drug product is "safe" for purposes of approval, but rather only whether the product must be limited to prescription status. Two comments said that, in the absence of specific statutory authority, the courts clearly have refused to permit FDA to impose restrictions on distribution and cited *American Pharmaceutical Association (APhA)* v. *Weinberger*, 377 F. Supp. 824, 829 n. 9 (D.D.C. 1974), *aff'd sub nom. APhA* v. *Mathews*, 530 F.2d 1054 (D.C. Cir 1976), a case concerning conditions placed on the approval of the drug methadone.

Some comments asserted that placing restrictions on the distribution of an approved drug to only certain facilities or physicians, or restricting use to certain medical procedures interferes with the practices of medicine and pharmacy, which the comments contended FDA does not have the authority to regulate.

The agency believes that the restrictions to ensure safe use contemplated for approvals under §§ 314.520 and 601.42 are authorized by statute. As discussed in the preamble to the proposed rule (57 FR 13234 at 13237), sections 501, 502, 503, 505, and 701 of the act provide broad authority for FDA to issue regulations to help assure the safety and effectiveness of new drugs.

The agency does not agree with the comments' contention that the misbranding provisions of the act are irrelevant. Section 502(a) of the act prohibits false or misleading labeling of drugs, including (under section 201(n) of the act) failure to reveal material facts relating to potential consequences under customary conditions of use. Section 502(f) of the act requires drugs to have adequate directions for use and adequate warnings against unsafe use, such as methods of administration, that may be necessary to protect users. In addition, section 502(j) of the act prohibits use of drugs that are dangerous to health when used in the manner suggested in their labeling. Each of these misbranding provisions is intended, at least in significant part, to protect consumers against the marketing of drugs that would not be safe under certain conditions of use. Section 701(a) of the act authorizes FDA to issue regulations for the efficient enforcement of the act. The restrictions on use contemplated by §§ 314.520 and 601.42 help to ensure that products that would be misbranded under section 502 of the act are not marketed.

The restrictions on use imposed under section 503 of the act, which relate to prescription use limitations, primarily concern whether a drug is safe for use except under the supervision of a licensed practitioner. While the agency agrees that the restrictions imposed under §§ 314.520 and 601.42 concerning distribution to certain facilities or physicians with special training or experience would be in addition to ordinary prescription limitation, FDA believes these restrictions are consistent with the spirit of section 503 of the act, as well as the other provisions of the act referred to, in ensuring safe use.

New drugs may be approved under section 505(d) of the act only if they are safe for use under the conditions prescribed, recommended, or suggested in the proposed labeling. In addition, for approval, a drug's labeling must not be false or misleading based on a fair evaluation of all material facts, which would include details about the conditions of use. For biological products, section 351(d) of the PHS Act also authorizes the imposition of restrictions through regulations "designed to insure the continued safety, purity, and potency" of the products.

The agency disagrees with the comments' implication that the courts' rulings in *American Pharmaceutical Association (APhA)* v. *Weinberger* mean there is no statutory authority to impose restrictions on distribution for accelerated approval drugs. The situation considered in that case is readily distinguishable from the situation addressed in §§ 314.520 and 601.42 of the accelerated approval regulations. The *APhA* case concerned a regulation that withdrew approval of NDA's for methadone, but permitted distribution to certain maintenance treatment programs and certain hospital and community pharmacies. Because methadone is a controlled substance within the provisions of the Controlled Substances Act, which is implemented by the Drug Enforcement Administration with the Justice Department, the district court concluded that the question of permissible distribution of the drug was within the jurisdiction of the Justice Department, not FDA. The Court of Appeals determined that the type of misuse associated with methadone, i.e., misuse by persons who have no intent to try to use drugs for medical purposes, differed from safety issues contemplated for control under section 505 of the act. In contrast, the restrictions contemplated under §§ 314.520 and 601.42 are precisely those deemed necessary to ensure that section 505 criteria have been met, i.e., restrictions to ensure that the drug will be safe under its approved conditions of use. It is clearly FDA's responsibility to implement the statutory provisions regarding new drug approval.

Nor does FDA agree that the provisions placing restrictions on distribution to certain facilities or physicians, or conditioned on the performance of certain medical procedures, impermissibly interfere with the practice of medicine and pharmacy. There is no legal support for the theory that FDA may only approve sponsors' drugs without restriction because physicians or pharmacists may wish to prescribe or dispense drugs in a certain way. The restrictions under these provisions would be imposed on the sponsor only as necessary for safe use under the extraordinary circumstances of the particular drug and use. Without such restrictions, the drugs would not meet the statutory criteria, could not be approved for distribution, and would not be available for prescribing or dispensing. The agency, as a matter of longstanding policy, does not wish to interfere with the appropriate practice of medicine or pharmacy. In this instance, the agency believes that rather than interfering with physician or pharmacy practice, the regulations permit, in exceptional cases,

approval of drugs with restrictions so that the drugs may be available for prescribing or dispensing.

21. One comment asserted that postmarketing restrictions on distribution to certain facilities or physicians with certain training or experience should be limited to rare occasions in cases of extreme hazard to patient safety in which toxicity of a particular drug may require it, but should not be applied because of insufficient efficacy data. Some comments argued that safety issues in the context of drug use should be addressed through patient management and effective product labeling, not through restricted distribution. In support of this argument, the comments cited the labeling of oncologic drugs, which provides physicians with adequate warnings and recommendations for their use without limiting distribution.

FDA agrees with these comments in part and intends to impose restrictions on distribution or use under this rule only in those rare instances in which the agency believes carefully worded labeling for a product granted accelerated approval will not assure the product's safe use. As stated in the preamble to the proposed rule (57 FR 13234 at 13237), FDA believes that the safe use of most prescription drugs will continue to be assured through traditional patient management by health professionals and through necessary safety warnings in the drug's labeling.

22. Two comments asked who will determine if restricted distribution should occur and what facilities or physicians with special training or experience will participate. Several comments expressed concern that restricted distribution and/or conditional use may not include all health care professionals who should participate in safe and effective patient care. Two organizations representing pharmacists asked that FDA develop functional and objective criteria that clearly establish the activities of pharmacists, physicians, and others in the care of patients receiving a drug under restricted distribution. The comments asserted that any health care professional that met these criteria should be allowed to participate in distribution of the drug and care of the patient. One comment recommended that any postmarketing restrictions on distribution or use of a drug approved under the accelerated approval process be developed by appropriate FDA advisory committees or panels expanded to include physicians and pharmacists with expertise in the therapeutic area being considered and in relevant drug distribution systems. Where appointment of pharmacists to these committees or panels is not feasible, the comment recommended that FDA use pharmacists in a consultant capacity. Another comment argued that current systems for drug distribution incorporate "checks and balances" such that prescribers and pharmacists work together to assure safe use of a drug by a patient. Two comments would oppose any restricted distribution system that allows manufacturers exclusively to deliver prescription drugs directly to patients. One comment asked whether FDA or the applicant would monitor the criteria for restricted distribution sites or physicians.

The medical reviewing divisions within FDA's CDER and CBER will determine if restricted distribution or use should be imposed. FDA will usually seek the advice of outside expert consultants or advisory committees before making this determination, and will, of course, consult with the applicant.

The agency does not agree that FDA should develop criteria that clearly establish the activities of health care professionals in the care of patients receiving a drug approved under this rule and for which restricted distribution has been imposed. Any postmarketing restrictions required under this rule will impose an obligation on the applicant to ensure that the drug or biological product is distributed only to the specified facilities or physicians. FDA will seek the advice of outside consultants with expertise in distribution systems or advisory committees when necessary in determining the need for or type of restricted distribution. The limitations on distribution or use imposed under this rule, including specific distribution systems to be used and the applicant's plan for monitoring compliance with the limitations, will have been agreed to by the applicant at the time of approval. The burden is on the applicant to ensure that the conditions of use under which the applicant's product was approved are being followed. As appropriate, FDA may monitor the sponsor's compliance with the specified terms of the approval and with the sponsor's obligations.

23. One comment recommended that proposed § 314.520 be modified to include therapeutic outcomes monitoring as a third example of a permissible postmarketing restriction. The comment defined therapeutic outcomes monitoring as the systematic and continual monitoring of the clinical and psychosocial effects of drug therapy on a patient which achieves the objective of preventing problems with drug therapy. Some comments argued that through therapeutic outcomes monitoring, a physician, a pharmacist, and a patient can work together to prevent problems with drug therapy by being constantly alert to signs of trouble. One comment said that indicator data can be routinely reported to a central collection point for utilization review by health care professionals, followed by educational programs to further improve the efficacy of drug therapy.

The postmarketing restrictions set forth in the proposal and in this final rule are intended to enhance the safety of a drug whose risks would outweigh its benefits in the absence of the restriction. Therapeutic outcomes monitoring does not contribute to that enhancement, and would not be required under this rule.

24. Some comments asked that FDA clarify how products will move from restrictive status to a regular prescription drug status. The comments asserted that all conditions associated with accelerated approval should automatically terminate following completion of confirmatory clinical trials; one comment urged FDA to explicitly state this in the final rule. One comment asserted that restrictions should automatically be removed 180 days after a supplemental application containing the data from the postmarketing study has been filed if FDA has not yet acted upon the supplemental application and the product should be deemed approved as if by "traditional" procedures and all other provisions of the act should apply, e.g., the applicant must have a formal hearing before removal of the product from the market.

FDA will notify the applicant when a particular restriction is no longer necessary for safe use of the product. In the case of drugs approved with a requirement for postapproval studies, FDA would expect that all of the postapproval requirements set forth in this rule, i.e., submission of promotional material and use of expedited withdrawal procedures, would no longer apply after postmarketing studies have verified and described the drug's clinical benefit. Concurrent with the review of the postmarketing studies, if requested, FDA will also review the need to continue any restrictions on distribution that have been imposed. In the case where restrictions on distribution or use have been imposed, such restrictions would be eliminated only if FDA determines that safe use of the product can be assured without them, through appropriate labeling. In

some cases, however, that assurance could not be expected and the nature of the specific safety issue raised by the product might require continued restrictions. FDA has added new §§ 314.560 and 601.46 to state when postapproval requirements will no longer apply and state that the applicant may petition the agency, in accordance with 21 CFR 10.30, at any time to remove specific postapproval requirements.

With respect to the suggested time period for removing restrictions on distribution or use following submission of a supplemental application containing the data from a postmarketing study, FDA does not believe it should prescribe any specific time period. These applications will receive a priority rating and FDA is firmly committed to expedited review of an application considered for accelerated approval and all data submitted from a postmarketing study to verify clinical benefit and believes most reviews will be completed and action taken within 180 days.

25. One comment argued that, as proposed, it is not clear how accelerated approval would apply to drugs which fall under the conditions described in §§ 314.520 and 601.42, which state the postmarketing restrictions on distribution or use that FDA may apply, because the language of these sections explicitly states that the sections apply to products "shown to be effective," which are already adequately covered by the act. To the comment, the language "shown to be effective" implies that full Phase 3 efficacy trials have been conducted, assessed, and deemed to demonstrate that the drug is effective for its proposed use. If the clinical data demonstrate that the product has an acceptable safety profile, the safe use of the drug should be addressed in the product labeling. Thus, the comment argued that §§ 314.520 and 601.42 should not be included in new subpart H of part 314 and subpart E of part 601, respectively, which deal with accelerated approval because these sections explicitly apply to products shown to be effective under a full drug development program.

Sections 314.520 and 601.42 apply not only to drugs and biological products approved on the basis of an effect on a surrogate endpoint but also to drugs and biological products that have been studied for their safety and effectiveness in treating serious or life-threatening illnesses using clinical endpoints and that have serious toxicity. In either case, if the products are so potentially harmful that their safe use cannot be assured through carefully worded labeling, FDA will approve the products for early marketing only if postmarketing restrictions on distribution or use are imposed. The phrase "shown to be effective" was not intended to distinguish drugs approved under new subpart H from drugs approved under any other subpart of the regulations. All drugs approved will have had effectiveness demonstrated on the basis of adequate and well-controlled studies, whether the endpoint of the studies is a surrogate endpoint or a clinical endpoint.

26. One comment expressed concern that the proposed restricted distribution or use provisions would restrict or eliminate the wholesale distribution of drugs approved through the accelerated approval process.

The limitations on distribution or use required under this rule are imposed on the applicant. Therefore, the burden is on the applicant to ensure that the conditions of use under which the applicant's product was approved are being followed. This rule does not specify how a manufacturer will distribute its product to those receiving the product under the approval terms. FDA will only determine which facilities or physicians may receive the drug, and the applicant will have agreed to this limitation on distribution or use.

27. One comment expressed concern that the proposed postmarketing restriction provision does not preclude a physician to whom restricted distribution applies from prescribing drugs approved under the accelerated approval process for unapproved (off-label) uses.

The comment is correct that this rule does not itself prevent a physician from prescribing a drug granted accelerated approval for an unapproved use. Under the act, a drug approved for marketing may be labeled, promoted, and advertised by the manufacturer only for those uses for which the drug's safety and effectiveness have been established and that FDA has approved. Physicians may choose to prescribe the drug for a condition not recommended in labeling. Such off-label use would, of course, be carried out under the restrictions imposed under this section. FDA also believes that physicians will be cognizant of the product's special risks and will use such drugs with particular care. The labeling of products approved under this rule will include all necessary warnings and full disclosure labeling would generally reflect the extent of clinical exposure to the drug.

F. Postmarketing Studies

28. Three comments argued that FDA does not have the authority to require postmarketing studies to be performed as a condition of approval based on a "surrogate" endpoint. One comment stated that it is widely accepted that the act empowered the agency to define the type and extent of efficacy data necessary to approve a product application. If a surrogate marker can be shown to be sufficiently related to actual patient benefit, then, the comment asserted, data regarding the effect of a drug on a surrogate marker constitute acceptable proof of efficacy under the act. Two comments urged FDA to continue to ask applicants to agree voluntarily to perform postmarketing studies when medically warranted as is the current policy under the traditional approval process. One comment expressed concern that requiring postmarketing studies may become the norm rather than the exception.

The agency's response to comment 1. explained the circumstances in which FDA might conclude that a drug should be marketed on the basis of an effect on a surrogate endpoint reasonably likely to predict clinical benefit only if studies were carried out to confirm the presence of the likely benefit. As discussed in the preamble to the proposed rule (57 FR 13234 at 13236), FDA believes that it is authorized by law to require postmarketing studies for new drugs and biological products. Section 505(d) of the act provides for the approval of new drugs for marketing if they meet the safety and effectiveness criteria set forth in section 505(d) of the act and the implementing regulations (21 CFR part 314). As discussed in the proposed rule, to demonstrate effectiveness, the law requires evidence from adequate and well-controlled clinical studies on the basis of which qualified experts could fairly and responsibly conclude that the drug has the effect it is purported to have. Under section 505(e) of the act, approval of a new drug application is to be withdrawn if new information shows that the drug has not been demonstrated to be either safe or effective. Approval may also be withdrawn if new information shows that the drug's labeling is false or misleading.

Section 505(k) of the act authorizes the agency to promulgate regulations requiring applicants to make records and reports of data or other information that are necessary to enable the agency to determine whether there is reason to withdraw approval of an NDA. The agency believes that the referenced reports can include additional studies to evaluate the clinical effect of a drug approved on the basis of an effect on a surrogate endpoint. Section 701(a) of the act generally authorizes FDA to issue

regulations for the "efficient enforcement" of the act.

With respect to biological products, section 351 of the PHS Act provides legal authority for the agency to require postmarketing studies for these products. Licenses for biological products are to be issued only upon a showing that they meet standards "designed to insure the continued safety, purity, and potency of such products" prescribed in regulations (42 U.S.C. 262(d)). The "potency" of a biological product includes its effectiveness (21 CFR 600.3(s)).

The agency notes that it has in the past required postmarketing studies as a prerequisite for approval for some drugs (see 37 FR 201, January 7, 1972; and 37 FR 26790, December 15, 1972).

29. One comment recommended that FDA require that specific timelines for completion of the required postmarketing studies be included in the marketing application. The comment further suggested that, if the sponsor fails to meet its timelines, approval of its application be withdrawn, or in the event it is difficult to withdraw approval of drugs for serious or life-threatening diseases, FDA should establish substantial fines and penalties for sponsors that deliberately withhold information from FDA regarding the preliminary results and the progress of their postmarketing studies, or delay the completion of such studies. The comment also urged FDA to publish in the **Federal Register** identification of manufacturers who are not meeting their obligation to complete the required postmarketing studies on time. These recommendations were prompted by the comment's concern that once a manufacturer is granted approval for its product, the manufacturer will have little incentive to complete postmarketing studies in a timely manner, especially if the preliminary results of such studies indicate that the drug may not be safe and/or effective. Another comment urged FDA to include in the final rule language that requires the participation of pharmacists in postmarketing studies because pharmacists can serve as an additional source of information on therapeutic outcomes of patients taking drugs approved under this rule and monitoring for such drugs.

The agency expects that the requirement for postmarketing studies will usually be met by studies already underway at the time of approval and that there will be reasonable enthusiasm for resolving the questions posed by those studies. The plan for timely completion of the required postmarketing studies will be included in the applicant's marketing application. In addition, in accord with the annual reporting requirements at § 314.81(b)(2)(vii) (21 CFR 314.81(b)(2)(vii), an NDA applicant is required to provide FDA with a statement of the current status of any postmarketing studies. FDA declines to impose the sanctions suggested by the comment for failure of an applicant to meet its plans for completion of a postmarketing study. FDA believes this rule applies appropriate regulatory sanctions. Under the proposed rule and this final rule, FDA may withdraw approval of an application if the applicant fails to perform the required postmarketing study with due diligence.

FDA believes that it is not within the scope of this rule to establish the role of pharmacists in postmarketing studies. That role should more properly be defined by the clinical investigator and each institution or facility at which a postmarketing study is conducted.

30. One comment asserted that the proposal sets forth an inherent contradiction between the way FDA evaluates the benefit and risk for drugs today and the way the proposal contemplates. The comment argued that now, if postmarketing data raise questions about the risk associated with a drug product, FDA considers that data along with the other data known about the product, and determines whether, based on the overall knowledge about the drug, there is a need to seek withdrawal of approval. Under this proposal, if the postmarketing study data raised questions about the risk of the product, FDA would seek withdrawal of approval, whether or not the new data really made a fundamental difference to what is known about the benefit and risk of the product.

FDA does not agree that the contradiction described by the comment exists. Under the circumstances of accelerated approval, approval would be based on a weighing of the benefit suggested by the effect on the surrogate endpoint against known and potential risks of the drug. Should well-designed postapproval studies fail to demonstrate the expected clinical benefit, the benefit expected at the time of approval (reasonably likely to exist) would no longer be expected and the totality of the data, showing no clinical benefit, would no longer support approval. This evaluation of the data is not different from considerations that would apply in evaluating data in the case of a drug approved under other provisions of the regulations.

31. Two comments expressed the view that the proposed requirement for postmarketing studies may raise important ethical questions because once a drug product is approved, it may be unethical, depending on the circumstances, for a physician to conduct a study using a placebo control. One comment also contended that a postmarketing study requirement could compromise the NDA holder's ability to enroll sufficient numbers of patients in the study when the new approved drug and possible alternative therapies are widely available to patients.

Usually, and preferably, because of problems suggested in the comment, the requirement for postmarketing studies will be met by studies already underway at the time of approval, e.g., by completion of studies that showed an effect on the surrogate. FDA recognizes that ethical considerations will play a central role in the type of study carried out, a choice that will depend upon the type and seriousness of the disease being treated, availability of alternative therapies, and the nature of the drug and the patient population. There often are alternatives to use of a placebo control, including active control designs and dose-response studies that can satisfy both the demands of ethics and adequacy of design.

32. One comment contended that the term "postmarketing study" is used inconsistently in the proposed rule. The comment argued that "postmarketing study" is an accepted regulatory term of art which, to this point, has referred to studies conducted to confirm safety (not efficacy), after an approval has been granted, whereas in this proposal, a "postmarketing study" refers to a study required to establish clinical efficacy (i.e., a Phase 3 study), but not necessarily safety, although safety data will be collected. To prevent confusion and to differentiate between these required postmarketing confirmatory efficacy studies and safety studies traditionally conducted after approval and to clarify that products granted accelerated approval have been approved on the basis of Phase 2 (surrogate endpoint) data, the comment suggested changing the term "postmarketing study" to "Phase 3 study" in this rule except where traditional postmarketing studies are intended. The comment also suggested that the term "Phase 3 study" be defined as a study required to confirm findings of efficacy based upon surrogate data collected in Phase 2, which will be conducted after an accelerated approval has been granted and will be required before restrictions set forth in § 314.520 are removed.

The agency does not believe that the comment has accurately described accepted meanings of various terms.

The term postmarketing study does not refer to any particular kind of study, but to studies carried out after a drug is marketed, often as part of an agreement by a sponsor to do so. These have included pharmacokinetic, drug-drug interaction, and pediatric studies, studies of dose-response or of higher doses, and studies of new uses. The term is not limited to safety studies. Moreover, Phase 2 and 3 studies are not distinguished by the endpoints chosen. Phase 3 hypertension studies, for example, still measure blood pressure, not stroke rate. The agency believes that the use of the "postmarketing study" in the final rule is appropriate and consistent.

G. Withdrawal of Approval

33. One comment supported the proposed withdrawal of approval procedure. Other comments asserted that the proposed procedure does not provide the applicant with the procedural safeguard of a formal evidentiary hearing guaranteed by section 505 of the act and the Administrative Procedure Act (APA). As an example, the comments said that based on a finding of a single study failing to show clinical benefit or misuse of any promotional material, an approved new drug would be subject to withdrawal from the market with only a minimal opportunity for the NDA holder to be heard. The comments argued that section 505(e) of the act guarantees applicants "due notice and opportunity for a hearing" on withdrawal of an NDA in compliance with APA hearing standards, thus FDA must conduct hearings on withdrawals of NDA's using the formal adjudicatory procedures of the APA. One comment asserted that, under the proposed procedure, there is the absence of a discernible legal standard, an inability to cross-examine, the prosecuting attorney and judge are one and the same person, and there is a lack of even minimal formal evidentiary procedures. The comment expressed doubt that the proposed procedure would be sufficient to create a record suitable for review by a Court of Appeals, which must be able, on the basis of such a record, to determine whether the approval is supported by "substantial evidence."

FDA believes the withdrawal procedures set forth in proposed §§ 314.530 and 601.43 and in this final rule are consistent with relevant statutes and provide applicants adequate due process. As stated in the proposed rule, in issuing its general procedural regulations, FDA decided to afford NDA holders an opportunity for a formal evidentiary hearing even though the courts had not decided that such a hearing was necessarily legally required (see 40 FR 40682 at 40691, September 3, 1975). In promulgating its procedural regulations, FDA also determined that a formal evidentiary hearing is not required before withdrawing approval of biological products, but that it would be appropriate to apply the same procedures to biological products as to drug removal (see 40 FR 40682 at 40691).

Through the hearing process in this final rule, as in the proposed rule, applicants will be afforded the opportunity to present any data and information they believe to be relevant to the continued marketing of their product. The proposed process also would have permitted the presiding officer, the advisory committee members, a representative of the applicant, and a representative of the Center that initiates the withdrawal proceedings to question any person during or at the conclusion of the person's presentation. As discussed below in response to a comment, FDA has decided to allow up to three representatives of the applicant and of the Center to question presenters. Participants could comment on or rebut information and views presented by others. As with ordinary 21 CFR part 15 hearings, the hearing will be transcribed. Subsequent to the hearing, the Commissioner of Food and Drugs would render a final decision on the matter. The agency believes that the administrative record created through this process would be sufficient for judicial review.

The agency emphasizes that, as part of the approval process under this rule, applicants will have agreed that these withdrawal procedures apply to the drug for which they seek approval; applicants objecting to these procedures may forego approval under these regulations and seek approval under the traditional approval process. Under such circumstances, applicants would not have the benefit of accelerated approval; if the drug were subsequently approved, however, before withdrawal of the approval, the applicant would have an opportunity for a 21 CFR part 12 hearing.

34. One comment noted that the "imminent hazard" provision of section 505(e) of the act allows FDA to suspend approval of a product, immediately, if it is found to pose an imminent hazard to the public health. As an alternative to the proposed withdrawal procedure or in addition to the "imminent hazard" statutory provision, the comment suggested that, when confronted with a dangerous product on the market, FDA could request that the applicant voluntarily withdraw its product, and most applicants would comply if a legitimate hazard exists.

As noted in the proposed rule, FDA and applicants have often reached mutual agreement on the need to remove a drug from the market rapidly when significant safety problems have been discovered. However, applicants usually have been unwilling to enter into such agreements when doubts about effectiveness have arisen, such as following the review of effectiveness of pre-1962 approvals carried out under the Drug Efficacy Study Implementation (DESI) program. For drugs approved under the accelerated procedure regulations, the risk/benefit assessment is dependant upon the likelihood that the surrogate endpoint will correlate with clinical benefit or that postmarketing restrictions will enable safe use. If the effect on the surrogate does not translate into a clinical benefit, or if restrictions do not lead to safe use, the risk/benefit assessment for these drugs changes significantly. FDA believes that if that occurs, rapid withdrawal of approval as set forth in this rule is important to the public health.

35. Under the proposed withdrawal procedures, in addition to other persons, one representative of the Center that initiates the withdrawal proceedings may question participants at a withdrawal of approval hearing. One comment objected to limiting the Center to one representative because detailed knowledge about a drug product is likely to be available from several scientists.

The proposed limitation of questioning to single representatives of the initiating Center and the applicant was intended to make the proceedings manageable. On further consideration, the agency has determined that it would be appropriate and manageable to allow up to three persons to be designated as questioners for the applicant and for FDA. Sections 314.530(e)(2) and 601.43(e)(2) have been revised accordingly.

36. Some comments questioned FDA's ability to withdraw approval under the proposed procedures efficiently or effectively because of: (1) The lack of assurance that the results of postmarketing studies will be promptly provided to FDA; (2) limited agency resources to review study results and act upon them promptly; (3) the difficulties associated with establishing that an approved drug is "ineffective;" and (4) political pressure not to rescind the approval of NDA's for drug products that may lack evidence of effectiveness.

especially if no clearly effective alternative treatments are available. One comment offered the opinion that where a drug shows only modest evidence of benefit, perhaps on a surrogate endpoint, and only shows equivocal evidence of clinical efficacy in postmarketing studies it would be difficult and socially disruptive to withdraw approval and remove the drug from the market if the drug has become well established and accepted, and there is no issue of toxicity. Another comment believed it would be difficult to withdraw approval of a drug that may be beneficial in a subpopulation but which, in fact, has not been shown to be efficacious in broader patient population studies. The comments suggested the need for a lesser sanction.

Another comment suggested that expediting removal of a product from the market could be accomplished by using a procedure like the "imminent hazard" provision of the act, i.e., immediate removal of the drug from the market if any of the conditions listed in proposed § 314.530 were met followed by a hearing.

Although the potential difficulties cited by the comments are real, they are not fundamentally different from determinations FDA regularly must make in carrying out its responsibilities. The new regulations provide for an expedited procedure to withdraw approval; they do not guarantee that results of studies will be wholly unambiguous or that FDA will always be able to prevail in its view as to the need for withdrawal, any more than current withdrawal procedures do. The studies being carried out under these provisions will be conspicuous and important and their completion will be widely known. There is no reason to believe their results would or could be long hidden. A study that fails to show clinical effectiveness does not prove a drug has no clinical effect but it is a study that, under § 314.530, will lead to a withdrawal procedure because it has failed to show that the surrogate endpoint on which approval was based can be correlated with a favorable clinical effect. This may have occurred because the study was poorly designed or conducted; while FDA will make every effort to avoid this, the commercial sponsor has the responsibility for providing the needed evidence confirming clinical benefit. As previously discussed, §§ 314.510 and 601.41 have been revised to clarify that required postmarketing studies must also be adequate and well-controlled. The possibility that an ineffective drug has become "accepted" is not a basis for continued marketing. FDA intends to implement the provisions of § 314.530 as appropriate; data that are ambiguous will inevitably lead to difficult judgments.

A drug with clear clinical effectiveness in a subset of the population, but not in the population described in labeling, would have its labeling revised to reflect the data. Withdrawal would be inappropriate under such circumstances.

If an imminent hazard to the public health exists, the Secretary of Health and Human Services may suspend approval of an application and then afford the applicant an opportunity for an expedited hearing. In the absence of a significant hazard requiring immediate withdrawal, FDA believes the expedited procedure described in the rule satisfies the need for prompt action while, at the same time, allowing opportunity for discussion and debate before withdrawal.

37. One comment noted that the proposed rule would allow FDA to withdraw approval for failure to perform the required postmarketing studies with due diligence. The comment asserted that the act does not permit FDA to withdraw approval on this ground. Another comment, however, suggested that because proposed §§ 314.530 and 601.43 cite grounds for withdrawal of approval that are not grounds under the act, the language of these proposed sections should be revised to use language that closer aligns to that used in the act, e.g., describe a "postmarketing study" in statutory language.

FDA reaffirms the position expressed in the preamble to the proposal (57 FR 13234 at 13239) that there is adequate authority under the act to withdraw approval of an application for the reasons stated under proposed §§ 314.530 and 601.43, which include failure of an applicant to perform the required postmarketing study with due diligence. Section 505(e) of the act authorizes the agency to withdraw approval of an NDA if new information shows that the drug has not been demonstrated to be either safe or effective. Approval may also be withdrawn if the applicant has failed to maintain required records or make required reports. In addition, approval may be withdrawn if new information, along with the information considered when the application was approved, shows the labeling to be false or misleading.

For biological products, section 351(d) of the PHS Act authorizes approval of license applications under standards designed to ensure continued safety, purity, and potency. "Potency" for biological products includes effectiveness (21 CFR 600.3(s)). The PHS Act does not specify license revocation procedures, except to state that licenses may be suspended and revoked "as prescribed by regulations."

For drugs approved under § 314.510, FDA will have determined that reports of postmarketing studies are critical to the risk/benefit balance needed for approval; if those reports are not forthcoming, then, under authority of section 505(d) of the act, the drug cannot on an ongoing basis meet the standards of safety and efficacy required for marketing under the act. Therefore, it is important to ensure that the applicant make a good faith effort to complete any required postmarketing studies in a timely manner so that FDA can rapidly determine whether the surrogate endpoint upon which the drug was approved has been confirmed to correlate with clinical benefit. Failure to submit the study results in a timely fashion would also constitute failure to make a required report. Similarly, without submission of the information from required postmarketing studies on biological products approved under these procedures, the biological product is not assured of continued safety and effectiveness. The license application may, therefore, appropriately be revoked as described in § 601.43.

FDA does not find the statements of the grounds for withdrawal of approval under §§ 314.530 and 601.43 of this rule inconsistent with statutory language or ambiguous. The agency notes that, in the event none of the grounds for withdrawal specifically listed in § 314.530 or § 601.43 applies, but another ground for withdrawal under section 505 of the act or section 351 of the PHS Act and implementing regulations at 21 CFR 314.150 or 601.5 does apply, the agency will proceed to withdraw approval under traditional procedures.

38. Two comments expressed concern that it may be difficult for the agency to enforce the requirement that postmarketing studies be pursued with due diligence. The comments asked what would happen if a sponsor using due diligence is unable to recruit enough patients, or if the sponsor questions the validity of the data from the required postmarketing study, and would clumsy data management be seen as sufficient reason to rescind approval for a marketed drug? Another comment stated that once a product is approved and, by definition, provides a "meaningful therapeutic benefit over existing therapies," study accrual may drop off dramatically as patients may refuse to receive the "old" therapy or

placebo, or physicians may consider it unethical not to treat all patients with the approved indication with the new drug or biological product. Under these circumstances, the comment expressed the opinion that neither the sponsor nor the product should be penalized, nor should there be a threat to withdraw approval. Based on FDA's past history in postmarketing studies, which one comment characterized as resulting in poorly done studies, studies conducted much later than agreed upon, or not at all, the comment expressed the opinion that the "due diligence" with which applicants are expected to carry out postmarketing studies may be an overly great expectation. One comment asked FDA to give examples of when it may withdraw approval if "other evidence demonstrates that the drug product is not shown to be safe or effective under its conditions of use" (proposed §§ 314.530(a)(6) and 601.43(a)(6)).

FDA does not agree that it will be difficult to enforce the "due diligence" provision of this rule. The "due diligence" provision was designed to ensure that the applicant makes a good faith effort to conduct a required postmarketing study in a timely manner to confirm the predictive value of the surrogate marker or other indicator. Any requirement for postmarketing studies will have been agreed to by the applicant at the time of approval, and if the study is not conducted in a timely manner as agreed to by the applicant, approval of the applicant's application will be withdrawn. FDA will expect any required postmarketing study to be conducted in consultation with the agency. Therefore, should the applicant encounter problems with subject enrollment in a study or ethical difficulties about the type of study to conduct, FDA expects the applicant to discuss these problems with the agency and reach agreement on their resolution.

Examples of other evidence demonstrating the drug product is not shown to be safe and effective could include further studies of the effect of the drug and the surrogate endpoint that fail to show the effect seen in previous studies, new evidence casting doubt on the validity of the surrogate endpoint as a predictor of clinical benefit, or new evidence of significant toxicity.

39. Some comments objected to withdrawal of approval of a drug product approved under the accelerated approval process because of perceived misconduct by the applicant, such as failure to perform a required postmarketing study with due diligence or use of promotional materials that are false or misleading. The comments argued that the primary purpose of the accelerated approval process is to provide improved treatments to desperately ill patients at the earliest possible time, and withdrawal of approval of the new treatments for reasons not directly related to safety or efficacy undermines the purpose of the proposed rule. Two comments suggested that correction of the promotional material without interruption of access to the drug would be a better approach. Another comment suggested that there may be circumstances where continued access to the drug, if accompanied by informed consent, would be appropriate even if substantial questions arise about a product's safety and effectiveness. One comment urged that anticipated withdrawal of approval be preceded by measures to ensure that patients and their physicians will have an uninterrupted supply until alternative treatment arrangements can be made.

The need for "due diligence" in conducting the agreed to postmarketing studies is discussed in paragraph 37. The reasons for concern about misleading promotional materials are discussed under paragraph 16. With respect to promotional materials, FDA expects that, in most cases, any disagreements between the applicant and FDA will be resolved through discussion and modification of the materials, so that the drug or biological product can continue to be marketed. If, however, FDA concludes that the promotional materials adversely affect the risk/benefit conclusion supporting the drug's marketing, the agency intends to minimize the risk to the public health by removing the product from the market through the withdrawal procedures in this rule.

40. One comment expressed concern that the proposed withdrawal procedure may give the appearance of bias or preconceived notions on the part of the agency because the final decision to withdraw approval of a drug would be made by the Commissioner of Food and Drugs and the intention to withdraw approval of the drug will already have been determined by the agency.

Under the withdrawal provisions of this rule, FDA's CDER or CBER, rather than the Commissioner, will initiate the withdrawal proceedings. The withdrawal process will begin with a letter from CDER or CBER notifying the applicant that the Center proposes to withdraw marketing approval and stating the reasons for the proposed action. Although separation of functions will not apply under the provisions of §§ 314.530 or 601.43, the Commissioner's decision regarding withdrawal would not occur until after the applicant had an opportunity for hearing as described in those sections. The Commissioner would then expect to review the issues with objectivity and fairness having had the benefit of the presentations and discussions at the hearing and of the advisory committee's recommendations.

H. Safeguards for Patient Safety

41. One comment asked if drugs approved under the accelerated approval process will be held to the same standards concerning postmarketing safety as drugs approved by the traditional process.

As discussed in the preamble to the proposed rule, applicants gaining approval for new drugs through the accelerated approval procedures will also be expected to adhere to the agency's longstanding requirements for postmarketing recordkeeping and safety reporting (see 21 CFR 314.80 and 314.81). Information that comes to FDA from the applicant or elsewhere that raises potential safety concerns will be evaluated in the same manner that such information is evaluated for drugs approved under the agency's traditional procedures. If the postmarketing information shows that the risk/benefit assessment is no longer favorable, the agency will act accordingly to remove the drug from the market.

42. One comment urged FDA, if the proposed rule were adopted, to require written informed consent so that patients would know that the drugs with which they were being treated had risks and that the benefits had not been adequately established.

The agency does not agree that patients using drug products approved under the accelerated approval regulations should be asked to provide written informed consent. Drugs approved under these provisions are not considered experimental drugs for their approved uses. Like all approved drugs, drugs approved under these provisions will have both risks and benefits. As previously discussed in this preamble, for drugs approved based on studies showing an effect on a surrogate endpoint, the approved labeling will describe that effect. In addition, the labeling will contain information on known and potential safety hazards and precautionary information. As with all prescription drugs, the physician has the responsibility for appropriately advising the patient regarding the drug being prescribed.

43. One comment asked that FDA require manufacturers to maintain an updated list of names, addresses, and phone numbers of physicians prescribing their products approved

under this rule, and in the case of recall or withdrawal of approval, require manufacturers to contact these physicians and encourage them to notify their patients.

FDA does not believe such a procedure is necessary. Furthermore, maintaining such a registry for drugs prescribed through pharmacies would be very difficult. Agency experience with recalls and product withdrawals indicates that the methods of notification that have been developed for such circumstances are adequate.

44. One comment recommended that FDA require patient package inserts (PPI's) for all drugs granted accelerated approval that would state the specific restrictions placed on a drug product and/or the reason for requiring postmarketing studies. In addition, the comment recommended that FDA require the manufacturer to include an adverse drug reaction "hotline" phone number in the PPI along with an FDA phone number. The PPI should inform the patient to report immediately any adverse drug reaction experienced to his or her doctor, the manufacturer, and FDA, and the manufacturer should be required to contact FDA immediately after receiving a report of a serious adverse reaction.

FDA concludes that patient package inserts are not routinely needed for drugs granted accelerated approval, although if circumstances made one appropriate, one would be developed for a particular drug. As with any prescription drug, the approved labeling for a product granted accelerated approval will contain information about the safe and effective use of the product, including all necessary warnings and the extent of clinical exposure. In addition, the conditions of use will be carefully worded to reflect the nature of the data supporting the product's approval. Physicians have the responsibility to inform patients about the safe and effective use of an approved product. Labeling includes suggestions to the physician concerning information to be provided to patients.

The agency notes that in this final rule limited editorial changes have been made to the wording of the proposed rule. The agency has determined that these changes do not effect the intent of the proposed rule.

V. Economic Impact

In accordance with Executive Order 12291, FDA has carefully analyzed the economic effects of this final rule and has determined that it is not a major rule as defined by the Order. Indeed, because firms will not be forced to use the accelerated approval mechanism, applicants will most probably choose to take advantage of the program only where its use is expected to reduce net costs, Similarly, the final rule does not impose a significant economic impact on a substantial number of small entities so as to require a regulatory flexibility analysis under the requirements of the Regulatory Flexibility Act of 1980.

VI. Environmental Impact

The agency has determined under 21 CFR 25.24(a)(8) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

VII. Paperwork Reduction Act of 1980

This rule does not contain new collection of information requirements. Section 314.540 does refer to regulations that contain collection of information requirements that were previously submitted for review to the Director of the Office of Management and Budget (OMB) under section 3504 of the Paperwork Reduction Act of 1980 (Adverse Drug Experience Reporting, OMB No. 0190–0230).

List of Subjects

21 CFR Part 314

Administrative practice and procedure, Confidential business information, Drugs, Reporting and recordkeeping requirements.

21 CFR Part 601

Biologics, Confidential business information.

Therefore, under the Federal Food, Drug, and Cosmetic Act, the Public Health Service Act, and under authority delegated to the Commissioner of Food and Drugs, 21 CFR parts 314 and 601 are amended as follows:

PART 314—APPLICATIONS FOR FDA APPROVAL TO MARKET A NEW DRUG OR AN ANTIBIOTIC DRUG

1. The authority citation for 21 CFR part 314 continues to read as follows:

Authority: Secs. 201, 301, 501, 502, 503, 505, 506, 507, 701, 706 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 331, 351, 352, 353, 355, 356, 357, 371, 376).

2. Subpart H consisting of §§ 314.500 through 314.560 is added to read as follows:

Subpart H—Accelerated Approval of New Drugs for Serious or Life-Threatening Illnesses

Sec.
314.500 Scope.
314.510 Approval based on a surrogate endpoint or on an effect on a clinical endpoint other than survival or irreversible morbidity.
314.520 Approval with restrictions to assure safe use.
314.530 Withdrawal procedures.
314.540 Postmarketing safety reporting.
314.550 Promotional materials.
314.560 Termination of requirements

Subpart H—Accelerated Approval of New Drugs for Serious or Life-Threatening Illnesses

§ 314.500 Scope.

This subpart applies to certain new drug and antibiotic products that have been studied for their safety and effectiveness in treating serious or life-threatening illnesses and that provide meaningful therapeutic benefit to patients over existing treatments (e.g., ability to treat patients unresponsive to, or intolerant of, available therapy, or improved patient response over available therapy).

§ 314.510 Approval based on a surrogate endpoint or on an effect on a clinical endpoint other than survival or irreversible morbidity.

FDA may grant marketing approval for a new drug product on the basis of adequate and well-controlled clinical trials establishing that the drug product has an effect on a surrogate endpoint that is reasonably likely, based on epidemiologic, therapeutic, pathophysiologic, or other evidence, to predict clinical benefit or on the basis of an effect on a clinical endpoint other than survival or irreversible morbidity. Approval under this section will be subject to the requirement that the applicant study the drug further, to verify and describe its clinical benefit, where there is uncertainty as to the relation of the surrogate endpoint to clinical benefit, or of the observed clinical benefit to ultimate outcome. Postmarketing studies would usually be studies already underway. When required to be conducted, such studies must also be adequate and well-controlled. The applicant shall carry out any such studies with due diligence.

§ 314.520 Approval with restrictions to assure safe use.

(a) If FDA concludes that a drug product shown to be effective can be safely used only if distribution or use is restricted, FDA will require such postmarketing restrictions as are needed to assure safe use of the drug product, such as:

(1) Distribution restricted to certain facilities or physicians with special training or experience; or

(2) Distribution conditioned on the performance of specified medical procedures.

(b) The limitations imposed will be commensurate with the specific safety concerns presented by the drug product.

§ 314.530 Withdrawal procedures.

(a) For new drugs and antibiotics approved under §§ 314.510 and 314.520, FDA may withdraw approval, following a hearing as provided in part 15 of this chapter, as modified by this section, if:

(1) A postmarketing clinical study fails to verify clinical benefit;

(2) The applicant fails to perform the required postmarketing study with due diligence;

(3) Use after marketing demonstrates that postmarketing restrictions are inadequate to assure safe use of the drug product;

(4) The applicant fails to adhere to the postmarketing restrictions agreed upon;

(5) The promotional materials are false or misleading; or

(6) Other evidence demonstrates that the drug product is not shown to be safe or effective under its conditions of use.

(b) *Notice of opportunity for a hearing.* The Director of the Center for Drug Evaluation and Research will give the applicant notice of an opportunity for a hearing on the Center's proposal to withdraw the approval of an application approved under § 314.510 or § 314.520. The notice, which will ordinarily be a letter, will state generally the reasons for the action and the proposed grounds for the order.

(c) *Submission of data and information.* (1) If the applicant fails to file a written request for a hearing within 15 days of receipt of the notice, the applicant waives the opportunity for a hearing.

(2) If the applicant files a timely request for a hearing, the agency will publish a notice of hearing in the Federal Register in accordance with §§ 12.32(e) and 15.20 of this chapter.

(3) An applicant who requests a hearing under this section must, within 30 days of receipt of the notice of opportunity for a hearing, submit the data and information upon which the applicant intends to rely at the hearing.

(d) *Separation of functions.* Separation of functions (as specified in § 10.55 of this chapter) will not apply at any point in withdrawal proceedings under this section.

(e) *Procedures for hearings.* Hearings held under this section will be conducted in accordance with the provisions of part 15 of this chapter, with the following modifications:

(1) An advisory committee duly constituted under part 14 of this chapter will be present at the hearing. The committee will be asked to review the issues involved and to provide advice and recommendations to the Commissioner of Food and Drugs.

(2) The presiding officer, the advisory committee members, up to three representatives of the applicant, and up to three representatives of the Center may question any person during or at the conclusion of the person's presentation. No other person attending the hearing may question a person making a presentation. The presiding officer may, as a matter of discretion, permit questions to be submitted to the presiding officer for response by a person making a presentation.

(f) *Judicial review.* The Commissioner's decision constitutes final agency action from which the applicant may petition for judicial review. Before requesting an order from a court for a stay of action pending review, an applicant must first submit a petition for a stay of action under § 10.35 of this chapter.

§ 314.540 Postmarketing safety reporting.

Drug products approved under this program are subject to the postmarketing recordkeeping and safety reporting applicable to all approved drug products, as provided in §§ 314.80 and 314.81.

§ 314.550 Promotional materials.

For drug products being considered for approval under this subpart, unless otherwise informed by the agency, applicants must submit to the agency for consideration during the preapproval review period copies of all promotional materials, including promotional labeling as well as advertisements, intended for dissemination or publication within 120 days following marketing approval. After 120 days following marketing approval, unless otherwise informed by the agency, the applicant must submit promotional materials at least 30 days prior to the intended time of initial dissemination of the labeling or initial publication of the advertisement.

§ 314.560 Termination of requirements.

If FDA determines after approval that the requirements established in § 314.520, § 314.530, or § 314.550 are no longer necessary for the safe and effective use of a drug product, it will so notify the applicant. Ordinarily, for drug products approved under § 314.510, these requirements will no longer apply when FDA determines that the required postmarketing study verifies and describes the drug product's clinical benefit and the drug product would be appropriate for approval under traditional procedures. For drug products approved under § 314.520, the restrictions would no longer apply when FDA determines that safe use of the drug product can be assured through appropriate labeling. FDA also retains the discretion to remove specific postapproval requirements upon review of a petition submitted by the sponsor in accordance with § 10.30.

PART 601—LICENSING

3. The authority citation for 21 CFR part 601 continues to read as follows:

Authority: Secs. 201, 501, 502, 503, 505, 510, 513–516, 518–520, 701, 704, 708, 801 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 351, 352, 353, 355, 360, 360c–360f, 360h–360j, 371, 374, 376, 381); secs. 215, 301, 351, 352 of the Public Health Service Act (42 U.S.C. 216, 241, 262, 263); secs. 2–12 of the Fair Packaging and Labeling Act (15 U.S.C. 1451–1461).

4. Subpart E consisting of §§ 601.40 through 601.46 is added to read as follows:

Subpart E—Accelerated Approval of Biological Products for Serious or Life-Threatening Illnesses

Sec.
- 601.40 Scope.
- 601.41 Approval based on a surrogate endpoint or on an effect on a clinical endpoint other than survival or irreversible morbidity.
- 601.42 Approval with restrictions to assure safe use.
- 601.43 Withdrawal procedures.
- 601.44 Postmarketing safety reporting.
- 601.45 Promotional materials.
- 601.46 Termination of requirements.

Subpart E—Accelerated Approval of Biological Products for Serious or Life-Threatening Illnesses

§ 601.40 Scope.

This subpart applies to certain biological products that have been studied for their safety and effectiveness in treating serious or life-threatening illnesses and that provide meaningful therapeutic benefit to patients over existing treatments (e.g., ability to treat patients unresponsive to, or intolerant of, available therapy, or improved patient response over available therapy).

§ 601.41 Approval based on a surrogate endpoint or on an effect on a clinical endpoint other than survival or irreversible morbidity.

FDA may grant marketing approval for a biological product on the basis of adequate and well-controlled clinical trials establishing that the biological product has an effect on a surrogate endpoint that is reasonably likely, based on epidemiologic, therapeutic,

pathophysiologic, or other evidence, to predict clinical benefit or on the basis of an effect on a clinical endpoint other than survival or irreversible morbidity. Approval under this section will be subject to the requirement that the applicant study the biological product further, to verify and describe its clinical benefit, where there is uncertainty as to the relation of the surrogate endpoint to clinical benefit, or of the observed clinical benefit to ultimate outcome. Postmarketing studies would usually be studies already underway. When required to be conducted, such studies must also be adequate and well-controlled. The applicant shall carry out any such studies with due diligence.

§ 601.42 Approval with restrictions to assure safe use.

(a) If FDA concludes that a biological product shown to be effective can be safely used only if distribution or use is restricted, FDA will require such postmarketing restrictions as are needed to assure safe use of the biological product, such as:

(1) Distribution restricted to certain facilities or physicians with special training or experience; or

(2) Distribution conditioned on the performance of specified medical procedures.

(b) The limitations imposed will be commensurate with the specific safety concerns presented by the biological product.

§ 601.43 Withdrawal procedures.

(a) For biological products approved under §§ 601.40 and 601.42, FDA may withdraw approval, following a hearing as provided in part 15 of this chapter, as modified by this section, if:

(1) A postmarketing clinical study fails to verify clinical benefit;

(2) The applicant fails to perform the required postmarketing study with due diligence;

(3) Use after marketing demonstrates that postmarketing restrictions are inadequate to ensure safe use of the biological product;

(4) The applicant fails to adhere to the postmarketing restrictions agreed upon;

(5) The promotional materials are false or misleading; or

(6) Other evidence demonstrates that the biological product is not shown to be safe or effective under its conditions of use.

(b) *Notice of opportunity for a hearing.* The Director of the Center for Biologics Evaluation and Research will give the applicant notice of an opportunity for a hearing on the Center's proposal to withdraw the approval of an application approved under § 601.40 or § 601.41. The notice, which will ordinarily be a letter, will state generally the reasons for the action and the proposed grounds for the order.

(c) *Submission of data and information.* (1) If the applicant fails to file a written request for a hearing within 15 days of receipt of the notice, the applicant waives the opportunity for a hearing.

(2) If the applicant files a timely request for a hearing, the agency will publish a notice of hearing in the Federal Register in accordance with §§ 12.32(e) and 15.20 of this chapter.

(3) An applicant who requests a hearing under this section must, within 30 days of receipt of the notice of opportunity for a hearing, submit the data and information upon which the applicant intends to rely at the hearing.

(d) *Separation of functions.* Separation of functions (as specified in § 10.55 of this chapter) will not apply at any point in withdrawal proceedings under this section.

(e) *Procedures for hearings.* Hearings held under this section will be conducted in accordance with the provisions of part 15 of this chapter, with the following modifications:

(1) An advisory committee duly constituted under part 14 of this chapter will be present at the hearing. The committee will be asked to review the issues involved and to provide advice and recommendations to the Commissioner of Food and Drugs.

(2) The presiding officer, the advisory committee members, up to three representatives of the applicant, and up to three representatives of the Center may question any person during or at the conclusion of the person's presentation. No other person attending the hearing may question a person making a presentation. The presiding officer may, as a matter of discretion, permit questions to be submitted to the presiding officer for response by a person making a presentation.

(f) *Judicial review.* The Commissioner's decision constitutes final agency action from which the applicant may petition for judicial review. Before requesting an order from a court for a stay of action pending review, an applicant must first submit a petition for a stay of action under § 10.35 of this chapter.

§ 601.44 Postmarketing safety reporting.

Biological products approved under this program are subject to the postmarketing recordkeeping and safety reporting applicable to all approved biological products.

§ 601.45 Promotional materials.

For biological products being considered for approval under this subpart, unless otherwise informed by the agency, applicants must submit to the agency for consideration during the preapproval review period copies of all promotional materials, including promotional labeling as well as advertisements, intended for dissemination or publication within 120 days following marketing approval. After 120 days following marketing approval, unless otherwise informed by the agency, the applicant must submit promotional materials at least 30 days prior to the intended time of initial dissemination of the labeling or initial publication of the advertisement.

§ 601.46 Termination of requirements.

If FDA determines after approval that the requirements established in § 601.42, § 601.43, or § 601.45 are no longer necessary for the safe and effective use of a biological product, it will so notify the applicant. Ordinarily, for biological products approved under § 601.41, these requirements will no longer apply when FDA determines that the required postmarketing study verifies and describes the biological product's clinical benefit and the biological product would be appropriate for approval under traditional procedures. For biological products approved under § 601.42, the restrictions would no longer apply when FDA determines that safe use of the biological product can be assured through appropriate labeling. FDA also retains the discretion to remove specific postapproval requirements upon review of a petition submitted by the sponsor in accordance with § 10.30.

Dated: December 7, 1992.

David A. Kessler,

Commissioner of Food and Drugs.

Louis W. Sullivan,

Secretary of Health and Human Services.

For those of you who must keep informed about **Presidential Proclamations and Executive Orders,** there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period April 13, 1945, through January 20, 1989, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1945–1989 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

FEDERAL REGISTER SUBSCRIBERS: IMPORTANT INFORMATION ABOUT YOUR SUBSCRIPTION

After 6 years without an adjustment, it has become necessary to increase the price of the **Federal Register** in order to begin recovering the actual costs of providing this subscription service. Effective October 1, 1992, the price for the **Federal Register** will increase and be offered as follows:

(1) FEDERAL REGISTER COMPLETE SERVICE—Each business day you can continue to receive the daily **Federal Register**, plus the monthly **Federal Register Index** and **Code of Federal Regulations List of Sections Affected (LSA)**, all for **$415.00** per year.

(2) FEDERAL REGISTER DAILY ONLY SERVICE—With this subscription service, you will receive the **Federal Register** every business day for **$375.00** per year.

HOW WILL THIS AFFECT YOUR CURRENT SUBSCRIPTION?

You will receive your current complete **Federal Register** service for the length of time remaining in your subscription.

AT RENEWAL TIME

At renewal time, to keep this important subscription coming—you can continue to receive the complete **Federal Register** service by simply renewing for the entire package, or you can select and order only the parts that suit your needs:

- renew your entire **Federal Register Service** (complete service)

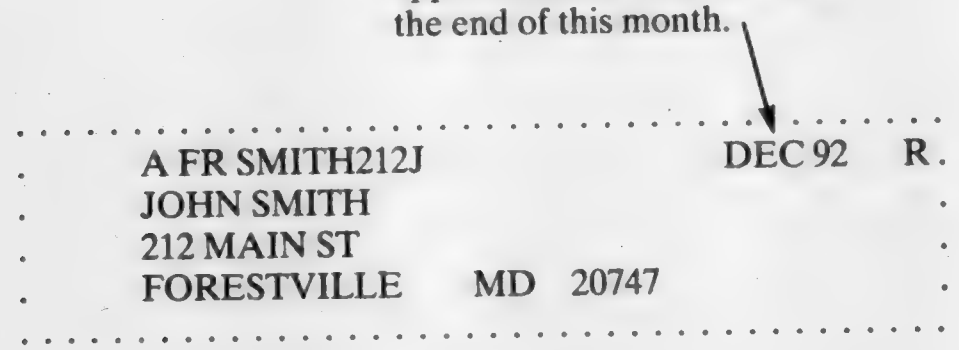
or select. . .

- the daily only **Federal Register** (basic service)
- and complement the basic service with either of the following supplements: the monthly **Federal Register Index** or the monthly **LSA**

When your current subscription expires, you will receive a renewal notice to continue the complete **Federal Register** service. At that time, you will also receive an order form for the daily **Federal Register** basic service, the **Federal Register Index**, and the **LSA**.

To know when to expect the renewal notice, check the top line of your subscription mailing label for the month and year of expiration as shown in this sample:

A renewal notice will be sent approximately 90 days before the end of this month.



Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$21.00 per year

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$19.00 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers.
FR Indexes and the LSA (List of CFR Sections Affected) are mailed automatically to regular FR subscribers.

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

GUIDE: Revised January 1, 1992

The GUIDE to record retention is a useful reference tool, compiled from agency regulations, designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

December 14, 1992

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche format and magnetic tape. The annual subscription price for the **Federal Register** paper edition is $375, or $415 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $353; and magnetic tape is $37,500. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $4.50 for each issue, or $4.50 for each group of pages as actually bound; or $1.50 for each issue in microfiche form; or $175.00 per magnetic tape. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

Rules and Regulations

Federal Register
Vol. 57, No. 240
Monday, December 14, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 2

Revision of Delegations of Authority

AGENCY: Department of Agriculture.

ACTION: Final rule.

SUMMARY: This document amends the delegations of authority from the Secretary of Agriculture and General Officers of the Department to delegate from the Assistant Secretary for Science and Education to the Administrator of the Extension Service, the authority to administer a grant program to upgrade agricultural and food science facilities at 1890 land-grant colleges pursuant to 7 U.S.C. 3222b and to establish and administer the development and utilization of an agricultural communications network pursuant to 7 U.S.C. 5926.

EFFECTIVE DATE: December 14, 1992.

FOR FURTHER INFORMATION CONTACT: Marcus F. Gross, Jr., Office of the General Counsel, United States Department of Agriculture, Washington, DC, (202) 720–4076.

SUPPLEMENTARY INFORMATION: This rule relates to internal agency management. Therefore, pursuant to 5 U.S.C. 553, notice of proposed rulemaking and opportunity for comment are not required, and this rule may be effective less than 30 days after publication in the Federal Register.

Further, since this rule relates to internal agency management, it is exempt from the provisions of Executive Order Nos. 12291 and 12278. This action is not a rule as defined by Pub. L. No. 96–354, the Regulatory Flexibility Act, (5 U.S.C. 601 *et seq.*) and thus is exempt from its provisions.

List of Subjects in 7 CFR Part 2

Authority delegations (Government agencies)

Accordingly, Part 2, Subtitle A, Title 7, Code of Federal Regulations is amended as follows:

PART 2—DELEGATIONS OF AUTHORITY BY THE SECRETARY OF AGRICULTURE AND GENERAL OFFICERS OF THE DEPARTMENT

1. The authority citation for part 2 continues to read as follows:

Authority: 5 U.S.C. 301 and Reorganization Plan No. 2 of 1953.

Subpart N—Delegations of Authority by the Assistant Secretary for Science and Education

2. Section 2.108 is amended by adding new paragraphs (a)(57) and (a)(58) to read as follows:

§ 2.108 Administrator, Extension Service.

(a) Delegations.

* * * * *

(57) Administer grants to 1890 land-grant colleges, including Tuskegee University, to upgrade agricultural and food sciences facilities which are used for research, extension, and resident instruction (7 U.S.C. 3222b).

(58) Establish and administer a program for the development and utilization of an agricultural communications network (7 U.S.C. 5926).

Dated: December 8, 1992.

Duane C. Acker,

Assistant Secretary for Science and Education.

BILLING CODE 3410–01–M

Federal Grain Inspection Service

7 CFR Parts 800 and 810

RIN 0580–AA15

United States Standards for Wheat

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: The Federal Grain Inspection Service (FGIS) is revising the United States Standards for Wheat to (1) remove the description Red Durum wheat from the definition of Unclassed wheat; (2) reduce the U.S. Sample grade criteria for stones from eight or more to four or more and reduce the U.S. Sample grade aggregate weight criteria for stones from more than 0.2 percent by weight to more than 0.1 percent by weight; (3) reduce the U.S. Sample grade criteria for pieces of glass from two or more to one or more (zero tolerance); (4) establish a cumulative total criteria for factors which may cause U.S. Sample grade; (5) reduce the limit for ergot from 0.30 percent to 0.05 percent by weight; (6) reduce the minimum criteria for the special grade light smutty wheat from more than 14 smut balls to more than 5 smut balls; and (7) reduce the grading limits for foreign material in grades 1, 2, and 3. FGIS is also revising inspection plan tolerances for wheat based on the final action. This action is the result of the periodic review by FGIS of the United States Standards for Wheat.

EFFECTIVE DATE: May 1, 1993.

FOR FURTHER INFORMATION CONTACT: George Wollam, Federal Grain Inspection Service, USDA, room 0632 South Building, P.O. Box 96454, Washington, DC 20090–6454; telephone (202) 720–0292.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

This final rule is issued in conformance with Executive Order 12291 and Departmental Regulation 1512–1. This action is classified as nonmajor because it does not meet the criteria for a major regulation established in the Order.

Executive Order 12778

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. This action is not intended to have retroactive effect. The United States Grain Standards Act provides in section 87g that no state or subdivision may require or impose any requirements or restrictions concerning the inspection, weighing, or description of grain under the Act. Otherwise, this final rule will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule. There are no administrative procedures which must be exhausted prior to any judicial challenge to the provisions of this rule.

Regulatory Flexibility Act Certification

John C. Foltz, Administrator, FGIS, determined this final rule does not have a significant economic impact on a substantial number of small entities because those persons that apply the standards and most users of the inspection service do not meet the requirements for small entities as defined in the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Further, the standards are applied equally to all entities.

Information Collection and Recordkeeping Requirements

In compliance with the Office of Management and Budget (OMB) regulations (5 CFR part 1320) which implement the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35) and section 3504(h) of that Act, the information collection and recordkeeping requirements contained in this rule are approved by OMB and assigned OMB No. 0580–0013.

Background

On July 1, 1991, FGIS proposed in the **Federal Register** (56 FR 29907) to revise the U.S. Standards for Wheat by (1) removing the description Red Durum wheat from the definition of Unclassed wheat; (2) reducing the U.S. Sample grade criteria for stones from eight or more to four or more and eliminating the U.S. Sample grade aggregate weight criteria for stones; (3) reducing the U.S. Sample grade criteria for pieces of glass from two or more to one or more (zero tolerance); (4) establishing a cumulative total criteria for factors which may cause U.S. Sample grade; (5) reducing the limit for ergot from 0.30 percent to 0.05 percent by weight; (6) reducing the minimum criteria for the special grade light smutty wheat from more than 14 smut balls to more than 2 smut balls; and (7) reducing the grading limits for foreign material in grades 1, 2, and 3. FGIS further proposed to revise inspection plan tolerances for wheat based on the proposed changes.

Comment Review

During the 60-day comment period ending August 30, 1991, FGIS received a total of 28 comments from the various segments of the wheat industry including producers, end-users, grain handlers, foreign buyers, promotional associations, and a State agriculture department. The majority of the commentors addressed the specific issues included in the proposed action. Two commentors representing grain handlers expressed general opposition to all of the proposed changes without providing specific reasons for their opposition. The following paragraphs address comments received regarding the proposed changes.

Red Durum Wheat

Eighteen commentors supported or generally supported the proposal to remove Red Durum wheat from the definition of Unclassed wheat while eight commentors had no comment on the issue. Since no opposing reasons were presented in the comments received, FGIS is removing Red Durum wheat from the definition of Unclassed wheat as proposed.

Stones

Ten commentors supported or generally supported, ten commentors suggested modifications, three commentors opposed, and three commentors had no comments to the proposal to reduce the U.S. Sample grade criteria for stones from 8 or more stones to 4 or more stones and to eliminate the aggregate weight criteria.

The three commentors opposing the proposed changes represented the California wheat industry. Their comments indicated stones are inherently present in dwarf wheat varieties grown in California. They further indicated the proposed revision would unnecessarily penalize the value of the wheat and may encourage the production of lesser end-use quality wheat which exhibits better agronomic traits to avoid stones during harvest.

FGIS reviewed and evaluated this concern and concluded that the majority of wheat grown in California is of dwarf varieties; however, California wheat samples rarely contain stones. Generally, dirt clods and sand are found in semi-dwarf wheat when combines are run too close to the ground. The larger dirt clods and fine sand particles are removed as dockage during the inspection process. Further, small dirt clods remaining in the dockage-free wheat are not considered stones for grading purposes.

A review of California wheat samples selected by FGIS for monitoring inspection accuracy support this conclusion. The database used for the evaluation represents a random selection of wheat samples inspected in California from 1989 to 1991. Of the 1,520 samples in the database, 1,374 samples (90.4 percent) reported a determination for stones. Of the 1,374 samples reporting stone information, 22 samples (1.6 percent) exceeded the proposed limit of 4 or more stones and 8 samples (0.6 percent) exceeded the current limit of 8 or more stones. Consequently, revising the stone limits in wheat will not significantly affect the numerical grade of California wheat.

Ten commentors representing producers and grain handlers suggested modifications to the proposed action on stones. One of the ten commentors suggested replacing the count limit with an aggregate weight limit. The commentor indicated this action would ensure objectivity of and accuracy in inspection. The other nine commentors, suggesting a modification to the proposal, support the proposed action to reduce the stone count limit but recommended not eliminating the aggregate weight provision. Instead of completely eliminating the aggregate weight provision, some commentors suggested revising the U.S. Sample grade aggregate weight criteria from more than 0.2 percent by weight to more than 0.1 percent by weight. They also recommended determining U.S. Sample grade due to stones on a combination count and weight basis in comparison to the established separate count or weight basis. These commentors concluded that the maintenance of the aggregate weight provision ensures appropriate grading of grain in circumstances in which the presence of small stones is not a quality concern.

Historically, the wheat standards established stones as a U.S. Sample grade factor based on count alone. FGIS published a final rule on June 30, 1987 (52 FR 24414), which included weight criteria for stones independent of the count limit. Because the determination of stones is based on a dockage-free sample, excessively large and small stones are removed from the sample prior to the determination of stones. Therefore, the U.S. Sample grade determination is based on stones which are similar to the size of wheat kernels. It could take in excess of 7 to 10 stones to surpass the 0.1 percent aggregate weight limit. Consequently, reducing the count limit to 4 or more stones in combination with a weight limit in excess of 0.1 percent is viewed as not consistent with the proposed action. For these reasons, FGIS will not establish combination count and weight criteria for stones. FGIS will, however, establish a separate aggregate weight criteria for any number of stones in excess of 0.1 percent by weight.

One grain handler supporting the proposed change recommended a change to the basis of determination. Stones in wheat are determined on a dockage-free sample basis. This commentor indicated it is better to make the determination for stones on a sample before the removal of dockage because, unlike wheat for flour milling, feed wheat is generally not cleaned

prior to entering the feed mill. Therefore, the presence of any stones could cause damage to feed rolls and pellet disks.

Comments received in response to the advance notice of proposed rulemaking (54 FR 48752) and to the proposed rule (56 FR 29907) do not indicate a need to revise the basis of determination for stones in wheat. FGIS does not believe any changes to the basis of determination is needed at this time because wheat is primarily produced as a food grain, and the standards reflect normal cleaning prior to processing. Additionally, any changes to the basis of determination for stones could result in unknown economic impacts to producers and grain handlers because inspection data are not available to determine the frequency distribution of stones removed as dockage.

Based on the comments received and available information, FGIS is revising U.S. Sample grade criteria for stones in wheat from 8 or more stones or any number of stones which have an aggregate weight in excess of 0.2 percent by weight to 4 or more stones or any number of stones which have an aggregate weight in excess of 0.1 percent by weight.

Glass

Twenty-three commentors supported or generally supported and five had no comments to the proposal to reduce the Sample grade tolerance from two or more pieces of glass to one or more. Since no opposing reasons were presented in the comments received, FGIS is revising U.S. Sample grade criteria for glass in wheat from two or more pieces of glass to one or more (zero tolerance).

Cumulative Sample Grade Factors

Seventeen commentors supported or generally supported, three commentors suggested modifications, one commentor opposed, and five commentors had no comments to the proposal to establish a cumulative total criteria for factors which may cause U.S. Sample grade.

The one commentor opposing the proposed action represented producers from Virginia. They stated:

> We do not agree with this proposal as we understand it. We are not in favor of any existing class totals being equal to the cumulative total which by itself would cause a U.S. sample grade.

The three commentors suggesting modifications to the proposed changes represented the California wheat industry. Their comments indicated they support the concept for a total limit of suspected harmful and toxic substances; however, they stated that stones are not harmful or toxic and should not be included in this category. Stones are infrequently found in California wheat. Additionally, other harmful and toxic substances included in this category are infrequently found as well.

The National Association of Wheat Growers commented that this category is an important new addition which addresses the value of total defects on the end-use value. Based upon the comments received and available information, FGIS plans to establish the cumulative total Sample grade criteria as proposed.

Ergot

Fourteen commentors supported or generally supported, five commentors suggested modifications, and seven commentors had no comments to the proposal to reduce the limit for ergot from 0.30 percent to 0.05 percent by weight.

The five commentors suggesting modifications to the proposed action represented a foreign buyer, Idaho wheat producers, and grain handlers. The Japanese Food Agency, a foreign buyer of U.S. wheat, suggested establishing a 0.00 percent limit for ergot to match their existing regulations. Idaho wheat producers commented that they support the reduced ergot limits if a 3-year phase-in period is implemented. They suggested limits at 0.20, 0.10, and 0.05 for the first, second, and third years, respectively. Three grain handler comments indicated they do not oppose the reduction to 0.05 percent; however, they were surprised at the magnitude of reduction and urged FGIS to review the matter further to determine if a less drastic reduction would suffice.

FGIS has reviewed this issue further. Ergot, caused by a fungus and favored by wet, cool weather, occurs in wheat, rye, triticale, barley, and oats. Normally, the frequency of ergot on wheat is low, but is of a constant concern. Ergot can be avoided by planting seed free from sclerotia, crop rotation, deep soil tillage, and clean cultivation. Ergot does not get into food supplies if the infected wheat is commercially processed to remove impurities (1, 2).

Based on the comments received and available information, FGIS believes the proposed limit of 0.05 percent is reasonable and necessary.

Light Smutty Wheat

Thirteen commentors supported or generally supported, five commentors suggested modifications, and eight commentors had no comments to the proposal to reduce the criteria for the special grade light smutty wheat from more than 14 smut balls to more than 2 smut balls.

The Idaho Wheat Commission commented that they support an effort to maintain a more reliable certification process throughout the market. They suggested a phase-in period beginning at more than 5 smut balls and decreasing to more than 2 as proposed. The Idaho Grain Producers Association expressed a similar concern. Grain handlers indicated they do not oppose the reduction in the number of smut balls from 14 to 2. However, similar to their comments to ergot, they were surprised at the magnitude of reduction and urged FGIS to review the matter further to determine if a less drastic reduction would suffice.

FGIS included this proposed action in response to an Idaho grain handler who indicated the handling of wheat containing less than 14 smut balls potentially could grade light smutty due to odor when the smut balls break apart and disappear during handling. The need for reliable and repeatable certification results prompted FGIS to seek comments on the issue.

The comments received indicate the need for a change in the minimum limit of smut balls in a sample. Based on comments received and on available information, FGIS has determined to accept the Idaho wheat industry comments and revise the proposed action to establish the minimum smut ball criteria for light smutty wheat at more than 5 smut balls in 250 grams as a reasonable alternative to the proposed 2 smut ball limit. FGIS, however, will not implement a phase-in period but will evaluate the need to reduce the criteria further as part of future periodic reviews of the standards.

Foreign Material

Thirteen commentors supported or generally supported, eleven commentors opposed, two commentors suggested modifications, and one commentor had no comments to the proposal to reduce the grading limits for foreign material in grades 1, 2, and 3 from 0.5, 1.0, and 2.0 to 0.4, 0.7, and 1.3, respectively.

Grain handlers opposed the proposed action citing three reasons for their position. First, they indicated the market already supplies low foreign material wheat; therefore, changes in the standards as an incentive to maintain low foreign material is not needed. Second, they indicated there is no practical cleaning system to efficiently lower foreign material levels. Third, they indicated the proposal is premature in view of the current study undertaken

by the USDA Economic Research Service regarding the costs and benefits associated with improvements in the cleanliness of wheat.

Producers are supportive of the proposed action. Their comments indicate they support changes to improve the reputation of U.S. grain as a quality product while balancing the cost impact upon farmers.

The two comments received regarding modifications of the proposed rule generally supported the concept of reducing foreign material limits. One commentor suggested reducing the limits for U.S. Nos. 2 and 3 because these grades are commonly traded; however, they did not think it was necessary to reduce limits for U.S. No. 1 and would oppose that action. Another commentor strongly supported the position of reducing foreign material grade limits and suggested lowering the limits to 0.3, 0.5, and 1.0 for U.S. Nos. 1, 2, and 3 instead of the proposed limits of 0.4, 0.7, and 1.3.

In response to the opposing views, FGIS evaluated the situation and reached the following conclusions. Producers initiated discussions to reduce foreign material limits in wheat. Foreign material is composed of non-wheat material which is similar in size, shape, and density of wheat kernels. This material originates at the farm level and usually consists of rye, sorghum, and various weed seeds. Consequently, any economic impact as a result of revisions to foreign material limits will affect the producer. The FGIS-proposed limits complement current agronomic practices. As a result, the proposed limits should virtually have no economic impact on producer revenues due to foreign material discounts imposed by the grain industry.

Based on the above discussion and comments and other available information, FGIS is reducing the grading limits for foreign material in grades 1, 2, and 3 as proposed from 0.5, 1.0, and 2.0 to 0.4, 0.7, and 1.3, respectively.

Grade Chart Format and Authority Citation

FGIS proposed to revise the grade chart format in § 810.2204(a), Grades and grade requirements for all classes of wheat, except Mixed wheat, to improve the readability of the grade chart. Also, FGIS proposed to revise the authority citation for part 810. No comments were received regarding this action. Therefore, FGIS is revising the grade chart format and the authority citation as proposed with minor modifications for clarity.

Inspection Plan Tolerances

Five commentors supported or generally supported, one commentor opposed, one commentor suggested modifications, and eighteen commentors had no comments to the proposal to revise the breakpoints for ergoty wheat from 0.19 to 0.03 and for light smutty wheat from 6 to 2. FGIS also proposed to revise the foreign material breakpoint for U.S. No. 3 from 0.5 to 0.4. In addition, FGIS proposed to revise the breakpoint for wheat dockage from 0.20 to 0.2.

The Japanese Food Agency opposed the proposal to revise the breakpoint for wheat dockage because they were concerned that the change may lead to inferior quality wheat. An association representing grain handlers commented that the proposed 0.03 breakpoint for ergot was unreasonable and operationally impractical. They further commented that they recognize that some reduction in the ergot breakpoint is appropriate to accommodate the lower grade of 0.05 percent but did not suggest an alternative to the proposed breakpoint.

FGIS evaluated these comments and concluded that revising the dockage breakpoint from 0.20 to 0.2 will not affect the level of dockage found in wheat. This revision promotes uniform recording procedures for factors certified to the nearest tenth percentage point. FGIS also concluded that the proposed 0.03 ergot breakpoint sufficiently assures ergot levels within the 0.05 percentage point limit. This proposed limit provides the exporter with an operating range which allows a tolerance of up to 60 percent from the 0.05 percentage point limit. FGIS further believes that a 0.03 ergot breakpoint will not affect the loading efficiency of export elevators since ergot is seldom found in wheat.

Based on the comments received and issues discussed, FGIS will revise the breakpoints for ergoty wheat from 0.19 to 0.03, for the U.S. No. 3 foreign material limit from 0.5 to 0.4, and for wheat dockage from 0.20 to 0.2. FGIS is also revising the breakpoint for light smutty wheat from 6 to 3 as a result of the revised special grade limit established at more than 5 smut balls.

Miscellaneous Comments

Some commentors provided views and opinions on matters other than the specific proposed actions. These comments addressed establishing weight limits instead of count limits for U.S. Sample grade criteria, establishing grade limits for insect-damaged kernels, reducing grade limits for shrunken and broken kernels, and reporting sprout damage on the inspection certificate if it is equal to or greater than 1.0 percent. FGIS evaluated these concerns and is providing a general discussion for each.

One commentor, representing grain handlers, recommended expressing all U.S. Sample grade tolerances as a percentage of the sample weight rather than by a count. The comment suggested this change would ensure consistency of the grade determinations by replacing qualitative judgment with quantitative analysis. To address this comment, FGIS reviewed historical files regarding the establishment of U.S. Sample grade criteria which are based on a count. The criteria include animal filth, castor beans, crotalaria seeds, glass, stones, and unknown foreign substances. These U.S. Sample grade factors were included in the wheat standards as noted in the November 1, 1968, final rule (33 FR 16065) and were effective January 31, 1969. On April 27, 1976, the **Federal Register** published proposed revisions to the wheat standards (41 FR 17553). One proposed action included revising the definition of U.S. Sample grade to coincide with defect action levels established by the Food and Drug Administration (FDA). FDA action levels for commonly recognized harmful or toxic substances are established on a count basis. The June 29, 1976, final rule (41 FR 26670) implemented these revisions effective May 1, 1977.

FGIS believes uniformity of standards between Federal agencies is very important in order to prevent confusion and disruption within the grain marketing system. Therefore, the current method of reporting U.S. Sample grade factors on a count basis is appropriate since it best reflects the action levels established by FDA.

One commentor, representing the flour milling industry, recommended establishing grade limits for insect-damaged kernels, reducing grade limits for shrunken and broken kernels, and reporting sprout damage on the inspection certificate if it is equal to or greater than 1.0 percent.

The commentor recommended establishing separate grade limits for insect-damaged kernels because, in the commentor's opinion, the current U.S. Sample grade criteria of 32 or more kernels in a 100-gram sample does not reflect current market practice. The commentor indicated purchasing specifications typically reject any wheat containing 5 to 7 insect-damaged kernels. For these reasons, the commentor suggested the following grade limits based on either a count or a percentage basis.

RECOMMENDED GRADE LIMITS FOR INSECT-DAMAGED KERNELS

Grade	Number of Kernels	Maximum percent limit
1	8	0.2
2	8	.2
3	16	.5
4	32	1.0
5	32	1.0

FGIS does not believe it is appropriate to establish separate grade limits for insect-damaged kernels for the following reasons. General research determined that the interrelationships between FDA defect action levels for insect-damaged kernels in wheat and FDA defect action levels in flour found little correlation between insect-damaged kernel levels and insect fragments in flour. The research concluded that the flour miller cannot rely on the percent or the number of insect-damaged kernels in wheat as a predictor of the number of insect fragments found in the subsequent flour. The research further demonstrated the correlation between the number of insect-damaged kernels and corresponding weight is questionable. Although some research indicates 32 insect-damaged kernels per 100 grams of wheat is comparable to approximately 1 percent damage; other research indicates it could take as much as 101 insect-damaged kernels to obtain approximately 1.1 percent damage (3). Furthermore, insect-damaged kernels as it correlates to insect fragments in flour is a concern only to domestic flour mills. Export contracts do not include similar requirements.

Although FGIS did not propose and is not establishing separate grade limits for insect-damaged kernels, flour millers may request the certification of the actual number of insect-damaged kernels found in a sample. This information should assist the miller in determining if a wheat lot meets the acceptance level established in the purchase specification.

The same commentor recommended reducing grade limits for shrunken and broken kernels. The commentor indicated small and shriveled kernels greatly affect the milling quality of wheat. Although quantitative effects of shrunken and broken kernels on milling quality were not provided with the comment, the commentor suggested the following grade limits:

RECOMMENDED GRADE LIMITS FOR SHRUNKEN AND BROKEN KERNELS

Grade	Maximum percent limits	
	Current	Suggested
1	3.0	1.0
2	5.0	3.0

RECOMMENDED GRADE LIMITS FOR SHRUNKEN AND BROKEN KERNELS—Continued

Grade	Maximum percent limits	
	Current	Suggested
3	8.0	5.0
4	12.0	8.0
5	20.0	12.0

FGIS has requested the Agricultural Research Service to develop a practical test to predict milling yield and/or performance. FGIS believes the development implementation of a highly-correlated objective test to predict milling performance addresses the commentor's concern and is in the best interest of the wheat industry. Therefore, FGIS is addressing this commentor's concerns through research and welcomes any available information regarding the effects of shrunken and broken kernels on milling yield to assist in the development of a test.

Another concern expressed by this commentor involved reporting the percentage of sprout damage on the inspection certificate. The commentor indicated the presence of sprout damage is detrimental to the wheat's end use for some products. The commentor suggested reporting the actual percentage of sprout damage on the inspection certificate whenever the sprout damage level is equal to or greater than 1.0 percent. This 1.0 percent reporting threshold was recommended to reduce an unnecessary reporting burden to the inspection system while providing the milling industry with important quality information.

FGIS agrees that sprout damage could affect the end-use value of wheat. This is demonstrated by some purchase specifications which restrict the maximum allowable levels to 0.0, 0.2, and 0.5 percentage points. The national inspection system, however, already provides certification procedures for reporting the actual levels of sprout damage, as well as other types of damage, in wheat. Due to the vastly different needs of end users, FGIS has determined it is best to provide this information on a request basis and not as a mandatory reporting requirement. Certificating this additional information upon request provides for an efficient and cost-effective inspection service which meets the demands of every end user. Therefore, FGIS does not plan to revise the sprout damage reporting provision as suggested by the comment.

Final Action

On the basis of these comments and other available information, FGIS has decided to enact the changes as proposed with the exception of the elimination of the aggregate weight criteria for stones and the minimum criteria for smut balls for light smutty wheat. Rather than eliminating the aggregate weight criteria as proposed, FGIS has decided to reduce the aggregate weight criteria for stones from more than 0.2 percent by weight to more than 0.1 percent by weight. FGIS has also decided to revise the light smutty wheat criteria for smut balls from more than 2 smut balls as proposed to more than 5 smut balls.

Pursuant to section 4(b)(1) of the United States Grain Standards Act (7 U.S.C. 76(b)(1)), no standards established or amendments or revocations of standards are to become effective less than one calendar year after promulgation, unless in the judgement of the Administrator, the public health, interest, or safety requires that they become effective sooner. Pursuant to that section of the Act, it has been determined that in the public interest the revisions become effective May 1, 1993, to coincide with the beginning of the 1993 crop year. These changes will facilitate domestic and export marketing of grain.

Special grade or factor	Grade limit	Breakpoint
Soft white:		
SWH	Not more than 10% white club wheat.	2.0
WHCB	Not more than 10% of other soft white wheat.	2.0
WWH	More than 10% WHCB and more than 10% of other soft white wheat.	-3.0

PART 810—OFFICIAL UNITED STATES STANDARDS FOR GRAIN

3. The authority citation for part 810 continues to read as follows:

Authority: Public Law 94-582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*).

Subpart M—United States Standards for Wheat

4. Section 810.2202(a)(7) is revised to read as follows:

§ 810.2202 Definition of other terms.

(a) * * *

(7) *Unclassed wheat.* Any variety of wheat that is not classifiable under other criteria provided in the wheat standards. There are no subclasses in this class. This class includes any wheat which is other than red or white in color.

* * * * *

5. Section 810.2204(a) is revised to read as follows:

§ 810.2204 Grades and grade requirements.

(a) Grades and grade requirements for all classes of wheat, except Mixed wheat.

Grading Factors	Grades U.S. Nos.				
	1	2	3	4	5
Minimum pound limits of:					
Test weight per bushel:					
Hard Red Spring wheat or White Club wheat	58.0	57.0	55.0	53.0	50.0
All other classes and subclasses	60.0	58.0	56.0	54.0	51.0
Maximum percent limits of:					
Defects:					
Damaged kernels:					
Heat (part of total)	0.2	0.2	0.5	1.0	3.0
Total	2.0	4.0	7.0	10.0	15.0
Foreign material	0.4	0.7	1.3	3.0	5.0
Shrunken and broken kernels	3.0	5.0	8.0	12.0	20.0

Grading Factors	Grades U.S. Nos.				
	1	2	3	4	5
Total[1]	3.0	5.0	8.0	12.0	20.0
Wheat of other classes:[2]					
Contrasting classes	1.0	2.0	3.0	10.0	10.0
Total[3]	3.0	5.0	10.0	10.0	10.0
Stones	0.1	0.1	0.1	0.1	0.1
Maximum count limits of:					
Other material:					
Animal filth	1	1	1	1	1
Castor beans	1	1	1	1	1
Crotalaria seeds	2	2	2	2	2
Glass	0	0	0	0	0
Stones	3	3	3	3	3
Unknown foreign substance	3	3	3	3	3
Total[4]	4	4	4	4	4
Insect-damaged kernels:					
In 100 grams	31	31	31	31	31

U.S. Sample grade is Wheat that:
(a) does not meet the requirements for U.S. Nos. 1, 2, 3, 4, or 5; or
(b) has a musty, sour or commercially objectionable foreign odor (except smut or garlic odor); or
(c) is heating or of distinctly low quality.

[1] Includes damaged kernels (total), foreign material, shrunken and broken kernels.
[2] Unclassed wheat of any grade may contain not more than 10.0 percent of wheat of other classes.
[3] Includes contrasting classes.
[4] Includes any combination of animal filth, castor beans, crotalaria seeds, glass, stones, and unknown foreign substance.

* * * * *

6. Section 810.2205 paragraphs (a) and (c) are revised to read as follows:

§ 810.2205 Special grades and special grade requirements.

(a) *Ergoty wheat.* Wheat that contains more than 0.05 percent of ergot.

* * * * *

(c) *Light smutty wheat.* Wheat that has an unmistakable odor of smut, or which contains, in a 250-gram portion, smut balls, portions of smut balls, or spores of smut in excess of a quantity equal to 5 smut balls, but not in excess of a quantity equal to 30 smut balls of average size.

RIN 0580–AA10

United States Standards for Sorghum

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: The Federal Grain Inspection Service (FGIS) is revising the United States Standards for Sorghum to (1) reduce the maximum "broken kernels and foreign material" (BNFM) limits for U.S. No. 2 sorghum by 1 percent and U.S. Nos. 3 and 4 sorghum by 2 percent; (2) establish grade limits for foreign material; (3) reduce the amount of Brown sorghum allowed in Yellow sorghum from 10.0 percent to 3.0 percent; (4) modify the classification terminology for the classes Yellow and Brown sorghum; and (5) revise the definitions for all classes of sorghum. FGIS is also revising inspection plan tolerances for sorghum based on these changes.

EFFECTIVE DATE: June 1, 1993.

FOR FURTHER INFORMATION CONTACT: George Wollam, FGIS, USDA, room 0632 South Building, P.O. Box 96454, Washington, DC 20090–6454. Telephone (202) 720–0292; Fax (202) 720–4628.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

This final rule has been issued in conformance with Executive Order 12291 and Departmental Regulation 1512–1. This action has been classified as nonmajor because it does not meet the criteria for a major regulation established in the Order.

Executive Order 12778

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. This action is not intended to have retroactive effect. The United States Grain Standards Act provides in section 87g that no State or subdivision may require or impose any requirements or restrictions concerning the inspection, weighing, or description of grain under the Act. Otherwise, this final rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule. There are no administrative procedures which must be exhausted prior to any judicial challenge to the provisions of this rule.

Regulatory Flexibility Act Certification

John C. Foltz, Administrator, FGIS, has determined that this final rule will not have a significant economic impact on a substantial number of small entities because those persons that apply the standards and most users of the inspection service do not meet the requirements for small entities as defined in the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Further, the standards are applied equally to all entities.

Information Collection and Recordkeeping Requirements

In compliance with the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the information collection and recordkeeping requirements contained in this rule have been approved by OMB and assigned OMB No. 0580–0013.

Effective Date

Pursuant to section 4(b)(1) of the United States Grain Standards Act (7 U.S.C. 76(b)(1)), no standards established or amendments or revocations of standards are to become

effective less than one calendar year after promulgation, unless in the judgment of the Administrator, the public health, interest, or safety requires that they become effective sooner. Pursuant to that section of the Act, it has been determined that in the public interest these amendments become effective less than one calendar year after promulgation. Accordingly, this final rule will be effective on June 1, 1993, in order to be in effect for the 1993 crop year. These changes will facilitate domestic and export marketing of sorghum.

Final Action

On April 2, 1991, FGIS proposed in the **Federal Register** (56 FR 13420) to revise the U.S. Standards for Sorghum by (1) separating the grading factor "broken kernels, foreign material, and other grains" (BNFM) into two factors "broken kernels" (BN) and "foreign material" (FM); (2) reducing the amount of Brown sorghum allowed in Yellow sorghum; (3) modifying the classification terminology for the classes Yellow and Brown sorghum; (4) revising the definitions for all classes of sorghum; and (5) requiring dockage to be reported to the nearest tenth percent rather than whole percents with fractions disregarded.

During the 60 day comment period ending June 3, 1991, FGIS received a total of 29 comments from the various segments of the sorghum industry including producers, end-users, handlers, academicians, and official inspection agencies.

On the basis of these comments and other available information, FGIS has decided to enact the changes as proposed with the exception of the dockage and BNFM proposal.

FGIS is investigating alternative options regarding dockage determination, reporting, and certification and will solicit public comment at a later date. Meanwhile, FGIS will continue to report dockage to the whole percent and disregard any fraction.

Rather than separating BNFM into BN and FM and establishing separate limits for each, FGIS has decided to establish grade limits for FM as a subfactor of BNFM and retain BNFM as a grade determining factor for sorghum.

BN and FM

FGIS proposed to separate the grading factor BNFM into two factors, BN and FM and reduce the combined limits for BN and FM in grades 2, 3, and 4. Twenty-three commentors supported or generally supported and six opposed the proposed action.

Supporters of the proposal are encouraged by the fact that sorghum customers will know precisely how much foreign material they are receiving, thereby dispelling the perception some buyers have that BNFM is predominately or exclusively FM. They also believe the proposed action will promote the marketing of cleaner, more consistent quality sorghum and will provide more complete information regarding the end-use value of the sorghum. Supporters further believe the combination of more consistent quality sorghum and greater end-use value information will encourage domestic and foreign buyers to consider sorghum in their grain buying decisions.

Opponents are concerned that the proposal would disadvantage certain geographical locations and inflict significant economic losses on producers and handlers without improving the Nation's competitive position in the world market. They explained that many sorghum handling facilities are not equipped to clean sorghum and if enacted, the proposal could force facilities to retrofit existing operations to meet the separate BN and FM grade limits. Furthermore, they contended that dealing with two separate factors rather than one combined factor could inhibit handling efficiency. Opponents conclude that the cost of retrofitting and the reduced operational efficiency far exceed the benefits that may result from establishing separate BN and FM grading limits. Several commentors added that the market has not demonstrated any contractual interest in receiving separate BN and FM information or limiting the amounts of BN and FM currently being delivered. In fact, some handlers and merchants believe that enacting the proposal would result in a greater market demand for U.S. No. 3 sorghum and considerably less demand for U.S. No. 2 because price governs sales more so than quality.

While a consensus of the sorghum handlers oppose the idea of separating BN and FM, they do not necessarily oppose a reduction in the amount of BNFM permitted in the different numerical grades. One trade association commenting on the proposal believes the industry can economically support some tightening of the BNFM levels, but questions the rationale for such a reduction by stating that "lower limits should be based upon market demand and we don't believe that has been clearly established."

The current sorghum standards permit a wide range of BNFM in each grade. For example, the difference between the current U.S. No. 2 BNFM limit and that of U.S. No. 3 is 4 percentage points. Consequently, a buyer may receive one shipment of U.S. No. 2 sorghum containing only 4.1 percent BNFM and in the next shipment receive as much as 8 percent BNFM. This inconsistency in BNFM levels complicates end-use processing and represents a significant difference in product value.

During a 1989 grain sorghum research and utilization conference in Lubbock, Texas, end-users representing the feed, food, and industrial sectors of the sorghum industry expressed their concern over the levels and inconsistency of BNFM in sorghum. In the steam flaking process, high levels of BNFM interfere with the intact kernel's ability to absorb water. Broken kernel and foreign material absorb moisture at a faster rate which limits the amount of available moisture and impacts on the overall processing performance. In addition, processors and end-users are concerned because BNFM is a better media for mold, which could lead to mycotoxin production.

In reaching a final decision regarding BNFM, FGIS carefully considered the technical constraints and marketing concerns of the grain handlers and merchants. As stated earlier, those opposing separate BN and FM limits stated such action could threaten the efficiency with which the Untied States handles and markets sorghum and conceivably shift the quality preference of sorghum customers. FGIS believes changes to the sorghum standards must serve to improve market efficiency and encourage the production and delivery of high quality sorghum. FGIS' decision to retain BNFM as a grading factor and add a subfactor limit for FM should achieve these objectives.

BNFM will remain as a grade determining factor in sorghum with the limits for U.S. Nos. 2, 3, and 4 sorghum reduced to 7, 10, and 13 percent, respectively. The BNFM limit for U.S. No. 1 sorghum will remain at 4 percent. The corresponding FM fractions for grades 1 through 4 are established at 1.5, 2.5, 3.5, and 4.5 percent, respectively.

This new FM standard limits the amount of FM in BNFM for U.S. No. 2 sorghum to 35.7 percent; whereas, prior to this change, 100 percent of the BNFM could have been FM. Such a restriction is also comparable to the standards of other major sorghum exporters. Argentina, for instance, whose export standard is comparable to the current U.S. No. 2 BNFM standard, allows up to 5 percent BN and 3 percent FM. Therefore, 37.5 percent of the combined BNFM may be FM. Similarly, certain

Australian standards allow up to 50 percent of the BNFM to be FM.

The final decision to make FM a subfactor of BNFM rather than a separate factor alters the projected market impact discussed in the proposal. FGIS had estimated that the proposed rule to establish separate limits for BN and FM would have resulted in 77.4 rather than 100 percent of the export lots and 73.6 rather than 94.4 percent of the domestic lots receiving the U.S. No. 2 or better grade designation. These estimates were based on BNFM inspection data collected between 1987 and 1989 and assumed no immediate market reaction to lower actual BN and FM levels. FGIS's decision to place a restriction only on the levels of FM in the combined BNFM factor lessens the estimated market impact.

FGIS estimates this final rule will result in 91.4 and 87.6 percent of the export and domestic sorghum lots, respectively, continuing to receive the U.S. No. 2 or better grade designation. This compares with a current level of 99.9 and 95.7 percent for export and domestic sorghum lots, respectively. These new estimates are based on available inspection data collected between 1987 and 1991 and again assumes no immediate market reaction to lower actual BN and FM level.

It is impractical to speculate specific market reaction to the revised BNFM limits. If the market views these changes as positive, market changes could occur to create incentives for lower BNFM sorghum. That is, a market environment would evolve with greater price discrimination between low and high BNFM sorghum. If the new limits do not serve as an incentive to improve market efficiencies, the market will, through contractual arrangements, find a BNFM level that optimizes market performance. The revised limits are new parameters for describing sorghum quality which will serve as an incentive for members of the sorghum market at all levels to examine their operational and marketing practices and revise them as deemed necessary to improve market efficiency.

Based on comments received regarding the BNFM proposal and other available information, FGIS is revising the sorghum standards to:

(1) Reduce the BNFM limits for grades 2, 3, and 4; and

(2) Include FM as a subfactor with maximum limits under BNFM for each grade.

FGIS is taking this action to better reflect sorghum quality in the standards, to encourage the delivery of high quality sorghum, and to discourage the addition of foreign material and other grains to sorghum.

Dockage

To more accurately and precisely report dockage in sorghum, FGIS proposed the reporting of dockage to the nearest tenth percent, rather than whole percents with fractions being disregarded.

FGIS received mixed opinions regarding this proposal. In general, producers and academicians supported efforts to provide further quality information to the market. In contrast, the grain handlers and merchants were generally opposed to reporting dockage in tenths of a percent because it "could introduce a new variable in merchandising that would raise questions for our export customers * * *." In fact, several opponents directly or indirectly suggested that the term "dockage" be deleted from the sorghum standards and that the material currently defined as dockage be included in FM.

Based on available sorghum inspection data, dockage is not reported in 97 percent of the domestic sorghum lots and 99.9 percent of the export lots because it does not exceed 1 percent. Therefore, reporting dockage on each certificate may indeed prompt merchandisers to reevaluate the way in which sorghum is marketed. Furthermore, the two major export competitors, Argentina and Australia, do not make any distinction between BNFM and dockage.

However, FGIS has decided to investigate alternative options regarding dockage with a possible proposal for action at a later date. Therefore, no change is being made to the dockage procedures. Dockage will continue to be reported as a whole percent with any fraction of a percent disregarded.

Brown Sorghum Limits

FGIS proposed to reduce the amount of Brown sorghum allowed in Yellow sorghum from 10.0 percent to 3.0 percent. Twenty-six commentors supported the proposed action and two commentors did not have an opinion and one commentor felt the reduction was too dramatic stating that "any time you make a 70% adjustment, you either question the old standard or the new standard."

Yellow sorghum is generally considered to have approximately 95 percent of the nutritional value of corn (1, 2). However, the nutritional value of Brown (high-tannin) sorghum does not compare favorably to that of Yellow sorghum. Feeding trials have demonstrated that Brown sorghum can cause as much as a 30-percent reduction in feed efficiency when compared to Yellow sorghum, depending on the class of livestock being fed, the method of feeding, and other variables (1). Research has shown that the nutritional impact of feeding Brown sorghum depends on the level of tannin in the grain and the percent of the diet it comprises (3). At the present time, however, due to the variability of the tannin content among Brown sorghum varieties, it is impractical to assess the level which would effect feed efficiency. The intent of the proposed reduction of Brown sorghum limits is to assure U.S. sorghum customers of its relatively high nutritional value.

Brown sorghum accounts for approximately 2 percent of the total U.S. sorghum production. The potential for combining Brown sorghum with Yellow sorghum at unacceptable levels has hindered U.S. sorghum promotional efforts according to the Grain Sorghum Promotion Federation (GSPF), the market development entity of the National Grain Sorghum Producers Association (NGSPA). They indicate livestock feeders that have witnessed the animals' poor performance when fed the sorghum mixtures have become prejudiced against sorghum in general.

Although FGIS cannot establish the limit based on quantitative evidence regarding the effects on nutritional value, FGIS, believes that limiting the amount of Brown sorghum in Yellow sorghum to 3 percent will improve a buyer's confidence in the quality of U.S. sorghum by providing reasonable assurances to domestic and foreign customers that the sorghum will have approximately 95 percent the nutritional value of corn in livestock feed. Consequently, FGIS is amending the sorghum standards to reduce the amount of Brown sorghum allowed in Yellow sorghum, from 10.0 percent to 3.0 percent.

Class and Definition Terms

FGIS proposed to modify the classification terminology for the class Yellow and Brown sorghum to more clearly discriminate between the two classes. In addition, FGIS proposed to revise the definition for all classes of sorghum. Twenty-five commentors either supported or generally supported and four were silent on these issues.

The current classification system based on the visual appearance (color) of the kernel is confusing. The pericarp (seedcoat) colors of one class can also be observed in the other, with the exception of the brown pericarp. Only Brown sorghum has a brown pericarp, but, it is sometimes difficult to

distinguish the brown pericarps of the Brown sorghum varieties from the reddish-brown pericarps common to many Yellow sorghum varieties. A better distinction between the two classes is the presence of a pigmented testa (subcoat). The testa, which contains condensed tannins, is only present in Brown sorghum. It is the condensed tannins which are believed to be responsible for the nutritional effects associated with feeding Brown sorghum (1, 2). Consequently, to more distinctly define and isolate the two classes, FGIS is changing the class Brown sorghum to Tannin sorghum and revising the corresponding definition to include the words "pigmented testa" and "tannin."

The class Yellow sorghum, which includes more reddish-colored kernels than yellow colored kernels, creates some confusion in the marketplace. Due to the array of colors found in this class and the fact that the majority of the sorghum grown in the United States falls into this classification, FGIS is changing the class Yellow sorghum to Sorghum. Further, to communicate the fact that sorghum varieties within this class do not have a pigmented testa layer or the correspondingly high tannin levels, FGIS is revising the definition to reflect this information. It is important to note that although sorghum varieties without testa layers do not contain condensed tannins, the analytical methods employed for tannin analyses routinely report low-tannin levels due to the presence and measurement of other nontannin phenols (1). For this reason, definitions for the nontannin sorghum classes include a statement that they are low in tannin content.

While FGIS is retaining the classification terminology for White and Mixed sorghum, the definitions for these classes are being revised to coincide with the classification changes and revisions discussed above.

Inspection Plan Tolerances

Grain sorghum lots are inspected by a statistically based inspection plan. Inspection tolerances, commonly referred to as breakpoints (BP), are used to determine acceptable quality. As a result of the sorghum standards changes discussed above, some of the established breakpoints for sorghum require adjustment. Consequently, FGIS is revising section 800.86 (c)(2) of the regulations, tables 15 and 16, to reflect the corresponding changes/additions in the established inspection plan tolerances. The grade limits (GL) and BP for sorghum and the BP for sorghum special grades and factors are also revised.

Grade Chart Format

FGIS is revising the grade chart format in section 810.1404, Grades and grade requirements for sorghum, to improve the readability of the grade chart. In addition, section (b) of section 810.1404 is being revised and incorporated into the grade chart.

PART 810—OFFICIAL UNITED STATES STANDARDS FOR GRAIN

3. The authority citation for Part 810 continues to read as follows:

Authority: Pub. L. 94–582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*).

Subpart I—United States Standards for Sorghum

4. In § 810.1402, paragraph (i) is removed, paragraphs (j) and (k) are redesignated (i) and (j) and republished, and paragraphs (b) and (c) are revised to read as follows:

§ 810.1402 Definitions of other terms.

* * * * *

(b) *Broken kernels and foreign material.* The combination of broken kernels and foreign material as defined in paragraph (a) and (f) of this section.

(c) *Classes.* There are four classes of sorghum: Sorghum, Tannin sorghum, White sorghum, and Mixed sorghum.

(1) *Sorghum.* Sorghum which is low in tannin content due to the absence of a pigmented testa (subcoat) and contains less than 98.0 percent White sorghum and not more than 3.0 percent Tannin sorghum. The pericarp color of this class may appear white, yellow, pink, orange, red, or bronze.

(2) *Tannin sorghum.* Sorghum which is high in tannin content due to the presence of a pigmented testa (subcoat) and contains not more than 10.0 percent non-Tannin sorghum. The pericarp color of this class is usually brown but may also be white, yellow, pink, orange, red, or bronze.

(3) *White sorghum.* Sorghum which is low in tannin content due to the absence of a pigmented testa (subcoat) and contains not more than 2.0 percent sorghum of other classes. The pericarp color of this class is white or translucent and includes sorghum containing spots that, singly or in combination, cover 25.0 percent or less of the kernel.

(4) *Mixed sorghum.* Sorghum which does not meet the requirements for any of the classes Sorghum, Tannin sorghum, or White sorghum.

* * * * *

(i) *Pericarp.* The pericarp is the outer layers of the sorghum grain and is fused to the seedcoat.

(j) *Sieves.*

(1) *1.98 mm (5/64 (0.0781) inches) triangular-hole sieve.* A metal sieve 0.81 mm (0.032 inches) thick with equilateral triangular perforations the inscribed circles of which are 1.98 mm (0.0781 inches) in diameter.

(2) *0.99 mm (2 1/2 /64 (0.0391) inches) round-hole sieve.* A metal sieve 0.81 mm (0.032 inch) thick with round holes 0.99 mm (0.0391 inches) in diameter.

5. Section 810.1403 is revised to read as follows:

§ 810.1403 Basis of Determination.

Each determination of broken kernels and foreign material is made on the basis of the grain when free from dockage. Each determination of class, damaged kernels, heat-damaged kernels, and stones is made on the basis of the grain when free from dockage and that portion of the broken kernels, and foreign material that will pass through a 1.98 mm (5/64 inches) triangular-hole sieve. Other determinations not specifically provided for in the general provisions are made on the basis of the grain as a whole except the determination of odor is made on either the basis of the grain as a whole or the grain when free from dockage, broken kernels, and foreign material removed by the 1.98 mm (5/64 inches) triangular-hole sieve.

6. Section 810.1404 is revised to read as follows:

§ 810.1404 Grades and grade requirements for sorghum.

Grading factors	Grades U.S. Nos.[1]			
	1	2	3	4
Minimum pound limits of:				
Test weight per bushel	57.0	56.0	53.0	51.0
Maximum percent limits of:				
Damaged kernels:				
Heat (part of total)	0.2	0.5	1.0	3.0
Total	2.0	5.0	10.0	15.0
Broken kernels and foreign material:				
Foreign material (part of total)	1.5	2.5	3.5	4.5
Total	4.0	7.0	10.0	13.0
Maximum count limits of:				
Other material:				
Animal filth	0	0	0	0
Castor beans	1	1	1	1
Crotalaria seeds	2	2	2	2
Glass	1	1	1	1
Stones[2]	7	7	7	7
Unknown foreign substance	3	3	3	3
Cockleburs	7	7	7	7

U.S. Sample grade is Sorghum that:
(a) Does not meet the requirements for U.S. Nos. 1, 2, 3, or 4; or
(b) Has a musty, sour or commercially objectionable foreign odor (except smut odor); or
(c) Is badly weathered, heating or distinctly low quality.

[1] Sorghum which is distinctly discolored shall not grade higher than U.S. No. 3.
[2] Aggregate weight of stones must also exceed 0.2 percent of sample weight.

Dated: November 3, 1992.

John C. Foltz,

Administrator.

BILLING CODE 3410-EH-M

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

12 CFR Part 5

[Docket No. 92-25]

Receivership

AGENCY: Office of the Comptroller of the Currency, Treasury.

ACTION: Final rule.

SUMMARY: The Office of the Comptroller of the Currency (OCC) is removing its receivership regulation. The OCC presently makes an "insolvency" determination when placing a national bank into receivership. Effective December 19, 1992, statutory changes provide the OCC with new, additional grounds for appointing a receiver for a national bank. With these statutory changes, the OCC will no longer be required to make an "insolvency" determination; and the receivership regulation will no longer be necessary.

EFFECTIVE DATE: December 19, 1992.

FOR FURTHER INFORMATION CONTACT: Christina Trojan-Masnyk, Attorney, Corporate Organization and Resolutions Division, (202) 874-5300, Office of the Comptroller of the Currency, Washington, DC 20219.

SUPPLEMENTARY INFORMATION: The OCC has the authority to appoint a receiver for a national bank, under 12 U.S.C. 191, whenever the OCC becomes satisfied of its insolvency, after due examination of its affairs. Because insolvency is not defined in the statute, and to clarify the basis under which the OCC could appoint a receiver for a national bank, the OCC promulgated 12 CFR 5.49 (receivership regulation). This regulation defines two possible insolvency tests the OCC may consider in determining whether to appoint a receiver for a national bank. The receivership regulation defines a "net worth insolvency" test and a "liquidity insolvency" test. The receivership regulation notes that the OCC may also use alternate methods to determine whether a national bank is insolvent.

Effective December 19, 1992, 12 U.S.C. 191 is amended by section 133 of the Federal Deposit Insurance Corporation Improvement Act of 1991, Public Law 102-242, 105 Stat. 2236 (December 19, 1991) (FDICIA). Section 133 of FDICIA provides the OCC, and the other Federal banking agencies, with uniform grounds for appointing either a conservator or a receiver. The grounds as specified in 12 U.S.C. 1821(c)(5) are:

(A) The institution's assets are less than the institution's obligations to its creditors and others, including members of the institution [for a mutual institution].

(B) Substantial dissipation of assets or earnings due to—

(i) any violation of any statute or regulation; or

(ii) any unsafe or unsound practice.

(C) An unsafe or unsound condition to transact business.

(D) Any willful violation of a cease and desist order which has become final.

(E) Any concealment of the institution's books, papers, records, or assets, or any refusal to submit the institution's books, papers, records, or affairs for inspection to any examiner or to any lawful agent of the appropriate Federal banking agency or State bank or savings association supervisor.

(F) The institution is likely to be unable to pay its obligations or meet its depositors' demands in the normal course of business.

(G) The institution has incurred or is likely to incur losses that will deplete all or substantially all of its capital, and there is no reasonable prospect for the institution to become adequately capitalized (as defined in 12 U.S.C. 1831o(b)) without Federal assistance.

(H) Any violation of any law or regulation, or any unsafe or unsound practice or condition that is likely to—

(i) Cause insolvency or substantial dissipation of assets or earnings;

(ii) Weaken the institution's condition; or

(iii) Otherwise seriously prejudice the interests of the institution's depositors or the deposit insurance fund.

(I) The institution, by resolution of its board of directors or its shareholders or members, consents to the appointment.

(J) The institution ceases to be an insured institution.

(K) The institution is "undercapitalized" [1] and—

(i) has no reasonable prospect for becoming adequately capitalized (as defined);

(ii) fails to become adequately capitalized when required to do so under 12 U.S.C. 1831o(f)(2)(A);

(iii) fails to submit a capital restoration plan acceptable to the appropriate agency within the time prescribed under 12 U.S.C. 1831o(e)(2)(D); or

(iv) materially fails to implement a capital restoration plan submitted and accepted under 12 U.S.C. 1831o(e)(2).

(L) The institution—

(i) is "critically undercapitalized;" [2] or

(ii) otherwise has substantially insufficient capital. 12 U.S.C. 203(a) and 1821(c)(5).[3]

Some of these grounds are similar to, and have the same effect as, the net worth test and the liquidity test in the regulation. However, the amendment to 12 U.S.C. 191 makes the regulation unnecessary.

Administrative Procedure Act

The OCC is adopting this rulemaking as a final rule effective December 19, 1992. The OCC finds, pursuant to 5 U.S.C. 553(b)(B), that notice and public comment procedure is unnecessary and contrary to the public interest. The OCC finds that the public interest is best served through removing the receivership regulation at the same time that the new grounds for appointing a receiver for a national bank become effective. This simultaneous effective date will assure the least possible confusion regarding the basis under which a national bank may be placed into receivership and will avoid any unnecessary delays in permitting the OCC to take appropriate actions for the protection of depositors of a national bank. Because the changes to the grounds for appointing a receiver for a national bank are based on statutory amendments, and not merely changes in OCC policy on determining when to appoint a receiver, public comment on the grounds for appointment of a receiver is unnecessary and contrary to the public interest. Accordingly, the OCC finds that this decision is exempt from the notice and comment provisions

[1] "Undercapitalized" means the institution fails to meet any of the minimum required capital ratios established under 12 U.S.C. 1831o(b)(1)(C), as amended by section 131 of FDICIA.

[2] "Critically undercapitalized" means the national bank fails to meet any of the critical capital levels to be set by the OCC under 12 U.S.C. 1831o (b)(1)(E) and (c)(3)(A), as amended by section 131 of FDICIA. See 57 FR 44866, 44891 *et seq.* (September 29, 1992), to be codified at 12 CFR part 6, subpart A. For critically undercapitalized national banks, the OCC must generally appoint a receiver within 90 days, appoint a conservator within 90 days with the concurrence of the Federal Deposit Insurance Corporation (FDIC), or take other action which the OCC determines, with the concurrence of the FDIC, would better achieve the goal of increased capitalization at such bank, under 12 U.S.C. 1831o(g)(3), as amended by section 131 of FDICIA.

[3] The OCC may not appoint a conservator for a national bank under the last two grounds without the FDIC's consent, unless the OCC has given the FDIC 48 hours notice of the intention and the grounds therefor. 12 U.S.C. 1821(c)(11).

of the Administrative Procedure Act under 5 U.S.C. 553(b)(B).

For the reasons set forth above, good cause also exists for publication of this final rule less than 30 days before its effective date, pursuant to 5 U.S.C. 553(d)(3). In addition, a delayed effective date would result in the continued existence of a regulation which has been superseded, and rendered ineffective, by a statutory change.

Regulatory Flexibility Act

Because no notice of proposed rulemaking is required for this rulemaking, the provisions of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, do not apply.

Executive Order 12291

The OCC has determined that this rulemaking is not a "major rule" as defined in Executive Order 12291, and it therefore does not require a Regulatory Impact Analysis. This action is required to give effect to statutory changes and is not expected to have any material effect on a national bank.

List of Subjects in 12 CFR Part 5

Administrative practice and procedure, National banks, Reporting and recordkeeping requirements, Securities.

Authority and Issuance

For the reasons set out in the preamble, part 5 of chapter I of title 12 of the Code of Federal Regulations is amended as follows:

PART 5—[AMENDED]

1. The authority citation for part 5 is revised to read as follows:

Authority: 12 U.S.C. 1 *et seq.*, 93a.

§ 5.49 [Amended]

2. Part 5 is amended by removing § 5.49.

Dated: October 14, 1992.

Stephen R. Steinbrink,

Acting Comptroller of the Currency.

[FR Doc. 92-30191 Filed 12-11-92; 8:45 am]

BILLING CODE 4810-33-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 91-CE-14-AD; Amendment 39-8438; AD 92-27-05]

Airworthiness Directives; Piper Aircraft Corporation PA-31 Series Airplanes

AGENCY: Federal Aviation Administration; DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to certain Piper Aircraft Corporation (Piper) PA-31 series airplanes. This action requires painting the color red on the aileron balance cable and the bellcrank lug of both aileron control systems. The Federal Aviation Administration (FAA) has received several reports of improper connections of the aileron control systems on the affected airplanes. The actions specified by this AD are intended to prevent improper connection of the aileron control systems, which could result in loss of lateral control of the airplane because the left and right ailerons could only move in the same direction.

EFFECTIVE DATE: January 29, 1993.

ADDRESSES: Information that is related to this AD may be examined at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Charles Perry, Aerospace Engineer, FAA, Atlanta Aircraft Certification Office, 1669 Phoenix Parkway, suite 210C, Atlanta, Georgia 30349; Telephone (404) 991-2910; Facsimile (404) 991-3606.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an AD that is applicable to certain Piper PA-31 series airplanes was published in the **Federal Register** on July 15, 1992 (57 FR 31341). The action proposed painting the color red on the aileron balance cable and the bellcrank lug on both aileron control systems.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the one comment received.

The commenter recommends that the compliance time be changed to the next annual inspection instead of within the next 100 hours time-in-service because, if the airplane is currently flying, it is safe to assume that the aileron cables are properly connected. The FAA concurs that, if the airplane is currently flying, then the aileron cables are properly connected, and that under these circumstances, the next 100 hours TIS is not a justifiable compliance time. The FAA has determined that, because of the nature of this situation and the operator-need for flexibility in accomplishing the required actions, the compliance time should be changed to the next time the aileron cables are disconnected for any reason, but not later than 12 calendar months from the effective date of the AD. The proposed AD has been revised to reflect this change in the compliance time.

No comments were received on the FAA's determination of the cost to the public.

After careful review, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed except for the compliance time revision described above and minor editorial corrections. The FAA has determined that the revision and minor corrections will not change the meaning of the AD nor add any additional burden upon the public than was already proposed.

The FAA estimates that 3,361 airplanes in the U.S. registry will be affected by this AD, that it will take approximately 1 workhour per airplane to accomplish the required action, and that the average labor rate is approximately $55 an hour. Parts cost approximately $20 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $272,325.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the

Rules Docket at the location provided under the caption "ADDRESSES".

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [AMENDED]

2. Section 39.13 is amended by adding the following new AD:

92-27-05 Piper Aircraft Corporation: Amendment 39-8438; Docket No. 91-CE-14-AD.

Applicability: PA-31 Series airplanes (all models and serial numbers), certificated in any category. Compliance: Required the next time the aileron cables are disconnected for any reason, but no later than 12 calendar months after the effective date of this AD, unless already accomplished.

To prevent improper connection of the aileron control systems, which could result in loss of lateral control of the airplane, accomplish the following:

(a) Using red enamel paint, color code the aileron balance cable and the bellcrank lug of both aileron control systems in accordance with Figure 1 of this AD.

BILLING CODE 4910-13-M

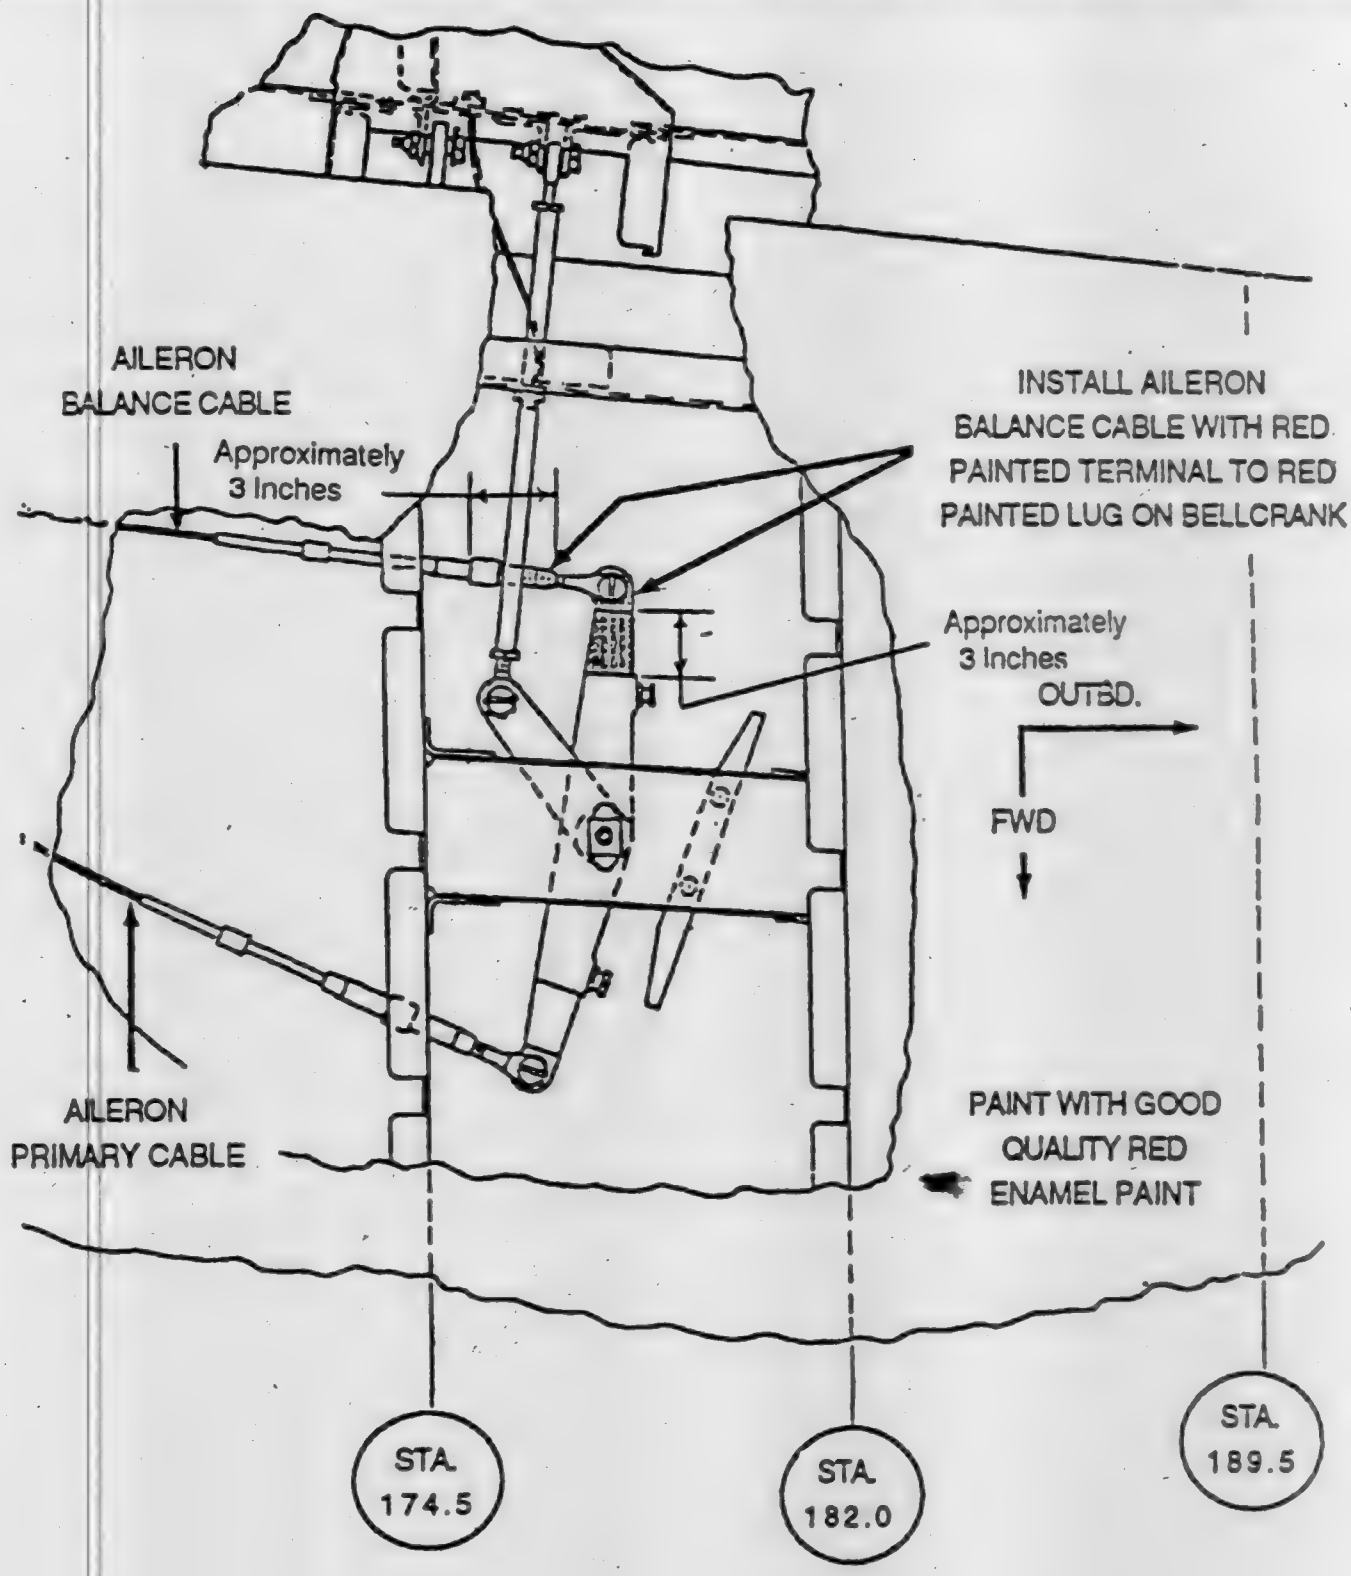

FIGURE 1

VIEW LOOKING THRU TOP WING SKIN (LEFT WING)
RIGHT WING OPPOSITE

BILLING CODE 4910-13-C

(b) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a location where the requirements of this AD can be accomplished.

(c) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Atlanta Aircraft Certification Office, 1669 Phoenix Parkway, Suite 210C, Atlanta, Georgia 30349. The request shall be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Atlanta Aircraft Certification Office.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Atlanta Aircraft Certification Office.

(d) All persons affected by this directive may examine any information that is applicable to this AD at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

(e) This amendment (39–8438) becomes effective on January 29, 1993.

Issued in Kansas City, Missouri, on December 8, 1992.

John E. Tigue,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92–30226 Filed 12–11–92; 8:45 am]

BILLING CODE 4910–13–M

FEDERAL TRADE COMMISSION

16 CFR Part 305

RIN 3084–AA25

Rules for Using Energy Cost and Consumption Information Used in Labeling and Advertising of Consumer Appliances Under the Energy Policy and Conservation Act; Corrections to Ranges of Comparability for Dishwashers

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: The Federal Trade Commission amends its Appliance Labeling Rule by issuing corrections to the ranges of comparability used on required labels for dishwashers that were published on September 22, 1992.[1] Properly labeled dishwashers manufactured prior to the effective date of this notice (including dishwashers labeled in accordance with the ranges published on September 22, 1992) need not be relabeled. Catalogs printed prior to the effective date in accordance with 16 CFR 305.14 need not be revised. Those manufacturers who have already printed or purchased labels in reliance on the September 22 notice may use those labels until the label stock is exhausted; they must use labels based on the ranges published today after that.

EFFECTIVE DATE: March 15, 1993.

FOR FURTHER INFORMATION CONTACT: James Mills, Attorney, 202–326–3035, Division of Enforcement, Federal Trade Commission, Washington, DC 20580.

SUPPLEMENTARY INFORMATION: This notice publishes the corrected range figures, which, under Sections 305.10, 305.11 and 305.14 of the rule, must be used on labels on dishwashers manufactured on and after March 15, 1993. and in advertising of dishwashers in catalogs printed after March 15, 1993.

New figures for the estimated annual costs of operation for dishwashers, which were calculated using the 1992 representative average energy costs published by DOE on January 14, 1992,[2] were submitted and analyzed by the Commission. New ranges based upon them were published in the **Federal Register** on September 22, 1992. The staff of the Commission has learned since then that there were several inadvertent errors in those ranges. The staff has corrected the errors, and the new ranges published today reflect the corrections. For the sake of clarity, the Commission is republishing the complete set of ranges in their corrected form.

Although this corrected notice is being published prior to the effective date of the September 22, 1992 notice, which is now rescinded, manufacturers need not relabel any appliances already labeled and may use any labels that were ordered or printed before the date of this notice in good faith reliance on the September 22 notice. After this initial stock of labels is exhausted, however, labels based on today's notice must be used.

In consideration of the foregoing, the Commission amends Appendix C of its Appliance Labeling Rule by publishing the following ranges of comparability for use in the labeling and advertising of dishwashers beginning March 15, 1993.

List of Subjects in 16 CFR Part 305

Advertising, Energy conservation, Household appliances, Labeling, Reporting and recordkeeping requirements.

Accordingly, 16 CFR Part 305 is amended as follows:

[1] 57 FR 43611.

[2] 57 FR 1461. The cost for electricity was published as 8.25 cents per kilowatt-hour; for natural gas: 58 cents per therm; for propane: 74 cents per gallon; for No. 2 heating oil: $1.03 per gallon.

PART 305—[AMENDED]

1. The authority citation for Part 305 continues to read as follows:

Authority: Sec. 324 of the Energy Policy and Conservation Act (Pub. L. 94–163) (1975), as amended by the National Energy Conservation Policy Act, (Pub. L. 95–619) (1978), the National Appliance Energy Conservation Act, (Pub. L. 100–12) (1987), and the National Appliance Energy Conservation Amendments of 1988, (Pub. L. 100–357) (1988), 42 U.S.C. 6294; sec. 553 of the Administrative Procedure Act, 5 U.S.C. 553.

2. In appendix C, Paragraph 1 and the introductory text in Paragraph 2 are revised to read as follows:

Appendices

* * * * *

Appendix C to Part 305—Dishwashers

1. *Range Information:* "Compact" includes countertop dishwasher models with a capacity of fewer than eight (8) place settings.

"Standard" includes portable or built-in dishwasher models with a capacity of eight (8) or more place settings.

Place settings shall conform to AHAM Specification DW–1 for chinaware, flatware and serving pieces. Load patterns shall conform to the operating normal for the model being tested.

Ranges of Comparability	Ranges of estimated yearly energy costs			
	Electrically heated Water		Natural gas heated Water	
	Low	High	Low	High
Compact	(1)	(1)	(1)	(1)
Standard	$46.00	$82.00	$25.00	$46.00

[1] No data submitted.

2. *Yearly Cost Information:* Estimates on the scales are based on a national average electric rate of 8.25¢ per kilowatt hour, a national average natural gas rate of 58¢ per therm, and eight loads of dishes per week.

BILLING CODE 6750–01–M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 33

Regulation of Domestic Exchange-Traded Commodity Option Transactions

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rulemaking.

SUMMARY: The Commodity Futures Trading Commission (Commission) is deleting regulations which require boards of trade designated as contract markets for options to adopt rules requiring member futures commission merchants ("FCMs") that engage in the offer or sale of commodity options regulated under part 33 to send copies of customer complaints and their resolutions and copies of all promotional material to the members' designated self-regulatory organization ("DSRO"). The purpose of this deletion is to eliminate duplicative recordkeeping requirements affecting FCMs.

EFFECTIVE DATE: January 13, 1993.

FOR FURTHER INFORMATION CONTACT: Tobey Kaczensky, Assistant Deputy Director, Audit and Review Section, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Telephone (202) 254–8246.

SUPPLEMENTARY INFORMATION:

I. Background

On September 4, 1992, the Commission published for comment a proposal to delete provisions of Regulation § 33.4 which require boards of trade designated as contract markets for options to adopt rules requiring member FCMs that engage in the offer or sale of commodity options to forward customer complaints and the resolutions thereof, and copies of all promotional material, to the member's self-regulatory organization. Commission Regulation § 33.4(b)(4)(i) will continue to require that boards of trade require member FCMs to retain all options complaints. In addition, Regulation § 33.4(b)(ii) will continue to require that boards of trade adopt and retain rules which require each FCM to make a record of the date the complaint was received, the associated person who serviced, or the introducing broker who introduced the account, a general description of the matter complained of, and what, if any, action was taken by the FCM in regard to the complaint.

The provisions to be deleted date from the Commission's pilot program for the reintroduction of domestic exchange-traded options. At that time, the Commission was concerned that the history of customer abuses that marked the previous trading of commodity options not be repeated. Thus, the Commission imposed certain requirements on the exchanges in an effort to guard against fraud in the offer and sale of exchange-traded options on commodity futures. The pilot program has since been terminated. Based on its experience with the administration of the options pilot program for ten years, the Commission recently reassessed the need for some of the differential sales practice and monitoring imposed on options, and as a result determined to eliminate some provisions of the options designation requirements.[1]

In light of the activities of the Joint Audit Committee ("JAC"), which is responsible for, among other things, coordinating the self regulatory organizations' audit and financial surveillance programs, including futures and options sales compliance audit procedures, the Commission believes that the exchanges and the National Futures Association (NFA) can be given some flexibility in meeting their affirmative action compliance obligations. It should be noted that the JAC's program for FCM audits includes a review of options, customer complaints and promotional material. In addition, NFA Rule 2–29 sets standards for promotional material and provides certain circumstances under which NFA may review such material.

The Commission believes that the elimination of the regulations described will reduce duplicative reporting requirements without significantly reducing customer protection. The staff will monitor through rule enforcement reviews the review of complaints and promotional material.

II. Related Matters

A. Notice and Comment

The Commission's proposal to delete Regulations § 33.4(b)(4)(iii) and (b)(8) was published in the **Federal Register** (57 FR 40626) on September 4, 1992 for 30 days comment.

Comments in support of the proposed deletions were received from two exchanges, the Chicago Board of Trade (CBOT) and the Chicago Mercantile Exchange (CME); from the Futures Industry Association (FIA); from the National Futures Association (NFA), and from Prudential Securities, Inc. (Prudential). There were no comments filed which opposed deletion.

The commenters uniformly stated that they believed the regulations require unnecessary recordkeeping by DSROs (FIA, CBOT, CME) and are duplicative. With regard to Regulation § 33.4(b)(4)(iii), NFA emphasized that, for those FCMs for which it serves as the DSRO, its compliance staff routinely reviews written customer complaints during audits of those FCMs. NFA stated that it is sent customer complaints directly by customers,[2] and that it reviews promotional material during on-site audits of FCMs, and also promotional material which is submitted pursuant to NFA Rule 2–29. Thus, NFA's present system assures review of both customer complaints and promotional material absent the regulatory requirements which the Commission has deleted.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) 5. U.S.C. 601 *et seq.*, requires that agencies, in proposing rules, consider the impact of those rules on small businesses. These proposed deletions will permit contract markets to change rules affecting FCMs and thereby to relieve a regulatory burden. The Commission has previously established certain definitions of "small entities" to be used by the Commission in evaluating the impact of its rules on such entities in accordance with the RFA.[3] The Commission has previously determined that contract markets and registered FCMs are not small entities for the purpose of the RFA. Therefore, the deletions would not have a significant economic impact on small entities.

C. Paperwork Reduction Act

The Paperwork Reduction Act of 1980, (PRA) 44 U.S.C. 3501 *et seq.*, imposes certain requirements on federal agencies (including the Commission) in connection with their conducting or sponsoring any collection of information as defined by the PRA. In compliance with the Act the Commission has submitted these proposed deletions to the Office of Management and Budget. These proposed deletions have no burden.

List of Subjects in 17 CFR Part 33

Commodity futures.

In consideration of the foregoing and pursuant to the authority contained in the Commodity Exchange Act and, in particular, section 4(b) of said Act, the Commission amends part 33 of title 17 of the Code of Federal Regulations as follows:

---

[1] For background, see generally 56 FR 43694 (September 4, 1991).

[2] Those customers who have major complaints about an FCM are unlikely to send the complaint to the firm because the firm is the source of the problem. Thus, they direct their complaint to the self-regulatory entity for the industry, which is the NFA.

[3] 47 FR 18618–18621 (April 30, 1982).

PART 33—REGULATION OF DOMESTIC EXCHANGE-TRADED COMMODITY OPTION TRANSACTIONS

1. The authority citation for part 33 continues to read as follows:

Authority: 7 U.S.C. 2, 2a, 4, 6, 6a, 6b, 6e, 6f, 6g, 6h, 6i, 6j, 6k, 6l, 6m, 6n, 6o, 7, 7a, 7b, 8, 9, 11, 12a, 13a, 13a–1, 13b, 19, and 21, unless otherwise noted.

§ 33.4 [Amended]

2. Section 33.4(b)(4)(iii) is removed.

§ 33.4 [Amended]

3. Section 33.4(b)(8) is removed and reserved.

Issued in Washington, DC, this 8th day of December, 1992, by the Commodity Futures Trading Commission.

Jean A. Webb,

Secretary of the Commission.

BILLING CODE 6351–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 161 and 250

[Docket Nos. RM87–5–011 and CP87–238–002; Order No. 497–D]

Inquiry Into Alleged Anticompetitive Practices Related to Marketing Affiliates of Interstate Pipelines and Ozark Gas Transmission System; Order on Remand and Extending Sunset Date

Issued December 4, 1992.

AGENCY: Federal Energy Regulatory Commission, Energy.

ACTION: Final rule; order on remand and extending sunset date.

SUMMARY: This order addresses on remand an opinion of the U.S. Court of Appeals for the District of Columbia Circuit which upheld in substantial part the Commission's final rule governing the relationship between interstate natural gas pipelines and their marketing affiliates. The court also remanded for further consideration the Commission's extension of the rule's contemporaneous disclosure requirement to gas sales and marketing information. The Commission's order narrows the scope of the contemporaneous disclosure requirement with respect to sales and marketing information. The Commission's order also addresses whether the marketing affiliates rule should be applicable to the operations of Ozark Gas Transmission Company. Finally, the Commission's order extends the sunset date of the rule's reporting requirements to December 31, 1993.

EFFECTIVE DATE: This order is effective January 13, 1993.

FOR FURTHER INFORMATION CONTACT: David Faerberg, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, (202) 208–1275.

SUPPLEMENTARY INFORMATION: In addition to publishing the full text of this document in the **Federal Register**, the Commission also provides all interested persons an opportunity to inspect or copy the contents of this document during normal business hours in room 3308, 941 North Capitol Street, NE., Washington, DC 20426.

The Commission Issuance Posting System (CIPS), an electronic bulletin board service, provides access to the texts of formal documents issued by the Commission. CIPS is available at no charge to the user and may be accessed using a personal computer with a modem by dialing (202) 208–1397. To access CIPS, set your communications software to use 300, 1200, or 2400 baud, full duplex, no parity, 8 data bits and 1 stop bit. The full text of this order will be available on CIPS for 30 days from the date of issuance. The complete text on diskette in WordPerfect format may also be purchased from the Commission's contractor, La Dorn Systems Corporation, also located in room 3308, 941 North Capitol Street, NE., Washington, DC 20426.

ORDER ON REMAND AND EXTENDING SUNSET DATE

Before Commissioners: Martin L. Allday, Chairman; Charles A. Trabandt, Elizabeth Anne Moler, Jerry J. Langdon and Branko Terzic.

I. Introduction

On July 21, 1992, the United States Court of Appeals for the District of Columbia Circuit issued its opinion in *Tenneco Gas* v. *Federal Energy Regulatory Commission (Tenneco)*,[1] upholding in substantial part Order Nos. 497 and 497–A,[2] the Commission's final rule governing the relationship between interstate natural gas pipelines and their marketing or brokering affiliates. However, the court found that the Commission did not adequately justify its extension of the contemporaneous disclosure requirement of § 161.3(f)[3] to gas sales and marketing information. Further, in its review of *Ozark Gas Transmission System (Ozark)*,[4] a consolidated case, the court found that the Commission erred in finding Order No. 497 applicable to Ozark Gas Transmission System (Ozark), a joint venture. Accordingly, the court remanded the proceeding to the Commission. In response to the court's remand, this order revises § 161.3(f) to narrow the scope of the contemporaneous disclosure requirement with respect to sales and marketing information, and finds that Ozark is subject to the requirements of Order No. 497. In addition, this order extends the sunset date of Order No. 497's reporting requirements from December 31, 1992, until December 31, 1993. However, 90 days after the Commission has determined that an individual pipeline is in full compliance with Order No. 636, the pipeline will no longer be required to submit the affiliated transportation log (FERC Form 592) to the Commission.[5] The pipeline must continue to maintain[6] and to provide its affiliated transportation log information on its electronic bulletin board (EBB).[7]

II. Public Reporting Burden

Since certain categories of gas sales and marketing information will be eliminated from § 161.3(f), the amount of information that a pipeline must contemporaneously disclose will be reduced. However, the reporting burden

[Regulations Preambles 1986–1990] ¶ 30,908 (1990), order extending sunset date and amending final rule, Order No. ¶ 30,934 (1991), reh'g denied, 57 FR 5815, 58 FERC ¶ 61,139 (1992), aff'd in part and remanded in part, *Tenneco Gas* v. *FERC*, No. 89–1768 (DC Cir. July 21, 1992).

[3] 18 CFR 161.3(f).

[4] 49 FERC ¶ 61,247 (1989).

[5] Pipeline Service Obligations and Revisions to Regulations Governing Self-Implementing Transportation Under Part 284 of the Commission's Regulations; and Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol, 57 FR 13267 (April 16, 1992) III FERC Stats & Regs. Preambles ¶ 30,939 (April 8, 1992) (Order No. 636), order on reh'g, Order No. 636–A, 57 FR 36128 (August 12, 1992), III FERC Stats. & Regs. Preambles ¶ 30,950 (August 3, 1992).

[6] 18 CFR 250.16(a)(3) (1992).

[7] In Order No. 636, the Commission created new regulations which, *inter alia*, require all interstate pipelines transporting pursuant to part 284 of the Commission's regulations to create and maintain EBBs. See § 284.8(b)(4) and § 284.9(b)(4), 57 FR 13267 (April 16, 1992). Once operational, the EBB would become a pipeline's tool for compliance with Order No. 497's 24-hour electronic information requirement. See 18 CFR 250.16(g)(2) (1992).

will remain the same because such information is not reported on FERC Form No. 592. The Office of Management and Budget (OMB) approved the reporting requirements in the final rule on August 18, 1988. This approval is effective until December 31, 1992.

The current annual reporting burden for collection of information, as revised in order No. 636, is estimated to be 7,882 hours for FERC Form No. 592 (1902–0157). The industry burden is based on an estimated average of 9.94 hours per filing for the 61 respondents to complete 793 filings of FERC Form No. 592. This estimate includes the time for reviewing instructions, searching existing data sources, gathering and obtaining the data needed, and completing and reviewing the collection of information. Exemption from the requirement to file Form No. 592 90 days after full compliance with Order No. 636 should result in a reduction of the number of respondents.

Hard copy and/or electronic formats for any data collection required by this order may be obtained by contacting: La Dorn Systems Corporation, in room 3308, 941 North Capitol Street, NE., Washington, DC 20426.

III. Background

On June 1, 1988, the Commission issued Order No. 497,[8] a final rule in this proceeding, which was the result of a lengthy rulemaking proceeding[9] begun in response to petitions for rulemaking[10] and several cases that raised the issue of potential abuse in the relationship between interstate natural gas pipelines and their marketing or brokering affiliates.[11] The final rule in Order No. 497 adopted standards of conduct, codified at part 161 of the Commission's regulations,[12] and reporting requirements, codified at § 250.16 of the Commission's regulations,[13] intended to prevent the preferential treatment of an affiliated marketer by an interstate pipeline in the provision of transportation services. The final rule also adopted a sunset provision of December 31, 1989, for the reporting requirements of Order No. 497 and specifically reserved the Commission's right to extend the date, should the Commission decide there was a need to do so.

On December 15, 1989, the Commission issued Order No. 497–A[14] which granted partial rehearing of Order No. 497 and clarified certain provisions of the final rule. Order No. 497–A also extended the final rule's reporting requirements for an additional year, from December 31, 1989, to December 31, 1990, and stated that the Commission would examine the need to further extend the rule's reporting requirements prior to their sunset date of December 31, 1990.

On December 13, 1990, the Commission issued Order No. 497–B[15] which extended the sunset date of Order No. 497's reporting requirements for an additional year, from December 31, 1990, until December 31, 1991, because several issues regarding Order Nos. 497 and 497–A were pending. The issues included those raised in the protests of filings made by pipelines in response to the issuance of Order No. 497, the applicability of the standards of conduct to discount sales programs, as well as the appeal to the United States Court of Appeals for the District of Columbia Circuit.

On December 20, 1991, the Commission issued Order No. 497–C[16] which extended Order No. 497's reporting requirements for an additional year, from December 31, 1991, until December 31, 1992, and amended the final rule to reduce the number of paper printouts of the FERC Form No. 592 information that pipelines are required to file. The Commission extended Order No. 497's reporting requirements for an additional year because certain issues regarding Order Nos. 497 and 497–A were still pending and a new issue had arisen. The issues still pending were the applicability of the standards of conduct to discount sales programs and the appeal of Order No. 497 to the United States Court of Appeals for the District of Columbia Circuit. The new issue was the proposal in the Notice of Proposed Rulemaking in Docket No. RM91–11–00[17] to require pipelines to comply with Order No. 497's standards of conduct and reporting requirements by considering their unbundled sales operating employees as an operational unit which is the functional equivalent of a marketing affiliate. The Commission concluded that with these issues before it, it would be premature to let the reporting requirements lapse at the end of 1991.

On April 8, 1992, the Commission issued Order No. 636, a final rule in Docket No. RM91–11–000 which requires significant structural changes in the services provided by natural gas pipelines. Order No. 636 continues Order No. 497's standards of conduct for interstate pipelines with marketing affiliates. Order No. 636 also extends Order No. 497's standards of conduct and reporting requirements to transportation transactions where the pipeline provides unbundled gas sales service because the pipeline as a merchant would be the functional equivalent of a marketing affiliate.

On July 21, 1992, the United States Court of Appeals for the District of Columbia Circuit issued its opinion in *Tenneco*, upholding in substantial part Order Nos. 497 and 497–A. However, the court found that the Commission did not adequately justify its extension of the contemporaneous disclosure requirement of § 161.3(f)[18] to gas sales and marketing information. The court stated that "[o]n remand the Commission should reconsider its justification for applying [the contemporaneous disclosure requirement of § 161.3(f)] to sales and marketing information and ensure that the final requirement is reasonably tailored to meet the Commission's goals of improving the market and benefitting consumers, as well as preventing undue discrimination."[19] In a related matter, the court also stated that "[a]pplying [the contemporaneous disclosure requirement of 161.3(f)] to released-gas information prior to the issuance of Order No. 497–A might well be

fundamentally unfair" and that the Commission could avoid "the expense of litigation over this issue by announcing that it will not retroactively apply [161.3(f)] to released gas information."[20]

Further, in its review of *Ozark*, the court found that the Commission erred in finding Order No. 497 applicable to Ozark, a joint venture. Ozark is a partnership composed of subsidiaries of four natural gas pipelines, each of which has a 25 percent ownership and voting interest. Two of the owners have marketing affiliates. The court stated that the Commission failed to consider relevant evidence regarding the ability of the owner pipelines with affiliates to control the partnership.

IV. Discussion

Section 161.3(f) states that "[t]o the extent [a pipeline] provides to a marketing affiliate information related to transportation of natural gas, or gas sales or gas marketing it must provide that information contemporaneously to all potential shippers, affiliated and nonaffiliated, on its system." In *Tenneco*, the court found that "the contemporaneous disclosure requirement—at least as it affects information regarding transportation, where pipelines have monopolistic market power—reflects a reasonable effort to promote a competitive market without significantly harming existing efficiencies."[21] However, with respect to the contemporaneous disclosure of gas sales and marketing information, the court stated that it was "unable to conclude that standard (f)'s application to sales and marketing is justified; nor can we be confident that FERC possessed the statutory authority to regulate the transfer of sales and marketing information from pipelines to their affiliates."[22] The court remanded the proceeding to the Commission and stated that "[o]n remand, the Commission should consider its justification for applying standard (f) to sales and marketing information and ensure that the final requirement is reasonably tailored to meet the Commission's goals of improving the market and benefitting consumers, as well as preventing undue discrimination."[23]

Based upon the court's opinion, and in light of the structural changes in the gas industry that will occur as a result of Order No. 636, the Commission will revise § 161.3(f) to narrow the scope of the contemporaneous disclosure requirement with respect to sales and marketing information. Under revised standard (f), pipelines will still have to contemporaneously disclose information related to transportation of natural gas. However, with respect to information related to gas sales or marketing, pipelines will only be required to disclose information relating to sales or marketing on its system or the system of an affiliated pipeline. Accordingly, there will be two categories of gas sales or marketing information that will not be required to be contemporaneously disclosed: (1) gas sales or marketing information that is available from public sources and (2) information related to gas sales or marketing off a pipeline's system or the system of an affiliated pipeline. The Commission believes that a contemporaneous disclosure requirement revised in the manner discussed above is reasonably tailored to meet the its goals of improving the market and benefitting consumers, as well as preventing undue discrimination.

First, we will discuss the two categories of sales or marketing information that will be specifically excluded from the contemporaneous disclosure requirement of standard (f). The Commission believes that sales or marketing information that is available from public sources should not be required to be disclosed because that information will be available to all nonaffiliated shippers and potential shippers on a pipeline's system. The fact that the disclosure of this information by the pipeline to the marketing affiliate may give the affiliate an advantage over other potential shippers is irrelevant. As the court stated, "advantages a pipeline gives its affiliate are improper only to the extent that they flow from the pipeline's anti-competitive market power."[24] Moreover, one of the reasons the court gave for remanding standard (f) to the Commission for further explanation was that the standard, as currently written, "prohibits pipelines from sharing with their marketing affiliates information concerning potential marketing opportunities, even where that information was developed from public sources or sources entirely unrelated to a pipeline's transportation service."[25]

The Commission also believes that information related to sales or marketing off a pipeline's system, but not involving the system of an affiliated pipeline, should not be disclosed for several reasons. First, and most obvious, is that such sales or marketing information disclosed by the pipeline to the marketing affiliate will not involve the pipeline's transportation facilities, and, thus, there is no potential for a pipeline to exercise its monopoly power over the transportation facilities in a manner that would give an undue preference to its marketing affiliate. Second, and more importantly, is the role that off-system sales will play in pipelines' restructuring of their services. Under Order No. 636, pipelines will perform an effectively deregulated merchant function. As such, pipelines will seek to make sales both on and off system, an effort that may not necessarily involve their own transportation facilities with respect to off-system sales. In fact, pipelines may need to aggressively market their gas off-system if their current customers choose to only sign up for transportation services because otherwise they will be burdened with portfolios of wellhead contracts. If the pipelines do not shed their unwanted contracts, they could be subject to take-or-pay liability. The Commission believes that to require contemporaneous disclosure of information related to sales or marketing off system, but not involving the system of an affiliated pipeline, could have a chilling effect on pipelines marketing their gas.

While we are limiting the scope of standard (f), pipelines are not relieved of their obligations to refrain from unduly discriminatory conduct that is prohibited under the Natural Gas Act or the Natural Gas Policy Act, whether or not that conduct is covered by standard (f) or any of the other standards.

With respect to information relating to sales and marketing on a pipeline's system or the system of an affiliated pipeline, the Commission believes that information should continue to be disclosed for several reasons. First, any information obtained by the pipeline relating to sales and marketing on its system "flow[s] from the pipeline's anticompetitive market power."[26] The Commission's experience and common sense tell us that a pipeline has access to a great deal of information which it learns in the process of operating its transportation facilities. Its ongoing relationship with shippers on its line yields information on sales and marketing opportunities that are not readily available to others. A contemporaneous disclosure of information relating to sales and marketing on a pipeline's system is necessary because this type of

[20] *Id.* at 1202.

[24] *Id.* at 1201.
[25] *Id.* at 1200.
[26] *Id.* at 1201.

information naturally comes to the attention of a pipeline in connection with the transportation needed to get the gas from the point of availability to the market. The simple knowledge that there is a gas supply and a demand for gas in a particular location increases substantially in value when combined with information regarding potentially available transportation. The Commission believes that disclosing on-system sales or marketing information to an affiliate creates an undue preference because the affiliate would not have learned that information but for its relationship with the pipeline.

Second, the Commission believes that an undue preference would also be created in favor of a marketing affiliate if the pipeline gave it information concerning sales or marketing on the system of an affiliated pipeline. An illustration may be helpful:

> Acme Pipeline Company serves the southwestern United States and Apex Pipeline Company serves New England. Both pipelines are owned by the Double A Corporation and both are authorized to make unbundled firm or interruptible sales of gas throughout the country pursuant to § 284.284 of the Commission's regulations. In the course of business, Apex obtains information on a potential gas purchaser on its system which it will be unable to serve. Apex conveys this information to Acme. However, Acme is also unable to serve this potential customer. Acme, in turn, conveys this information to its marketing affiliate, Acme Gas Marketing, which does have gas supplies available to serve the customer on Apex's pipeline in New England.

In this situation, the pipeline would not have learned this information but for its membership in a corporate family with the affiliated pipeline. Further, as discussed above, the marketing affiliate would not have learned of the sales and marketing information but for its relationship with the pipeline.

In a related matter, the court stated that applying standard (f) to released-gas information prior to the issuance of Order No. 497–A might well be fundamentally unfair and that the Commission could avoid the expense of litigation over this issue by announcing that it will not retroactively apply the standard to released gas information. Accordingly, the Commission will not retroactively apply the contemporaneous disclosure requirement of standard (f) to released gas information, that is, standard (f)'s application to released gas information would begin with the issuance of Order No. 497–A.

With respect to the issue of Order No. 497's applicability to Ozark, some general background is necessary. Ozark Gas Transmission System is a general partnership with four equal partners:

- Ozark Gas Pipeline Corporation, a wholly-owned subsidiary of Texas Oil and Gas Corporation, which, in turn, is a wholly-owned subsidiary of USX Corporation;
- Tennessee Ozark Gas Pipe Company, a wholly-owned subsidiary of Tennessee Gas Pipeline Company, which is, in turn, a wholly-owned subsidiary of Tenneco, Inc.;
- Columbia Gulf Transmission Company, a wholly-owned subsidiary of the Columbia Gas System, Inc.; and
- Caney River Transmission Company, a wholly-owned subsidiary of ONEOK, Inc.

TXO Production Company (TXO) and Tenngasco Corporation (Tenngasco) are shippers on Ozark's system. TXO is owned by Texas Oil and Gas Corporation and Tenngasco is owned by Tennessee Gas Pipeline Company. Thus, the parent companies of two of Ozark's partners have marketing affiliates who are shippers on the Ozark system. The Commission in its *Ozark* order stated that because the parent companies have a 25 percent interest in Ozark they are presumed to have control over Ozark. This finding was based on § 161.2 of the Commission's regulations[27] which states that "[a] voting interest of 10 percent or more creates a rebuttable presumption of control." The Commission found that the requirements of Order No. 497 were applicable to Ozark because "[t]he ownership of Ozark by common parent companies with the shippers raises the possibility that the companies may seek and potentially obtain a preference from Ozark on their behalf or on behalf of their marketing affiliates."[28]

In its opinion in *Tenneco* v. *FERC*, the court agreed with Ozark that the Commission failed to address record evidence which called into question the presumption of control, *i.e.*, the Ozark partnership agreement which states that, except in certain limited circumstances, the Ozark Management Committee may only act if there is unanimous approval by each of the partners, who each have one vote. The court stated:

> Without remarking at all on the unanimity requirement in the Ozark partnership agreement, FERC rushed to conclude that Ozark had failed to "rebut the presumption that the overlapping economic interests of its owners provide an incentive for the granting of a preference." *Ozark Gas Transmission System*, 49 FERC at 61,870. As we noted above, however, FERC's economic interest analysis is appropriate only after it has properly determined that "control" exists. Here, FERC articulated no findings on whether "control" existed and provided no explanation as to why Ozark's rebuttal evidence did not defeat the presumption of control.[29]

Accordingly, the court remanded for further proceedings consistent with its opinion.

The Commission finds that despite the fact that there is a unanimous approval provision in the Ozark partnership agreement, the two partners that have parent companies with marketing affiliates shipping on Ozark's line can still exercise "control" over Ozark. Section 161.2 of the Commission's regulations states:

> *Control* (including the terms "controlling," "controlled by," and "under common control with") includes, but is not limited to, the possession, directly or indirectly and whether acting alone or in conjunction with others, of the authority to direct or cause the direction of the management or policies of a company. A voting interest of 10 percent or more creates a rebuttable presumption of control.

The Commission finds that even with a unanimous approval provision in the partnership agreement, Ozark Pipeline Company and Tennessee Ozark Gas Company, the two partners whose parent companies have marketing affiliates, can each act alone to direct or affect the management or policies of Ozark Gas Transmission. Since there is a unanimous approval requirement, each partner has veto power over any decision by simply withholding its vote. Such power could be exercised in a manner that could unduly prefer the marketing affiliates related to Ozark's partners, for example, by either or both partners refusing to engage in an action that would benefit an independent marketer in competition with one of Ozark's partners' affiliates. The Commission believes that control can be exercised in a negative manner, *i.e.*, by withholding approval of a specific policy or transaction, as well as in an affirmative manner, *i.e.*, by actually approving a decision that would unduly prefer a marketing affiliate.

Extension of Reporting Requirements

Finally, the Commission will also extend the sunset date of Order No. 497's reporting requirements from December 31, 1992, until December 31, 1993, because of the important role they will play in the regulatory structure created by Order No. 636. Order No. 636 does not change the requirements governing the relationship between pipelines and their marketing affiliates.

---

[27] 18 CFR 161.2.

[28] 49 FERC ¶ 61,247 at 61,870 (1989).

[29] 969 F.2d at 1214.

However, Order No. 636 extends the requirements of Order No. 497 to pipelines providing unbundled gas sales service because the pipeline as merchant will be the functional equivalent of a marketing affiliate.[30] The Commission found in Order No. 636 that unbundling does not eliminate the potential for pipelines to favor their marketing affiliates because there is no change in the pipeline's control over the transportation function. Because of the fact that the potential for abuse in favor of marketing affiliates still exists, as recognized by Order No. 636, and the court found that it was in the Commission's discretion to provide for an annual review of the costs and benefits of Order No. 497's reporting requirements, the Commission will extend the sunset provision until December 31, 1993. This action is consistent with the Commission's finding in Order No. 636–A that abuses in the area of marketing affiliates might not be a perpetual problem and that increased competition that will result after unbundling may reduce the incentive for abuse.

Although Order No. 636 does not change the requirements governing the relationship between pipelines and their marketing affiliates, the structural change engendered by full compliance with the rule would remove the need to continue filing the affiliated transportation log (FERC Form No. 592) with the Commission. Order No. 636's EBB requirements ensure certain minimum standards for maintaining and communicating information about a pipeline's available capacity, current capacity release offers, and affiliate marketing-related information.[31] Unless further case-specific action is taken by the Commission, 90 days after the Commission has determined that a pipeline is in full compliance with the requirements of Order No. 636, that pipeline will no longer be required to submit the affiliated transportation log (FERC Form 592) to the Commission. The pipeline must continue to maintain[32] and to provide its affiliated transportation log information on its EBB.[33] In practice, this means that pipelines remain subject to the standards of conduct and will continue to maintain the Order Nos. 497- and 636-mandated information, but will no longer be required to file FERC Form No. 592 with the Commission.[34]

[30] For this reason, the Commission notes that pipeline sales, after compliance with Order No. 636, need not be performed by the pipeline's marketing affiliate. Rather such sales may be performed on an unbundled basis by a separate sales division of the pipeline. Such sales are subject to certain requirements discussed in Order No. 636 and Order No. 636–A.

[31] In brief, new § 284.8(b)(4) and § 284.9(b)(4) require that a pipeline's EBB must provide for information downloading by users, daily back up of information, purging information on completed transactions, displaying most recent entries ahead of information posted earlier, on-line help, a search function and menu selections.

[32] 18 CFR 250.16(a)(3).

[33] In Order No. 636, the Commission created new regulations which, *inter alia*, require all interstate pipelines transporting pursuant to Part 284 of the Commission's regulations to create and maintain EBBs. See § 284.8(b)(4) and § 284.9(b)(4), 57 FR 13267 (April 16, 1992). Once operational, the EBB would become a pipeline's tool for compliance with Order No. 497's 24-hour electronic information requirement. See 18 CFR 250.16(g)(2) (1992).

[34] Although pipelines would no longer be required to file FERC Form 592 with the Commission, they would still be required to follow the content requirements of that form in providing electronic access and maintaining affiliated transportation log information.

[35] 5 CFR 1320.14.

V. Information Collection Statement

The Office of Management and Budget's (OMB) regulations[35] require that OMB approve certain information collection requirements imposed by agency rule. The information collection requirements of Order No. 497 are contained in FERC Form No. 592, "Marketing Affiliates of Interstate Pipelines." The Commission is notifying OMB that it is extending the sunset provision for Order No. 497's reporting requirements and submitting the information collection provisions in this notice for its approval.

Interested persons can obtain information on the information collection provisions by contacting the Federal Energy Regulatory Commission, 941 North Capitol Street, NE., Washington, DC 20426 (Attention: Michael Miller, Information Policy and Standards Branch, (202) 208–1415). Comments on the information collection provisions can be sent to the Office of Information and Regulatory Affairs of OMB, New Executive Office Building, Washington, DC 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission).

VI. Effective Date

This order is effective January 13, 1993.

List of Subjects

18 CFR Part 161

Natural gas, Reporting and recordkeeping requirements.

18 CFR Part 250

Natural gas, Reporting and recordkeeping requirements.

In consideration of the foregoing, the Commission amends parts 161 and 250, chapter I, title 18 *Code of Federal Regulations* as set forth below.

By the Commission. Commissioner Moler dissented in part with a separate statement attached. Commissioner Terzic dissented.

Lois D. Cashell,

Secretary.

PART 161—STANDARDS OF CONDUCT FOR INTERSTATE PIPELINES WITH MARKETING AFFILIATES

1. The authority citation for part 161 is revised to read as follows:

Authority: 15 U.S.C. 717–717w, 3301–3432; 42 U.S.C. 7101–7352.

2. In § 161.3, paragraph (f) is revised to read as follows:

§ 161.3 Standards of conduct.

* * * * *

(f) To the extent it provides to a marketing affiliate information related to transportation of natural gas, or information related to gas sales or gas marketing on its system or the system of an affiliated pipeline, it must provide that information contemporaneously to all potential shippers, affiliated and nonaffiliated, on its system. Pipelines are not required to contemporaneously disclose: (1) Gas sales or gas marketing information that is available from public sources and (2) information related to gas sales or gas marketing off a pipeline's system, but not involving the system of an affiliated pipeline.

* * * * *

PART 250—FORMS

1. The authority citation for part 250 is revised to read as follows:

Authority: 15 U.S.C. 717–717w, 3301–3432; 42 U.S.C. 7101–7352.

2. In § 250.16, paragraphs (a)(3), (c)(1), (c)(2) introductory text and (d)(1) are revised to read as follows:

§ 250.16 Format of compliance plan for transportation services and affiliate transactions.

(a) *Who must comply.* * * *

(3) Maintain all information required under this section from the time the information is received until December 31, 1993.

* * * * *

(c) *What to maintain.*

(1) An interstate pipeline must maintain the information in paragraph (b)(2) of this section for all requests for transportation services made by nonaffiliated shippers or in which a nonaffiliated shipper is involved from the time the information is received until December 31, 1993.

(2) The information required to be maintained by this section will be

available from September 12, 1988 until December 31, 1994 to:

* * * * *

(d) *When to file.*

(1) The information in paragraph (b)(1) of this section and entries in the log specified in paragraph (b)(2) of this section relating to transportation requests for which transportation has commenced 30 days or more previously, which have been denied, or which have been pending for more than six months, must be filed initially with the Commission by September 19, 1988, and thereafter as required by paragraphs (d)(2) and (d)(4) until the earlier of: 90 days after the Commission has determined that the pipeline is in full compliance with the requirements of Order No. 636; or December 31, 1993. This requirement applies to transportation service that commenced or transportation requests that were denied after July 14, 1988, or that were pending for six months or more on July 14, 1988.

* * * * *

Moler, Commissioner, *dissenting in part*:

With only minor exceptions, the majority continues to require that pipelines contemporaneously disclose to all shippers the gas sales and marketing information provided to their affiliates.[1] I disagree as a matter of policy. The requirement for contemporaneous disclosure unduly burdens pipelines and gives the pipelines' competitors an unwarranted advantage. It is also unnecessary because Standards C and E are more than adequate safeguards against affiliate abuse.

Standard C prohibits pipelines from giving their marketing affiliates preferences in receiving open access transportation.[2] Standard E prohibits pipelines from disclosing, to their marketing affiliates, information which they receive from nonaffiliated shippers.[3] The retention of these provisions adequately protects nonaffiliated marketers. The court's main concern in *Tenneco Gas* v. *Federal Energy Regulatory Commission (Tenneco)*[4] was that a pipeline should not be allowed to use its market power over transportation to skew the competitive market for natural gas in favor of its affiliate.[5] These provisions accomplish that without imposing undue burdens on pipelines and their affiliates.

I also disagree as a matter of law. I do not believe the Commission has met the challenge imposed by the court in order to justify retention of Standard F in the face of court's explicit remand in *Tenneco*. There the court found the commission's explanation for requiring contemporaneous disclosure of sales and marketing information was "unsatisfactory".[6] On remand, the court required us to justify the disclosure requirement in terms of the pipeline's monopoly control over transportation service.[7] This the Commission has failed to do.

The order is vague; it does not discuss the types of sales and marketing information that may be obtained in providing transportation services, and thus properly subject to disclosure. Instead, the order cites as truth the bare assumptions previously advanced and rejected by the *Tenneco* court: That a pipeline's ongoing relationship with shippers yields information on sales and marketing information that is not readily available to others and that disclosing this information only to an affiliate creates an undue preference because the affiliate would not have otherwise learned that information. The order utterly fails to meet the burden of showing how this flows from the pipeline's anticompetitive exercise of market power. Wrapping itself in the court's language, the Commission concludes, without support or explanation, that any information obtained by the pipeline relating to sales and marketing on its system "flow[s] from the pipeline's anticompetitive market powers" and thus must be subject to disclosure.[8] The Commission, repeating the error exposed by the *Tenneco* court, asks the world to rely on "common sense" and the Commission's "experience."[9] That is not good enough.[10]

The court has already rejected the circular reasoning that any advantage to a marketing affiliate is a bad advantage.[11] The advantage a pipeline gives to its marketing affiliate is improper only to the extent that the advantage flows from the pipeline's anticompetitive market power. Otherwise, the court said, we would improperly cripple the permissible efficiencies of vertical integration that "cannot by themselves be considered uses of monopoly power."[12]

In conclusion, I would eliminate the contemporaneous disclosure requirement for all sales and marketing information. Thus I dissent.

Elizabeth Anne Moler,

Commissioner.

[FR Doc. 92–30269 Filed 12–11–92; 8:45 am]

BILLING CODE 6717–01–M

---

[1] The order excludes from the contemporaneous disclosure requirement information obtained from public sources and information that does not directly involve the pipeline or an affiliated pipeline. Slip op. at 10.

[2] 18 CFR 161.3(c).

[3] 18 CFR 161.3(e).

[4] 969 F.2d 1187 (DC Cir. 1992).

[5] 969 F.2d at 1201.

[6] 969 F.2d at 1201.

[7] In particular, the Commission was to "ensure that the final requirement is reasonably tailored to meet the Commission's goals of improving the market and benefiting consumers, as well as preventing undue discrimination." 969 F.2d at 1201.

[8] Slip op. at 13; *cf.* 969 F.2d at 1201 ("[b]ut advantages a pipeline gives its affiliate are improper only to the extent that they flow from the pipeline's anti-competitive market power").

[9] Slip op. at 13.

[10] To be sure, while courts must defer to the "informed discretion" of the Commission, we must demonstrate how we are "informed" by relevant factual evidence. See generally *Michigan Consolidated Gas Co.* v. *FERC*, 883 F.2d 117, 123–124 (DC Cir. 1989), *cert. denied*, 494 U.S. 1079 (1990).

[11] The Commission made essentially the same claims to the court on brief as it does here.

There is no merit to the pipeline's argument that the Commission exceeded its authority in requiring disclosure of sales and marketing information rather than just transportation related information. As the Commission explained, for a pipeline to share sales and marketing information, like transportation information, with its affiliate, and not others, presents an obvious potential for undue discrimination * * *. Since the sales and marketing information, like transportation information, can afford a pipeline affiliate a significant advantage, the Commission had ample opportunity to require its disclosure to all potential shippers if the pipeline discloses such information to its affiliate.

Brief of Respondent Federal Energy Regulatory Commission at 37–38 (citations and footnote omitted).

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 8452]

RIN 1545–AG02

Information Returns of Brokers

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to information returns of brokers. Changes to the applicable law were made by the Tax Equity and Fiscal Responsibility Act of 1982. The regulations affect brokers effecting dispositions (including short sales) of securities, commodities, regulated futures contracts, and forward contracts and provide them with guidance needed to comply with the law.

EFFECTIVE DATE: The regulations are effective July 1, 1983.

FOR FURTHER INFORMATION CONTACT: John P. Moriarty, 202–622–4950 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

Section 1.6045–1(a)(5) of the Income Tax Regulations (26 CFR part 1) defines the term "commodity" for purposes of the information reporting requirements of section 6045 of the Internal Revenue Code. On January 5, 1984, the Internal Revenue Service published in the **Federal Register** proposed amendments (49 FR 646) to those regulations to clarify the definition of a commodity. The proposed regulations also contain an exception to the information reporting requirements for sales of small amounts of commodities.

Public Comments

A number of comments on the proposed regulations suggested specific *de minimis* dollar amounts or quantities of commodities that should be excepted from reporting. A public hearing on the January 1984 regulations was held on March 28, 1984. After consideration of all written comments regarding the proposed amendments, the final regulations under section 6045 are revised by this Treasury decision. The Internal Revenue Service anticipates finalizing the remaining aspects of the proposed amendments in the near future.

Explanation of Provisions

After considering the comments submitted with respect to the proposed regulations, the Service has concluded that specifically tailored rules that except certain transactions from the information reporting requirements will more appropriately balance the cost of reporting against the improvement in compliance attributable to reporting than a general *de minimis* rule. Further, the Service has determined that these rules should not necessarily be limited to transactions involving commodities, but rather should apply to sales of securities as well in appropriate circumstances.

Accordingly, the final regulations provide that no return of information is required for a sale effected by a broker for a customer if the sale is an "excepted sale." A sale is an excepted sale if it is so designated by the Service in a revenue ruling or revenue procedure published in the Internal Revenue Bulletin.

Special Analyses

It has been determined that these rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553 (b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a final Regulatory Flexibility Analysis is not required.

Drafting Information

The principal author of these regulations is John P. Moriarty of the Office of the Assistant Chief Counsel (Income Tax and Accounting), Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations on matters of both substance and style.

List of Subjects in 26 CFR 1.6031–1 through 1.6060–1

Income taxes, Reporting and recordkeeping requirements.

Adoption of amendments to the regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority citation for part 1 is amended by adding the following authority citation:

Authority: 26 U.S.C. 7805 * * * Section 1.6045–1 also issued under 26 U.S.C. 6045 * * *

Par. 2. Section 1.6045–1 is amended by revising paragraph (c)(3) to read as follows:

§ 1.6045–1 Returns of information of brokers and barter exchanges.

* * * * *

(c) * * *

(3) *Exceptions*—(i) *In general.* Except as provided in paragraph (c)(3)(ii) of this section, the exceptions set forth in paragraph (c)(3) of § 5f.6045–1 of this chapter apply to sales effected on or after May 29, 1984. For an exception for certain sales of agricultural commodities and certificates issued by the Commodity Credit Corporation after January 1, 1993, see paragraph (c)(7) of this section. With respect to sales effected before May 29, 1984, the exceptions provided in § 1.6045–1(c)(3) (as contained in the CFR edition revised as of April 1, 1984) apply.

(ii) *Excepted sales.* No return of information is required with respect to a sale effected by a broker for a customer if the sale is an excepted sale. For this purpose, a sale is an excepted sale if it is so designated by the Internal Revenue Service in a revenue ruling or revenue procedure published in the Internal Revenue Bulletin. (See § 601.601(d)(2)(ii)(*b*) of this chapter).

[TD 8453]

RIN 1545–AM68

Review of Jeopardy Levy or Assessment Procedures

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to the procedures for review of jeopardy levies and jeopardy and termination assessments. The Technical and Miscellaneous Revenue Act of 1988 expanded the coverage of the existing procedures for the review of an assessment made under sections 6851(a), 6852(a), 6861(a), or 6862 to include the review of those jeopardy levies made less than 30 days after notice and demand for payment is made under section 6331(a). In addition, because Congress intended to permit administrative and judicial review of all jeopardy levy cases where the general notice requirements of section 6331 (a) and (d) are not met, the regulations extend review to include all such cases. The regulations also incorporate the modifications to section 7429 which now provide the Tax Court with concurrent jurisdiction with the federal district courts regarding the review of jeopardy and termination assessments and jeopardy levies in certain circumstances, where previously only the district courts had jurisdiction with respect to the review of jeopardy and termination assessments.

EFFECTIVE DATE: These regulations are effective on December 14, 1992.

FOR FURTHER INFORMATION CONTACT: Joseph W. Clark, 202–622–3640 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

This document contains final regulations amending the Procedure and Administration Regulations (26 CFR part 301) under section 7429 of the Internal Revenue Code (Code). The regulations reflect the amendment of section 7429 by section 6237 of the Technical and Miscellaneous Revenue Act of 1988 (Pub. L. No. 100–647).

Explanation of Provisions

The Internal Revenue Service published a notice of proposed rulemaking in the **Federal Register** on May 9, 1991. The Internal Revenue Service received no public comments on the proposed regulations. No changes have been made to the final regulations.

Section 6237 of the Technical and Miscellaneous Revenue Act of 1988 (TAMRA) (Pub. L. No. 100–647, 102 Stat. 3573) amended section 7429 of the Code to extend the existing procedures relating to the review of jeopardy and termination assessments to the review of certain jeopardy levies. The regulations specify that the Internal Revenue Service must give the taxpayer whose property has been subjected to jeopardy or termination assessment a written statement of the information on which the action is based within 5 days of the date the jeopardy or termination assessment is made. A written statement is also required within 5 days of the date that a jeopardy levy is made if the general notice requirements of section 6331 (a) and (d) are not met with respect to the levy. The taxpayer has 30 days from receipt of the written statement or, if no statement was provided, 30 days from the date the statement was required to be furnished to request administrative review. The taxpayer may commence judicial review of the reasonableness of the jeopardy or termination assessment or levy by bringing a civil action in the appropriate court within 90 days after the earlier of (1) the date of notice of the administrative review determination or (2) the 16th day after the request for review was made. The regulations further reflect the grant to the Tax Court of concurrent jurisdiction with the federal district courts over challenges to jeopardy and termination assessments and levies if the taxpayer has filed a petition with the Tax Court prior to the making of the jeopardy assessment or levy with respect to any deficiency covered by the jeopardy assessment or levy notice.

Special Analyses

It has been determined that these regulations are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a final Regulatory Flexibility Analysis is not required. Pursuant to section 7805 of the Internal Revenue Code, the notice of proposed rulemaking for these regulations was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Drafting Information

The principal author of these regulations is Joseph W. Clark, Office of the Assistant Chief Counsel (General Litigation), Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in their development.

Lists of Subjects in 26 CFR Part 301

Administrative practice and procedure, Alimony, Bankruptcy, Child support, Continental shelf, Courts, Crime, Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Investigations, Law enforcement, Oil pollution, Penalties, Pensions, Reporting and recordkeeping requirements, Statistics, Taxes.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 301 is amended as follows:

Paragraph 1. The authority citation for part 301 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2 Sections 301.7429–1, 301.7429–2 and 301.7429–3 are revised to read as follows:

§ 301.7429–1 Review of jeopardy and termination assessment and jeopardy levy procedures; information to taxpayer.

Not later than 5 days after the day on which an assessment is made under section 6851(a), 6852(a), 6861(a), or 6862, or a levy is made under section 6331(a) without complying with the notice before levy provisions of section 6331(d), the district director shall provide the taxpayer a written statement setting forth the information upon which the district director relies in authorizing such assessment or levy.

§ 301.7429–2 Review of jeopardy and termination assessment and jeopardy levy procedures.

(a) *Request for administrative review.* Any request for the review of a jeopardy or termination assessment or jeopardy levy provided for by section 7429(a)(2) shall be filed with the district director within 30 days after the statement described in § 301.7429–1 is given to the taxpayer. However, if no statement is given within the 5 day period described in § 301.7429–1, any request for review of the jeopardy or termination assessment or jeopardy levy shall be filed within 35 days after the date such assessment or levy is made. Such request shall be in writing, shall state fully the reasons for the request, and shall be supported by such evidence as will enable the district director to make the redetermination described in section 7429(a)(3).

(b) *Administrative review.* In determining whether the assessment is reasonable and the amount assessed is appropriate, or whether the jeopardy levy is reasonable, the district director shall take into account not only information available at the time the assessment or jeopardy levy is made but also information which subsequently becomes available.

(c) *Abatement of assessment.* For rules relating to the abatement of assessments made under sections 6851 and 6861 see § § 301.6861–1(e), 301.6861–1(f) and 1.6851–1(d) of this chapter.

§ 301.7429–3 Review of jeopardy and termination assessment and jeopardy levy procedures; judicial action.

(a) *Time for bringing judicial action.* An action for judicial review described in section 7429(b) may be instituted by the taxpayer during the period beginning on the earlier of—

(1) The date the district director notifies the taxpayer of the determination described in section 7429(a)(3) and ending on the 90th day thereafter; or

(2) The 16th day after the request described in section 7429(a)(2) was made by the taxpayer and ending on the 90th day thereafter.

(b) *Extension of period for judicial review.* The United States Government may not by itself seek an extension of the 20 day period described in section 7429(b)(3), but it may join with the taxpayer in seeking such an extension.

(c) *Jurisdiction for determination.*—In general, the United States district court will have exclusive jurisdiction over any civil action for a determination described in section 7429(b). However, if a petition for a redetermination of a

deficiency has been timely filed with the Tax Court prior to the making of an assessment or levy that is subject to the section 7429 review procedures, and one or more of the taxes and tax periods before the Tax Court as a result of the petition is also included in the written statement that was provided to the taxpayer, then the Tax Court will have jurisdiction concurrent with the district courts over any civil action for a judicial determination with respect to all the taxes and tax periods included in the written statement. In all other cases, the appropriate United States district court continues to have exclusive jurisdiction over such an action.

David G. Blattner,

Acting Commissioner of Internal Revenue.

Approved: November 13, 1992.

Fred T. Goldberg, Jr.,

Assistant Secretary of the Treasury.

BILLING CODE 4830-01-M

Office of Foreign Assets Control

31 CFR Part 500

Foreign Assets Control Regulations

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Final Rule, amendment.

SUMMARY: The Office of Foreign Assets Control (FAC) is amending the Foreign Assets Control Regulations (the "FACR"), to authorize U.S. common carriers to make current settlement payments to Vietnam or Vietnamese nationals with respect to telecommunications transactions involving Vietnam.

EFFECTIVE DATE: December 14, 1992.

FOR FURTHER INFORMATION CONTACT: Steven I. Pinter, Chief of Licensing (tel.: 202/622-2480), or William B. Hoffman, Chief Counsel (tel.: 202/622-2410), Office of Foreign Assets Control, Department of the Treasury, Washington, DC 20220.

SUPPLEMENTARY INFORMATION: This rule amends § 500.571 of the FACR (31 CFR part 500), which authorizes telecommunications transactions involving Vietnam, provided that payments owed to Vietnam or its nationals are deposited into blocked interest-bearing accounts in domestic U.S. banks pending full lifting of the embargo. The final rule removes the requirement that such proceeds be deposited into blocked U.S. accounts, and the requirement that the establishment of these accounts be reported to FAC. The effect of this amendment is to authorize current settlement accounts with Vietnam or its nationals arising from telecommunications authorized in § 500.571 of the FACR.

Because the FACR involve a foreign affairs function, Executive Order 12291 and the provisions of the Administrative Procedure Act, 5 U.S.C. 563, requiring notice of proposed rulemaking opportunity for public participation, and delay in effective date are inapplicable. Because no notice of proposed rulemaking is required for this rule, the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, does not apply.

List of Subjects in 31 CFR Part 500

Banks, Blocking of assets, Reporting and recordkeeping requirements, Telecommunications, Vietnam.

For the reasons set forth in the preamble, 31 CFR part 500 is amended as follows:

PART 500—FOREIGN ASSETS CONTROL REGULATIONS

1. The authority citation for Part 500 continues to read as follows:

Authority: 50 U.S.C. App. 5, as amended; E.O. 9193, 7 FR 5205, 3 CFR 1938-1943 Cum. Supp., p. 1174; E.O. 9989, 13 FR 4891, 3 CFR 1943-1948 Comp., p. 748.

Subpart E—Licenses, Authorizations, and Statements of Licensing Policy

2. Section 500.571 is revised to read as follows:

§ 500.571 Transactions related to telecommunications authorized.

All transactions of U.S. common carriers incident to the receipt or transmission of telecommunications involving Vietnam are authorized.

Note: Exports or reexports to Vietnam of goods and technical data, or of the direct products of technical data (regardless of U.S. content), not prohibited by this part may require authorization from the U.S. Department of Commerce pursuant to the Export Administration Regulations, 15 CFR parts 768-799.

Dated: November 17, 1992.

R. Richard Newcomb,

Director, Office of Foreign Assets Control.

Approved: November 25, 1992.

Peter K. Nunez,

Assistant Secretary (Enforcement).

BILLING CODE 4810-25-M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 367

[DoD Directive 5136.1]

Assistant Secretary of Defense for Health Affairs (ASD(HA))

AGENCY: Office of the Secretary, DoD.

ACTION: Final rule.

SUMMARY: This document revised 32 CFR part 367 to reflect the Deputy Secretary of Defense's guidance on strengthening the medical personnel, facilities, programs, land funding and other resources within DoD which are subject to the authority, direction and control of the ASD (Health Affairs). In addition, this document establishes the Defense Medical Advisory Council to provide advice to the ASD (Health Affairs).

EFFECTIVE DATE: December 2, 1992.

FOR FURTHER INFORMATION CONTACT: R. Kennedy, Office of the Director of Administration and Management, Organizational and Management Planning, Pentagon, Washington, DC, 20301, telephone 703-697-1142.

SUPPLEMENTARY INFORMATION:

List of Subjects in 32 CFR Part 367

Organization and functions (Government agencies).

Accordingly, 32 CFR part 367 is revised to read as follows:

PART 367—Assistant Secretary of Defense for Health Affairs (ASD(HA))

Sec.

367.1 Purpose.
367.2 Applicability.
367.3 Responsibilities.
367.4 Functions.
367.5 Relationships.
367.6 Authorities.

Authority: 10 U.S.C. 136.

§ 367.1 Purpose.

Pursuant to the authority vested in the Secretary of Defense under title 10, United States Code, this part:

(a) Designates one of the positions of Assistant Secretary of Defense as the ASD(HA).

(b) Assigns responsibilities, functions, relationships, and authorities, as prescribed herein, to the ASD(HA).

§ 367.2 Applicability.

This part applies to the Office of the Secretary of Defense (OSD); the Military Departments; the Chairman of the Joint Chiefs of Staff and the Joint Staff; the Unified and Specified Commands; the Office of the Inspector General,

Department of Defense; the Defense Agencies; and the DoD Field Activities (hereafter referred to collectively as the "DoD Components").

§ 367.3 Responsibilities.

The Assistant Secretary of Defense for Health Affairs is the principal staff assistant and advisor to the Secretary of Defense for all DoD health policies, programs, and activities and is responsible for the effective execution of the Department's medical mission which is to provide, and to maintain readiness to provide, medical services and support to members of the Armed Forces during military operations, and to provide medical services and support to members of the Armed Forces, their dependents, and others entitled to DoD medical care.

(a) In carrying out his responsibilities, the ASD(HA) shall exercise authority, direction, and control over the medical personnel, facilities, programs, and funding and other resources within the Department of Defense. The ASD(HA)'s exercise of that authority, direction, and control shall include, but not be limited to:

(1) Establishing policies, procedures, and standards which shall govern DoD medical programs.

(2) Serving as program manager for all DoD health and medical resources. Prepare and submit in the Department's planning, programming, and budgeting system (PPBS) a unified medical program and budget to provide resources for all medical activities within the Department of Defense. Consistent with applicable law, all funding for the DoD medical program, including operation and maintenance, procurement, research and development, and the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS), but excluding the personnel funds for active and reserve medical military personnel, which shall be in a single defense medical appropriations account, and funds for medical facility military construction shall be in a single appropriations account.

(3) Presenting and justifying the unified medical program and budget throughout the PPBS process, including the Defense Planning and Resources Board, and with Congress.

(4) Performing such other duties as the Secretary or Deputy Secretary of Defense may assign.

(b) The ASD(HA) may not direct a change in the structure of the chain of command within a Military Department with respect to medical personnel and may not direct a change in the structure of the chain of command with respect to medical personnel assigned to that command.

§ 367.4 Functions.

The ASD(HA) shall:

(a) Carry out the responsibilities described in § 367.3, including for the following functional areas:

(1) Medical readiness.

(2) Disease prevention.

(3) Health promotion.

(4) Health benefits programs.

(5) Alcohol and drug abuse treatment.

(6) Cost containment.

(7) Professional affairs, quality assurance, and utilization management.

(8) Medical information systems.

(9) DoD medical research and development program.

(10) Procurement, professional development, and retention of medical and dental personnel, and related health care specialists and technicians.

(11) Military medical construction.

(12) Medically related services for disabled children.

(13) DoD financed, civilian provided, health care services.

(14) Medical education and graduate medical education programs.

(b) Chair and establish the agenda of the Defense Medical Advisory Council (DMAC), which shall provide advice to the ASD(HA) in the execution of the DoD medical mission. The DMAC shall consist of the ASD(HA), one civilian Presidential Appointee from each of the Military Departments designated by the Secretary concerned, one general or flag officer from each Military Service designated by the Secretary of the Military Department concerned, and the President of the Uniformed Services University of the Health Sciences.

(c) Chair the Armed Services Biomedical Research Evaluation and Management Committee.

§ 367.7 Relationships.

(a) In the performance of assigned duties, the ASD(HA) shall:

(1) Coordinate and exchange information with other OSD Officials and heads of DoD Components having collateral or related functions.

(2) Consult, as appropriate, with the Comptroller of the Department of Defense (C, DoD), and the Assistant Secretary of Defense for Program Analysis and Evaluation to ensure that medical planning, programming, and budgeting activities are integrated with the DoD PPBS. The C, DoD shall allocate and reallocate the funds in the Defense Health Program account and the medical facility military construction account among the DoD Components in accordance with ASD(HA) instructions and applicable law.

(3) Obtain through the Chairman of the Joint Chiefs of Staff, submissions of the operational and other needs of the commanders of the Unified and Specified commands, and obtain submission from the Secretaries of the Military departments of their proposed elements of the medical unified program and budget, and shall consider, review, and integrate those submissions as appropriate.

(4) Use existing facilities and services of the Department of Defense or other Federal Agencies, whenever practicable, to achieve maximum efficiency and economy.

(5) Exercise direction, authority, and control over:

(i) The Office of Civilian Health and Medical Program of the Uniformed Services.

(ii) The Defense Medical Programs Activity.

(iii) The Armed Forces Institute of Pathology.

(iv) The Uniformed Services University of the Health Sciences (USUHS) pursuant to the authority vested in the Secretary of Defense by 10 U.S.C. Chapter 104 and the Department of Defense Appropriations Act, 1991, except that the authority to appoint the President of the USUHS is reserved to the Secretary of Defense.

(b) Other OSD officials and Heads of DoD Components shall coordinate with the ASD(HA) on all matters concerning the functions in § 367.4.

§ 367.5 Authorities.

The ASD(HA) is hereby delegated authority to:

(a) Issue orders, DoD Instructions, publications, and one-time directive-type memoranda, consistent with DoD 5025.1–M [1], regarding the accomplishment of functions and responsibilities assigned by the Secretary of Defense in this part. Instructions to the Military Departments shall be issued through the Secretaries of those Departments. Instructions to Unified or Specified Commands shall be communicated through the Chairman of the Joint Chiefs of Staff.

(b) Obtain reports, information, advice, and assistance, consistent with DoD Directive 7750.5 [2], as necessary.

(c) Communicate directly with the Heads of the DoD Components. Communications to the Commanders of the Unified and Specified Commands shall be coordinated through the Chairman of the Joint Chiefs of Staff.

---

[1] Copies may be obtained, at cost, from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161.

[2] See footnote 1 to § 367.5(a).

(d) Make determinations on the uniform implementation of laws on separation from the Military Departments due to physical disability as prescribed in DoD Directive 1332.18[3].

(e) Develop, issue, and maintain regulations, with the coordination of the Military Departments, as necessary and appropriate to fulfill the Secretary of Defense's responsibility to administer 10 U.S.C. chapter 55.

(f) Establish arrangements for DoD participation in nondefense governmental programs for which the ASD(HA) has been assigned primary cognizance.

(g) Communicate with other Government Agencies, representatives of the legislative branch, and members of the public, as appropriate, in carrying out assigned functions.

(h) The ASD(HA) also is hereby delegated the authorities contained in enclosure 1 of DoD Directive 5105.45[4]. The ASD(HA) may modify, terminate, or redelegate these authorities, in whole or in part as appropriate, and in writing, except as otherwise provided by law or regulation.

Dated: December 8, 1992.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[COTP Baltimore, MD Regulation 92-05-33]

Safety Zone Regulation: Patapsco River, Inner Harbor, Baltimore, MD

AGENCY: Coast Guard, DOT.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard Marine Safety Office Baltimore is establishing safety zones for Inner Harbor fireworks displays in Baltimore. Fireworks will be launched from a barge anchored approximately 600 feet south of Pier 6, Patapsco River, Inner Harbor, Baltimore, Maryland. The safety zones are necessary to control spectator craft and to provide for the safety of life and property on and in the vicinity of navigable waters during the events.

EFFECTIVE DATE: These regulations will be effective from 6 p.m. until 6:30 p.m. on December 05, December 12, and December 20.

FOR FURTHER INFORMATION CONTACT: Lieutenant Junior Grade Mark Williams, U.S. Coast Guard Marine Safety Office Baltimore, U.S. Custom House, 40 South Gay Street, Baltimore, Maryland 21202-4022, (410) 962-5104.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 553, notices of proposed rulemaking have not been published for these regulations and good cause exists for making them effective in less than 30 days from the date of publication. Adherence to normal rulemaking procedures is not possible due to time of receipt of notices of intent to conduct fireworks displays. Specifically, the sponsor's application to hold these events was not received until November 12, 1992, leaving insufficient time to publish notices of proposed rulemaking in advance of the event.

Drafting Information: The drafters of this regulation are Lieutenant Junior Grade Mark Williams, project officer for the Captain of the Port, Baltimore, Maryland, and Lieutenant Keith B. Letourneau, project attorney, Fifth Coast Guard District Legal Staff.

Background and Purpose: On November 12, 1992, the Baltimore Office of Promotion submitted applications to hold fireworks displays on December 05, 12, and 20, 1992. As part of its application, the Baltimore Office of Promotion requested the Coast Guard to provide assistance with control of spectator and commercial vessel traffic in the vicinity of the fireworks displays.

Discussion of Regulations: These fireworks will be launched from a barge anchored approximately 600 feet south of Pier 6, Inner Harbor, Patapsco River, Baltimore, Maryland. These Safety Zones will consist of a circle, with a radius of 600 feet, around the barge. These regulations are necessary to control spectator craft and to provide for the safety of life and property on and in the vicinity of the Patapsco River during the fireworks events. Since the main shipping channel will not be closed and these regulations will only be in effect for one half hour, the impacts on routine navigation should be minimal.

These emergency rules are not considered major under Executive Order 12291 and are not significant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The Coast Guard also considered the impact of these regulations on small entities and concluded that such impact should be minimal. Therefore, the Coast Guard certifies under 5 U.S.C. 605(b), that these regulations will not have a significant economic impact on a substantial number of small entities.

These actions have been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that these emergency rules do not raise sufficient federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Final Regulations: In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations is amended as follows:

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 C.F.R. 1.05-1(g), 6.04-1, 6.04-6, and 160.5; 49 C.F.R. 1.46.

2. A temporary section 165.T592 is added to read as follows:

§ 165.T592 Safety Zone: Patapsco River, Inner Harbor, Baltimore, Maryland.

(a) *Location:* The following area is a safety zone: The waters of the Patapsco River, Inner Harbor bounded by the arc of a circle with a radius of 600 feet and with its center located at latitude 39-17-00 North, longitude 076-36-15 West.

(b) *Definitions.* The designated representative of the Captain of the Port is any Coast Guard commissioned, warrant or petty officer who has been authorized by the Captain of the Port, Baltimore, Maryland to act on his behalf. The following officers have or will be designated by the Captain of the Port: the Coast Guard Patrol Commander, the senior boarding officer on each vessel enforcing the safety zone, and the Duty Officer at the Marine Safety Office, Baltimore, Maryland.

(1) The Captain of the Port and the Duty Officer at the Marine Safety Office, Baltimore, Maryland can be contacted at telephone number (410) 962-5105.

(2) The Coast Guard Patrol Commander and the senior boarding officer on each vessel enforcing the safety zone can be contacted on VHF-FM channels 16 and 81.

(c) *Local Regulations.* Except for persons or vessels authorized by the Coast Guard Patrol Commander, no person or vessel may enter or remain in the regulated area during the effective time of the safety zone.

(1) The operator of any vessel in the immediate vicinity of this safety zone shall:

---

[3] See footnote 1 to § 367.5(a).

[4] See footnote 1 to § 367.5(a).

(i) Stop the vessel immediately upon being directed to do so by any commissioned, warrant, or petty officer on board a vessel displaying a Coast Guard Ensign.

(ii) Proceed as directed by any commissioned, warrant, or petty officer on board a vessel displaying a Coast Guard Ensign.

(2) Any spectator vessel may anchor outside of the regulated area specified in paragraph (2)(a) of these regulations, but may not block a navigable channel.

(d) *Effective Date:* These regulations will be effective from 6 p.m. until 6:30 p.m. on December 05, December 12, and December 20 unless sooner terminated by the Captain of the Port, Baltimore, Maryland.

Dated: December 4, 1992.

R.L. Edmiston,

Captain, U.S. Coast Guard, Captain of the Port, Baltimore, Maryland.

[FR Doc. 92-30154 Filed 12-11-92; 8:45 am]

BILLING CODE 4910-14-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR PART 52

[GA 017 and 020-4-5418; FRL-4111-1]

Approval and Promulgation of Implementation Plans Georgia: Approval of PM_{10} SIP

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: On April 15, 1988, and January 3, 1991, the State of Georgia submitted a revision to the Georgia State Implementation Plan (SIP). However, it was not until April 3, 1991, that all the required elements were submitted, making the January 3, 1991, package a complete submittal. EPA is approving the revisions submitted by Georgia on April 15, 1988, January 3, 1991, and April 3, 1991. The revisions were submitted pursuant to the requirements of Section 110 of the Clean Air Act to provide for the attainment of the new particulate matter standards known as "PM_{10}" standards which replaced the total suspended particulate (TSP) standards. On July 1, 1987, EPA promulgated a new ambient air quality standard for particulate matter which was based upon the measurement of particles having an aerodynamic diameter of 10 microns or less (PM_{10}). Consequently, States were required to develop plans which provide for attainment and maintenance of these new standards. The Georgia SIP revisions demonstrate that the existing SIP for total suspended particulates (TSP) is adequate to provide for attainment and maintenance of the PM_{10} standards.

EFFECTIVE DATES: This action will be effective February 12, 1993, unless notice is received within 30 days that someone wishes to submit adverse or critical comments. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Written comments should be addressed to Liz Wilde of EPA Region IV's Air Programs Branch (see EPA Region IV address below). Copies of the State's submittal are available for review during normal business hours at the following locations.

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

Region IV Air Programs Branch, Environmental Protection Agency, 345 Courtland Street, Atlanta, Georgia 30365.

Air Protection Branch, Georgia Environmental Protection Division, Georgia Department of Natural Resources, 205 Butler Street, Southeast, Room 1162, East Tower, Atlanta, Georgia 30334.

FOR FURTHER INFORMATION CONTACT: Liz Wilde of the EPA Region IV Air Programs Branch at (404) 347-2864 or (FTS) 257-2864 and at the above address.

SUPPLEMENTARY INFORMATION: Pursuant to the 1977 amendments to the Clean Air Act, EPA, on July 1, 1987 (52 FR 24634), promulgated revised primary and secondary National Ambient Air Quality Standards (NAAQS) for particulate matter by replacing the total suspended particulate matter standard with a standard that included only those particles with an aerodynamic diameter less than or equal to a nominal 10 micrometers. The particles are referred to as PM_{10}.

In order for States to regulate PM_{10}, they must make certain changes in their rules and regulations and in the SIPs. The changes to the rules and the SIP must insure that the PM_{10} NAAQS are attained and maintained; that new and modified sources which emit PM_{10} are reviewed; that PM_{10} is one of the pollutants to trigger alert, warning, and emergency actions; and that the State's monitoring network be designed to include PM_{10} monitors. These changes must be made regardless of the existing levels of PM_{10} in any area of the State. The regulations call for the PM_{10} SIPs to be submitted nine months after the Federal PM_{10} regulations went into effect on July 31, 1987.

Because PM_{10} air quality data was lacking in most areas of the country, EPA could not arbitrarily designate areas as attainment or nonattainment. EPA developed an analysis using historical ambient TSP data and any available PM_{10} data, to classify all counties in the nation into one of three groups based upon the statistical probabilities of not attaining the new PM_{10} standards. EPA has classified the following: (1) Areas with probability of not attaining the PM_{10} standards of at least 95 percent as "Group I", (2) areas with a probability of not attaining the PM_{10} standard of between 20 and 95 percent as "Group II", and (3) areas with a probability of not attaining the PM_{10} standard of less than 20 percent as "Group III". All areas are currently conducting ambient monitoring to determine whether actual ambient PM_{10} concentrations are above or below the PM_{10} NAAQS.

A control strategy is required to show how PM_{10} emissions will be reduced to provide for attainment and maintenance of the PM_{10} NAAQS for a Group I area. For Group II areas, the States are required to commit to perform additional PM10 monitoring in that area and to prepare a control strategy if the data show with certainty that the standards are being exceeded. The commitments must be submitted in the form of an SIP revision and are termed a "committal" SIP.

EPA reviewed TSP monitoring data from Georgia to evaluate the probabilities of PM_{10} air quality levels, and concluded that Georgia was a Group III area. This means that the existing particulate matter control strategy is believed to be largely adequate to attain and maintain the PM_{10} standards. The Georgia SIP, however, still needed to be revised to address the PM_{10} NAAQS in the following ways:

(a) To include State ambient air quality standards for PM_{10} at least as stringent as the NAAQS,

(b) To trigger preconstruction review for new or modified sources which would emit significant amounts of either PM or PM_{10} emissions,

(c) To invoke the emergency episode plan to prevent PM_{10} concentrations from reaching the significant harm level of 600 ug/m^3,

(d) To meet ambient PM_{10} monitoring requirements of 40 CFR part 58, and,

(e) To meet the requirements of 40 CFR 51.322 and 51.323 to report actual annual emissions of PM_{10} (beginning with emissions for 1988) for point sources emitting 100 tons per year or more.

In the April 15, 1988, SIP submittal, Georgia made the following regulation changes to satisfy the above requirements:

I. Georgia revised its SIP to address the PM_{10} NAAQS. The definitions for "Total Suspended Particulate", "Particulate Matter", "Particulate Matter Emissions", "PM_{10}", and "PM_{10} Emissions" were added or modified to read the same as the federal definitions.

II. The Air Quality Control Rules dealing with the prevention of significant deterioration of air quality were amended to incorporate the needed PM_{10} modifications to comply with federal regulations.

III. In the permit review regulations, provisions were added to require major sources impacting a nonattainment area to meet additional federal requirements regarding allowable offset emissions controls before being granted a state permit.

IV. In the Air Pollution Episodes regulations, several revisions were made. The paragraphs for Alert, Warning, and Emergency were revised to add the criterium for PM_{10}. The criteria for suspended particulates was deleted.

EPA's review of the April 15, 1988, submittal, identified four issues within the SIP submittal that were deficient and needed correction. In a letter dated July 6, 1988, EPA identified the following issues that needed corrections:

(a) Georgia's PM_{10} SIP dealt with the NAAQS being protected everywhere at "ground level". EPA requires that the NAAQS be attained and maintained in the "ambient air", as defined in 40 CFR part 50.1(e).

(b) Georgia did not adopt a new 24-hour and annual, primary and secondary particulate matter NAAQS measured as PM_{10}.

(c) The new particulate matter SIP did not require new sources locating in attainment or unclassifiable areas for any criteria pollutant to obtain ambient offsets if such sources would cause or contribute to nonattainment levels for any criteria pollutant in excess of significant levels as required by 40 CFR part 51.165(b).

(d) The Prevention of Air Pollution Episodes Plan contained PM_{10} levels deemed inadequate to prevent Significant Harm levels from being reached.

Dialogue between EPA and the Georgia Department of Natural Resources has led to the resolution of these issues as follows:

(a) Due to long-standing EPA policy, it is EPA's position that Georgia's proposed particulate matter NAAQS must prohibit exceedances of the standard everywhere in the "ambient air". The Code of Federal Regulations (CFR) clearly defines "ambient air" to mean that portion of the atmosphere external to buildings to which the general public has access (see 40 CFR part 50.1(e)). This includes rooftops and balconies of buildings accessible to the public. Therefore, the NAAQS must be attained everywhere in the "ambient air" and not just at "ground level".

Georgia's January 3, and April 3, 1991, submittals correct the definition from "ground level" to ambient air.

(b) EPA's promulgation of a new NAAQS for particulate matter on July 1, 1987, and subsequent guidance from EPA to states on how to develop new SIPs pursuant to the new particulate matter NAAQS, envisioned a process where states would adopt new 24-hour and annual, primary and secondary particulate matter NAAQS measured as PM_{10}. In such an approach, in addition to a provision giving the numerical value of the particulate matter standards, there would need to be a provision stating that for the purpose of determining attainment of the NAAQS, particulate matter shall be measured in the ambient air as PM_{10}. Also, there would need to be an appropriate definition for "PM_{10}" which required measurement by a reference method based on appendix J of 40 CFR part 50 and designated in accordance with 40 CFR Part 53 or by an equivalent method designated by EPA.

Georgia's approach in developing their new particulate matter standard was to adopt a PM_{10} NAAQS rather than a particulate matter NAAQS measured as PM_{10}. Georgia's adoption included an appropriate definition of "PM_{10}". Georgia's adoption, however, also included the following provision: "PM_{10} shall be measured in the ambient air as PM_{10} (particles with an aerodynamic diameter less than or equal to a nominal 10 micrometers) by a reference method based upon 40 CFR part 50, appendix J. There was no need for such a provision in the Georgia regulations because Georgia adopted a PM_{10} NAAQS, rather than a particulate matter NAAQS measured as PM_{10}. Thus the numerical value of the PM_{10} NAAQS and an appropriate definition of PM_{10} is all that was needed.

Despite the fact that inclusion of the provision as well as Georgia's failure to adopt the numerical value of the NAAQS as both a primary and a secondary standard are both inconsistent with national PM_{10} SIP development guidance, Region IV will proceed to approve the Georgia PM_{10} SIP without the suggested changes being made since neither appears to cause a fundamental defect in the SIP.

(c) Due to specific requirements in the Code of Federal Regulations (40 CFR 51.165(b)), it was necessary for Georgia's proposed PM_{10} SIP to require "ambient offsets" rather than "emission offset." Further, such requirements must clearly be defined to apply "within areas that do not or would not meet the applicable NAAQS or within an area that is designated nonattainment for the applicable NAAQS." Georgia revised the PM_{10} SIP to provide for the ambient offsets as well as establishing acceptable significance levels for "cause or contribute" to nonattainment of a NAAQS.

(d) The Code of Federal Regulations and PM_{10} SIP guidance clearly indicate that the PM_{10} SIPs had to replace the TSP Significant Harm level with a level of 600 micrograms per cubic meter for PM_{10} and that PM_{10} SIPs had to incorporate emergency episode criteria for PM_{10}. 40 CFR part 51.151 specifically indicates that Priority 1 Regions need a contingency plan which must, as a minimum, provide for taking action necessary to prevent ambient pollution concentrations at any location from reaching the Significant Harm Levels specified in 40 CFR 51.151. The principal problem with Georgia's submittal is that while it contains three stages of episode criteria (one more than the minimum required) and appropriate emission control actions for each stage of episode criteria specified, the third stage of episode criteria for all pollutants is triggered by ambient concentrations specified in 40 CFR part 51.151 as the Significant Harm Level. This is not allowed because all stages of episode criteria and their corresponding emission control actions must be triggered by ambient concentrations below the Significant Harm Level in order to prevent the Significant Harm Level from ever being reached.

Georgia revised their Prevention of Air Pollution Episodes Plan to incorporate lower levels to trigger Significant Harm which are consistant with 40 CFR part 51 appendix L.

Final Action

EPA has reviewed the submitted material and found it to meet the requirements of 40 CFR part 51. Therefore, EPA is today approving Georgia's PM_{10} SIP.

This action is being taken without prior proposal because the changes are noncontroversial and EPA anticipates no significant comments on them. The public should be advised that this action will be effective February 12, 1993. However, if notice is received

within 30 days that someone wishes to submit adverse or critical comments, this action will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw the final action and another will begin a new rulemaking by announcing a comment period.

This action has been classified as a Table 3 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget waived Table 2 and 3 SIP revisions (54 FR 222) from the requirements of Section 3 of Executive Order 12291 for two years. EPA has submitted a request for a permanent waiver for Table 2 and 3 SIP revisions. OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request.

The Agency has reviewed this request for revision of the federally approved States Implementation Plan for conformance with the provisions of the 1990 Amendments enacted on November 15, 1990. The Agency has determined that this action conforms with those requirements irrespective of the fact that part of the submittal preceded the date of enactment.

Nothing in this action shall be construed as permitting or allowing or establishing a precedent for any future request for a revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic and environmental factors and in relation to relevant statutory and regulatory requirements.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 12, 1993. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule of action. This action may not be challenged later in proceedings to enforce its requirements. [See section 307(b)(2).]

Under 5 U.S.C. section 605 (b), I certify that this approval action will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

List of Subjects in 40 CFR Part 52

Air pollution control, Incorporation by reference, Intergovernmental relations, Particulate matter, Reporting and recordkeeping requirements.

Dated: February 7, 1992.

Patrick M. Tobin,

Acting Regional Administrator.

Part 52 of chapter I, title 40 of the Code of Federal Regulations, is amended as follows:

PART 52—[AMENDED]

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

Subpart L—Georgia

2. Section 52.570 is amended by adding paragraph (c) (38) to read as follows:

§ 52.570 Identification of plan.

* * * * *

(c) * * *

(38) State implementation plan for PM10 which was submitted on April 15, 1988, January 3, 1991, and April 3, 1991, by the Georgia Department of Natural Resources.

(i) Incorporation by reference.

(A) Revisions to Chapter 391–3–1, "Air Quality Control" which became State effective April 14, 1988. Rule 391–3–1–.01, "Definitions", mm, yyy, zzz, aaaa; Rule 391–3–1–.02(4)(c), "Ambient Air Standards"; Rule 391–3–1.–02(7), "Prevention of Significant Deterioration of Air Quality".

(B) Revisions to Rule 391–3–1–.02(4)(c), "PM10", which became State effective January 9, 1991.

(ii) Other material.

(A) April 15, 1988, January 3, 1991, and April 3, 1991, letters from the Georgia Department of Natural Resources.

Approval and Promulgation of Air Quality Implementation Plans; Massachusetts; RACT for Dartmouth Finishing Corporation in New Bedford

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is approving a State Implementation Plan (SIP) revision submitted by the Commonwealth of Massachusetts. This revision establishes and requires the use of reasonably available control technology (RACT) to reduce volatile organic compound (VOC) emissions from fabric printing and fabric finishing operations at Dartmouth Finishing Corporation (Dartmouth) in New Bedford, Massachusetts. The intended effect of this action is to approve a source-specific RACT determination submitted by the Commonwealth of Massachusetts in accordance with commitments of its approved 1982 ozone attainment plan. This action is being taken in accordance with section 110 of the Clean Air Act.

EFFECTIVE DATE: This action will become effective February 12, 1992, unless notice is received within 30 days that adverse or critical comments will be submitted. If the effective date is delayed, timely notice will be published in the **Federal Register.**

ADDRESSES: Comments may be mailed to Linda M. Murphy, Director, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region I, JFK Federal Building, Boston, MA 02203. Copies of the documents relevant to this action are available for public inspection during normal business hours, by appointment at the Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region I, One Congress Street, 10th floor, Boston, MA; and the Division of Air Quality Control, Department of Environmental Protection, One Winter Street, 7th floor, Boston, MA 02108.

FOR FURTHER INFORMATION CONTACT: Robert F. McConnell, (617) 565–3249.

SUPPLEMENTARY INFORMATION: On May 15, 1991, the Commonwealth of Massachusetts submitted a formal revision to its State Implementation Plan (SIP). The SIP revision consisted of a plan approval issued by the Massachusetts Department of Environmental Protection (DEP) which imposed VOC control measures as RACT for Dartmouth Finishing Corporation located in New Bedford, Massachusetts. This final rulemaking action approves the formal SIP revision submittal by the DEP on May 15, 1991. This notice is divided into three parts:

I. Background Information
II. Summary of SIP Revision
III. Final Action

I. Background Information

On November 9, 1983 (48 FR 51480), EPA approved Massachusetts Regulation 310 CMR 7.18(17), "Reasonably Available Control Technology (RACT)", as part of the Commonwealth of Massachusetts 19b-

ozone attainment plan. This regulation requires the Massachusetts DEP to determine and impose RACT on all facilities with the potential to emit one hundred tons per year or more of VOC that are not already subject to Massachusetts regulations developed pursuant to the EPA Control Techniques Guideline (CTG) documents.

On January 10, 1991, the Massachusetts DEP submitted a proposed SIP revision consisting, in part, of a draft non-CTG RACT plan approval defining VOC control requirements for Dartmouth. EPA reviewed the document for enforceability, completeness and technical sufficiency, and provided written comments to the DEP on February 13, 1991. Massachusetts incorporated EPA's proposed changes and submitted a final plan approval as a SIP revision on May 15, 1991.

II. Summary of SIP Revision

Dartmouth's VOC emissions have been reduced from 304 tons per year in 1984 to a maximum of 28 tons per year, resulting in a 90.8% reduction based on typical production. Dartmouth achieved its emissions reductions by reformulating its printing pastes. The DEP's May 13, 1991 final plan approval limits the content of Dartmouth's print pastes to 0.35 pounds of VOC per pound of solids, and requires that fabric finishing mixtures utilized by Dartmouth not exceed 0.115 pounds of VOC per pound of solids. The final plan approval also imposes a daily VOC emission limit on Dartmouth of 0.14 tons per day (280 pounds per day).

A CTG has not been issued for the fabric printing and fabric finishing operations at Dartmouth. However, the CTG governing graphic arts printing covers a printing process that is similar to the fabric printing and finishing operations at Dartmouth. The graphic arts CTG recommends a 65% overall reduction in VOC emissions from packaging rotogravure and a 75% overall reduction for publication rotogravure when using add-on controls. Furthermore, EPA has determined that 0.5 pounds of VOC per pound of solid is RACT for flexographic and packaging rotogravure printing. The emission reductions achieved by Dartmouth through reformulation of its print pastes are consistent with the reductions anticipated through add-on controls or through reformulation at facilities required to meet the emission limits suggested by EPA's graphic arts CTG. For these reasons, the DEP has imposed emission limits of 0.35 pounds of VOC per pound of solids for print pastes, and a limit of 0.115 pounds of VOC per pound of solids for fabric finishing mixtures used by Dartmouth. In addition, a daily emissions limit of 0.14 tons (280 pounds per day) will ensure maintenance of the 90.8% reduction in annual VOC emissions achieved by Dartmouth.

III. Final Action

EPA is approving Massachusetts final plan approval No. 4P89051 dated and effective May 13, 1991 as a Revision to the Massachusetts SIP. The final plan approval establishes and imposes RACT consisting of an emission limit of 0.35 pounds of VOC per pound of solids for print pastes and 0.115 pounds of VOC per pound of solids for fabric finishing mixtures. In addition, the final plan approval imposes a daily emissions limit of 280 pounds of VOC for Dartmouth Finishing Corporation in New Bedford, Massachusetts. EPA is approving this SIP revision without prior proposal because the Agency views this as an uncontroversial revision and anticipates no adverse comments. This action will be effective 60 days from the date of this **Federal Register** notice unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted. If such notice is received, this action will be withdrawn before the effective date by simultaneously publishing two subsequent notices. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective on (60 days from date of publication).

Under 5 U.S.C. section 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

This action has been classified as a Table 3 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225).

EPA has submitted a request for a permanent waiver for Table 2 and 3 SIP Revisions. OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any State implementation plan. Each request for revision to the State implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 12, 1993. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action.

This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Ozone, Reporting and recordkeeping requirements.

Note. Incorporation by reference of the State Implementation Plan for the State of Massachusetts was approved by the Director of the Federal Register on July 1, 1982.

Dated: October 27, 1992.

Julie Belaga,

Regional Administrator, Region I.

Part 52 of chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52–[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

Subpart W—Massachusetts

2. Section 52.1120 is amended by adding paragraph (c)(95) to read as follows:

Approval and Promulgation of Air Quality Implementation Plans; Massachusetts; Stage II Vapor Recovery

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is approving a State Implementation Plan (SIP) revision submitted by the Commonwealth of Massachusetts. This revision consists of a regulation entitled "Dispensing of Motor Vehicle Fuel" which requires motor vehicle fuel dispensing facilities to install and operate Stage II vapor recovery equipment. By this action EPA is approving this regulation which limits the amount of volatile organic compounds (VOC) emitted to the atmosphere during the refueling of automobiles. This action is being taken in accordance with section 110 of the Clear Air Act.

EFFECTIVE DATE: This rule will become effective on January 13, 1993.

ADDRESSES: Copies of the documents relevant to this action are available for public inspection during normal business hours, by appointment at the Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region I, One Congress Street, 10th floor, Boston, MA; Public Information Reference Unit, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460; and the Division of Air Quality Control, Department of Environmental Protection, One Winter Street, 8th Floor, Boston, MA 02108.

FOR FURTHER INFORMATION CONTACT: Anne E. Arnold, (617) 565-3166.

SUPPLEMENTARY INFORMATION: On May 17, 1990, EPA received a formal State Implementation Plan (SIP) submittal from the Commonwealth of Massachusetts' Department of Environmental Protection (DEP). This submittal contained new subsection 310 CMR 7.24(6) entitled "Dispensing of Motor Vehicle Fuel;" amendments to 310 CMR 7.00 "Definitions;" and amendments to subsection 310 CMR 7.24(2)(c) requiring Stage I vapor recovery in Berkshire County. Subsequently, in a letter to EPA dated July 5, 1990, DEP withdrew the Stage I portion of the SIP submittal. Massachusetts Stage I regulation has since been resubmitted to EPA and is being processed as part of another Agency action.

This state-initiated SIP revision was submitted prior to the enactment of the Clean Air Act Amendments (CAAA) of 1990. Public Law 101-549, 104 Stat. 2399, codified at 42 U.S.C. 7401-7671q. The Clean Air Act, as amended in 1990 (CAA), requires states with moderate or above ozone nonattainment areas adopt Stage II vapor recovery regulations and submit them to EPA by November 15, 1992 [section 182(b)(3)(A)].

On June 7, 1991, EPA received another formal SIP submittal containing an amendment to subsection (6) of 310 CMR 7.24. Massachusetts submitted this revision in response to EPA's Notice of Proposed Rulemaking (NPR) for this action published on July 10, 1991 (56 FR 31364). In addition, on April 21, 1992, DEP submitted an implementation policy statement regarding its Stage II program and a draft document entitled "Stage II Vapor Recovery Program Compliance and Enforcement Protocol."

Dispensing of Motor Vehicle Fuel—310 CMR 7.24(6)

This regulation requires all existing motor vehicle fuel dispensing facilities in Massachusetts with throughput volumes of greater than 20,000 gallons per month to install and operate Stage II vapor recovery equipment. The required installation date for the vapor recovery equipment varies depending on a facility's annual gasoline throughput. In addition, this regulation also requires any motor vehicle fuel dispensing facility, which has been constructed or substantially modified after November 1, 1989, regardless of throughput, to install and operate a Stage II vapor recovery and control system.

Definitions Added to 310 CMR 7.00

Definitions of the following terms which appear throughout the above Stage II regulation have been added to 310 CMR 7.00: "motor vehicle fuel," "motor vehicle fuel dispensing facility," "substantial modification," and "vapor collection and control system."

EPA proposed to approve the Massachusetts Stage II regulation and associated definitions with the understanding that prior to final rulemaking the Massachusetts DEP would make the necessary amendments to the rule as outlined in EPA's NPR. The necessary amendments and Massachusetts' response are discussed below. In addition, the NPR stated that when EPA published its guidance on Stage II vapor recovery, EPA would subsequently review Massachusetts' rule in accordance with this new guidance. Results of this review are summarized in the "Outstanding

Issues" section below. EPA guidance on Stage II vapor recovery is contained in the following documents: Technical Guidance—Stage II Vapor Recovery Systems for Control of Vehicle Refueling Emissions at Gasoline Dispensing Facilities (EPA–450/3–91–022b), and Enforcement Guidance for Stage II Vehicle Refueling Control Programs (EPA, Office of Mobile Sources). Massachusetts' regulation and EPA's evaluation are detailed in a memorandum dated July 27, 1992 entitled "Technical Support Document—Massachusetts—Stage II Vapor Recovery."

Amendments Required by EPA's NPR

Previously, 310 CMR 7.24(6)(b) stated: "* * * no person, owner, operator or employee of a motor vehicle fuel dispensing facility, shall dispense, or allow the dispensing of, motor vehicle fuel from any motor vehicle fuel dispensing facility unless the motor vehicle fuel dispensing facility is equipped with a properly operating vapor collection and control system." EPA's NPR noted that this language could be misinterpreted to mean only one pump per facility needs Stage II vapor recovery control equipment installed. Therefore, the NPR stated that this provision needed to be clarified to cover all nozzles dispensing motor vehicle fuel at a facility.

In response to EPA's comments, the Massachusetts DEP amended the regulation to read "* * * unless each motor vehicle fuel dispenser at the motor vehicle fuel dispensing facility is equipped with a properly operating vapor collection and control system." Thus, the regulation requires all pumps at a facility to have Stage II equipment installed. This amendment was included in the revised Stage II regulation that Massachusetts submitted to EPA on June 7, 1991.

In addition, the NPR stated that Massachusetts must address a second deficiency found at 310 CMR 7.24(6)(c)(4). This section requires that the vapor recovery system recover at least 95 percent by weight of motor vehicle fuel vapors displaced during the dispensing of motor vehicle fuel. A certified test method or a requirement to use only certified equipment is not, however, included in the regulation. The NPR stated that either a test method or a requirement to use only certified equipment must be specified in order to assure compliance. The NPR explained that as an alternative to testing each station for 95 percent control effectiveness, DEP could require Stage II systems to be certified to achieve at least a 95 percent reduction by either the California Air Resources Board (CARB), or by using CARB test procedures and methods or equivalent test procedures and methods developed by the DEP and approved by EPA. The DEP did not address this deficiency in the revised regulation which was submitted to EPA on June 7, 1991.

Although CARB certified systems are not explicitly referenced in Massachusetts' Stage II regulation, DEP has indicated to EPA that requiring these systems is the method currently being used by the State to implement the 95 percent control requirement. DEP staff have also indicated that Massachusetts is unable to reference another state's certification or testing procedures in a Massachusetts' regulation. EPA, therefore, agreed to consider, in addition to the regulation itself, other documentation which shows that the Massachusetts' Stage II program requires facilities to use CARB certified systems. In response, on April 21, 1992, DEP submitted the following documents to EPA: "Division of Air Quality Control Policy" and "Draft Stage II Vapor Recovery Program Compliance and Enforcement Protocol." Review of these documents indicates that they satisfactorily demonstrate that the Massachusetts Stage II program implements the 95 percent control requirement by requiring facilities to use CARB certified equipment, as specified in EPA's Stage II guidance documents.

Finally, the third deficiency noted in EPA's NPR relates to the applicability levels of the regulation. The Massachusetts regulation requires all motor vehicle fuel dispensing facilities with a throughput volume of greater than 20,000 gallons of motor vehicle fuel per month since January 1, 1988 to install Stage II vapor recovery systems. Section 182(b)(3)(A) of the amended CAA requires States with moderate or higher ozone nonattainment areas to submit to EPA by November 15, 1992 regulations which require Stage II systems for facilities which dispense greater than 10,000 gallons per month, or 50,000 gallons per month for independent small business marketers (ISBMs). Thus, the Massachusetts applicability levels are not consistent with the requirements of the amended CAA. For those stations that are not considered ISBMs, the Massachusetts regulation has a less stringent applicability cutoff. The DEP did not address this issue in their revised regulation submitted to EPA on June 7, 1991.

Outstanding Issues

On April 30, 1992, EPA provided comments to the Massachusetts' DEP which detailed the remaining outstanding issues which the State must address in order for the regulation to be considered consistent with EPA guidance and be approved as meeting the requirements of section 182(b)(3) of the CAA. Under the requirements of the CAA, Massachusetts must address the following outstanding issues by November 15, 1992:

1. As previously discussed, Massachusetts' Stage II applicability levels must be consistent with the requirements of the CAA.

2. As outlined in EPA's Stage II Enforcement Guidance, the following testing requirements should be included in the Massachusetts' Stage II regulation:

a. Testing, for verification of proper installation and function of the entire system, should be required once all of the equipment is in operational condition at the gasoline dispensing pumps. Liquid Blockage testing, Leak Check testing, and all other related tests for auto shutoff and flow prohibiting mechanisms, as applicable, should be conducted in accordance with the test procedures found in appendix J of the EPA document Technical Guidance-Stage II Vapor Recovery Systems for Control of Vehicle Refueling Emissions at Gasoline Dispensing Facilities, Vol II (EPA–450/3–91–022b).

b. Recertification of the function of Stage II equipment should be required at least every five years, or upon major system replacement or modification, whichever occurs first. This recertification should include a Leak Check Test and any and all other functional tests that were required for the initial system certification. A major system modification is considered to be replacing, repairing or upgrading 75 percent or more of a facility's Stage II equipment.

3. The recordkeeping provision in Massachusetts' regulation should be amended to include that the following records be kept, as specified by the Enforcement Guidance:

a. Any and all permits and licenses to operate a facility or a specific system at a facility;

b. Records which verify that the Stage II system meets or exceeds the requirements of a Liquid Blockage Test, a Leakage Test, or other applicable tests and which indicate the date of the test results and the installing and test companies' names, addresses and phone numbers;

c. A chronological file of inspection reports issued by the state;

d. A chronological file of compliance records including warnings, notices of violation, and other compliance records issued by the state; and

e. Training certification records showing proof of attendance and completion of required training.

In addition, the recordkeeping provisions stated in § 7.24(6)(f) of Massachusetts' Stage II regulation which currently require the recording of any failures of the Stage II equipment should be amended to include the recording of maintenance performed in response to these system failures.

Because of the noted deficiencies, EPA believes that this regulation does not meet the requirements of section 182(b)(3). As noted above, the DEP needs to address the remaining outstanding issues and, in accordance with the CAA, submit its revised regulation to EPA as a SIP revision by November 15, 1992. Although there are still outstanding issues associated with this rule, EPA is approving this revision to the Massachusetts SIP at this time, since it will strengthen the existing SIP and contribute to a reduction in volatile organic compound emissions until such time as DEP revises its rule to meet all of the requirements of section 182(b)(3) of the CAA.

Final Action

EPA is approving 310 CMR 7.24(6) "Dispensing of Motor Vehicle Fuel," and the addition of the following definitions to 310 CMR 7.00, as a revision to the Massachusetts SIP: "motor vehicle fuel," "motor vehicle fuel dispensing facility," "substantial modification," and "vapor collection and control system" submitted on May 17, 1990 and June 7, 1991. Today's action makes final the action proposed on July 10, 1991 (56 FR 31364). This approval is based on the strengthening effect of this submittal and is not an approval of the Stage II rule as meeting section 182(b)(3) of the amended CAA. EPA received no adverse public comment on the proposed action. As a direct result, the Regional Administrator has reclassified this action from Table 1 to Table 2 under the processing procedures established on January 19, 1989 (54 FR 2214).

Under the Regulatory Flexibility Act, 5 U.S.C. 600 et. seq., EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

SIP approvals under section 110 and subchapter I, part D of the CAA do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. E.P.A.*, 427 U.S. 246, 256–66 (S.Ct. 1976); 42 U.S.C. 7410 (a)(2).

On January 6, 1989, the Office of Management and Budget (OMB) waived Table 2 and Table 3 revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291 for a period of two years. EPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any State implementation plan. Each request for revision to the State implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 12, 1993. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Air pollution control, Hydrocarbons, Incorporation by reference, Ozone.

Note: Incorporation by reference of the State Implementation Plan for the Commonwealth of Massachusetts was approved by the Director of the **Federal Register** on July 1, 1982.

Dated: November 3, 1992.

Julie Belaga,

Regional Administrator, Region I.

Part 52 of chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

Subpart W—Massachusetts

2. Section 52.1120 is amended by adding paragraph (c)(97) to read as follows:

§ 52.1120 Identification of plan.

* * * * *

(c) * * *

(97) Revisions to the State Implementation Plan submitted by the Massachusetts Department of Environmental Protection on May 17, 1990, July 5, 1990, June 7, 1991, and April 21, 1992.

(i) Incorporation by reference.

(A) Letters from the Massachusetts Department of Environmental Protection, dated May 17, 1990 and June 7, 1991, submitting a revision to the Massachusetts State Implementation Plan.

(B) Definition of "motor vehicle fuel," "motor vehicle fuel dispensing facility," "substantial modification," and "vapor collection and control system," added to 310 CMR 7.00 and effective in the Commonwealth of Massachusetts on October 27, 1989.

(C) 310 CMR 7.24(6) "Dispensing of Motor Vehicle Fuel," effective in the Commonwealth of Massachusetts on October 27, 1989.

(D) Amendments to 310 CMR 7.24(6)(f) "Dispensing of Motor Vehicle Fuel" and to the definition of "substantial modification" in 310 CMR 7.00, effective in the Commonwealth of Massachusetts on June 21, 1991.

(E) Amendment to the definition of "motor vehicle fuel dispensing facility" in 310 CMR 7.00, effective in the Commonwealth of Massachusetts on April 12, 1991.

(ii) Additional materials.

(A) Letter from the Massachusetts Department of Environmental Protection, dated July 5, 1990, requesting the withdrawal of amendments to subsection 310 CMR 7.24(2)(c) which require Stage I vapor recovery in Berkshire County from the SIP revision package submitted on May 17, 1990.

(B) Letter from the Massachusetts Department of Environmental Protection, dated April 21, 1992, submitting an implementation policy statement regarding its Stage II program. This policy statement addresses the installation of California Air Resources Board (CARB) certified systems, Stage II testing procedures, and defects in State II equipment.

(C) Nonregulatory portions of the submittal.

§ 52.1167 [Amended]

3. Table 52.1167 is amended by adding a new entry to state citation "310 CMR 7.00" and by adding a new state citation for "310 CMR 7.24(6)" to read as follows:

TABLE 52.1167.—EPA-APPROVED RULES AND REGULATIONS

BILLING CODE 6560-50-M

Proposed Rules

Federal Register
Vol. 57, No. 240
Monday, December 14, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

FARM CREDIT ADMINISTRATION

12 CFR Part 621

RIN 3052–AB32

Accounting and Reporting Requirements

AGENCY: Farm Credit Administration.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Farm Credit Administration (FCA) issued regulations on Accounting and Reporting Requirements, as a proposed regulation on August 27, 1985 (50 FR 34711). The regulation was published as a final regulation on March 13, 1986 (51 FR 8644). The regulation was developed in large part to set requirements and standards for institutions to use in accounting for high-risk assets (i.e., problem loans) and disclosing loan performance characteristics. The regulation included specific standards and reporting requirements for nonperforming loans. The regulation defined nonperforming loans as nonaccrual, formally restructured, other restructured and reduce rate, and other high-risk loans. The FCA is soliciting comments from the public on possible amendments to the regulatory requirements.

DATES: Comments should be received on or before February 12, 1993.

ADDRESSES: Comments should be mailed or delivered (in triplicate) to Patricia W. DiMuzio, Division Director, Regulation Development Division, Office of Examination, Farm Credit Administration, McLean, Virginia 22102–5090. Copies of all comments received will be available for examination by interested parties in the Regulation Development Division, Farm Credit Administration.

FOR FURTHER INFORMATION CONTACT:

Linda C. Sherman, Policy Analyst, Regulation Development Division, Office of Examination, Farm Credit Administration, McLean, Virginia 22102–5090, (703) 883–4498, TDD (703) 883–4444, or

William L. Larsen, Senior Attorney, Regulatory Operations Division, Office of General Counsel, Farm Credit Administration, McLean, Virginia 22102–5090, (703) 883–4020, TDD (703) 883–4444.

SUPPLEMENTARY INFORMATION: The FCA has undertaken a project to amend and update 12 CFR part 621, Accounting and Reporting Requirements, to promote consistency with industry practices pertaining to problem loan accounting issues and to ensure that the regulatory requirements are standards of 12 CFR part 621 are consistent with those of generally accepted accounting practices.

Since the regulations were issued in 1986, there have been continued efforts on the part of both the FCA and the Farm Credit System (System) to provide additional guidance in the area of problem loan accounting. However, differences continue to exist which have resulted in financial disclosures of problem loans by System institutions that are not readily comparable to similar disclosures of other financial institutions.

After careful analysis of the issues and before initiating the actual drafting of proposed regulations, the FCA has determined that it would be appropriate and beneficial to solicit input from the System and the public on this project through an advance notice of proposed rulemaking (ANPRM). Accordingly, the FCA requests public comments on the accounting and reporting requirements contained in 12 CFR part 621. Comments received will be considered in the drafting of proposed regulations amending part 621.

The FCA is seeking comment from the public with regard to financial disclosures of problem loans by System institutions, particularly as they relate to the following questions:

(1) The FCA is considering modifying § 621.2 regarding nonperforming loans and the categories within that area. What costs and/or benefits would you foresee if modifications were to be made to this area? Would revising the nonperforming loan categories enhance the usefulness of performance classifications in measuring the risk to System institutions? System institutions are requested to quantify any costs or savings as specifically as possible.

(2) What benefit would be gained by providing financial disclosure of credit quality statistics for the purpose of risk identification, in addition to the current practice of reporting and disclosing loan performance characteristics?

(3) It has been suggested that the FCA regulations pertaining to problem loan disclosure should parallel those prescribed in the Securities and Exchange Commission's (SEC) Industry Guide 3, "Statistical Disclosure by Bank Holding Companies" to promote comparability between System institutions and commercial banks. If 12 CFR part 621 were amended in such a fashion, what impact would this have on the institutions' disclosure of portfolio risk?

(a) For example, if the other high-risk (OHR) category were to be modified or eliminated, what other types of disclosures, if any, would be appropriate to identify those loans previously disclosed in the OHR category?

(b) What alternatives, if any would you propose for the other restructured and reduced rate category?

(4) The FCA is considering expanding existing nonaccrual loan guidelines to provide direction with regard to the treatment of the application of payments on nonaccrual loans, income recognition on nonaccrual loans, and criteria for reinstatement to accrual loan status. The FCA is seeking information on what criteria is currently used by lending institutions in this area, and what criteria should be established.

(5) The FCA is considering modifications to the existing rule of aggregation. The FCA received considerable comment on the rule of aggregation as it was discussed in the proposed lending limit regulations (56 FR 2452, January 23, 1991). The FCA is seeking input as to how the rule of aggregation, as discussed in 12 CFR part 621, relates to performance categories. In particular, when should the rule of aggregation be applied and what criteria should be established regarding what constitutes an independent credit risk?

(6) Please include any other comments relevant to financial disclosures of problem loans by System institutions, particularly as they relate to the above topics.

Dated: December 8, 1992.

Curtis M. Anderson,

Secretary, Farm Credit Administration Board.

[FR Doc. 92-30301 Filed 12-11-92; 8:45 am]

BILLING CODE 6705-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92-CE-51-AD]

Airworthiness Directives; Aerostar Aircraft Corp. PA-60-600 (Aerostar 600) and PA-60-700 (Aerostar 700) Series (Formerly Piper) Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to supersede Airworthiness Directive (AD) 92-11-08, which currently requires replacing or upgrading the main landing gear torque links on certain Aerostar Aircraft Corporation (Aerostar) PA-60-600 and PA-60-700 series airplanes. The Federal Aviation Administration (FAA) has received several reports of fatigue failure of the main landing gear torque links that were installed or upgraded in accordance with AD 92-11-08. The proposed action would require replacing these main landing gear torque links with parts of improved design. The actions specified by the proposed AD are intended to prevent loss of directional control of the airplane during ground operation caused by torque link failure.

DATES: Comments must be received on or before February 23, 1993.

ADDRESSES: Submit comments in triplicate to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 92-CE-51-AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

Service information that is discussed in the proposed AD may be obtained from the Aerostar Aircraft Corporation, Customer Service Department, 3608 South Davison Boulevard, Spokane, Washington 99204; Telephone (509) 455-8672. This information also may be examined at the Rules Docket at the address above.

FOR FURTHER INFORMATION CONTACT: Mr. William A. Swope, Aerospace Engineer, Seattle Aircraft Certification Office, 1601 Lind Avenue, S.W., Renton, Washington 98055-4056; Telephone (206) 227-2589.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 92-CE-51-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 92-CE-51-AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

AD 92-11-08, Amendment 39-8258 (57 FR 20742, May 15, 1992), currently requires the following on certain Aerostar PA-60-600 (Aerostar 600) and PA-60-700 (Aerostar 700) series airplanes: (1) An inspection to determine whether the main landing gear torque links are both single lug links or a single lug link fitting into a dual lug link; and (2) the installation of a main landing gear torque upgrade kit or the installation of a main landing gear torque link replacement kit depending on the result of the inspection. The actions are accomplished in accordance with the instructions in Aerostar Service Bulletin (SB) No. 746B, dated June 11, 1991, or in accordance with the instructions in the Main Landing Gear Torque Link Replacement Kit, part number (P/N) 765-155 Rev F, which is referenced in Aerostar SB No. 746B. This action superseded AD 80-02-09.

AD 92-11-08 was issued based upon several reports of main landing gear torque links cracking or collapsing on the affected airplanes. Airplanes that are equipped with replacement or upgraded torque links in accordance with that AD have had fatigue failures of these torque links. Aerostar has redesigned and manufactured main landing gear torque links that will help prevent fatigue cracking.

In addition, Aerostar has issued SB No. 746C, dated September 15, 1992, which specifies procedures for installing these improved main landing gear torque links.

After examining the circumstances and reviewing all available information related to the incidents described above, the FAA has determined that AD action should be proposed to require installation of these new improved main landing gear torque links in order to prevent loss of directional control of the airplane during ground operation.

Since an unsafe condition has been identified that is likely to exist or develop in other Aerostar PA-60-600 (Aerostar 600) and PA-60-700 (Aerostar 700) series airplanes of the same type design, the proposed AD would supersede AD 92-11-08 with a new AD that would require replacing the existing main landing gear torque links with improved design torque links, P/N 400126-501 and 400126-502 (left main landing gear) and P/N 400126-503 and 400126-504 (right main landing gear). The proposed action would be accomplished in accordance with the Instructions section of Aerostar SB No. 746C, dated September 15, 1992.

The FAA estimates that 800 airplanes in the U.S. registry would be affected by the proposed AD, that it would take approximately 2 workhours per airplane to accomplish the proposed action, and that the average labor rate is approximately $55 an hour. Parts cost approximately $882 per airplane. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $793,600.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient

federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES".

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

Section 39.13 [Amended]

2. Section 39.13 is amended by removing AD 92–11–08, Amendment 39–8258 (57 FR 20742, May 15, 1992), and adding the following new airworthiness directive:

Aerostar Aircraft Corporation: Docket No. 92–CE–51–AD. Supersedes AD 92–11–08, Amendment 39–8258.

Applicability: The following model and serial number airplanes, certificated in any category:

Models	Serial Numbers
PA–60–600 Aerostar 600	60–0001–003 through 60–0933–8161262.
PA–60–601 Aerostar 601	61–0001–004 through 61–0680–8162157.
PA–60–601P Aerostar 601P	61P–0157–001 through 61P–0660–8163455.
PA–60–602P Aerostar 602P	62P–0750–8165001 through 60–8365021.
PA–60–700P Aerostar 700P	60–8223001 through 60–8423025.

Note 1.—The manufacturing and ownership rights of the affected model airplanes were previously owned by the Piper Aircraft Corporation, but these rights were recently transferred to the Aerostar Aircraft Corporation.

Compliance: Required within the next 100 hours time-in-service after the effective date of this AD, unless already accomplished.

To prevent loss of directional control of the airplane during ground operation caused by torque link failure, accomplish the following:

(a) Replace the existing main landing gear torque links with improved design torque links, part number (P/N) 400126–501 and 400126–502 (left main landing gear) and P/N 400126–503 and 400126–504 (right main landing gear), in accordance with the INSTRUCTIONS section of Aerostar Service Bulletin (SB) No. 746C, dated September 15, 1992.

Note 2.—Aerostar SB No. 746C, dated September 15, 1992, references the availability of Main Landing Gear Torque Link Replacement Kit No. 765–155 revision G. This kit contains the improved torque links and all hardware necessary to install these links. This kit may be obtained from the manufacturer at the address specified in paragraph (d) of this AD.

(b) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(c) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Seattle Aircraft Certification Office, 1601 Lind Avenue, S.W., Renton, Washington 98055–4056. The request shall be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Seattle Aircraft Certification Office.

Note 3.—Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle Aircraft Certification Office.

(d) All persons affected by this directive may obtain copies of the documents referred to herein upon request to the Aerostar Aircraft Corporation, Customer Service Department, 3608 South Davison Boulevard, Spokane, Washington 99204; or may examine these documents at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

(e) This amendment supersedes AD 92–11–08, Amendment 39–8258.

Issued in Kansas City, Missouri, on December 8, 1992.

John E. Tigue

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 92–CE–50–AD]

Airworthiness Directives; Mitsubishi Heavy Industries, Ltd., MU–2B Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to adopt a new airworthiness directive (AD) that would apply to certain Mitsubishi Heavy Industries, Ltd., (Mitsubishi) MU–2B series airplanes. The proposed action would reduce the maximum deflection of the elevator nose-down trim to a 1-degree to 3-degree range. Analysis of service history on the affected airplanes has revealed one accident and two incidents where the existing elevator nose-down trim deflection caused excessive control wheel force. The actions specified by the proposed AD are intended to prevent excessive control wheel force caused by extreme elevator nose-down trim deflection, which could result in loss of control of the airplane.

DATES: Comments must be received on or before February 23, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 92–CE–50–AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

Service information that is applicable to this AD may be obtained from Mitsubishi Heavy Industries, Ltd., Nagoya Aerospace Systems, 10, Oyecho, Minato-Ku, Nagoya, Japan. This information also may be examined at the Rules Docket at the address above.

FOR FURTHER INFORMATION CONTACT: Mr. William Roberts, Aerospace Engineer, Los Angeles Aircraft Certification Office, FAA, 3229 E. Spring Street, Long Beach, California 90806; Telephone (310) 988–5228; Facsimile (310) 988–5210.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 92–CE–50–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 92–CE–50–AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion: The FAA's review of the service history of certain Mitsubishi MU–2 series airplanes has revealed one accident and two incidents where the existing elevator nose-down trim deflection caused excessive control wheel force. Extreme elevator nose-down trim deflection, if not corrected, could result in loss of control of the airplane.

Mitsubishi has issued Service Bulletin (SB) No. 216, dated September 11, 1992, which specifies procedures for reducing the elevator nose-down trim deflection to a 1-degree to 3-degree range on certain MU–2 series airplanes.

After examining the circumstances and reviewing all available information related to the incidents described above, the FAA has determined that AD action should be taken to correct the unsafe condition.

Since the condition described is likely to exist or develop in other Mitsubishi MU–2 series airplanes of the same type design, the actions specified by the proposed AD would reduce the maximum deflection of the elevator nose-down trim to a 1-degree to 3-degree range. The proposed action would be accomplished in accordance with the service bulletin described above.

The FAA estimates that 252 airplanes in the U.S. registry would be affected by the proposed AD, that it would take approximately 6 workhours per airplane to accomplish the proposed action, and that the average labor rate is approximately $55 an hour. Parts cost approximately $300 per airplane. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $158,760.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES".

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR Part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§39.13 [AMENDED]

2. Section 39.13 is amended by adding the following new AD:

Mitsubishi Heavy Industries, Ltd.: Docket No. 92–CE–49–AD.

Applicability: The following model and serial number airplanes, certificated in any category:

Model	Serial Numbers
MU–2B–10, MU–2B–15, MU–2B–20, MU–2B–25, and MU–2B–26	008 through 312, 314 through 320, and 322 through 347.
MU–2B–30, MU–2B–36, and MU–2B–36	501 through 651, 653 through 660, and 662 through 666.

Compliance: Required within the next 100 hours time-in-service after the effective date of this AD, unless already accomplished.

To prevent excessive control wheel force caused by extreme elevator nose-down trim deflection, which could result in loss of control of the airplane, accomplish the following:

(a) Reduce the maximum deflection of the elevator nose-down trim to a 1-degree to 3-degree range in accordance with the Instructions section of Mitsubishi Service Bulletin No. 216, dated September 11, 1992.

(b) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(c) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Los Angeles Aircraft Certification Office, FAA, 3229 E. Spring Street, Long Beach, California 90806. The request shall be forwarded through an

appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles Aircraft Certification Office.

Note.—Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles Aircraft Certification Office.

(d) All persons affected by this directive may obtain copies of the document referred to herein upon request to Mitsubishi Heavy Industries, Ltd., Nagoya Aerospace Systems, 10, Oyecho, Minato-Ku, Nagoya, Japan; or may examine this document at the FAA, Central Region, Office of the Assistant Chief Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Issued in Kansas City, Missouri, on December 8, 1992.

John E. Tigue,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the supersedure of an existing airworthiness directive (AD), applicable to certain Boeing Model 757 series airplanes equipped with Pratt and Whitney PW2000 series engines, that currently requires certain inspections, adjustments, and functional checks of the engine thrust reverser system; and modification of the engine thrust reverser directional control valve. This action would add a requirement to install an additional thrust reverser system locking feature, which, when accomplished, would terminate the requirement for repetitive inspections and functional checks. This proposal is prompted by results of a recent safety review of the thrust reverser system on these airplanes, which revealed that the installation of additional features to further minimize the likelihood of an in-flight thrust reverser deployment is necessary. The actions specified by the proposed AD are intended to prevent deployment of a thrust reverser in flight and subsequent reduced controllability of the airplane.

DATES: Comments must be received by February 9, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-173-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124-2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Jeffrey Duven, Aerospace Engineer, Seattle Aircraft Certification Office, Propulsion Branch, ANM-140S, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055-4056; telephone (206) 227-2688; fax (206) 227-1181.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92-NM-173-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-173-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056.

Discussion: On September 11, 1991, the FAA issued AD 91-20-09, Amendment 39-8043 (56 FR 46725, September 16, 1991), to require certain inspections, adjustments, and functional checks of the engine thrust reverser system; and modification of the engine thrust reverser directional control valve. That action was prompted by a determination that certain discrepancies in the thrust reverser system on Model 767 series airplanes equipped with Pratt and Whitney PW4000 series engines can cause an uncommanded thrust reverser deployment, and a determination that the thrust reverser systems of the Models 767 and 757 series airplanes, equipped with Pratt and Whitney PW4000 and PW2000 series engines, respectively, are similar. The requirements of that AD are intended to prevent deployment of a thrust reverser in flight and subsequent reduced controllability of the airplane.

Since the issuance of that AD, the FAA has completed a safety review of the thrust reverser system installed on Boeing Model 757 series airplanes equipped with Pratt and Whitney PW2000 series engines. The results of that review revealed that in-flight deployment of a thrust reverser could result in a significant reduction in controllability of the airplane from that previously considered. Consequently, the FAA has determined that the installation of additional features to further minimize the likelihood of an in-flight thrust reverser deployment is necessary.

The FAA has reviewed and approved Boeing Service Bulletin 757-78-0028, Revision 1, dated October 29, 1992, that describes procedures for installation of an additional thrust reverser system locking feature (denoted as a synch shaft lock). The locking system is controlled independently of the system's existing electro-mechanical safety features. This additional locking feature has been certified and is installed on new-production Model 757 series airplanes equipped with Pratt and Whitney PW2000 series engines.

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would supersede AD 91-20-09 to continue to require certain inspections, adjustments, and functional checks of the engine

thrust reverser system; and modification of the engine thrust reverser directional control valve. The proposed AD would add a requirement to install an additional thrust reverser system locking feature which, when accomplished, would terminate the requirement for repetitive inspections and functional checks. The actions would be required to be accomplished in accordance with the service bulletin described previously.

There are approximately 211 Model 757 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 192 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 624 work hours per airplane to accomplish the proposed actions, and that the average labor rate is $55 per work hour. Required parts would be supplied by the manufacturer at no cost to operators. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $6,589,440, or $34,320 per airplane. This total cost figure assumes that no operator has yet accomplished the proposed requirements of this AD action.

The FAA recognizes the large number of work hours required to accomplish the proposed modification. The 5-year compliance time proposed in paragraph (e) of this notice should allow the synch shaft lock installation to be made coincidentally with scheduled major airplane inspection and maintenance activities, thereby minimizing the costs associated with special airplane scheduling. To ensure consistent progress in accomplishing these modifications, the FAA proposes that, during each one-year period after the effective date of the final rule, each operator would be required to modify 20 percent of the affected fleet in its possession during that year. By following this schedule, the FAA estimates that 20 percent of the entire affected Model 757 fleet would be modified within one year after issuance of the final rule, and 40 percent of the fleet would be modified within two years after the effective date of the final rule. This practice would continue until five years after the effective date of the final rule, at which time the entire affected fleet would be modified.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES."

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39–8043 (56 FR 46725, September 16, 1991), and by adding a new airworthiness directive (AD), to read as follows:

Boeing: Docket 92–NM–173–AD. Supersedes AD 91–20–09, Amendment 39–8043.

Applicability: Model 757 series airplanes equipped with Pratt and Whitney PW2000 series engines; having airplane line numbers 0001 through 0441, inclusive; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

Note: Paragraphs (a), (b), (c), and (d) of this AD restate the requirements of AD 91–20–09, Amendment 39–8043, paragraphs (a), (b), (c), and (d). As allowed by the phrase, "unless accomplished previously," if the requirements of AD 91–20–09 have been accomplished previously, paragraphs (a), (b), and (c) of this AD do not require those actions to be repeated.

To prevent deployment of a thrust reverser in flight and subsequent reduced controllability of the airplane, accomplish the following:

(a) Within 14 days after September 16, 1991 (the effective date of AD 91–20–09, Amendment 39–8043), accomplish either paragraph (a)(1) or (a)(2) of this AD.

(1) Accomplish both paragraphs (a)(1)(i) and (a)(1)(ii) of this AD:

(i) Inspect the thrust reverser Directional Control Valve (DCV) assemblies of both engines to determine the solenoid-driven pilot valve's part number, in accordance with Boeing Alert Service Bulletin 757–78A0027, dated September 9, 1991.

(A) If any DCV has a suspect pilot valve as specified in the service bulletin, prior to further flight, replace the DCV with a DCV that has a part number of a non-suspect solenoid-driven pilot valve, in accordance with the service bulletin.

(B) If a DCV has a non-suspect solenoid-driven pilot valve as specified in the service bulletin, that pilot valve does not need to be replaced.

(ii) Perform all tests and inspections of the engine thrust reverser control and indication system on both engines in accordance with Boeing Service Bulletin 757–78–0025, dated September 9, 1991. If any discrepancies are found as a result of these tests or inspections, prior to further flight, correct the discrepancies in accordance with the service bulletin.

(2) Accomplish paragraph (a)(1) of this AD on one engine's thrust reverser and deactivate the other engine's thrust reverser, in accordance with Section 78–31–1 of Boeing Document D630N002, "Boeing 757 Dispatch Deviation Guide," Revision 8, dated January 15, 1991.

(b) Within 24 days after September 16, 1991 (the effective date of AD 91–20–09, Amendment 39–8043), the requirements of paragraph (a)(1) of this AD must be accomplished on both engines' thrust reverser systems.

(c) Within 45 days after September 16, 1991 (the effective date of AD 91–20–09, Amendment 39–8043), submit a report of the proximity sensor gap measurement and other results of the initial tests and inspections required by paragraph (a)(1)(ii) of this AD, both positive and negative, to the Manager, Seattle Aircraft Certification Office (ACO), ANM–100S, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) and have been assigned OMB Control Number 2120–0056.

(d) Repeat the tests and inspections specified in paragraph (a)(1)(ii) at intervals not to exceed 3,000 flight hours, and prior to further flight following any maintenance that disturbs the thrust reverser control system. Correct any discrepancies prior to further flight, in accordance with Boeing Service Bulletin 757–78–0025, dated September 9, 1991.

(e) Within 5 years after the effective date of this AD, install an additional thrust reverser system locking feature (sync lock installation), in accordance with Boeing Service Bulletin 757–78–0028, Revision 1, dated October 29, 1992. During each one-year

period of the 5 years after the effective date of this AD, each operator must accomplish this installation on at least 20 percent of the affected fleet in its possession during that year.

(f) Installation of an additional thrust reverser system locking feature, as required by paragraph (e) of this AD, constitutes terminating action for the requirements of this AD.

(g) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(h) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on December 8, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

RIN 1545-AQ50

Carryover of Passive Activity Losses and Credits and At Risk Losses and Credits and At Risk Losses to Bankruptcy Estates of Individuals; Hearing

AGENCY: Internal Revenue Service, Treasury.

ACTION: Rescheduling of the date and location of public hearing on proposed regulations; change of date to submit requests to speak and outlines of oral comments.

SUMMARY: This document reschedules the date and location of the public hearing, and changes the date to submit requests to speak and outlines of oral comments for the public hearing on proposed regulations relating to the application of sections 469 and 465 to the bankruptcy estates of individuals.

DATES: The public hearing will be held on Monday, January 25, 1993, beginning at 10 a.m. Requests to speak and outlines of oral comments must be received by Monday, January 4, 1993.

ADDRESSES: The public hearing will be held in the Commissioner's Conference Room, room 3313, Internal Revenue Service Building, 1111 Constitution Avenue, NW., Washington, DC. Requests to speak and outlines of oral comments should be submitted to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC:CORP:T:R, (IA-5-92), room 5228, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Carol Savage of the Regulations Unit, Assistant Chief Counsel (Corporate) 202-622-8452 or 202-622-7180 (not toll-free numbers).

SUPPLEMENTARY INFORMATION: A notice of public hearing appearing in the **Federal Register** for Monday, November 9, 1992 (57 FR 53304), announced, among other things, that a public hearing relating to the application of section 469 and 465 to the bankruptcy estates of individuals would be held on Thursday, December 17, 1992, beginning at 10 a.m., in room 2615, Internal Revenue Service Building, 1111 Constitution Avenue, NW., Washington, DC, and that requests to speak and outlines of oral comments should be received by Thursday, December 3, 1992. The proposed regulations were published in the **Federal Register** for Monday, November 9, 1992 (57 FR 53304).

There has been a change in the date and location of the public hearing, and change of date to submit requests to speak and outlines of oral comments. The hearing will be held on Monday, January 25, 1993, at 10 a.m., Commissioner's Conference Room, room 3313, Internal Revenue Service Building, 1111 Constitution Avenue, NW., Washington, DC. The requests to speak and outlines of oral comments must be received by Monday, January 4, 1993.

Because of controlled access restrictions, attendees cannot be permitted beyond the lobby of the Internal Revenue Service Building until 9:45 a.m.

In all other respects the details regarding the hearing will remain the same.

By direction of the Commissioner of Internal Revenue.

Cynthia E. Grigsby,

Alternate Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Parts 2606, 2612, 2615, 2616, 2622, and 2623

RIN 1212-AA40

Miscellaneous Amendments

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Proposed rule.

SUMMARY: Statutes amending the Employee Retirement Income Security Act of 1974 have made changes in procedures and other rules, including timing and definitional provisions, that affect and, in some cases, override several portions of the Pension Benefit Guaranty Corporation's regulations. This proposed rule would amend parts 2606, 2612, 2615, 2622, and 2623 of the regulations to conform them to current law. It also includes other organizational and procedural amendments and clarifying and technical changes.

DATES: Comments must be received on or before January 13, 1993.

ADDRESSES: Comments may be mailed to the Office of the General Counsel (22500), Pension Benefit Guaranty Corporation, 2020 K Street NW., Washington, DC 20006, or hand-delivered to Suite 7200 at the above address between 9 a.m. and 5 p.m., Monday through Friday. Comments will be available for inspection at the PBGC's Communications and Public Affairs Department, Suite 7100, at the above address between 9 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Judith Neibrief, Attorney, Pension Benefit Guaranty Corporation, Office of the General Counsel (Code 22500), 2020 K Street NW., Washington, DC 20006, 202-778-8850 (202-778-1958 for TTY and TDD). (These are not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background

The Pension Benefit Guaranty Corporation ("PBGC") administers the pension plan termination insurance program under Title IV of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), 29 U.S.C. 1001 *et seq.* In 1986 and 1987, respectively, Congress enacted the Single-Employer Pension Plan Amendments Act of 1986 ("SEPPAA") (Pub. L. 99-272) and the Pension Protection Act ("PPA") (which was part of the Omnibus Budget Reconciliation Act of 1987 ("OBRA '87") (Pub. L. 100-203)) with the aim of

better protecting promised pension benefits and better controlling the costs of the termination insurance program for single-employer plans. Among other things, SEPPAA and the PPA amended various Title IV procedures and other rules, including timing and definitional provisions, in ways that affect and, in some cases override several portions of the PBGC's regulations (29 CFR chapter XXVI). Certain Title I amendments in the Retirement Equity Act of 1984 ("REA") (Pub. L. 98–397) and the Tax Reform Act of 1986 ("TRA '86") (Pub. L. 99–514) also affect provisions of these portions of the regulations, and Congress subsequently clarified a number of previous Title IV amendments in the technical corrections enacted as Subtitle H of Title VII of the Omnibus Budget Reconciliation Act of 1989 ("OBRA '89") (Pub. L. 100–239).

Of particular relevance here are the substantial changes in the rules for voluntary plan termination under ERISA section 4041 (29 U.S.C. 1341) and the liability incurred upon termination under ERISA sections 4062 and 4064 (29 U.S.C. 1362 and 1364). Prior to SEPPAA (which applies to terminations initiated on or after January 1, 1986), a plan administrator was free to terminate a plan under section 4041 at any time, subject to certain procedural requirements, and upon termination of an underfunded plan, Title IV protected only benefits guaranteed by the PBGC. Moreover, plan termination enabled plan sponsors to shift liability for guaranteed benefits to the insurance program because section 4062 included a net worth limitation on liability for plan underfunding.

SEPPAA restricted the right to terminate a "single-employer plan" (*i.e.*, any defined benefit plan that is not a multiemployer plan (subsection (a)(15) of ERISA section 4001 (29 U.S.C. 1301)) and expanded liability upon termination, essentially transferring back to plan sponsors liability for funding promised pension benefits when they are financially able to bear these costs. If a plan is underfunded, the "contributing sponsor" (*i.e.*, the person entitled under subsection (a) of section 404 of the Internal Revenue Code of 1986 ("Code") (26 U.S.C. 404), or that would be so entitled except for the limitations in section 404(a), to receive a deduction for required contributions) and other members of the contributing sponsor's "controlled group" (*i.e.*, a contributing sponsor and all other persons under common control with that contributing sponsor) now must demonstrate that they are in such poor financial condition, or that their single-employer plan costs have become so burdensome, that they cannot realistically continue to maintain the plan for which termination is sought.[1] In other words, "standard termination" under section 4041(b) (for sufficient plans) and "distress termination" under section 4041(c) are the exclusive means of voluntary plan termination (section 4041(a)(1)). See ERISA section 4042 (29 U.S.C. 1342) for the PBGC's authority to institute involuntary termination proceedings.)

SEPPAA also revised a number of the procedural requirements for termination under section 4041, including timing and notification requirements. Among other things, these changes simplified and expedited PBGC review of standard terminations, thereby permitting faster distribution of plan assets where the agency will not be called upon to pay benefits and enabling the PBGC to devote more resources to those terminations that do impose liabilities on the insurance program

The PPA (effective December 17, 1987) further amended Title IV requirements by, among other things, increasing the benefits that, in a standard termination, a plan must be able to satisfy to all "benefit liabilities" (*i.e.*, the benefits of participants and beneficiaries under the plan, within the meaning of subsection (a)(2) of Code section 401 (26 U.S.C. 401)). The PPA also modified the distress termination rules so that (consistent with the change for standard terminations) a contributing sponsor is liable, along with every member of its controlled group, for all unfunded benefit liabilities. In addition, the PPA further restricted the role of the net worth limitation (ERISA section 4062(b)(2)(B) and subsection (a) of section 4068 (29 U.S.C. 1368)).

Upon termination of a single-employer plan under ERISA section 4041(c) or 4042, this liability now runs solely to the PBGC (with the repeal of the section 4049 trust introduced by SEPPAA) (ERISA section 4062(b)(1)). Under subsection (c) of ERISA section 4022 (29 U.S.C. 1322), the PBGC is to pay participants and beneficiaries a portion of their outstanding benefit liabilities (*i.e.*, unfunded benefit liabilities that are not guaranteed benefits; see ERISA section 4001(a)(19)) based on the values of its employer liability recoveries. The amounts paid are allocated in accordance with subsection (a) of ERISA section 4044 (29 U.S.C. 1344).

Implementation of the SEPPAA and PPA rules for voluntary terminations necessitated the complete revision of Parts 2616 and 2617 of the PBGC's regulations. The final rule replacing these regulations appears elsewhere in today's **Federal Register**. (Unless otherwise noted, references in this proposed rule to part 2616 or 2617 regulations are to the new provisions being published today.) Also, as indicated in its Agenda of Regulations Under Development (57 17560, April 27, 1992), the PBGC anticipates further changes in its regulations to implement requirements of REA and TRA '86, as well as the PPA.

Finally, the PBGC notes that the PPA enhanced its enforcement authority by adding section 4071 (29 U.S.C. 1371) to ERISA. As clarified by OBRA '89, section 4071 authorizes the PBGC to assess a penalty when a person fails to provide any notice or other material information required under Subtitle A, B, C, or D of Title IV or section 302(f)(4) or 307(e) of Title I (29 U.S.C. 1082(f)(4) or 1085b(e)), or any regulations prescribed thereunder, within the applicable time limit specified therein. (The penalty is payable to the PBGC and may not exceed $1,000 for each day that the failure continues.) Section 4071 applies to requirements in provisions of ERISA and PBGC regulations discussed below.

Proposed Rule

The PBGC is proposing to amend Parts 2606 (Rules for Administrative Review of Agency Decisions), 2612 (Trades or Businesses Under Common Control), 2615 (Certain Reporting and Notification Requirements), 2622 (Employer Liability for Withdrawals from and Terminations of Single-Employer Plans), and 2623 (Benefit Reductions in Terminated Single-Employer Pension Plans and Recoupment of Benefit Overpayments)[2] of the regulations to conform their provisions to current law. The proposed amendments also include minor clarifying and technical changes and

[1] SEPPAA substituted "contributing sponsor" and "controlled group" for "employer" terminology in the Title IV provisions that delineate termination requirements and liability. These provisions apply whether or not a single-employer plan is maintained by contributing sponsors that are members of more than one controlled group. (Although this distinction still is relevant for certain purposes, the PBGC no longer uses the term "single employer plan" to distinguish single-employer plans that are maintained by one or more trades or businesses under common control from single-employer plans maintained by trades or businesses not under common control.)

[2] As noted below, updating the terminology in Part 2623 also would make a transition sentence in new § 2616.4(c) unnecessary.

modifications in rules of agency procedure or practice.

Thus, the objectives of the proposed rule are quite limited. The PBGC decided to restrict this rule's scope in order to facilitate their accomplishment. (In the future, the PBGC will be considering whether the requirements of certain of these regulations should be amended to increase agency effectiveness in administering Title IV, as well as amending other parts of the regulations to implement requirements of REA, TRA '86, and the PPA.)

Nevertheless, attaining these objectives does necessitate amendments to a large number of regulatory provisions, and the agency wishes to assure that, as amended, the regulations will reflect current provisions of Title IV and will be internally consistent. Therefore, the PBGC is publishing a notice of proposed rulemaking and giving interested persons an opportunity to submit written comments, as provided in section 553 of the Administrative Procedure Act (5 U.S.C. 553), despite the fact that insofar as these amendments incorporate statutory changes or make minor modifications of existing regulations, advance notice and public procedure might be viewed as unnecessary, and modifications of rules of agency organization, procedure, or practice are exempt from these requirements (5 U.S.C. 553(b) (B) and (A), respectively).

The PBGC invites members of the public to express their views on the adequacy and appropriateness of these amendments. The agency emphasizes, however, that it has sought to restrict this rule to amendments that do not raise significant policymaking questions; to the extent proposed amendments to sections of the regulations include substantive judgments, the PBGC believes that Congress already has resolved the policy issues legislatively (see, *e.g.*, the proposed revision of § 2622.3).

Part 2606—Rules for Administrative Review of Agency Decisions

For the matters specified in § 2606.1(b), Part 2606 of the PBGC's regulations sets forth procedural rules for issuing initial determinations (Subpart B) and for administrative review of those determinations (reconsideration or appeal under subpart C or D, respectively). Regulatory changes since the adoption of these procedural rules (formerly part 2613; 44 FR 42181, July 19, 1979) necessitate technical and clarifying changes. This proposed rule also includes several changes proposed in 1983 (48 FR 22330, May 18, 1983). (Except to the extent addressed herein, the PBGC is withdrawing the 1983 proposed rule.)

The PBGC is proposing to amend § 2606.1 to reflect statutory changes as well as to clarify the application of its regulations. In particular, the scope of part 2606, as set forth in paragraph (b), no longer adequately provides for the types of determinations that the agency decided to subject to the initial determination and administrative review procedures in subparts B through D of part 2606. The proposed rule also would remove an unnecessary sentence in paragraph (a) and clarify paragraph (c) to state that nothing in part 2606 of the regulations limits the PBGC's authority to review a determination to which this part does not apply, either upon request or on its own initiative (*e.g.*, to correct an error), or the procedure utilized in such a review.

The proposed amendments to paragraph (b) include updating the statutory provisions that pertain to various determinations. In paragraphs (b)(1) and (b)(5), the reference to ERISA section 4082(b) (a transitional rule for plans terminating before September 2, 1974) would be deleted as no longer necessary. In paragraphs (b)(6) and (b)(7), references to additional ERISA provisions would be added because Title IV now addresses guaranteed benefits under multiemployer plans in section 4022A (29 U.S.C. 1322a) and includes the aggregate guaranteed benefit limit in section 4022B (29 U.S.C. 1322b). The PBGC also is proposing to amend these paragraphs to reflect the fact that its benefit entitlement decisions (paragraph (b)(6)) now include determinations (as the trustee of terminated plans) that a domestic relations order is or is not a "qualified domestic relations order" (see subsection (d)(3) of ERISA section 206 (29 U.S.C. 1056) and subsection (p) of Code section 414 (26 U.S.C. 414)), and its benefit entitlement and benefit amount decisions (paragraphs (b)(6) and (b)(7)) now include determinations, under ERISA section 4022(c), with respect to outstanding benefit liabilities.

In addition, the PBGC is proposing to amend paragraph (b)(3) and paragraphs (b)(9) through (b)(11) to reflect current statutory provisions. As revised, paragraph (b)(3) would include the determinations that the PBGC may make in a standard or distress termination proceeding under subsection (b) or (c), respectively, of ERISA section 4041 (see new parts 2616 and 2617 of the regulations). All such determinations are subject to reconsideration under subpart C. However, the PBGC believes that administrative review, upon contributing sponsor or controlled group member request, of determinations that the distress criteria in section 4041(c)(2)(B) are not met should be by the Executive Director (or his or her designee) rather than by an official of the Insurance Operations Department (the department that issues initial determinations in this area), and it is proposing to amend §§ 2606.34 and 2606.36 accordingly.

New paragraph (b)(9) would combine previous paragraphs (b)(9) through (b)(11) to avoid unnecessary repetition in describing determinations as to the amount of liability under current law. As revised, paragraph (b)(9) would include such determinations under ERISA sections 4062(b)(1) and 4064 upon termination of a single-employer plan and under ERISA section 4063 (29 U.S.C. 1363) upon withdrawal of a substantial employer from a single-employer plan under multiple controlled groups. Subsection (b)(1) of section 4062 is cited as the provision that now defines the amount of liability to the PBGC upon termination. (Since persons are liable for the total "amount of unfunded benefit liabilities" (as defined in ERISA section 4001(a)(18)), agency determinations of the amount of liability under section 4062(b)(1) do not include net worth decisions (see proposed amendments to part 2622 of the regulations). As indicated above, an aggrieved person still may request that the PBGC review such a decision.)

The proposed amendments to several definitions in § 2606.2 are essentially technical. They are designed to reflect changes in the terminology that Title IV uses to describe certain "aggrieved persons" (*i.e.*, persons that may be adversely affected by PBGC determinations), including, as a "beneficiary", an alternate payee (within the meaning of ERISA section 206(d)(3)(K)) under a qualified domestic relations order (as required by section 206(d)(3)(J)), a single-employer plan's "contributing sponsor", and members of the same "controlled group" as a contributing sponsor (see §§ 2616.2 and 2617.2). These proposed amendments, and amendments to several other part 2606 provisions, also would update the regulations to reflect changes in the terminology used by the PBGC, in particular, the agency's use of "department" (rather than "office") to describe its primary organizational units.

Other proposed amendments would clarify the intended scope of part 2606 provisions. Thus, the PBGC is proposing to amend § 2606.3 to state that this section applies only to agency assistance in obtaining information or

documents in the possession of a party other than the PBGC. (Access to PBGC records may be requested under the Freedom of Information Act (5 U.S.C. 552) or the Privacy Act (5 U.S.C. 552a) in accordance with part 2603 or 2607, respectively, of the regulations.) Similarly, the PBGC is proposing to amend the requirements in § 2606.22 to reflect the exception in § 2606.23(b): When the PBGC orders that an initial determination is effective on the date of issuance, the determination is to state that there is no obligation to exhaust administrative remedies by seeking PBGC review (rather than notify persons of their right to request review pursuant to subpart C or D). (Aggrieved persons still may request that the agency review the determinations in such cases; however, the provisions of Subparts C and D do not apply.)

Part 2612—Trades or Businesses Under Common Control

The PBGC promulgated part 2612 of the regulations to implement the Title IV requirement that, under regulations consistent and coextensive with regulations prescribed under the Code by the Secretary of the Treasury, employees of trades or businesses (whether or not incorporated) which are under common control be treated as employed by a single employer and all such trades and businesses be treated as a single employer (currently ERISA section 4001(b)(1); previously section 4001(b) and erroneously cited in § 2612.1(a) as section 4001d(b)). After the PBGC adopted Part 2612 (41 FR 12302, March 25, 1976), Congress redesignated this requirement and added a requirement that, for single-employer plans, the PBGC's common control determinations for "controlled group" purposes be made under regulations consistent and coextensive with regulations prescribed under the Code by the Secretary of the Treasury (section 4001(a)(14)).

The PBGC is proposing to amend Part 2612 to address the range of common control determinations that the agency must make, as described in revised paragraph (a) of § 2612.1. (See also the proposed addition of "controlled groups" in the title.) In addition to conforming the regulations to accord with the current statutory provisions, the agency is proposing to reorganize this part by replacing the § 2612.2 definition of "trades or businesses (whether or not incorporated) which are under common control" with an expanded § 2612.3. As amended, § 2612.3 would address all agency determinations. The PBGC also is proposing to remove unnecessary language from § 2612.1(b) and to update, correct, and conform other definitions in § 2612.2

Part 2615—Certain Reporting and Notification Requirements

The PBGC promulgated part 2615 of the regulations to implement ERISA section 4043 (29 U.S.C. 1343) (formerly part 2617; 45 FR 55636, August 20, 1980). Except to the extent that the PBGC exercises its waiver authority, section 4043 requires the reporting of various specified events and any other event that the PBGC determines may be indicative of a need to terminate the plan. Statutory changes since the PBGC's last rulemaking on these requirements (49 FR 22472, May 30, 1984) necessitate technical and clarifying changes. In particular, for consistency with current regulatory requirements and to avoid confusion about the applicability of a number of the reportable event requirements, the terminology used should be changed (see, *e.g.*, proposed amendments to §§ 2615.3 (b) and (c), 2615.5, and 2515.23(a)).

The PBGC notes that it is proposing these changes to reflect, in language consistent with the statue as amended, the requirements that the agency intended when it promulgated various provisions. The PBGC still is considering whether to propose that certain of these requirements be modified to assure that the agency is notified of events that may indicate the need to terminate a plan.

The PBGC also notes that it recently amended this part of the regulations by designating the reportable events requirements as subpart A and adding subpart B to address notification of failures to make required contributions (implementing subsection (f)(4) of ERISA section 302 and subsection (n)(4) of Code section 412 (26 U.S.C. 412)), and (as appropriate) any future rules implementing other notification requirements (56 FR 57977, November 15, 1991; effective January 1, 1992). (The PBGC did not receive any comments that warrant modification of that interim final rule and, on October 23, 1992, published a final rule (57 FR 48317) that redesignates the new section as § 2615.31.)

Based on pre-SEPPAA voluntary termination requirements (see *e.g.*, old § 2616.3), the PBGC limited application of part 2615 (now subpart A) to plans "for which a Notice of Intent to terminate under section 4041 has not been filed with the PBGC." However, as the agency noted in its proposal to revise the termination regulations (52 FR 33318, 33326, September 2, 1987), the PBGC no longer receives a notice of intent to terminate in a standard termination (see ERISA section 4041(a)(2)) and the notice of intent to terminate in a distress termination contains little of the information required to be provided under prior law. Moreover, under prior law, a plan administrator could file the Notice of Intent to Terminate as little as 10 days before the proposed date of plan termination, whereas current law requires issuance of notices of intent to terminate at least 60 days before the proposed termination date specified therein and the PBGC's revised regulations permit a plan administrator to extend that period (to up to 90 days) in the standard or distress termination notice subsequently filed with the PBGC (see §§ 2616.2, 2616.22, 2616.26, 2617.2, 2617.22, and 2617.25).

In addition, under current law, the PBGC may not proceed with a plan termination that would violate the terms of an existing collective bargaining agreement (section 4041(a)(3)). Therefore, the PBGC will suspend a termination proceeding if timely advised that a formal challenge to plan termination has been initiated and, depending upon the final resolution of the challenge, either dismiss the proceeding or, should the plan administrator wish to do so, reactivate it (see §§ 2616.5 and 2617.5.)

In view of these developments, the PBGC is proposing to amend paragraph (b) to provide that subpart A applies to single-employer plans for which no notice of intent to terminate has been issued or, if such a notice has been issued, until the proposed termination date specified in accordance with regulatory requirements. Also, if a termination proceeding is suspended pursuant to the regulations, subpart A would continue to apply unless and until the PBGC reactivates the proceedings, thereby accounting for the possibility that a significant period of time may pass before resolution of the challenge and a decision as to whether or not the proposed termination will go forward.

The PBGC is proposing to amend § 2615.2 to correct and conform the definitions of various terms. The changes include proposed amendments to update statutory references (*e.g.*, the "Code" definition), to assure consistency with other regulations (*e.g.*, the "participant", "controlled group", "irrevocable commitment", and "notice of intent to terminate" definitions), and to delete unnecessary terms. Certain of the terms to be deleted are not used in the regulations, either as now codified (*e.g.*, "Social Security benefits") or as

they would be amended (*e.g.*, "single employer plan"). Others will be unnecessary if the amended regulations adequately address terminology questions elsewhere (*e.g.*, the meaning of "bankruptcy case", in amended §§ 2615.3(c)(5) and 2615.21(a)(1)).

Because the implications of an event for the need to terminate a single-employer plan may differ depending on whether it is maintained by multiple "contributing sponsors" that are not members of the same "controlled group" (as the PBGC uses these terms; see §§ 2616.2 and 2617.2), certain reportable event requirements distinguish plans which are not "maintained by two or more contributing sponsors that are members of more than one controlled group" from those which are so maintained. (As indicated above, the PBGC previously described the former category as "single employer plans".) The PBGC is proposing to retain this distinction, describing plans in the former category as "maintained by one contributing sponsor or by two or more contributing sponsors that are members of the same controlled group", in amendments to §§ 2615.3(c)(2), 2615.14(b)(2), 2615.21(a), 2615.22(a), and 2615.23(a), as well as in paragraph (c)(2) of § 2615.14, which would replace the definition of "active participant".

Since § 2615.14 addresses the only reportable event for which "active participant" is relevant, the PBGC's tentative judgment is that any special usage of this term should be included in that section rather than in § 2615.2. With respect to plans maintained by one contributing sponsor or by two or more contributing sponsors that are members of the same controlled group, paragraph (c)(2) of amended § 2615.14 would include the same individuals as those who currently are described in the (a) portion of the definition. With respect to plans maintained by two or more contributing sponsors that are members of more than one controlled group, however, the PBGC believes that a special provision no longer is needed because the (b) portion of the current § 2615.2 definition covers the same individuals as those who generally are categorized as "active" participants (see § 2610.2, which would be referenced in amended § 2615.2).

Other proposed technical changes include updating amendments (*e.g.*, replacement of the statutory citation in § 2615.22(c) and the "Plan Number", PBGC organization, and form references in §§ 2615.3(b)(4), 2615.3(e), and 2615.14(b) and 2615.16(b), in that order) and clarifying the date of distribution of an irrevocable commitment (§ 2615.18(d)). They also include proposed changes for consistency with the wording and structure of this subpart (*e.g.*, moving the waiver criterion from paragraph (a) to paragraph (b) of § 2615.14). Finally, the PBGC notes that in the rule adding § 2615.30 to the regulations, the agency expanded paragraph (b) of § 2615.16 to add instances in which the form required by § 2615.30 (PBGC Form 200) has been submitted, in accordance with that section, with respect to the same failure.

Part 2622—Employer Liability for Withdrawals From and Terminations of Single-Employer Plans

The PBGC adopted part 2622 of the regulations primarily to prescribe rules for "employer liability" determinations and recovery under ERISA section 4062 and section 4067 (29 U.S.C. 1367) (formerly part 2613; 46 FR 9520, January 28, 1981). Portions of this part also apply to determinations under the special rules of ERISA sections 4063 and 4064 for withdrawal of a "substantial employer" from or termination of a plan (other than a multiemployer plan) under which more than one "employer" made contributions.

Significant changes in part 2622 provisions are necessary to reflect subsequent statutory amendments. In particular, whenever a single-employer plan is terminated, "any person who is, on the termination date, a contributing sponsor * * * or a member of * * * a contributing sponsor's controlled group" is liable to the PBGC for the total amount of unfunded benefit liabilities, together with interest (section 4062 (a) and (b)). Moreover, the collective net worth of these persons is relevant only to whether the entire liability is payable as of the termination date (section 4062(b)(2)(B)) and to the amount of the lien that ERISA section 4068(a) imposes for nonpayment. Other changes are being proposed in view of the current timing requirements for distress terminations under ERISA section 4041(c) and new part 2616 of the regulations and to update the terminology used in this part of the regulations.

As revised, § 2622.1 would summarize current provisions of subtitle D of title IV (paragraph (a)), focusing on liability to the PBGC under ERISA section 4062(b) upon single-employer plan termination and also describing the supplementary rules in ERISA sections 4063 and 4064 upon "substantial employer" withdrawal and termination for plans with two or more contributing sponsors at least two of whom are not under common control. The PBGC uses the term "multiple employer plan" to describe this category of single-employer plans and no longer uses the term "single employer plan" to describe other single-employer plans (see proposed amendments to § 2622.2; see ERISA section 4001(a)(2) and § 2616.2 of the regulations).

The statutory rules on the amount of liability to the PBGC that are reflected in this portion of the proposal apply with respect to plans for which voluntary or involuntary termination is initiated after December 17, 1987 (paragraph (b)). (For a termination initiated before that date but on or after January 1, 1986, see the discussion of liability under Title IV as amended by SEPPAA (for unfunded "benefit commitments" in excess of guaranteed benefits) in the PBGC's proposed rule on voluntary terminations (52 FR 33318, 33320, and 33327, September 2, 1987).)

In § 2622.2, the PBGC is proposing to add the term "section 4062(b) liability" to describe the liability to the PBGC now imposed by ERISA section 4062 (see subsections (a) and (b)). The new term "collective net worth of persons subject to liability in connection with a plan termination" and the revised definitions of the terms "net worth" and "net worth record date" would reflect the provisions of section 4062(d)(1), as implemented in §§ 2622.4 and 2622.5, as amended. Other proposed amendments to § 2622.2 would add terms now used in subtitle D of Title IV and/or new part 2616 (*e.g.*, "proposed termination date"), delete terms that are not needed in this part of the regulations (*e.g.*, "employer" and "Title IV"), and make minor technical and editorial changes (*e.g.*, amendments to the definition of "Act").

As revised § 2622.3 would state, in paragraphs (a) and (b), respectively, the statutory rules on the amount of section 4062(b) liability and the payment of that liability, including the PBGC's authority to make alternative arrangements for the satisfaction of liability (see ERISA sections 4062(b)(3) and 4067). Since net worth does not affect the amount of liability, this section, as amended, would not address net worth notification or determinations. (Similarly, the PBGC is proposing to delete the last sentence of § 2622.6(c).)

The exception in proposed paragraph (b) reflects the limitation on the general rule that section 4062(b) liability is due and payable as of the termination date: Under section 4062(b)(2)(B), payment of so much of the liability as exceeds 30 percent of the collective net worth of all persons described in section 4062(a) is to be made under commercially

reasonable terms prescribed by the PBGC. The PBGC is proposing to set forth the statutory rules for such cases in paragraph (c) of § 2622.8.

The statutory definition of "collective net worth of persons subject to liability in connection with a plan termination" (section 4062(d)(1)) incorporates pre-SEPPAA rules, including the requirement that net worth determinations be computed without regard to any liability under section 4062 (section 4062(d)(1)(C)). These statutory rules now are applied to each "person" that is subject to such liability. The PBGC is proposing to amend provisions of §§ 2622.4 through 2622.6 accordingly. (See also the proposed amendments to §§ 2622.7 through 2622.9, which include changes for consistency with other statutory phrasing as well.)

The collective net worth of such persons is the sum of the individual net worths of those with individual net worths that are greater than zero (section 4062(d)(1)(A)). Revised paragraph (a) of § 2622.4 would provide that the PBGC will determine individual net worths and collective net worth when, as under the current regulations, liable persons notify the agency and submit net worth information. (See § 2622.6(c) regarding incomplete submissions.)

The statutory definition now also provides for the timing of net worth determinations (subsection (d)(1)(C)). The existing net worth record date requirements of § 2622.5 are consistent with the statutory rule that "determinations * * * be made as of a day chosen by the [PBGC] (during the 120-day period ending with the termination date)." Therefore, the PBGC is proposing only technical and editorial amendments to § 2622.5.

The PBGC is proposing to expand § 2622.6 to include in paragraph (a) net worth notification, now addressed in § 2622.3(b), as well as net worth information submission, and it is proposing to move the information specifications (subparagraphs (1) through (7)) from paragraph (a) to paragraph (b) and make several editorial changes. Notification and information submission requirements that apply to an "employer who believes that 30 percent of * * * net worth is less than the plan asset insufficiency" would be amended to refer to a "contributing sponsor or member of the contributing sponsor's controlled group that believes section 4062(b) liability exceeds 30 percent of the collective net worth of persons subject to liability in connection with a plan termination" (*i.e.*, that the liability under current section 4062(b) is subject to the exception to the general rule on payment) (paragraph (a)(1)). However, if a contributing sponsor or member of the contributing sponsor's controlled group complies, the PBGC would consider these requirements to be satisfied by all members of that controlled group, while reserving the authority to require any person subject to liability to submit information (paragraphs (a)(2) and (a)(3)).

As discussed above, the statutory requirements for voluntary termination of an insufficient plan, as implemented in new part 2616, are significantly different from those that applied when the PBGC promulgated this part of the regulations. A plan can terminate under ERISA section 4041(c) only if financial hardship is demonstrated [3] and other requirements are met. Among other things, the notice of intent to terminate that is filed with the PBGC (PBGC Form 600) must identify the distress criterion that each contributing sponsor and member of a contributing sponsor's controlled group expects to meet and must provide documentation regarding any relevant liquidation or reorganization proceedings; and the distress termination notice (PBGC Form 601), which is due by the 120th day after the proposed termination date (see § 2616.24(a)), must include the information required to prove each such person satisfies one of the distress criteria. Thus, substantial analysis of the financial condition of liable persons should have occurred by the time notices of intent to terminate are issued, either in planning for distress termination or as part of another proceeding, and further financial and other business information must be compiled within the next few months.

In view of the above, the PBGC believes that the time limits it established in 1981 are inappropriate when a plan is being terminated under ERISA section 4041(c). Therefore, it is proposing, in subparagraph (1) of § 2622.6(a), to reflect subsequent changes in the regulatory scheme and coordinate part 2622 with the requirements in new Part 2616 in future distress terminations.

As amended, the regulations would require contributing sponsors and controlled group members that believe section 4062(b) liability exceeds 30 percent of the collective net worth of persons subject to liability in connection with a plan termination to so notify the agency by the 90th day after filing of the notice of intent to terminate with the PBGC and to submit net worth information by the 120th day after the proposed termination date (*i.e.*, by the deadline for filing the distress termination notice) (subparagraphs (1)(i) and (1)(ii)(A)). The PBGC believes that these periods will provide comparable time with respect to plans being terminated in distress terminations, and they are consistent with the agency's rationale in promulgating this part of the regulations.[4]

Under amended § 2622.6(a)(1), the time limits established in 1981 would continue to apply with respect to plans for which termination is initiated by the PBGC instituting proceedings under ERISA section 4042 (subparagraphs (1)(i) and (1)(ii)(B)). However, in the PBGC's judgment, the regulations no longer need emphasize when a plan's termination date is established (*i.e.*, upon the execution by all signatories of a trusteeship agreement or the issuance of a court order decreeing the plan terminated). Therefore, it is not proposing to include the last sentence of current § 2622.3(b) in amended § 2622.6(a)(1).

The PBGC is proposing to address when the net worth information specified in this section must be submitted within a shorter period and when additional information must be submitted in paragraph (a)(3) of § 2622.6. In this provision, the PBGC's objective is to consolidate and streamline existing regulatory provisions, but not to change the conditions that will result in the agency requiring such submissions. (Thus, for example, the agency believes it is not necessary to state in the regulations that one situation in which it may need additional information is when the PBGC establishes an earlier net worth record date after submission of the information specified in this section (see current §§ 2622.5(c) and 2622.6(b)).) In addition, as amended, § 2622.6(a)(3) would provide that the PBGC will specify the time within which a person subject to liability is required to submit information.

---

[3] See ERISA section 4041(c)(2)(B) and § 2616.3(d)(1) through (4) of the regulations for the four distress criteria: liquidation, reorganization, inability to continue in business, and unreasonably burdensome pension costs.

[4] In 1981, the PBGC expected that establishment of a plan's termination date "typically would not occur until some weeks after" the agency received a notice of intent to terminate (46 FR 9521), and "the employer will usually have 160–180 days, or more, after submitting . . . [that] notice to submit the net worth information" (46 FR 9524). Under new Part 2616, the 90th day after issuance of the notice of intent to terminate generally is the latest proposed termination date permitted (§§ 2616.2 and 2616.22(a)(1)), and the 120th day after the proposed termination date is 180 to 210 days after issuance of the notice of intent to terminate.

The distress termination requirements discussed above also increase the possibility that information required to be submitted pursuant to § 2622.6 already has been submitted to the PBGC. Therefore, the PBGC is proposing to add a provision, paragraph (a)(4), designed to avoid duplicative efforts: A person may respond to such a requirement by identifying a previous submission.

ERISA section 4062(b) now provides that liability to the PBGC includes "interest (at a reasonable rate) calculated from the termination date in accordance with regulations prescribed by the [PBGC]." Since paragraphs (a) and (c) of § 2622.7 currently impose interest on the unpaid portion of the liability (if any) at the rate prescribed in Code section 6601(a), the PBGC is proposing only technical and editorial changes in these paragraphs. Other proposed amendments would update § 2622.7 by modifying the terminology and deleting provisions for the calculation of pre-1983 interest (see also § 2622.6(d), as amended).

As noted above, the PBGC is proposing to expand § 2622.6 to address payment, under commercially reasonable terms, of the portion of section 4062(b) liability that exceeds 30 percent of the collective net worth of persons subject to liability in connection with a plan termination (see section 4062(b)(2)(B)), as well as the exercise of its discretion to defer payment of liability upon request. Revised paragraph (c) would set forth the rules for cases in which the PBGC determines that section 4062(b) liability exceeds 30 percent of the collective net worth of all liable persons. The PBGC's standards and factors for determining what, if any, deferred payment or other terms for the satisfaction of liability to grant and the procedure for requesting such action, which currently are in paragraphs (a) through (c), would be included in revised paragraph (b). As amended, these rules would apply to persons that are or may become liable under ERISA section 4062, 4063, or 4064 and provide for updating information when a request is made one year or more after the net worth record date.

The PBGC also is proposing to amend paragraphs (a) and (b) of § 2622.9 to provide that its requests and demands for liability indicate that the agency will prescribe commercially reasonable terms for payment of so much of the liability that exceeds 30 percent of the collective net worth of persons subject to liability in connection with a plan termination. The proposed amendments to this section and § 2622.10 include other updating and editorial changes. In particular, the PBGC is proposing to amend § 2622.10(b) to require that liability payments be sent to the address specified in the notification or demand for liability issued under § 2622.9 or, if not specified therein, to the address provided (upon request) by the PBGC's Investment Management Division.

Part 2623—Benefit Reductions in Terminated Single-Employer Pension Plans and Recoupment of Benefit Overpayments

The PBGC promulgated Part 2623 of the regulations to minimize benefit overpayments by the administrators of plans that ultimately will be trusteed by the PBGC under ERISA section 4042 because they are insufficient for guaranteed benefits (subpart B) and to provide rules for the recoupment of benefit overpayments and reimbursement of benefit underpayments when the PBGC is appointed trustee (subpart C). As discussed above, when the agency adopted these regulations (50 FR 3892, January 29, 1985), the statutory requirements for voluntary termination were significantly different than they are today. Among other things, ERISA section 4041 did not address the payment of plan benefits after termination is initiated, and the proposed date of termination specified by a plan administrator might be only 10 days after the filing of a Notice of Intent to Terminate.

Section 4041(c)(3)(D) now includes specific requirements for plan administration during the pendency of a distress termination under ERISA section 4041(c). The PBGC is implementing these requirements, as well as notice and information requirements, in new Part 2616 of the regulations. Therefore, this rule includes proposed amendments to limit the functions of subpart B of part 2623 and to coordinate its provisions with the requirements of section 4041(c) and part 2616. Among these are changes to reflect current timing requirements and to update the terminology used in both subparts B and C.

In addition, as indicated in its Agenda of Regulations Under Development, the PBGC plans to issue a new part of the regulations on the payment of benefits in PBGC-trusteed plans (57 FR 17562). Because the PBGC believes that benefit payment regulations should address recoupment and reimbursement, it plans to transfer subpart C of part 2623 to that part of the regulations, and it expects to consider further amendments to subpart C provisions during the development of benefit payment regulations.

The PBGC is proposing to amend the title of part 2623 and § 2623.1 to reflect, in current terminology (provided by proposed amendments to § 2623.2), the subjects addressed by this part of the regulations and to eliminate unnecessary language. As indicated in the proposed amendment to paragraph (a) of § 2623.1, the procedures in subpart B apply to plans that are terminating in a "distress termination" and, hence, generally are not expected to be "sufficient for guaranteed benefits"; those in subpart C apply to recoupment and reimbursement of benefit payments under any "PBGC-trusteed plan".

The proposed amendments to § 2623.2 would add several terms ("guaranteed benefit" as well as those just noted) and replace terms no longer used. The PBGC is proposing to substitute "proposed termination date" for "section 4041(a) date of termination" and "termination date" for "section 4048 date of termination" (see proposed amendments to §§ 2623.5, 2623.6, 2623.7, 2623.11, and 2623.12). (Since the substitution of "proposed termination date" for "section 4041(a) date of termination" would make the last sentence of new § 2616.4(c) unnecessary, the PBGC is proposing to delete it.)

Because paragraphs (b), (c), and (e) of new § 2616.4 include the actions prohibited during distress termination proceedings and the rules for when "benefit payments" must be reduced, the PBGC is proposing to amend § 2623.5 by deleting paragraphs (e) and (f)(1) (and redesignating the remainder of paragraph (f) as paragraph (e)) and the timing and applicability conditions in paragraph (a). As revised, § 2623.5(a) would describe the restricted role that this subpart now plays: Providing the methodology for determining benefits that plan administrators may not pay (§ 2623.5 (b) and (c)) and must pay (§§ 2623.5(d), 2623.6, and 2623.7) when § 2616.4 requires that benefit payments be limited.

The PBGC is proposing to delete references to when benefit payment limitations apply from paragraphs (b) through (d) of § 2623.5 as well. In addition, the proposed rule includes updated examples in paragraph (g) (which would be redesignated as paragraph (f) of § 2623.5 and §§ 2623.6(e) and 2623.7(e). (For example, the PBGC has removed obsolete material and used the maximum guaranteeable benefit payable for plans terminating in 1992 in the revised examples. (See 56 FR 64984, December 13, 1991, for the final rule

adding the 1992 amount ($2,352.27) to part 2621, appendix A.)

No change is proposed in the § 2623.5(d) requirement that plan administrators "pay the monthly benefit * * * determined under § 2623.6 or § 2623.7, whichever produces the higher benefit." Therefore, the PBGC is proposing to remove the last sentence of paragraph (a) of § 2623.6 (the procedures for computing estimated guaranteed benefits) and the last sentence of paragraph (a) of § 2623.7 (the procedures for computing estimated Title IV benefits) as redundant.

The other noteworthy amendment to subpart B would be the removal of § 2623.8. The PBGC is proposing to delete this section because, in implementing the requirements of ERISA section 4041(a)(2) and (c) (1) and (2), the agency has addressed the information needs of both participants and the agency elsewhere (see new part 2616).

Finally, the proposed amendments to subpart C include, in addition to conforming terminology and timing changes, the substitution of "PBGC-trusted plan" for "terminated insufficient plan" in § 2623.11 (a) and (b). The PBGC generally is appointed trustee when a plan is not sufficient for guaranteed benefits. However, the PBGC may be appointed trustee of a plan that is sufficient for guaranteed benefits, and the subpart C procedures are intended to apply in such situations.

E.O. 12291 and the Regulatory Flexibility Act

The PBGC has determined that this proposed rule is not a "major rule" for the purposes of Executive Order 12291 because it would not have an annual effect on the economy of $100 million or more; create a major increase in costs or prices for consumers, individual industries, or geographic regions; or have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. The primary purpose of these proposed amendments is to conform the regulations to existing statutory requirements. The proposed rule also includes other, minor modifications of existing regulations.

For the same reasons, the PBGC certifies that, if adopted, this proposed rule will not have a significant economic effect on a substantial number of small entities. Accordingly, as provided in section 605 of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), sections 603 and 604 do not apply.

List of Subjects

29 CFR Part 2606

Administrative practice and procedure, Organization and functions (Government agencies), Pension insurance, Pensions.

29 CFR Part 2612

Business and industry, Pension insurance, Pensions, Small businesses.

29 CFR Part 2615

Employee benefit plans, Pension insurance, Pensions, Reporting requirements.

29 CFR Part 2616

Employee benefit plans, Pension insurance, Pensions, Reporting requirements.

29 CFR Part 2622

Business and industry, Employee benefit plans, Pension insurance, Pensions, Reporting requirements, Small businesses.

29 CFR Part 2623

Employee benefit plans, Pension insurance, Pensions, Reporting and recordkeeping requirements.

For the reasons set forth above, the PBGC is proposing to amend 29 CFR parts 2606, 2612, 2615, 2616, 2622, and 2623 as follows:

PART 2606—RULES FOR ADMINISTRATIVE REVIEW OF AGENCY DECISIONS

1. The authority citation for part 2606 is revised to read as follows:

Authority: 29 U.S.C. 1302(b)(3).

§ 2606.1 [Amended]

2. Paragraph (a) of § 2606.1 is amended by removing the last sentence.

§ 2606.1 [Amended]

3. Paragraphs (b) and (c) of § 2606.1 are amended by removing "or section 4082(b)" in paragraph (b)(1) and paragraph (b)(5); by adding "or (c) or section 4022A(a)" after "section 4022(a)" and by adding "and determinations that a domestic relations order is or is not a qualified domestic relations order under section 206(d)(3) of the Act and section 414(p) of the Code" after "covered plans" and before the semicolon in paragraph (b)(6); by adding "or (c), section 4022A(b) through (e), or section 4022B" after "section 4022(b)" and by removing "guaranteed benefits of" and adding, in its place, "benefits payable to" in paragraph (b)(7); by adding "and" at the end in paragraph (b)(8); by removing paragraph (b)(10) and paragraph (b)(11); and by revising paragraphs (b)(3), (b)(9), and (c) to read as follows:

§ 2606.1 Purpose and scope.

* * * * *

(b) *Scope.* * * *

(3) Determinations with respect to voluntary terminations under subsection (b) (standard terminations) or subsection (c) (distress terminations) of section 4041 of the Act, including—

(i) A determination that a notice requirement under section 4041(b)(1)(A) or (B) or section 4041(c)(1)(A) or (B) or a certification requirement under section 4041(b)(3)(B) or section 4041(c)(3)(B) of the Act has not been met,

(ii) A determination that a contributing sponsor or a member of a contributing sponsor's controlled group does not meet the requirements for demonstrating distress under section 4041(c)(2)(B) of the Act, and

(iii) A determination under section 4041(b)(2) or section 4041(c)(3) of the Act with respect to the sufficiency of plan assets for benefit liabilities or for guaranteed benefits;

* * * * *

(9) Determinations of the amount of liability under section 4062(b)(1), section 4063, or section 4064 of the Act.

(c) *Matters not covered by this part.* Nothing in this part limits—

(1) The authority of the PBGC to review, either upon request or on its own initiative, a determination to which this part does not apply when, in its discretion, the PBGC determines that it would be appropriate to do so, or

(2) The procedure that the PBGC may utilize in reviewing any determination to which this part does not apply.

4. In § 2606.2, the definition of *Act* is amended by adding ", as amended" at the end before the period; the definition of *Director* or *Office Director* is amended by removing *"Office"* and adding, in its place, *"Department"* and by removing "office" and adding, in its place "department"; and the definition of *aggrieved person* is revised and a definition of *Code* is added to read as follows:

§ 2606.2 Definitions.

* * * * *

Aggrieved person means any participant, beneficiary, plan administrator, contributing sponsor of a single-employer plan or member of such a contributing sponsor's controlled group, plan sponsor of a multiemployer plan, or employer that is adversely affected by an initial determination of

BEST COPY AVAILABLE

the PBGC with respect to a pension plan in which such participant, beneficiary, plan administrator, contributing sponsor, controlled group member, plan sponsor, or employer has an interest. The term "beneficiary" includes an alternate payee (within the meaning of section 206(d)(3)(K) of the Act) under a qualified domestic relations order (within the meaning of section 206(d)(3)(B) of the Act). The term "contributing sponsor" includes only a person entitled to receive a deduction under section 404(a) of the Code (or that would be entitled to receive a deduction except for the limitations in section 404(a)) for contributions required to be made to a single-employer plan under section 302 of the Act and section 412 of the Code. The term "controlled group" includes all persons under common control with a contributing sponsor and the term "employer" includes all trades or businesses under common control, as provided in subsections (a)(14) and (b)(1) of section 4001 of the Act and part 2612 of this chapter.

* * * * *

Code means the Internal Revenue Code of 1986, as amended.

* * * * *

§ 2606.3 [Amended]

5. Section 2606.3 is amended by removing "data" each time it appears and adding, in its place, "documents"; by removing "the information" at the end of the first sentence before the period and adding, in its place, "information or documents in the possession of a party other than the PBGC"; and by adding "or documents" at the end of the second sentence before the period.

§ 2606.7 [Amended]

6. Section 2606.7 is amended by removing "an Office" and adding, in its place, "a Department" and by removing "by the PBGC" at the end before the period.

§ 2606.9 [Amended]

7. Section 2606.9(b) is amended by removing "Office" and adding, in its place, "department".

§ 2606.22 [Amended]

8. Section 2606.22 is amended by adding ", except when effective on the date of issuance as provided in § 2606.23(b)," before "shall contain".

§ 2606.34 [Amended]

9. Section 2606.34 is amended by removing "office" and adding, in its place, "department" and by adding, at the end before the period, ", except that a request for reconsideration of a determination described in § 2606.1(b)(3)(ii) shall be submitted to the Executive Director".

§ 2606.36 [Amended]

10. Paragraph (a) of § 2606.36 is amended by removing "office" both times it appears and adding, in its place, "department"; by removing "an Office" and adding, in its place, "a Department"; by removing "the Office" both times it appears and adding, in its place, "the Department"; and by adding, at the end of the second sentence before the period, "of a determination other than one described in § 2606.1(b)(3)(ii), and the Executive Director (or an official designated by the Executive Director) will issue the final decision on a request for reconsideration of a determination described in § 2606.1(b)(3)(ii)".

§ 2606.51 [Amended]

11. Section 2606.51 is amended by removing "(11)" and adding, in its place, "(9)".

PART 2612—TRADES OR BUSINESSES UNDER COMMON CONTROL; CONTROLLED GROUPS

12. The authority citation for part 2612 is revised to read as follows:

Authority: 29 U.S.C. 1301(a)(14), 1301(b)(1), and 1302(b)(3).

13. The title of part 2612 is amended as set forth above.

14. Paragraph (a) of § 2612.1 is revised to read as follows:

§ 2612.1 Purpose and scope.

(a) *Purpose.* This part includes the regulations under which, for purposes of Title IV of the Act, the PBGC determines the trades or businesses (whether or not incorporated) that are under common control and, hence, treated as a single employer and whether, in the case of a single-employer plan, two or more persons are under common control and, hence, members of the same controlled group. Section 4001 of the Act requires, in subsections (b)(1) and (a)(14), respectively, that the former and the latter determinations be made under PBGC regulations which are consistent and coextensive with regulations prescribed by the Secretary of the Treasury under section 414(c) and section 414 (b) and (c), respectively, of the Code.

* * * * *

§ 2612.7 [Amended]

15. Paragraph (b) of § 2612.1 is amended by adding "*Scope.*" at the beginning after paragraph (b) designation; by removing "(88 Stat. 1014)"; and by removing everything after "applies" and before the period.

16. In § 2612.2, the definition of *Act* is amended by removing "Means" and adding, in its place, "means" and by removing "(88 Stat. 829 *et seq.*)" and adding, in its place, ", as amended"; the definition of *trades or businesses (whether or not incorporated) which are under common control* is removed; and definitions of *Code* and *single-employer plan* are added, in alphabetical order, to read as follows:

§ 2612.2 Definitions.

* * * * *

Code means the Internal Revenue Code of 1986, as amended.

Single-employer plan means any defined benefit plan (as defined in section 3(35) of the Act) that is not a multiemployer plan (as defined in section 4001(a)(3) of the Act).

17. Section 2612.3 is amended by adding "; controlled groups" after "control" in the title; by removing the comma after "Act", adding a colon in its place, and designating the remainder of the current text as paragraph (a)(2) and republishing it; and by adding new paragraphs (a)(1), (a)(3), and (b) and the introductory text is republished to read as follows:

§ 2612.3 Trades or businesses under common control; controlled groups.

For purposes of Title IV of the Act:

(a)(1) The PBGC will determine that trades and businesses (whether or not incorporated) are under common control if they are "two or more trades or businesses under common control", as defined in regulations prescribed under section 414(c) of the Code.

(2) All employees of trades or businesses (whether or not incorporated) which are under common control shall be treated as employed by a single employer, and all such trades and businesses shall be treated as a single employer.

(3) An individual who owns the entire interest in an unincorporated trade or business is treated as his own employer, and a partnership is treated as the employer of each partner who is an employee within the meaning of section 401(c)(1) of the Code.

(b) In the case of a single-employer plan:

(1) In connection with any person, a controlled group consists of that person and all other persons under common control with that person.

(2) The PBGC will determine that persons are under common control if they are members of a "controlled group of corporations", as defined in

BEST COPY AVAILABLE

regulations prescribed under section 414(b) of the Code, or if they are "two or more trades or businesses under common control", as defined in regulations prescribed under section 414(c) of the Code.

PART 2615—CERTAIN REPORTING AND NOTIFICATION REQUIREMENTS

18. The authority citation for part 2615 continues to read as follows:

Authority: 29 U.S.C. 1082(f), 1302(b)(3), 1343, and 1365.

19. In § 2615.1, paragraph (a) and the first sentence of paragraph (b) are revised to read as follows:

§ 2615.1 Purpose and scope.

(a) *Purpose.* This subpart prescribes specific requirements for notification of the reportable events in section 4043 of the Act, including the reportable events specified in section 4043(b)(1) through (b)(8) and other events that the PBGC has determined, under section 4043(b)(9), may be indicative of a need to terminate the plan. It also implements the PGBC's authority to waive the requirement that plan administrators notify the PBGC with respect to certain reportable events and with respect to certain plans.

(b) *Scope.* This subpart applies with respect to any single-employer plan (within the meaning of section 4001(a)(15) of the Act) which is covered by section 4021 of the Act and for which either no notice of intent to terminate has been issued or, if such a notice has been issued, until the proposed termination date specified under section 4041 (b) or (c) of the Act and parts 2616 or 2617 of this subchapter; *Provided, That,* if a termination proceeding is suspended pursuant to § 2615.5 or § 2617.5 of this subchapter, this subpart continues to apply unless and until the PBGC reactivates the termination proceeding. * * *

20. In § 2615.2, the definition of *Act* is amended by removing "(29 U.S.C. 1001 *et seq.* (1976))" and adding, in its place, ", as amended"; the definition of *active participant* is redesignated as paragraph (c)(2) of § 2615.14; the definition of *Code* is amended by removing "1954" and adding, in its place, "1986"; the definition of *irrevocable commitment* is amended by removing "which" the first time it appears and adding, in its place, "if the obligation", by removing "which" the second time it appears, and by removing "against the insurer"; the definition of *nonforfeitable benefits which are not funded* is amended by adding "section 4001(a)(8) of the Act and as provided in" after "as defined in"; the definition of *plan* is amended by removing "be a single employer, multiemployer, or multiple employer plan" and adding, in its place, "is maintained by one or more contributing sponsors"; the definition of *plan year* is amended by removing "; policy"; the definition of *substantial owner* is amended by removing "4022(b)(6)(A)" and adding, in its place, "4022(b)(5)(A)"; the definitions of *bankruptcy case, break in service, employer, money purchase plan, normal retirement benefit, plan sponsor, Railroad Retirement benefits, single employer plan, Social Security benefits,* and *Title IV* are removed; and the definitions of *contributing sponsor, controlled group,* and *participant* are revised and definitions of *notice of intent to terminate* and *proposed termination data* are added, in alphabetical order, to read as follows:

§ 2615.2 Definitions.

* * * * *

Contributing sponsor means the person entitled to receive a deduction under section 404(a) of the Code (or that would be entitled to receive a deduction except for the limitations in section 404(a)) for contributions required to be made to the plan under section 302 of the Act and section 412 of the Code.

Controlled group means, in connection with any person, a group consisting of such person and all other persons under common control with such person, determined under part 2612 of this chapter.

* * * * *

Notice of intent to terminate means the notice to affected parties advising each of a proposed plan termination, as required by section 4041(a)(2) of the Act and § 2616.22 or § 2617.22 of this subchapter.

* * * * *

Participant has the same meaning as in § 2610.2 of this chapter.

* * * * *

Proposed termination date means the date specified as such by the plan administrator in a notice of intent to terminate or, if later, in the distress termination notice or the standard termination notice, in accordance with section 4041 of the Act and part 2616 of part 2617 of this subchapter.

* * * * *

§ 2615.3 [Amended]

21. Paragraph (b)(2) of § 2615.3 is amended by removing the word "plan" and adding each time it appears, in its place, "contributing".

§ 2615.3 [Amended]

22. Paragraph (b)(4) of § 2615.3 is amended by removing "plan sponsor" both times it appears and adding, in its place, "contributing sponsor"; by removing "Plan Identification Number (PIN)" and adding, in its place, "Plan Number (PN)"; and by removing "EIN–PIN" both times it appears and adding, in its place, "EIN–PN".

§ 2615.3 [Amended]

23. Paragraph (c)(2) of § 2615.3 is amended by removing "single employer plan," and adding, in its place, "plan maintained by one contributing sponsor or by two or more contributing sponsors that are members of the same controlled group,".

§ 2615.3 [Amended]

24. Paragraph (c)(5) of § 2615.3 is amended by removing "a bankruptcy or liquidation" and adding, in its place, "bankruptcy and insolvency".

§ 2615.3 [Amended]

25. Paragraph (c)(6) of § 2615.3 is amended by removing "of employer" and adding, in its place, "in the same controlled group as a contributing sponsor"; by removing ", or of the trade or business no longer controlled by the contributing sponsor, or of the new trade or business controlling" and adding, in its place, "or of the person no longer under common control with"; and by removing ", and of the trade or business no longer controlled by the contributing sponsor, or the new trade or business controlling" and adding, in its place, "and of the person no longer under common control with".

§ 2615.3 [Amended]

26. Paragraph (e) of § 2615.3 is amended by removing "Office of Program Operations" and adding, in its place, "Case Operations and Compliance Department" and by removing "Room 5300A" and adding, in its place, "Room 5500 (Code 45100)".

§ 2615.5 [Amended]

27. Section 2615.5 is amended by removing "employer" and adding, in its place, "contributing sponsor" in the title and by removing "an employer making contributions" and adding, in its place, "a contributing sponsor" in the text.

§ 2615.12 [Amended]

28. Sections 2615.12(a), 2615.15(a), and 2615.16(a) are amended by removing "the plan" and adding, in its place, "a plan".

§ 2615.14 [Amended]

29. Paragraph (a) of § 2615.14 is amended by removing everything after "previous plan year" and before the period.

30. Paragraph (b) of § 2615.14 is amended by removing in the introductory text "either paragraph (b)(1) or (b)(2)" and adding, in its place, "paragraph (b)(1), (b)(2), or (b)(3)" and by adding a new paragraph (b)(3) to read as follows:

§ 2615.14 Active participant reduction.

* * * * *

(b) * * *

(3) The present value of unfunded vested benefits under the plan (as reported on the most recently filed IRS/DOL/PBGC Form 5500 or Form 5500–C/R) is less than $250,000.

* * * * *

§ 2615.14 [Amended]

31. Paragraph (b)(2) of § 2615.14 is amended by removing "single employer plan, as" and adding, in its place, "plan maintained by one contributing sponsor or by two or more contributing sponsors that are members of the same controlled group, as" and by removing "the single employer plans covered by section 4021 that are maintained by the employer" and adding, in its place, "the plans covered by this part that are maintained by a contributing sponsor and all members of the same controlled group, if any, either"; and by removing "or not" and adding, in its place, "or is not".

32. Paragraph (c) of § 2615.14 is amended by designating the sentence after the heading as subparagraph (1) and by revising the definition of *active participant*, redesignated as subparagraph (2), to read as follows:

§ 2615.14 Active participant reduction.

* * * * *

(c) *Determination of the number of active participants.*

* * * * *

(2) For purposes of this section and information submitted pursuant to § 2615.3(c)(1), with respect to a plan maintained by one contributing sponsor or by two or more contributing sponsors that are members of the same controlled group, include as "active" only a participant who—

(i) Is receiving compensation for work performed;

(ii) Is on paid or unpaid leave granted for a reason other than a layoff;

(iii) Is laid off from work for a period of time that has lasted less than 30 days; or

(iv) Is absent from work due to a recurring reduction in employment that occurs at least annually.

33. The first sentence of paragraph (b) of § 2615.16 is amended by removing "Forms 5500, 5500–C, 5500–K or 5500–R" and adding, in its place, "Form 5500 or Form 5500–C/R".

§ 2615.18 [Amended]

34. Paragraph (d) of § 2615.18 is amended by removing "effective date of the irrevocable commitment" in the first sentence and adding, in its place, "date on which the obligation to provide benefits passes from the plan to the insurer".

§ 2615.18 [Amended]

35. In paragraph (f) of § 2615.18, the heading is revised to read *"Valuation of assets and benefits"*.

§ 2615.21 [Amended]

36. Paragraph (a) of § 2615.21 is amended by removing in the introductory text "single employer plan," and adding, in its place, "plan maintained by one contributing sponsor or by two or more contributing sponsors that are members of the same controlled group" and by adding "(under Title 11, U.S.C.)" before ", or" in paragraph (a)(1).

§ 2615.22 [Amended]

37. In paragraph (a) of § 2615.22, the introductory text is amended by removing "single employer plan," and adding, in its place, "plan maintained by one contributing sponsor or by two or more contributing sponsors that are members of the same controlled group".

§ 2615.22 [Amended]

38. Paragraph (c) of § 2615.22 is amended by removing *"section 4062(d)"* in the heading and adding, in its place, *"section 4069(b)"* and by removing "section 4062(d)" in the text and adding, in its place, "section 4069(b)".

§ 2615.23 [Amended]

39. The title of § 2615.23 is amended by removing "of employer" and adding, in its place, "in contributing sponsor or controlled group".

§ 2615.23 [Amended]

40. Paragraph (a) of § 2615.23 is amended by removing everything in the introductory text after "with respect to" and before "with nonforfeitable benefits" and adding, in its place, "a plan maintained by one contributing sponsor or by two or more contributing sponsors that are members of the same controlled group"; by removing "trade or business" each time it appears in paragraph (a)(1)(iii) and paragraph (a)(2) and adding, in its place, "person"; and by removing "the sponsor" in paragraph (a)(2) and adding, in its place, "the contributing sponsor".

§ 2615.23 [Amended]

41. In paragraph (e) of § 2615.23, the heading is revised to read *"Valuation of assets and benefits"*.

PART 2616—DISTRESS TERMINATIONS OF SINGLE-EMPLOYER PLANS

42. The authority citation for part 2616 continues to read as follows:

Authority: 29 U.S.C. 1302(b)(3), 1341, and 1344.

§ 2616.4 [Amended]

43. In paragraph (c) of § 2616.4 the introductory text is amended by removing the last sentence.

PART 2622—LIABILITY ON TERMINATION OF OR WITHDRAWAL FROM A SINGLE-EMPLOYER PLAN

44. The authority citation for part 2622 is revised to read as follows:

Authority: 29 U.S.C. 1302(b)(3), 1362–1364, and 1367–1368.

45. The title of part 2622 is revised to read as set forth above.

46. Section 2622.1 is revised to read as follows:

§ 2622.1 Purpose and scope.

(a) *Purpose.* The purpose of this part is to set forth rules for determination and payment of the liability incurred, under section 4062(b) of the Act, upon termination of any single-employer plan and, to the extent appropriate, determination of the liability incurred with respect to multiple employer plans under sections 4063 and 4064 of the Act. This part also includes related rules regarding payment arrangements under section 4067 of the Act and the PBGC's lien under section 4068 of the Act with respect to liability arising under section 4062, 4063, or 4064.

When a single-employer plan is terminated under section 4041(c) or 4042 of the Act, section 4062 imposes joint and several liability, to the PBGC and the trustee appointed under section 4042(b) or (c), on any person that, on the termination date, is a contributing sponsor or a member of a contributing sponsor's controlled group. Sections 4063 and 4064, in conjunction with section 4062, apply to liability determinations with respect to multiple employer plans. Under section 4063, the PBGC determines the conditional liability for withdrawal of a substantial employer; under section 4064, the PBGC determines the liability upon termination of persons that, within the 5 preceding plan years, contributed to the plan. Both sections provide for prorating or allocating liability among

controlled groups after calculating the amount for the entire plan under section 4062(b), and section 4062(e) makes sections 4063 and 4064 applicable when there are certain cessations of operations at a facility. (See section 4069 of the Act regarding transactions to evade liability and certain corporate reorganizations.)

(b) *Scope.* The provisions of this part regarding the amount of liability to the PBGC that is incurred upon termination of a single-employer plan apply with respect to a plan for which a notice of intent to terminate under section 4041(c) of the Act is issued or proceedings to terminate under section 4042 of the Act are instituted after December 17, 1987. Those provisions also apply, to the extent described in paragraph (a) of this section, to the amount of liability for withdrawal from a multiple employer plan after that date.

47. In § 2622.2, the definition of *Act* is amended by removing "is" and adding, in its place, "means" and by removing everything after "1974," and before the period and adding, in its place "as amended"; the definition of *PBGC* is amended by removing "is" and adding, in its place "means"; the definitions of *date of plan termination, employer, plan asset insufficiency, single employer plan,* and *Title IV* are removed; and the definitions of *net worth* and *net worth record date* are revised and definitions of *Code, collective net worth of persons subject to liability in connection with a plan termination, contributing sponsor, controlled group, multiple employer plan, notice of intent to terminate, proposed termination date, section 4062(b) liability, single-employer plan,* and *termination date* and added, in alphabetical order, to read as follows:

§ 2622.2 Definitions.

* * * * *

Code means the Internal Revenue Code of 1986, as amended.

Collective net worth of persons subject to liability in connection with a plan termination means the sum of the individual net worths of all persons that have individual net worths which are greater than zero and that (as of the termination date) are contributing sponsors of the terminated plan or members of their controlled groups, as determined in accordance with section 4062(d)(1) of the Act and § 2622.4 of this part.

Contributing sponsor means the person entitled to receive a deduction under section 404(a) of the Code (or that would be entitled to receive a deduction except for the limitations in section 404(a)) for contributions required to be made to the plan under section 302 of the Act and section 412 of the Code.

Controlled group means, in connection with any person, a group consisting of such person and all other persons under common control with such person, determined under Part 2612 of this subchapter.

Multiple employer plan means a single-employer plan maintained by two or more contributing sponsors that are not members of the same controlled group, under which all plan assets are available to pay benefits to all plan participants and beneficiaries.

Net worth means the fair market value of a person liable under section 4062 of the Act, as determined in accordance with section 4062(d)(1) of the Act and § 2622.4 of this part.

Net worth record date means the day, chosen by the PBGC in accordance with section 4062(d)(1) of the Act and § 2622.5 of this part, as of which the PBGC makes net worth determinations.

Notice of intent to terminate means the notice to affected parties advising each of a proposed plan termination, as required by section 4041(a)(2) of the Act and § 2616.22 of this subchapter.

* * * * *

Proposed termination date means the date specified as such by the plan administrator in a notice of intent to terminate or, if later, in the distress termination notice, in accordance with section 4041 of the Act and part 2616 of this subchapter.

Section 4062(b) liability means, with respect to a single-employer plan terminated under section 4041(c) or section 4042 of the Act, the joint and several liability to the PBGC which is incurred by any person that, on the termination date, is a contributing sponsor of the plan or a member of a contributing sponsor's controlled group; the amount of this liability is determined in accordance with section 4062(b)(1) of the Act and § 2622.3(a) of this part.

Single-employer plan means any defined benefit plan (as defined in section 3(35) of the Act) that is not a multiemployer plan (as defined in section 4001(a)(3) of the Act).

Termination date means the date established pursuant to section 4048(a) of the Act.

48. Section 2622.3 is revised to read as follows:

§ 2622.3 Amount and payment of section 4062(b) liability.

(a) *Amount of liability.*

(1) *General rule.* Except as provided in paragraph (a)(2) of this section, the amount of section 4062(b) liability is the total amount (as of the termination date) of the unfunded benefit liabilities (within the meaning of section 4001(a)(18) of the Act) to all participants and beneficiaries under the plan, together with interest calculated from the termination date in accordance with § 2622.7.

(2) *Special rule in case of subsequent finding of inability to pay guaranteed benefits.* In any distress termination proceeding under section 4041(c) of the Act and part 2616 of this subchapter in which (as described in section 4041(c)(3)(C)(ii) of the Act), after a determination that the plan is sufficient for benefit liabilities or for guaranteed benefits (as defined in § 2616.2 of this subchapter), the plan administrator finds that the plan is or will be insufficient for guaranteed benefits and the PBGC concurs with that finding, or the PBGC makes such a finding on its own initiative, actuarial present values shall be determined as of the date of the notice to, or the finding by, the PBGC of insufficiency for guaranteed benefits.

(b) *Payment of liability.* Section 4062(b) liability is due and payable as of the termination date, in cash or securities acceptable to the PBGC, except that, as provided in § 2622.8(c), the PBGC shall prescribe commercially reasonable terms for payment of so much of such liability as exceeds 30 percent of the collective net worth of persons subject to liability in connection with a plan termination, and the PBGC may make alternative arrangements, as provided in § 2622.8(b).

49. The title and paragraph (a) of § 2622.4 are revised to read as follows:

§ 2622.4 Determinations of net worth and collective net worth.

(a) *General rules.* When a contributing sponsor, or member(s) of a contributing sponsor's controlled group, notifies and submits information to the PBGC in accordance with § 2622.6, the PBGC shall determine the net worth, as of the net worth record date, of that contributing sponsor and any members of its controlled group based on the factors set forth in paragraph (c) of this section and shall include the value of any assets that it determines, pursuant to paragraph (d) of this section, have been improperly transferred. In making such determinations, the PBGC will consider information submitted pursuant to § 2622.6. The PBGC shall then determine the collective net worth of persons subject to liability in connection with a plan termination.

* * * * *

§ 2622.4 [Amended]

50. Paragraphs (b) through (d) of § 2622.4 are amended by removing "an employer" each time it appears and adding, in its place, "a person"; by removing "An employer's" in the introductory text of paragraph (c) and the first sentence of paragraph (d) and adding, in its place, "A person's"; by removing "the employer's" each time it appears and adding, in its place, "the person's"; by removing "the employer" each time it appears and adding, in its place, "the person"; by removing "net record" in paragraph (c)(3) and adding, in its place, "net worth record"; by removing "The employer's" in paragraph (c)(5) and adding, in its place, "The person's"; by removing "proceeding under chapter 11 of the Bankruptcy Code of 1978 (or under chapter XI of of the prior Bankruptcy Act)" in paragraph (c)(8) and adding, in its place, "case under title 11, United States Code, or any similar law of a state or political subdivision thereof,"; and by removing "employer liability" in the first sentence of paragraph (d) and adding, in its place, "liability".

§ 2622.5 [Amended]

51. Paragraph (a) of § 2622.5 is amended by removing "date of plan termination established pursuant to section 4048 of the Act" and adding, in its place, "plan's termination date".

§ 2622.5 [Amended]

52. Paragraph (b) of § 2622.5 is amended by removing everything in the first sentence after "establish" and before the period and adding, in its place, "as the net worth record date an earlier date during the 120-day period ending with the termination date".

§ 2622.5 [Amended]

53. Paragraph (c) of § 2622.5 is amended by removing "to the employer" in the heading; by removing "the employer" in the first sentence and adding, in its place, "liable person(s)"; and by removing "more information pursuant to § 2622.6(b)" in the second sentence and adding, in its place, "additional information, as provided in § 2622.6(a)(3)".

54. In § 2622.6, paragraphs (a)(1) through (a)(7) are redesignated as paragraphs (b)(1) through (b)(7), in that order; the introductory text of paragraph (a) is designated as paragraphs (a)(1) through (a)(4) and revised and the introductory text of paragraph (b) is revised; redesignated paragraphs (b)(1) through (b)(7) are amended by removing "The employer's" and adding, in its place, "An" and by removing "its" and adding, in its place, "the person's" in paragraph (b)(1); by removing "employer's" and adding, in its place, "person's" in paragraphs (b)(2), (b)(4), (b)(5), and (b)(6); by removing "employer" both times it appears and adding, in its place, "the person's" in paragraph (b)(3); and by removing "proceeding under chapter 11 of the Bankruptcy Code of 1978 (or under chapter XI of the prior Bankruptcy Act)" and adding, in its place, "case under title 11, United States Code, or any similar law of a state or political subdivision thereof," and by removing "employer" and adding, in its place, "person" in paragraph (b)(7); and paragraph (c) is revised; and as revised, paragraph (a), the introductory text of paragraph (b), and paragraph (c) read as follows:

§ 2622.6 Net worth notification and information.

(a) *General.*

(1) A contributing sponsor or member of the contributing sponsor's controlled group that believes section 4062(b) liability exceeds 30 percent of the collective net worth of persons subject to liability in connection with a plan termination shall—

(i) So notify the PBGC by the 90th day after the notice of intent to terminate is filed with the PBGC or, if no notice of intent to terminate is filed with the PBGC and the PBGC institutes proceedings under section 4042 of the Act, within 30 days after the establishment of the plan's termination date in such proceedings; and

(ii) Submit to the PBGC the information specified in paragraph (b) of this section with respect to the contributing sponsor and each member of the contributing sponsor's controlled group (if any)—

(A) By the 120th day after the proposed termination date, or

(B) If no notice of intent to terminate is filed with the PBGC and the PBGC institutes proceedings under section 4042 of the Act, within 120 days after the establishment of the plan's termination date in such proceedings.

(2) If a contributing sponsor or a member of the contributing sponsor's controlled group complies with the requirements of paragraph (a)(1) of this section, the PBGC will consider the requirements to be satisfied by all members of that controlled group.

(3) The PBGC may require any person subject to liability—

(i) To submit the information specified in paragraph (b) of this section within a shorter period whenever the PBGC believes that its ability to obtain information or payment of liability is in jeopardy, and

(ii) To submit additional information within 30 days, or a different specified time, after the PBGC's written notification that it needs such information to make net worth determinations.

(4) If a provision of paragraph (b) of this section or a PBGC notice specifies information previously submitted to the PBGC, a person may respond by identifying the previous submission in which the response was provided.

(b) *Net worth information.* The following information specifications apply, individually, with respect to each person subject to liability:

* * * * *

(c) *Incomplete submissions.* If a contributing sponsor and/or members of the contributing sponsor's controlled group do not submit all of the information required pursuant to paragraph (a) of this section (other than the estimate described in paragraph (b)(1) of this section) with respect to each person subject to liability, the PBGC may base determinations of net worth and the collective net worth of persons subject to liability in connection with a plan termination on any such information that such person(s) did submit, as well as any other pertinent information that the PBGC may have. In general, the PBGC will view information as of a date further removed from the net worth record date as having less probative value than information as of a date nearer to the net worth record date.

55. In § 2622.7, paragraph (d) is removed and the title and paragraphs (a) and (b) are revised to read as follows:

§ 2622.7 Calculating interest on liability and refunds of overpayments.

(a) *Interest.* Whether or not the PBGC has granted deferred payment terms pursuant to § 2622.8, the amount of liability under this part includes interest, from the termination date, on any unpaid portion of the liability. Such interest accrues at the rate set forth in paragraph (c) of this section until the liability is paid in full and is compounded daily. When liability under this part is paid in more than one payment, the PBGC will apply each payment to the satisfaction of accrued interest and then to the reduction of principal.

(b) *Refunds.* If a contributing sponsor or member(s) of a contributing sponsor's controlled group pays the PBGC an amount that exceeds the full amount of liability under this part, the PBGC shall refund the excess amount, with interest at the rate set forth in paragraph (c) of this section. Interest on an overpayment accrues from the later of the date of the

overpayment or 10 days prior to the termination date until the date of the refund and is compounded daily.

* * * * *

§ 2622.7 [Amended]

56. In paragraph (c) of § 2622.7, the first sentence is amended by removing "employer liability and refunds of employer liability" and adding, in its place, "liability under this part and refunds thereof" and by removing "Internal Revenue Code of 1954, as amended," and adding, in its place, "Code".

57. The title and paragraphs (a), (b), (c), and (d) of § 2622.8 are revised to read as follows:

§ 2622.8 Arrangements for satisfying liability.

(a) *General.* The PBGC will defer payment, or agree to other arrangements for the satisfaction, of any portion of liability to the PBGC only when—

(1) As provided in paragraph (b) of this section, the PBGC determines that such action is necessary to avoid the imposition of a severe hardship and that there is a reasonable possibility that the terms so prescribed will be met and the entire liability paid; or

(2) As provided in paragraph (c) of this section, the PBGC determines that section 4062(b) liability exceeds 30 percent of the collective net worth of persons subject to liability in connection with a plan termination.

(b) *Upon request.* If the PBGC determines that such action is necessary to avoid the imposition of a severe hardship on persons that are or may become liable under section 4062, 4063, or 4064 of the Act and that there is a reasonable possibility that persons so liable will be able to meet the terms prescribed and pay the entire liability, the PBGC may, in its discretion and when so requested in accordance with paragraph (b)(2) of this section, grant deferred payment or other terms for the satisfaction of such liability.

(1) In determining what, if any, terms to grant, the PBGC shall examine the following factors:

(i) The ratio of the liability to the net worth of the person making the request and (if different) to the collective net worth of persons subject to liability in connection with a plan termination.

(ii) The overall financial condition of persons that are or may become liable, including, with respect to each such person—

(A) The amounts and terms of existing debts;

(B) The amount and availability of liquid assets;

(C) Current and past cash flow; and

(D) Projected cash flow, including a projection of the impact on operations that would be caused by the immediate full payment of the liability.

(iii) The availability of credit from private sector sources to the person making the request and to other liable persons.

(2) A contributing sponsor or member of a contributing sponsor's controlled group may request deferred payment or other terms for the satisfaction of any portion of the liability under section 4062, 4063, or 4064 of the Act at any time by filing a written request. The request must include the information specified in § 2622.6(b), except that—

(i) If the request is filed one year or more after the net worth record date, references to "the net worth record date" in § 2622.6(b) shall be replaced by "the most recent annual anniversary of the net worth record date"; and

(ii) Information that already has been submitted to the PBGC need not be submitted again.

(c) *Liability exceeding 30 percent of collective net worth.* If the PBGC determines that section 4062(b) liability exceeds 30 percent of the collective net worth of persons subject to liability in connection with a plan termination, the PBGC will, after making a reasonable effort to reach agreement with such persons, prescribe commercially reasonable terms for payment of so much of the liability as exceeds 30 percent of the collective net worth of persons subject to liability in connection with a plan termination. The terms prescribed by the PBGC for payment of that portion of the liability (including interest) will provide for deferral of 50 percent of any amount otherwise payable for any year if a person subject to such liability demonstrates to the satisfaction of the PBGC that no person subject to such liability has any individual pre-tax profits (within the meaning of section 4062(d)(2) of the Act) for such person's last full fiscal year ending during that year.

(d) *Interest.* Interest on unpaid liability is calculated in accordance with § 2622.7(a).

* * * * *

§ 2622.8 [Amended]

58. Paragraph (e) of § 2622.8 is amended by removing "an employer" and adding, in its place, "the liable person(s)".

§ 2622.9 [Amended]

59. The title of § 2622.9 is amended by removing "lien for employer liability" and adding, in its place, "demand for liability; lien".

§ 2622.9 [Amended]

60. In paragraph (a) of § 2622.9, the first sentence is amended by removing "an employer's liability" and adding, in its place, "the liability" and by removing "the employer" and adding, in its place, "liable person(s)"; the second sentence is amended by adding "and will indicate that, as provided in § 2622.8, the PBGC will prescribe commercially reasonable terms for payment of so much of the liability as it determines exceeds 30 percent of the collective net worth of persons subject to liability in connection with a plan termination" at the end before the period; and the last sentence is amended by removing "employer's".

§ 2622.9 [Amended]

61. Paragraph (b) of § 2622.9 is amended by removing "If the employer fails to pay its" and adding, in its place, "Except as provided in paragraph (c) of this section, if person(s) liable to the PBGC fail to pay the" and by adding as concluding text of paragraph (b): "The demand letter will indicate that, as provided in § 2622.8, the PBGC will prescribe commercially reasonable terms for payment of so much of the liability as it determines exceeds 30 percent of the collective net worth of persons subject to liability in connection with a plan termination."

§ 2622.9 [Amended]

62. In paragraph (c) of § 2622.9, the first sentence is amended by removing "an employer's" after "payment of" and by removing "for an employer's liability" and adding, in its place, "for the liability"; and the last sentence is amended by removing "to appeal of the assessment of liability" and adding, in its place, "to an appeal".

§ 2622.9 [Amended]

63. Paragraph (d) of § 2622.9 is amended by removing "If the employer" and adding, in its place, "If any person liable to the PBGC under section 4062, 4063, or 4064 of the Act"; by removing "its liability" and adding, in its place, "such liability"; and by removing everything after "arising as of the" and before the period and adding, in its place, "plan's termination date, upon all property and rights to property, whether real or personal, belonging to that person, except that such lien may not be in an amount in excess of 30 percent of the collective net worth of all persons described in section 4062(a) of the Act".

§ 2622.10 [Amended]

64. Paragraph (a) of § 2622.10 is amended by adding "(including

information)" after "document" in the introductory text.

§ 2622.10 [Amended]

65. In paragraph (b) of § 2622.10, the first sentence is amended by removing "employer"; by removing ", and shall be sent to the Division of the Treasurer, Office of Financial Operations" and adding, in its place, ". Such payments shall be sent to the address specified in the notification or demand for liability issued by the PBGC under § 2622.9 or, if not so specified, to the address provided, upon request, by the Investment Management Division (Code 33500)"; and by adding "(202–778–8802)" at the end before the period; and the second sentence is amended by adding "(including information)" after "document" and by removing "Office of Program Operations" and adding, in its place, "Insurance Operations Department".

PART 2623—BENEFIT REDUCTIONS TERMINATING PLANS; RECOUPMENT AND REIMBURSEMENT

66. The authority citation for part 2623 is revised to read as follows:

Authority: 29 U.S.C. 1302(b)(3), 1322, 1322b, 1341(c)(3)(D), and 1344.

67. The title of part 2623 is revised to read as set forth above.

68. Section 2623.1 is revised to read as follows:

§ 2623.1 Purpose and scope.

(a) *Purpose.* The purpose of this part is to prescribe procedures that minimize the overpayment of benefits by plan administrators when terminating single-employer plans are not expected to be sufficient for guaranteed benefits and procedures for the recoupment of benefit overpayments from participants and beneficiaries entitled to annuities and the reimbursement of benefit underpayments to participants and beneficiaries in PBGC-trusteed plans.

(b) *Scope.* Subpart B of this part sets forth the rules for reducing benefit payments after initiating a distress termination; subpart C of this part sets forth the method of recoupment of benefit payments in excess of the amounts permitted under sections 4022, 4022B, and 4044 of the Act and provides for reimbursement of benefit underpayments.

69. Section 2623.2 is amended by removing the definitions of *insufficient plan, Title IV Benefit, section 4041(a) date of termination,* and *section 4048 date of termination* and by adding, in alphabetical order, definitions of *distress termination, guaranteed benefit, notice of intent to terminate, PBGC-trusteed plan, proposed termination date, single-employer plan, sufficient for guaranteed benefits, termination date,* and *title IV benefit* to read as follows:

§ 2622.2 Definitions.

* * * * *

Distress termination means the voluntary termination, in accordance with section 4041(c) of the Act and part 2616 of this subchapter, of a single-employer plan.

Guaranteed benefit means a benefit that is guaranteed by the PBGC under section 4022 (a) and (b) of the Act and parts 2613 and 2621 of this chapter.

Notice of intent to terminate means the notice to affected parties advising each of a proposed plan termination, as required by section 4041(a)(2) of the Act and § 2616.22 or § 2617.22 of this subchapter.

* * * * *

PBGC-trusteed plan means a terminated plan for which the PBGC is appointed trustee under section 4042(b) of the Act.

Proposed termination date means the date specified as such by the plan administrator in a notice of intent to terminate or, if later, in the distress termination notice or the standard termination notice, in accordance with section 4041 of the Act and part 2616 or part 2617 of this subchapter.

Single-employer plan means any defined benefit plan (as defined in section 3(35) of the Act) that is not a multiemployer plan (as defined in section 4001(a)(3) of the Act).

* * * * *

Sufficient for guaranteed benefits means that there is no amount of unfunded guaranteed benefits (within the meaning of section 4001(a)(17) of the Act).

Termination date means the date established pursuant to section 4048(a) of the Act.

Title IV benefit means the guaranteed benefit plus any additional benefits to which plan assets are allocated pursuant to section 4044 of the Act and part 2618 of this subchapter.

70. The title of § 2623.5 is amended by removing "benefits payable" and adding, in its place, "benefit payments".

71. Paragraph (a) of § 2623.5 is revised to read as follows:

§ 2623.5 Limitations on benefit payments by plan administrator.

(a) *General.* When, during the pendency of a distress termination proceeding, § 2616.4 of this subchapter requires a plan administrator to reduce benefits, the plan administrator shall limit benefit payments in accordance with this section.

* * * * *

§ 2623.5 [Amended]

72. Paragraph (b) of § 2623.5 is amended by removing "beginning on the section 4041(a) date of termination" in the first sentence and by adding "or her" after "his" in the second sentence.

§ 2623.5 [Amended]

73. Paragraph (c) of § 2623.5 is amended by removing "beginning on the section 4041(a) date of termination"; by removing "chapter" and adding, in its place "subchapter"; and by adding ", for the year of the proposed termination date" at the end before the period.

§ 2623.5 [Amended]

74. Paragraph (d) of § 2623.5 is amended by adding "*payments*" after "*benefit*" in the heading and by removing "Beginning on the thirtieth day after the section 4041(a) date of termination, or on the section 4041(a) date of termination if the Notice of Intent to Terminate proposes a date of termination that is more than thirty days after the Notice of Intent to Terminate was filed, a" and adding, in its place, "A".

§ 2623.5 [Amended]

75. Paragraph (e) of § 2623.5 is removed.

§ 2623.5 [Amended]

76. Paragraph (f) of § 2623.5 is amended by removing "*deadlines and*" in the heading; by removing paragraph (f)(1); by removing the colon after "may" in the introductory text; by removing the designation of paragraph (f)(2) and the word "Authorize" and adding, in its place, "authorize"; and, as so amended, paragraph (f) is redesignated as paragraph (e).

77. Paragraph (g) of § 2623.5 is redesignated as paragraph (f) and the examples following the introductory text are revised to read as follows:

§ 2623.5 Limitations on benefit payments by plan administrator.

* * * * *

(f) * * *

Example 1

Facts. On October 10, 1992, a plan administrator files with the PBGC a notice of intent to terminate in a distress termination that includes December 31, 1992, as the proposed termination date. A participant who is in pay status on December 31, 1992, has been receiving his accrued benefit of $2,500 per month under the plan. The benefit is in the form of a joint and survivor annuity (contingent basis) that will pay 50 percent of the participant's benefit amount (*i.e.*, $1,250

per month) to his surviving spouse following the death of the participant. On December 31, 1992, the participant is age 66, and his wife is age 56.

Benefit reductions. Paragraph (b) of this section requires the plan administrator to cease paying benefits in excess of the accrued benefit payable at normal retirement age. Because the participant is receiving only his accrued benefit, no reduction is required under paragraph (b).

Paragraph (c) of this section requires the plan administrator to cease paying benefits in excess of the maximum guaranteeable benefit, adjusted for age and benefit form in accordance with the provisions of part 2621 of this subchapter. The maximum guaranteeable benefit for plans terminating in 1992, the year of the proposed termination date, is $2,352.27 per month, payable in the form of a single life annuity at age 65. Because the participant is older than age 65, no adjustment is required under § 2621.4(c) based on the annuitant's age factor. The benefit form is a joint and survivor annuity (contingent basis), as defined in § 2621.2. The required benefit reduction for this benefit form under § 2621.4(d) is 10 percent. The corresponding adjustment factor is 0.90 (1.00–0.10). The benefit reduction factor to adjust for the age difference between the participant and the beneficiary is computed under § 2621.4(e). In computing the difference in ages, years over 65 years of age are not taken into account. Therefore, the age difference is 9 years (65–56). The required percentage reduction when the beneficiary is 9 years younger than the participant is 9 percent. The corresponding adjustment factor is 0.91 (1.00–0.09).

The maximum guaranteeable benefit adjusted for age and benefit form is $1,926.51 ($2,352.27×0.90×0.91) per month. Therefore, the plan administrator must reduce the participant's benefit payment from $2,500 to $1,926.51. If the participant dies after December 31, 1992, the plan administrator will pay his spouse $963.26 (0.50×$1,926.51) per month.

Example 2

Facts. The benefit of a participant who retired under a plan at age 60 is a reduced single life annuity of $400 per month plus a temporary supplement of $400 per month payable until age 62. The participant's accrued benefit under the plan is $450 per month, payable from the plan's normal retirement age. On the proposed termination date, June 30, 1992, the participant is 61 years old.

The maximum guaranteeable benefit adjusted for age under § 2621.4(c) of this subchapter is $1,693.63 ($2,352.27×0.72) per month. Since the benefit is payable as a single life annuity, no adjustment is required under § 2621.4(d) for benefit form.

Benefit reductions. The plan benefit of $800 per month payable until age 62 exceeds the participant's accrued benefit of $450 per month. Paragraph (b) of this section requires that, except to the extent permitted by paragraph (d), the plan benefit must be reduced to that level. Since the resulting levelized benefit of $404.10 ((0.082×50)+$400) per month, determined under § 2621.4(f), is less than the adjusted maximum guaranteeable benefit of $1,693.63 per month, no further reduction in the benefit payment is required under paragraph (c) of this section. The plan administrator next would determine the amount of the participant's benefit under paragraph (d).

Example 3

Facts. A retired participant is receiving a reduced early retirement benefit of $600 per month plus a temporary supplement of $1,200 per month payable until age 62. The benefit is in the form of a single life annuity. On the proposed termination date, November 30, 1992, the participant is 56 years old.

The participant's accrued benefit at normal retirement age under the plan is $1,200 per month. The maximum guaranteeable benefit adjusted for age is $1,152.61 ($2,352.27×0.49) per month. A form adjustment is not required.

Benefit reductions. The plan benefit of $1,800 per month payable from age 56 to age 62 exceeds the participant's accrued benefit at normal retirement age of $1,200 per month. Therefore, under paragraph (b) of this section, the plan administrator must reduce the temporary supplement to $600 per month.

For the purpose of determining whether the reduced benefit, *i.e.*, a level-life annuity of $600 per month and a temporary annuity supplement of $600 per month to age 62, exceeds the maximum guaranteeable benefit adjusted for age, the temporary annuity supplement of $600 per month is converted to a level-life annuity equivalent in accordance with § 2621.4(f) of this subchapter. The level-life annuity equivalent is $232.20 ($600×0.387). This, added to the life annuity of $600 per month, equals $832.20. Since the maximum guaranteeable benefit of $1,152.61 per month exceeds $832.20 per month, no further reduction is required under paragraph (c) of this section.

The plan administrator next would determine the participant's estimated benefit under paragraph (d). Assume that the estimated benefit under paragraph (d) is $1,500 per month until age 62 and $600 per month thereafter. The plan administrator would pay the participant $1,500 per month, reduced to $600 per month at age 62, subject to the final benefit determination made under title IV.

Example 4

Facts. A retired participant is receiving a reduced early retirement benefit of $2,250 per month plus a temporary supplement of $1,200 per month payable until age 62. The benefit is in the form of a joint and survivor annuity (contingent basis) that will pay 50 percent of the participant's benefit amount to his surviving spouse following the death of the participant. On the proposed termination date, December 20, 1992, the participant and his spouse are each 56 years old.

The participant's accrued benefit at normal retirement age under the plan is $3,000 per month. The maximum guaranteeable benefit adjusted for age and the joint and survivor annuity (contingent basis) annuity form is $1,037.35 per month. An adjustment for age difference is not required because the participant and his spouse are the same age.

Benefit reductions. The plan benefit of $3,450 per month payable from age 56 to age 62 exceeds the participant's accrued benefit at normal retirement age, which is $3,000 per month. Therefore, under paragraph (b) of this section, the plan administrator must reduce the participant's benefit so that it does not exceed $3,000 per month.

The level-life equivalent of the participant's reduced benefit, determined using the § 2621.4(f) adjustment factor, is $2,540.25 (($750×0.387)+$2,250) per month. Since this benefit exceeds the participant's maximum guaranteeable benefit of $1,037.35 per month, the plan administrator must reduce the participant's benefit payment so that it does not exceed the maximum guaranteeable benefit.

The ratio of (i) the participant's maximum guaranteeable benefit to (ii) the level-life equivalent of the participant's reduced benefit (computed under the "accrued for normal retirement age" limitation) is used in converting the level-life maximum guaranteeable benefit to the step-down form. The level-life equivalent of the reduced benefit computed under the "accrued for normal retirement age" limitation is 40.84 percent ($1,037.35/$2,540.25). Thus, the plan administrator must reduce the participant's level-life benefit of $2,250 per month to $918.90 ($2,250×0.4084) and must further reduce the reduced temporary benefit of $750 per month to $306.30 ($750×0.4084). Under paragraph (c) of this section, therefore, the participant's maximum guaranteeable benefit is $1,225.20 ($918.90+$306.30) per month to age 62 and $918.90 per month thereafter, subject to any adjustment under paragraph (d) of this section.

Assume that the estimated benefit under paragraph (d) is $1,050 per month to age 62 and $750 per month thereafter. The plan administrator would reduce the participant's benefit from $1,225.20 per month to $1,050 per month and pay this amount until age 62, at which time the benefit payment would be reduced to $750 per month, subject to the final benefit determination made under title IV.

§ 2623.6 [Amended]

78. Paragraph (a) of § 2623.6 is amended by removing the last sentence.

§ 2623.6 [Amended]

79. Paragraph (b) of § 2623.6 is amended by removing "section 4041(a) date of termination" each time it appears (in the heading or the text) and adding, in its place, "proposed termination date"; by removing "was" and adding, in its place, "is" in paragraph (b)(1); and by adding "or her" after "his" in paragraph (b)(2).

§ 2623.6 [Amended]

80. Paragraph (c) of § 2623.6 is amended by adding "or her" after "his" both times it appears in paragraph (c)(1); by adding "or she" after "he" each time it appears; and by removing "section 4041(a) date of termination" each time it appears in paragraph (c)(2) and

paragraph (c)(3) and adding, in its place, "proposed termination date".

§ 2623.6 [Amended]

81. Paragraph (d) of § 2623.6 is amended by removing "section 4041(a) date of termination" each time it appears and adding, in its place, "proposed termination date" and by adding "or she" after "he" and "or "her" after "his" in paragraph (d)(2)(ii).

82. The examples in paragraph (e) of § 2623.6 are revised to read as follows:

§ 2623.6 Estimated guaranteed benefit.

* * * * *

(e) * * *

Example 1

Facts. A participant which is not a substantial owner retired on December 31, 1991, at age 60 and began receiving a benefit of $600 per month. On January 1, 1989, the plan had been amended to allow participants to retire with unreduced benefits at age 60. Previously, a participant who retired before age 65 was subject to a reduction of ⅓sth for each year by which his or her actual retirement age preceded age 65. On January 1, 1992, the plan's benefit formula was amended to increase benefits for participants who retired before January 1, 1992. As a result, the participant's benefit was increased to $750 per month. There have been no other pertinent amendments. The proposed termination date is December 15, 1992.

Estimated guaranteed benefit. No reduction is required under § 2623.5(b) or (c) because the participant's benefit does not exceed either the participant's accrued benefit at normal retirement age or the maximum guaranteeable benefit. (Post-retirement benefit increases are not considered as increasing accrued benefits payable at normal retirement age.)

The amendment as of January 1, 1989, resulted in a "new benefit" because the reduction in the age at which the participant could receive unreduced benefits increased the participant's benefit entitlement at actual retirement age by ⅓₆, which is more than a 20 percent increase.

The amendment of January 1, 1992, which increased the participant's benefit to $750 per month, is a "benefit improvement" because it is an increase in the amount of benefit for persons in pay status. (No percentage test applies in determining whether such an increase is a benefit improvement.)

The multiplier for computing the amount of the estimated guaranteed benefit is taken from the third row of Table I (because the last new benefit had been in effect for 3 full years as of the proposed termination date) and column (c) (because there was a benefit improvement within the 1-year period preceding the proposed termination date). This multiplier is 0.55. Therefore, the amount of the participant's estimated guaranteed benefit is $412.50 (0.55 × $750) per month.

Example 2

Facts. A participant who is not a substantial owner terminated employment on December 31, 1990. On January 1, 1992, she reached age 65 and began receiving a benefit of $250 per month. She had completed 3 years of service at her termination of employment and was fully vested in her accrued benefit. The plan's vesting schedule had been amended on July 1, 1988. Under the schedule in effect before the amendment, a participant with 5 years of service was 100 percent vested. There have been no other pertinent amendments. The proposed termination date is December 31, 1992.

Estimated guaranteed benefit. No reduction is required under § 2623.5 (b) or (c) because the participant's benefit does not exceed either her accrued benefit at normal retirement age or the maximum guaranteeable benefit. The plan's change of vesting schedule created a new benefit for the participant. Because the amendment was in effect for 4 full years before the proposed termination date, the second row of Table I is used to determine the applicable multiplier for estimating the amount of the participant's guaranteed benefit. Because the participant did not receive any benefit improvement during the 12-month period ending on the proposed termination date, column (b) of the table is used. Therefore, the multiplier is 0.80, and the amount of the participant's estimated guaranteed benefit is $200 (0.80 × $250) per month.

Example 3

Facts. A participant who is a substantial owner retired prior to the proposed termination date after 5½ years of active participation in the plan. The benefit under the terms of the plan when he first began active participation was $800 per month. On the proposed termination date of April 30, 1992, he was entitled to receive a benefit of $2,000 per month. No reduction of this benefit is required under § 2623.5 (b) or (c).

Estimated guaranteed benefit. Paragraph (d)(2) of this section is used to compute the amount of the estimated guaranteed benefit of substantial owners with 5 or more years of active participation prior to the proposed termination date. Consequently, the amount of this participant's estimated guaranteed benefit is the lesser of—

(i) the amount calculated as if he had been an active participant in the plan for fewer than 5 full years on the proposed termination date, or $333.33 ($2,000 × ⅙₀) per month.

(ii) the amount to which he would have been entitled as of the proposed termination date under the terms of the plan when he first began participation, as limited by § 2623.5(b) and (c), multiplied by 2 times the number of years of active participation and divided by 30, or $266.67 ($800 × 2 × ⅓₀) per month.

Therefore, the amount of the participant's estimated guaranteed benefit is $266.67 per month.

§ 2623.7 [Amended]

83. The title of § 2623.7 is amended by removing "Title IV Benefit" and adding, in its place, "title IV benefit".

§ 2623.7 [Amended]

84. Paragraph (a) of § 2623.7 is amended by removing "Benefit" each time it appears and adding, in its place, "benefit" and by removing the last sentence.

§ 2623.7 [Amended]

85. Paragraph (b) of § 2623.7 is amended by removing "Benefits" both times it appears in the introductory text and adding, in its place, "benefits" and by removing "section 4041(a) date of termination" each time it appears and adding, in its place, "proposed termination date".

§ 2623.7 [Amended]

86. Paragraph (c) of § 2623.7 is amended by removing "*Benefit*" in the heading and adding, in its place, "*benefit*"; by removing "Benefit" in the first sentence of the introductory text and adding, in its place, "benefit"; and by removing "section 4041(a) date of termination" each time it appears and adding, in its place, "proposed termination date".

§ 2623.7 [Amended]

87. Paragraph (d) of § 2623.7 is amended by removing "*Benefit*" in the heading and adding, in its place, "*benefit*" and by adding "or she" after "he" in paragraph (d)(1).

88. The examples in paragraph (e) of § 2623.7 are revised to read as follows:

§ 2623.7 Estimated Title IV benefits.

* * * * *

(e) * * *

Example 1

Facts. A participant who is not a substantial owner was eligible to retire 3½ years before the proposed termination date. The participant retired 2 years before the proposed termination date with 20 years of service. Her final 5 years' average salary was $45,000, and she was entitled to an unreduced early retirement benefit of $1,500 per month payable as a single life annuity. This retirement benefit does not exceed the limitation in § 2623..5(b) or (c).

On the participant's benefit commencement date, the plan provided for a normal retirement benefit of 2 percent of the final 5 years' salary times the number of years of service. Five years before the proposed termination date, the percentage was 1½ percent. The amendments improving benefits were put into effect 3½ years prior to the proposed termination date. There were no other amendments during the 5-year period.

The participant's estimated guaranteed benefit computed under § 2623.6(c) is $1,500 per month times 0.90 (the factor from column (b) of Table I in § 2623.6(c)(2)), or $1,350 per month. It is assumed that the plan meets the conditions set forth in paragraph (b) of this section, and the plan administrator is therefore required to estimate the title IV benefit.

Estimated title IV benefit. For a participant who is not a substantial owner, the amount

of the estimated title IV benefit is the estimated priority category 3 benefit computed under paragraph (c) of this section. This amount is computed by multiplying the participant's benefit under the plan as of the later of the proposed termination date or the benefit commencement date by the ratio of (i) the normal retirement benefit under the provisions of the plan in effect 5 years before the proposed termination date and (ii) the normal retirement benefit under the plan provisions in effect on the proposed termination date.

Thus, the numerator of the ratio is the benefit that would be payable to the participant under the normal retirement provisions of the plan 5 years before the proposed termination date, based on her age, service, and compensation on her benefit commencement date. The denominator of the ratio is the benefit that would be payable to the participant under the normal retirement provisions of the plan in effect on the proposed termination date, based on her age, service, and compensation as of the earlier of her benefit commencement date or the proposed termination date. Since the only different factor in the numerator and denominator is the salary percentage, the amount of the estimated title IV benefit is $1,125 (0.015/0.020 × $1,500) per month. This amount is less than the estimated guaranteed benefit of $1,350 per month. Therefore, in accordance with § 2623.5(d), the benefit payable to the participant is $1,350 per month.

Example 2

Facts. A participant who is a substantial owner retires at the plan's normal retirement age, having completed 5 years of active participation in the plan, on October 31, 1992, which is the proposed termination date. Under provisions of the plan in effect 5 years prior to the proposed termination date, the participant is entitled to a single life annuity of $500 per month. Under the most recent plan amendments, which were put into effect 1½ years prior to the proposed termination date, the participant is entitled to a single life annuity of $1,000 per month. The participant's estimated guaranteed benefit computed under § 2623.6(d)(2) is $166.67 per month.

It is assumed that all of the conditions in paragraph (b) of this section have been met. Plan assets equal $2 million. The present value of all benefits in pay status is $1.5 million based on applicable PBGC interest rates. There are no employee contributions and the present value of all vested benefits that are not in pay status is $0.75 million based on applicable PBGC interest rates.

Estimated title IV benefit. Paragraph (d) of this section provides that the amount of the estimated Title IV benefit payable with respect to a participant who is a substantial owner is the higher of the estimated priority category 3 benefit computed under paragraph (c) of this section or the estimated priority category 4 benefit computed under paragraph (d) of this section.

Under paragraph (c), the participant's estimated priority category 3 benefit is $500 ($1,000 × $500/$1000) per month.

Under paragraph (d), the participant's estimated priority category 4 benefit is the estimated guaranteed benefit computed under § 2623.6(c) (*i.e.*, as if the participant were not a substantial owner) multiplied by the priority category 4 funding ratio. Since the plan has priority category 3 benefits, the ratio is determined under paragraph (d)(2)(i). The numerator of the ratio is plan assets minus the present value of benefits in pay status. The denominator of the ratio is the present value of all vested benefits that are not in pay status. The participant's estimated guaranteed benefit under § 2623.6(c) is $1,000 per month times 0.90 (the factor from column (b) of Table I in § 2623.6(c)(2)), or $900 per month. Multiplying $900 by the category 4 funding ratio of ⅔ (($2 million – $1.5 million)/$0.75 million) produces an estimated category 4 benefit of $600 per month.

Because the estimated category 4 benefit so computed is greater than the estimated category 3 benefit so computed, the estimated category 4 benefit is the estimated title IV benefit. Because the estimated category 4 benefit so computed is greater than the estimated guaranteed benefit of $166.67 per month, in accordance with § 2623.5(d), the benefit payable to the participant is the estimated category 4 benefit of $600 per month.

§ 2623.8 [Removed]

89. Section 2623.8 is removed.

§ 2623.11 [Amended]

90. Paragraph (a) of § 2623.11 is amended by removing "terminated insufficient plan" in the first sentence and adding, in its place, "PBGC-trusteed plan"; by removing "he or his" the first time it appears in the first sentence and adding, in its place, "the participant or his or her"; by removing "he or his" the second time it appears in the first sentence and adding, in its place, "the participant or beneficiary"; by removing "recoupment under" and adding, in its place, "recouping in accordance with the rules in" in the second sentence; and by removing "section 4048 date of termination" and adding, in its place, "termination date" in the last sentence.

§ 2623.11 [Amended]

91. Paragraph (b) of § 2623.11 is amended by removing "terminated insufficient plan" and adding, in its place, "PBGC-trusteed plan" and by removing "he or his" and adding, in its place, "the participant or his or her".

§ 2623.11 [Amended]

92. Paragraph (c) of § 2623.11 is amended by removing everything after "on or after the latest of" and before "the date on which" and adding, in its place, "the proposed termination date, the termination date, or, if no notice of intent to terminate was issued,".

§ 2623.12 [Amended]

93. Paragraph (a) of § 2623.12 is amended by removing "section 4048 date of termination" in paragraph (a)(1) and adding, in its place, "termination date" and by adding "or her" after "him" in paragraph (a)(3).

Issued in Washington, DC this 7th day of December, 1992.

James B. Lockhart III,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708–01–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 926

Montana Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule; public comment period and opportunity for public hearing on proposed amendment.

SUMMARY: OSM is announcing the receipt of a proposed amendment to the Montana permanent regulatory program (the Montana program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The proposed amendment is intended to change the State's definition of "prospecting" to more closely conform to the Federal definition of "coal exploration" and to include in the definition certain data gathering activities.

This document sets forth the times and locations that the Montana program and the proposed amendment to that program are available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendment, and procedures that will be followed regarding the public hearing, if one is requested.

DATES: Written comments must be received 4 p.m., m.s.t. January 13, 1993. If requested, a public hearing on the proposed amendment will be held on January 8, 1993. Requests to present oral testimony at the hearing must be received by 4 p.m., m.s.t. on December 29, 1992.

ADDRESSES: Written comments should be mailed or hand delivered to Guy Padgett at the address listed below.

Copies of the Montana program, the proposed amendment, and all written comments received in response to this notice will be available for public review at the addresses listed below

during normal business hours, Monday through Friday, excluding holidays. Each requester may receive one free copy of the proposed amendment by contacting OSM's Casper Field Office.

Guy Padgett, Director; Casper Field Office, Office of Surface Mining Reclamation and Enforcement; 100 East B Street, room 2128; Casper, WY 82601–1918. Telephone: (307) 261–5776.

Gary Amestoy, Administrator; Reclamation Division, Montana Department of State Lands; Capitol Station; 1625 Eleventh Ave.; Helena, MT 59620. Telephone: (406) 444–2074.

FOR FURTHER INFORMATION CONTACT: Guy V. Padgett, Director, telephone: (307) 261–5776.

SUPPLEMENTARY INFORMATION:

I. Background on the Montana Program

On April 1, 1980, the Secretary of the Interior conditionally approved the Montana program. General background information on the Montana program, including the Secretary's findings, the disposition of comments, and conditions of approval of the Montana program can be found in the April 1, 1980, **Federal Register** (45 FR 21560). Subsequent actions concerning the Montana program and program amendments can be found at 30 CFR 926.15 and 926.16.

II. Discussion of the Proposed Amendment

By letter dated October 19, 1992 (Administrative Record No. MT–9–01), Montana submitted a proposed amendment to its program pursuant to SMCRA. Montana submitted the proposed amendment in response to a 30 CFR part 732 notification, dated March 29, 1990. This notification informed Montana that its definition of "[p]rospecting," at Montana Code Annotated (MCA) 82–4–203(26), when applied to lands designated unsuitable for mining, was less effective than the Federal definition of "coal exploration" at 30 CFR 701.5.

The proposed program amendment consists of a legislative revision to the statutory definition. The revision adds to the definition new language specifying that the collection of surface or subsurface geologic, chemical, environmental, and other data, when conducted on areas designated as unsuitable for mining, is included in the definition of "[p]rospecting." As revised, the statutory definition would include the removal of overburden, core drilling, construction of roads, or any other disturbance of the surface for the purpose of determining the location, quantity, or quality of a natural mineral deposit and, on areas designated unsuitable for coal mining pursuant to 82–4–227 and 82–4–228, the gathering of surface or subsurface geologic, physical, or chemical data by mapping, trenching, geophysical, or other techniques necessary to determine the quality and quantity of overburden and coal in an area and the gathering of environmental data to establish the conditions of an area before beginning strip- or underground-coal-mining and reclamation operations under this part.

III. Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17(h), OSM is seeking comments on whether the proposed amendment satisfies the applicable program approval criteria of 30 CFR 732.15. If the amendment is deemed adequate, it will become part of the Montana program.

Written Comments

Written comments should be specific, pertain only to the issue proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "**DATES**" or at locations other than OSM's Casper Field Office will not necessarily be considered in the final rulemaking or included in the administrative record.

Public Hearing

Persons wishing to testify at the public hearing should contact the person listed under "**FOR FURTHER INFORMATION CONTACT**" by 4 p.m., m.s.t. December 29, 1992. The location and time of the hearing will be arranged with those persons requesting the hearing. If no one requests an opportunity to testify at the public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requested as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSM officials to prepare adequate responses and appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to testify, and who wish to do so, will be heard following those who have been scheduled. The hearing will end after all persons scheduled to testify and persons present in the audience who wish to testify have been heard.

Public Meeting

If only one person requests an opportunity to testify at a hearing, a public meeting, rather than a public hearing, may be held. Persons wishing to meet with OSM representatives to discuss the proposed amendment may request a meeting at the OSM office listed under "**FOR FURTHER INFORMATION CONTACT.**" All such meetings will be open to the public and, if possible, notices of meetings will be posted at the locations listed under "**ADDRESSES.**" A written summary of each meeting will be made a part of the administrative record.

IV. Procedural Determinations

Compliance With Executive Order 12291

On July 12, 1992, the Office of Management and Budget (OMB) granted OSM an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 (Reduction of Regulatory Burden) for actions related to approval or conditional approval of State regulatory programs, actions, and program amendments. Accordingly, preparation of a regulatory impact analysis is not necessary and OMB regulatory review is not required.

Compliance With Executive Order 12778

The Department of the Interior has conducted the reviews required by section 2 of E.O. 12778 and has determined that this rule meets the applicable standards of subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State regulatory programs and program amendments since each such program is drafted and promulgated by a specific State, not by OSM. Under sections 503 and 505 of SMCRA (30 U.S.C. 1253 and 1255) and 30 CFR 730.11, 732.15, and 732.17(h)(10), decisions on proposed State regulatory programs and program amendments submitted by the States must be based solely on a determination of whether the submittal is consistent with SMCRA and its implementing Federal regulations and whether the requirements of 30 CFR parts 730, 731, and 732 have been met.

Compliance With the National Environmental Policy Act

No environmental impact statement is required for this rule since section 702(d) of SMCRA (30 U.S.C. 1292(d)) provides that agency decisions on proposed State regulatory program provisions do not constitute major Federal actions within the meaning of

section 102(2)(C) of the National Environmental Policy Act, 42 U.S.C. 4332(2)(C).

Compliance With the Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by OMB under the Paperwork Reduction Act, 44 U.S.C. 3507 *et seq.*

Compliance with the Regulatory Flexibility Act

The Department of the Interior has determined that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The State submittal which is the subject of this rule, is based upon Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. Hence, this rule will ensure that existing requirements previously promulgated by OSM will be implemented by the State. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions for the counterpart Federal regulations.

List of Subjects in 30 CFR Part 926

Intergovernmental relations, Surface mining, Underground mining.

Dated: October 23, 1992.

Raymond L. Lowrie,

Assistant Director, Western Support Center.

BILLING CODE 4310-05-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[Region II Docket No. 114; FRL 4544-4]

Approval and Promulgation of Implementation Plans; New York State Implementation Plan Revision

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a revision to the New York State Implementation Plan (SIP) related to the control of volatile organic compounds. The SIP revision consists of a new part 236, "Synthetic Organic Chemical Manufacturing Facility Component Leaks" and an amended part 200, "General Provisions" of title 6 of the New York Code of Rules and Regulations. These revisions correct deficiencies in New York's SIP, as required by the Clean Air Act (CAA) as amended in 1990. New York was required to make these corrections pursuant to a SIP call issued in 1988 and pursuant to section 182(a)(2)(A) of the CAA. EPA has evaluated these regulations and proposes approval of part 200 and part 236 under section 110(k)(3) as meeting the requirements of Section 110(a) and part D of the CAA.

DATES: Comments must be received on or before January 13, 1993.

ADDRESSES: All comments should be addressed to: Constantine Sidamon-Eristoff, Regional Administrator, Environmental Protection Agency, Region II Office, 26 Federal Plaza, New York, New York 10278.

Copies of the state submittal are available at the following addresses for inspection during normal business hours:

Environmental Protection Agency, Region II Office, Air Programs Branch, 26 Federal Plaza, room 1034A, New York, New York 10278.

New York State Department of Environmental Conservation, Division of Air Resources, 50 Wolf Road, Albany, New York 12233.

SUPPLEMENTARY INFORMATION:

Background

Pursuant to the 1970 Clean Air Act, the New York City Metropolitan area (NYCMA) which is comprised of New York City, Nassau, Suffolk, Westchester and Rockland counties was designated nonattainment for ozone and required to submit a SIP which would attain the National Ambient Air Quality Standard (NAAQS) for ozone, by December 31, 1982. New York requested the EPA granted an extension of the attainment date to December 31, 1987.

On May 26, 1988, EPA informed the Governor of New York that the SIP for the NYCMA was substantially inadequate to attain the NAAQS for ozone and carbon monoxide. A follow-up letter of June 14, 1988, to the New York State Department of Environmental Conservation (NYSDEC) contained the basis for this finding of SIP inadequacy and identified both the specific deficiencies in New York's existing regulations and regulations that New York had committed to develop but did not.

On November 15, 1990 amendments to the Clean Air Act were enacted. Public Law 101-549, 104 Stat. 2399, codified at 42 U.S.C. 7401-7671q (Amendments). In amended section 182(a)(2)(A), Congress requires that ozone nonattainment areas fix their deficient reasonably available control technology (RACT) rules for ozone. Areas that were designated nonattainment of the NAAQS before enactment of the Amendments and that were classified as marginal or worse as of enactment, are required to correct any deficiencies to its RACT rules. Section 182(a)(2)(A) establishes a May 15, 1991 deadline for correcting RACT as it was required under pre-amended section 172(b) as that requirement was interpreted in pre-amendment guidance.[1] The SIP call letters interpreted that guidance and indicated corrections necessary for specific nonattainment areas. The NYCMA nonattainment area is classified as severe.[2] Therefore, this area is subject to the RACT fix-up requirement and the May 15, 1991 deadline.

On December 19, 1990 EPA sent a letter to the Governor of New York identifying a number of activities that the CAA required in the near term. The specific problems were identified in a January 30, 1991 letter to the NYSDEC.

The most significant problems EPA identified with the SIP were the failure to develop a control measure regulating the detection and repair of component leaks at synthetic organic chemical manufacturing (SOCMI) facilities, an inadequate definition of volatile organic compound (VOC) and inadequate emission limitations for certain surface coatings. This SIP revision addresses the missing control measure for SOCMI facilities and the inadequate definition of VOC.

State Submittals

On January 8, 1992, NYSDEC submitted to EPA a request to revise its SIP. The revisions consisted of a new part 236, "Synthetic Organic Chemical Manufacturing Facility Component Leaks" and an amended part 200,

[1] Among other things, the pre-amendment guidance consists of: The Post-87 policy, 52 FR 45044 (November 24, 1987); the Bluebook, "Issues Relating to VOC Regulation Cutpoints, Deficiencies and Deviations, Clarification to Appendix D of November 24, 1987 Federal Register Notice" (of which notice of availability was published in the Federal Register on May 25, 1988); and the existing CTGs.

[2] NYCMA retained its designation of nonattainment and was classified by operation of law pursuant to section 107(d) and 181(a) upon enactment of the Amendments (56 FR 56694).

"General Provisions" of title 6 of the New York Code of Rules and Regulations. These revisions address only the deficiencies which EPA identified with these regulations. New York had adopted both of these regulations on December 31, 1991. A summary of EPA's review and findings concerning these regulations follows.

Part 236

Part 236 regulates the monitoring and repair of leaks at SOCMI facilities. It requires SOCMI facilities to monitor components for leaks every three months. With NYSDEC approval, components that are unsafe to monitor may be monitored on an annual basis. Once a leak has been detected it must be repaired within fifteen days, unless repair would require shutting down the process unit. It this case, repair may be delayed until the next process unit shutdown.

Test methods for detecting leaks are specified. SOCMI facility operators are also required to maintain records of the monitoring of all components and the repair of all identified leaks. In addition, quarterly reports must be submitted to the NYSDEC.

Exemptions are allowed for components not in gas/vapor or light liquid service, components in vacuum service, components in process units which only produce the regulated compounds as byproducts and components in service fewer than 300 hours a year. These exemptions are consistent with EPA policy and guidance.

Section 236.6(e)(3) allows NYSDEC to accept the use of alternative methods of compliance if a source can demonstrate that the methods utilized constitute RACT. NYSDEC has agreed that for purposes of being federally enforceable it will submit any alternate requirements to EPA for approval. EPA will not recognize any alternate requirement until it is approved by EPA. Approval of a variance request will involve a case-by-case review that will be based on the effect of the proposed variance on air quality and on the ability of a facility to comply with the existing regulation.

Because EPA believes that part 236 meets the RACT requirements for SOCMI sources, EPA is proposing to approve part 236.

Part 200

Revised part 200 contains several new definitions and revisions of several other definitions. In addition, it lists the federal new source performance standards (NSPS), and the national emission standards for hazardous air pollutants (NESHAPS) that EPA has delegated NYSDEC the authority to implement.

The definitions that have been added to part 200 are: Municipal solid waste, municipal solid waste incineration facility, nonreactive volatiles, nonvolatile material and PM10.

The definitions that have been revised are: Air cleaning installation, emission, emission rate potential, facility, incinerator, maximum operating heat input, modification, process, refuse, standard conditions and volatile organic compound (VOC).

The definition of maximum operating heat input in § 200.1(gg) was changed to reflect New York's practice of specifying the maximum operating heat input as the permissible operating limit on permits to construct or certificates to operate. This practice was established by an April 27, 1983 letter from the Air Director of NYSDEC and will now be incorporated into the SIP.

The definition of VOC in § 200.1(mmm) was changed to reflect EPA's definition of VOC (40 CFR 51.100(s)). Instead of using vapor pressure limits as a means of defining VOC, it now is defined as an organic compound which participates in atmospheric photochemical reactions. New York's revised definition of VOC allows sources to measure VOC's either by EPA approved test methods in appendix A of title 40 Code of Federal Regulations part 60 or by an alternative method acceptable to the NYSDEC on the basis of a demonstration that it is as accurate as the appendix A method. The ability to use alternate test methods is needed for the rare instances when standard test methods cannot be used. NYSDEC has agreed that for purposes of being federally enforceable it will submit these alternate test methods to EPA for approval. EPA will not recognize any alternate test method until it is approved by EPA. Approval of an alternative test method will be based on a case-by-case review that involves the comparison of the proposed test method and the EPA method and on the ability of a facility to comply with the existing regulation.

The definition of nonvolatile material in § 200.1(oo) also allows for the use of alternative test methods. For the reasons explained above, NYSDEC has agreed that for purposes of being federally enforceable it will submit these alternate test methods to EPA for approval.

Section 200.10 lists the NSPS and NESHAPS that EPA has delegated to NYSDEC. This section is for informational purposes only and is not part of the SIP. The official list of NSPS's delegated to NYSDEC appear in 40 CFR part 60.4(ff)(1) and the NESHAPS are officially delegated to NYSDEC through **Federal Register** notices. Since this section is not part of the SIP, EPA is not granting either an approval or a disapproval of this section. EPA notes here that this section lists a number of NSPS and NESHAPS that have not been delegated to NYSDEC. At this time, EPA has not delegated to NYSDEC the following NSPS that are listed in table 1 of part 200.10: 40 CFR 60 subpart Db Industrial-Commercial-Institutional Steam Generating Units, 40 CFR 60 subpart Kb, Volatile Organic Liquid Storage Vessels Constructed after July 23, 1984; 40 CFR 60 subpart Na, Secondary Emissions from Basic Oxygen Processes Steelmaking Facilities; 40 CFR 60 subpart BBB, Rubber Tire Manufacturing and 40 CFR part 60 subpart TTT, Surface Coating of Plastic Parts for Business Machines. EPA has also not delegated the following NESHAPS, listed in table 2 of part 200.10: 40 CFR part 61 subpart O, Arsenic from Primary Copper Smelters and 40 CFR part 61 subpart P, Arsenic from Metallic Arsenic Production. EPA retains primary authority to implement the above standards. Therefore, sources subject to the above standards must make any required submissions to the EPA Region II office. Specific requirements for the individual NSPS and NESHAPS can also be found in current volumes of the CFR. All of the other NSPS and NESHAPS listed in tables 1 and 2, respectively, of part 200.10 have been delegated to NYSDEC.

EPA is proposing to approve part 200.

Conclusion

EPA is proposing approval of parts 200 and 236 because they are consistent with EPA policy and guidance and therefore EPA believes they meet the RACT requirements of section 182(a)(2)(A).

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 et seq., EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant

impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000

SIP approvals under section 110 and subchapter I, part D of the CAA do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *US EPA*, 427 US 246, 256–66 (S.Ct. 1976); 42 U.S.C. 7410(a)(2).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Medicare and Medicaid Programs; Requirements for Physician Incentive Plans in Prepaid Health Care Organizations

AGENCY: Health Care Financing Administration (HCFA), HHS. Office of Inspector General (OIG), HHS.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend the regulations governing Federally-qualified health maintenance organizations (HMOs) and competitive medical plans (CMPs) contracting with the Medicare program, and certain HMOs and health insuring organizations (HIOs) contracting with the Medicaid program, by implementing requirements in sections 4204(a) and 4731 of the Omnibus Budget Reconciliation Act of 1990 concerning physician incentive plans.

DATES: Written comments will be considered if we receive them at the appropriate address, as provided below, no later than 5 p.m. on February 12, 1993.

ADDRESSES: Mail comments to the following address:

Health Care Financing Administration, Department of Health and Human Services. Attention: OCC–024–P, P.O. Box 26676, Baltimore, Maryland 21207.

If you prefer, you may deliver your written comments to one of the following addresses:

Room 309–G, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201 or

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland 21207.

Due to staffing and resource limitations, we cannot accept comments by facsimile (FAX) transmission. In commenting, please refer to file code OCC–024–P. Written comments received timely will be available for public inspection as they are received, beginning approximately three weeks after publication of this document, in Room 309–G of the Department's offices at 200 Independence Avenue, SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (phone: 202–690–7890).

Organizations and individuals desiring to submit comments on the reporting requirements discussed under the section on "Collection of Information Requirements" of this preamble should direct them to the Health Care Financing Administration at one of the addresses cited above, and to the Office of Information and Regulatory Affairs, Attention: Allison Herron Edyt, Office of Management and Budget, New Executive Office Building (Room 3001), Washington, DC, 20503.

FOR FURTHER INFORMATION CONTACT:

Medicare: Parashar Patel, (202) 619–3166.

Medicaid: Ann Page, (410) 966–5364.

Office of Inspector General: Zeno St. Cyr, II, (202) 619–3270.

SUPPLEMENTARY INFORMATION:

I. Background

A. Introduction

Prepaid health care organizations, such as health maintenance organizations (HMOs), competitive medical plans (CMPs), and health insuring organizations (HIOs), are entities that provide enrollees with comprehensive, coordinated health care in a cost-efficient manner. The goal of prepaid health care delivery is to control health care costs through preventive care and care management and provide enrollees with affordable, coordinated, quality health care services. Titles XVIII and XIX of the Social Security Act (the Act) authorize contracts with prepaid health care organizations for the provision of covered health services to Medicare beneficiaries and Medicaid recipients. Such organizations may contract under either a risk-based or cost-reimbursed contract.

B. Medicare

Section 1876 of the Act authorizes the Secretary to enter into contracts with eligible organizations (HMOs that have been Federally qualified under section 1310(d) of the Public Health Service Act, and CMPs that meet the requirements of section 1876(b)(2) of the Act) to provide Medicare-covered services to beneficiaries, and specifies the requirements to be met by the organizations. Section 1876 of the Act also provides for Medicare payment at predetermined rates to eligible organizations that have entered into risk-based contracts under Medicare, or for payment of reasonable costs to eligible organizations that have entered into cost-reimbursed contracts. Implementing Federal regulations for the organization and operation of Medicare prepaid health care organizations, contract requirements, and conditions for payment are located at 42 CFR 417.400–417.694.

Risk-based organizations are paid a prospectively-determined per capita monthly payment for each Medicare beneficiary enrolled in the organization. This capitated payment is the projected actuarial equivalence of 95 percent of what Medicare would have paid for the Medicare beneficiaries if they had received services from a fee-for-service Medicare provider or supplier. Organizations paid on a risk basis are liable for any difference between the Medicare prepaid amounts and the actual costs they incur for providing services, and are therefore "at risk."

Cost-reimbursed organizations are paid monthly interim per capita payments that are based on a budget. Later, a retrospective cost settlement occurs to determine the reasonable costs actually incurred by the organization for the covered services it furnished to its Medicare enrollees.

C. Medicaid

Section 1903(m) of the Act specifies requirements that must be met for States to receive Federal financial participation (FFP) for their contracts with organizations (HMOs or HIOs) to provide specific arrays of services ("comprehensive services") on a risk basis, either directly or through arrangements. Federal implementing regulations for these contract requirements and conditions for payment are located at 42 CFR part 434.

States determine the per capita monthly rates that are to be paid to risk-based organizations. FFP is available for these payments at the matching rate applicable in the State as long as we determine that: (1) the HMO or HIO rates are actuarially sound; (2) the rates do not exceed the cost of providing the same scope of services on a fee-for-service basis, to an actuarially equivalent non-enrolled population group; and (3) the contract meets the additional requirements at 42 CFR part 434 and 45 CFR part 74.

II. Legislative History

Section 9313(c) of the Omnibus Budget Reconciliation Act of 1986 (OBRA '86), Pub. L. 99–509, enacted statutory language prohibiting hospitals and prepaid health care organizations with Medicare or Medicaid risk contracts from knowingly making incentive payments to a physician as an inducement to reduce or limit services to Medicare beneficiaries or Medicaid recipients. Under OBRA '86, parties who knowingly made or accepted such payments would have been subject to specified civil money penalties. OBRA '86 also required that the Secretary report on incentive arrangements in HMOs and CMPs.

The original implementation date for the OBRA '86 physician incentive provisions applicable to prepaid health care organizations was April 1, 1989. This date was extended by section 4016 of the Omnibus Budget Reconciliation Act of 1987 (OBRA '87), Pub. L. 100–203, to April 1, 1990. Section 6207 of the Omnibus Budget Reconciliation Act of 1989 (OBRA '89), Pub. L. 101–239, further extended the date to April 1, 1991. Sections 4204(a) and 4731 of the Omnibus Budget Reconciliation Act of 1990 (OBRA '90), Pub. L. 101–508, repealed the prohibition of all physician incentive plans in prepaid health care organizations and enacted requirements for regulating these plans.

Specifically, section 4204(a)(1) of OBRA '90 amended section 1876(i) of the Act to list these requirements, which are that prepaid health care organizations must:

- Not operate a physician incentive plan that directly or indirectly makes specific payments to a physician or physician group as an inducement to limit or reduce medically necessary services to a specific individual enrolled with the organization;
- Disclose to HCFA their physician incentive plan arrangements in such detail as to allow HCFA to determine compliance of the arrangements with Departmental regulations; and
- In instances where a physician incentive plan places a physician or physician group at "substantial financial risk" (as defined by the Secretary) for services not provided directly, provide the physicians or physician groups with adequate and appropriate stop-loss protection (under standards determined by the Secretary), and conduct surveys of currently and previously enrolled members to assess the degree of access to services and the satisfaction with the quality of services.

Each Medicare risk and cost contract must provide that the organization may not operate a physician incentive plan that does not meet the requirements stated above. Section 4731 of OBRA '90 enacted similar provisions for the Medicaid program by amending sections 1903(m)(2)(A) and 1903(m)(5)(A) of the Act.

In addition, sections 4204(a)(2) and 4731(b)(2) of OBRA '90 added violations of the above requirements to the list of violations in sections 1876(i)(6) and 1903(m)(5) of the Act that could subject an HMO, CMP, or HIO to intermediate sanctions and civil money penalties. (On July 22, 1991, we published a Notice of Proposed Rulemaking (NPRM) that described these intermediate sanctions and civil money penalties (see 56 FR 33403). For clarity and consistency, we are republishing certain sections of the regulations that were proposed in the July 22 NPRM because we are proposing to revise those regulations to incorporate the penalty provisions of this proposed rule. See Section V. of this preamble, Revisions to the Regulations, for the specific sections that are being republished).

III. Discussion of Physician Incentive Plans

Effective utilization control that identifies both under- and over-utilization is essential for the efficient operation of prepaid health care organizations. A prepaid health care organization needs to minimize over-utilization of services not only to prevent unnecessary spending, but also to reduce the risk of unnecessary and intrusive procedures. However, a prepaid health care organization also needs to assure that all medically necessary services are provided to protect patient health and to prevent more costly care later. In addition, if a prepaid health care organization inappropriately limits care, the organization may be risking its reputation and jeopardizing its ability to compete in the marketplace. Although professional ethics, risk of malpractice liability, and market competition help ensure proper utilization of services, Medicare and Medicaid require both cost-reimbursed and risk organizations to have internal quality assurance programs, external quality review or medical audits, and other mechanisms to ensure proper delivery of health care services. Medicare and Medicaid contracts also are subject to periodic monitoring for compliance. In addition, the July 22, 1991, NPRM on civil money penalties and intermediate sanctions provides for sanctions that may be imposed when an HMO or CMP fails substantially to provide medically necessary services.

One mechanism many prepaid health care organizations use to encourage proper utilization is a financial incentive as part of a physician incentive plan. OBRA '90 defines a physician incentive plan as any compensation arrangement between an eligible organization and a physician or physician group that may directly or indirectly have the effect of reducing or limiting services provided with respect to individuals enrolled with the organization.

A review and analysis of physician incentive plans in a sample of HMOs was conducted and presented in DHHS's 1990 Report to the Congress, "Incentive Arrangements Offered by Health Maintenance Organizations and Competitive Medical Plans to Physicians." The results showed a wide variety of incentive plans. There were differences in the types of incentive payments, the distribution of incentives, the basis for determining the incentive payments, and the parties or entities the incentives affected. This wide variety of physician incentive plans make it difficult to develop regulations that will apply to all arrangements. However, despite the differences, the Report examined several broad categories of

incentive arrangements, which we have considered in developing this proposal.

Physicians in prepaid health care organizations generally receive fee-for-service payments, salary, or capitation payments (a set dollar amount per patient) for the services they provide. Financial incentives may be used with the various types of physician payments to encourage appropriate levels of referral services. Referral services are any specialty, inpatient, outpatient, or laboratory services that a physician arranges but does not provide directly. Prepaid health care organizations may hold physicians or physician groups at risk for all or a portion of the cost of referral services to that they have a financial incentive to arrange for the provision of only medically necessary services. If the physician or physician group successfully controls the levels of referral services, it may receive additional compensation (an incentive payment) from the prepaid health care organization. The incentive payment may take the form of unused capitation, a returned withhold, or a bonus payment. Each of these methods is described below.

A capitation payment is a set dollar amount per patient per month that a prepaid health care organization pays to a physician or physician group to cover a specified set of services, without regard to the actual number of services provided to each person. The capitation may cover the physician's own services, referral services, or all medical services and/or administrative costs. If patient costs exceed the capitation amount, the physician must absorb these additional costs. If costs are below the capitation, the physician may keep the additional money.

Withholds are percentages of payments or set dollar amounts that a prepaid health care organization deducts from each physician's or physician group's payment (salary, fees, or capitation). The amount withheld is set aside in pools to pay for specialty referral services and inpatient hospital services. The withhold is at risk because it may be used to pay for referral services. When referral costs exceed a prepaid health care organization's budget, part or all of the withhold may be forfeited depending on the terms of the physician's contract. If referral costs do not exceed the ceiling, part or all of the withhold may be returned to the physician or physician group. Some plans limit the amount of the risk to the withhold; others hold the physician or physician group liable for amounts beyond the amount withheld. Withholds are most often used with fee-for-service or capitation payments.

Bonuses are payments prepaid health care organizations make to a physician or physician group beyond the physician's set salary, fee-for-service payments, or capitation. Bonuses may be based on a physician's or physician group's level of referral services, or may be independent (e.g., based on the overall performance of the organization). This system is most often used for salaried physicians in staff model HMOs.

If the physician or physician group has excessive referrals (as defined by the prepaid health care organization), it may not receive any incentive funds. In addition, the prepaid health care organization may hold the physician or physician group liable for referral costs that exceed a specified threshold. The prepaid health care organization may also increase the physician's or physician group's withhold or make other changes in its incentive arrangements.

Many physician incentive plans incorporate stop-loss protection to limit the liability of the physician or physician group. Most often, the stop-loss protection limits a physician's maximum liability per patient to a specific dollar amount. For example, the organization may limit a physician's liability to $5,000 per patient from his or her withhold fund, even if actual charges are higher. In some cases, prepaid health care organizations place an aggregate limit on the liability the physician could face. Instead of limiting liability to $5,000 per patient, the organization could limit total liability for all patients to $25,000. Stop-loss protection is particularly common with capitation arrangements.

There are other variables that may affect the amount of risk or the impact of financial incentives on physicians. For example, incentive payments may be calculated according to each individual physician's performance or by a physician group's performance. The size of the physician group will also impact the incentives. Performance may be evaluated over a long or short timeframe. The number of enrollees among whom the risk is spread and the amount of total income at risk vary. In addition, the relative health status of the patients involved increases risk if the enrollees are high utilizers, or may result in lower risk if the enrollees are healthier than the average enrollee. The percentage of the physician's practice that is made up of HMO/CMP/HIO patients, as opposed to fee-for-service patients, is also pertinent.

IV. Provisions of the Physician Incentive Plan Requirements

Section 9313(c) of OBRA '86 prohibited prepaid health care organizations with Medicare or Medicaid risk contracts from knowingly making incentive payments to a physician as an inducement to reduce or limit services to Medicare beneficiaries or Medicaid recipients. However, research conducted by DHHS, subsequent to the OBRA '86 prohibition, failed to find a link between the quality of care provided under the Medicare and Medicaid programs and the structure of physician incentive plans. Similarly, other researchers have found no linkage. Despite the lack of evidence, however, various media sources have alluded to quality problems related to physician incentive payments.

Sections 4204(a) and 4731 of OBRA '90 repealed the OBRA '86 prohibition of physician incentive plans in HMOs and, instead, required that physician incentive plans be regulated. To implement this legislation for Medicare, we are proposing to impose a new contract requirement pertaining to physician incentive plans. For Medicaid, we are proposing new requirements for the granting of FFP for State Medicaid agency contracts with HMOs and HIOs. These requirements address:

- The scope of the regulation;
- Disclosure requirements;
- Criteria for the determination of substantial financial risk;
- Requirements for physician incentive plans that place physicians at substantial financial risk;
- Prohibitions on certain physician payments; and
- Penalties.

Each category of requirements is discussed individually below.

We are proposing regulations, as required by OBRA '90, and after extensive consultation with the HMO industry, which we believe establish risk thresholds that are within the bounds of current industry practices and do not unduly restrict prepaid health care organizations' operational flexibility. However, if new information regarding the influence of various elements of physician incentive plans becomes available, we will evaluate it to determine if the approach in our proposed regulations should be reconsidered.

A. Scope

These proposed regulations apply to all Medicare- or Medicaid-contracting HMOs, CMPs, and HIOs with physician incentive plans. A physician incentive

plan is any compensation arrangement between an HMO, CMP, or HIO and a physician or a physician group that may directly or indirectly have the effect of limiting or reducing services provided to enrollees.

We are proposing to apply these requirements only to physician incentive plans that base incentive payments (in whole or in part) on services provided to Medicare beneficiaries or Medicaid recipients. We are proposing to limit the scope of the requirements based on the fact that sections 4204(a)(2) and 4731 of OBRA '90 amended sections 1876 and 1903(m) of the Act, which govern Medicare and Medicaid contracts, but did not amend title XIII of the Public Health Service Act, which governs all Federally-qualified HMOs. In addition, violations of the physician incentive plan requirements may result in civil money penalties and/or intermediate sanctions which only affect a plan's payment for, or ability to enroll Medicare beneficiaries or Medicaid recipients. We believe that these facts, taken together, reflect Congressional intent that this legislation apply only to Medicare and Medicaid enrollees of prepaid health care organizations.

We considered making these proposed regulations applicable to all physician incentive arrangements in HMOs, CMPs, and HIOs (including arrangements that affected only commercial enrollees), instead of limiting it to arrangements that affect only Medicare beneficiaries and Medicaid recipients. The statutory language uses the term "individuals enrolled with the organization," which could be interpreted as all of an organization's enrollees, not just Medicare or Medicaid enrollees as proposed in this rule. We are specifically seeking comments regarding the proposed scope of the regulations.

B. Disclosure

We are proposing that an HMO, CMP or HIO disclose to HCFA (for Medicare) or to the State Medicaid agency (for Medicaid) sufficient information on physician incentive plans that affect Medicare beneficiaries or Medicaid recipients so that HCFA or States may determine whether the organization is in compliance with our proposed requirements. We are proposing that the organization submit the information—

- When it applies for a contract;
- When it applies for a service area expansion (for Medicare);
- Thirty calendar days before a change in its incentive plan; or
- Within 30 calendar days of a request by HCFA (for Medicare) or the State Medicaid agency (for Medicaid).

In addition, we are proposing a one-time disclosure requirement. This one-time disclosure would require organizations that have Medicare or Medicaid contracts in effect when this proposal is published as a final rule to submit the required information within 30 days from the effective date of the final rule.

Under our proposed disclosure requirements, an organization must submit details about any incentive plan that affects Medicare beneficiaries or Medicaid recipients to HCFA (for Medicare) or to the State Medicaid agency (for Medicaid) so that these agencies may determine whether the plan meets all other proposed requirements for physician incentive plans. All organizations must submit sufficient information to determine whether the physician incentive plan includes the prohibited arrangements proposed at § 417.479(c) and whether the plan places physicians or physician groups at substantial financial risk, as defined in proposed § 417.479(d). Organizations that hold physicians or physician groups at substantial financial risk must also submit sufficient details regarding their enrollee surveys and stop-loss protection so that HCFA (for Medicare) or the State Medicaid agency (for Medicaid) can determine that they comply with the proposed standards. If HCFA or the State Medicaid agency determines that the information the organization supplies is insufficient, the organization will be required to supply additional information within 30 days of receipt of written notification.

For Medicare contracting HMOs and CMPs, we considered reviewing the physician incentive plans only at the time of site visits, which HCFA conducts at least every 2 years. However, if a prepaid health care organization changed its physician incentive plan shortly after a site visit, we may not learn of the new compensation arrangements for 2 years. Requiring disclosure of material 30 days before a change in the physician incentive plan will ensure that we have current information. It also will facilitate quick correction of plans if an organization is found out of compliance. Because HMOs and CMPs usually do not change their incentive plans more often than annually, we do not believe that this requirement will be unduly burdensome.

We also considered not requiring submission of the physician incentive plan each time it was substantially changed. However, we believe that it is important to maintain current information on the incentive plans. We also believe that this requirement is consistent with Congressional intent that HCFA be apprised of the specifics of an organization's current physician incentive plans.

C. Substantial Financial Risk

We are proposing that a physician or physician group be considered to be at substantial financial risk if more than a specified percentage (the risk threshold) of the prepaid health care organization's total potential payments to the physician or physician group is at risk, and the risk is based on the costs of services the physician or physician group does not provide (e.g., referrals to specialists or the costs of inpatient care). For purposes of determining substantial financial risk, we are defining payments as any amounts the organization pays physicians or physician groups for services they provide, plus amounts paid for administration and controlling levels or costs of referral services. Payments do not include bonuses or other forms of compensation that are not based on referral levels (such as bonuses based solely on quality of care provided, patient satisfaction, and overall plan performance).

"At risk" means amounts that a physician or physician group may or may not receive due to factors other than the number of patients served (for capitated physicians), hours worked (for salaried physician), or services performed by the physician (for fee-for-service physicians). For example, an amount would be "at risk" if its receipt depended on the status of the pool for referral services at a specified time.

Under this proposed rule, the risk threshold that determines substantial financial risk depends on the frequency with which the health plan assesses or distributes incentive payments. The risk threshold we are proposing for substantial risk for prepaid health care organizations that assess or distribute incentive payments no more often than annually is 25 percent. The risk threshold we propose for prepaid health care organizations that assess or distribute incentive payments more often than annually is 15 percent. The term "assess" means the final calculation of the incentive payment, after which further actions by the physician or physician group will not affect the incentive payment for the period being assessed. An incentive payment assessment does not include physician profiles or updates that inform providers of their performance under an incentive plan if the period being assessed has not expired.

Because physicians and physician groups voluntarily agree to participate in financial incentive arrangements, we are proposing an outlier approach in determining substantial financial risk. The DHHS Report to the Congress identified 25 percent and 30 percent as the upper ranges of withholds used under typical circumstances. In addition, the Group Health Association of America identified the median withhold percentage as 20 percent (GHAA Research Brief, Nov. 1987). Thus, our proposed rule establishes two thresholds for determining when substantial financial risk exists: (1) 25 percent of physician or physician group payments from prepaid health care organizations that assess or distribute incentive payments no more often than annually; and (2) 15 percent when the assessment or distribution occurs more often than on an annual basis. Further, we believe that an outlier approach is appropriate since there is no evidence that conventional physician incentive plans (as discussed in DHHS's 1990 Report to the Congress) have reduced access or caused quality of care problems.

It is also important to note that physician financial incentives do not work in isolation. There are other factors, such as the threat of malpractice, quality assurance programs, peer review, and professional ethics, that work in conjunction with financial incentive plans to ensure that the appropriate level of services is provided.

1. Substantial Financial Risk When Incentive Payments are Assessed No More Than Annually

We believe that allowing possible forfeiture of up to 25 percent of a physician's or physician group's payments (as defined in § 417.479(b)) is reasonable for purposes of determining whether substantial financial risk exists when incentive payments are made no more often than annually. As stated in DHHS's Report to the Congress concerning physician incentive plans, a large proportion of physicians in fee-for-service have bad debts ranging from 10 to 20 percent (i.e., bills never collected) and many have voluntarily reduced their fees as much as 20 to 25 percent below their usual charges for selected patients. Therefore, financial incentive plans that place physicians or physician groups at risk for 25 percent of their payments from prepaid health care organizations would appear to be of the same magnitude as the reduction in payments many physicians voluntarily accept in return for increased volume and protection against bad debt, and in response to marketplace competition. (See DHHS's 1990 Report to the Congress, p. V–37.)

The DHHS Report to the Congress also noted that prepaid health care organization physicians may perceive withholds as discounts. The Report states that "in many cases there is no expectation that more than some small proportion of the withhold will ever be paid. It can be argued that in these circumstances the withholds are in effect discounts . . .". (See p. V–37) The withhold is often used to cover unanticipated expenses and is usually returned only if there are plan surpluses.

Often, prepaid health care organizations use more than one type of compensation arrangement. If more than one type of arrangement is used, we will consider all the different risk arrangements placed on physicians or physician groups to determine whether they collectively exceed the 25-percent threshold. For example, if an organization's payments included withholds and bonuses, physicians or physician groups would be at substantial financial risk if the combined withhold amounts and potential bonuses comprised more than 25 percent of their total potential payments from the plan.

We would apply the 25-percent risk threshold as follows:

a. *Withholds*—Withholds on payments to physicians or physician groups to cover referral services put them at substantial financial risk when:

- The withholds are greater than 25 percent of payments for services they provide directly and administrative costs; or
- The withholds are 25 percent or less, but the physicians or physician groups are liable for amounts over the 25-percent threshold.

This would include withholds greater than 25 percent that an organization imposes because a physician repeatedly makes referrals for services that are not medically necessary. We emphasize, however, that physicians would only be considered to be at substantial financial risk if they are at risk for services they do not provide.

Example 1: An organization's annual payment to a physician for his or her services and administration total $100,000 and the organization withholds 25 percent (or $25,000) to cover deficits in the referral or inpatient hospital pool. The organization does not hold the physician liable for referral costs that exceed the withhold. The physician is not at substantial financial risk because he or she was not at risk for more than 25 percent of payments.

Example 2: An organization's annual payments to a physician total $100,000 and the organization imposes a 20-percent withhold ($20,000) for referrals. In addition, the organization holds the physician liable for up to $5,000 of any referral costs not covered by the withhold. The physician's referrals total $35,000. That is, the physician's referral costs exceed the withhold by $15,000. However, the organization does not hold its physicians liable for amounts over 25 percent of their payments. Since the physician is not liable for amounts over 25 percent of payments ($25,000), the physician is not at substantial financial risk. Had the organization held the physician liable for all amounts over the withhold (rather than limiting such liability to $5,000 for referral costs not included in the 20-percent withhold), the physician would have lost an additional $15,000 (or $10,000 more than the 25-percent risk threshold), and would have been at "substantial financial risk" because the physician's referral costs of $35,000 exceeded 25 percent of payments.

b. Bonuses—Bonuses are of concern only when they are based on levels of referral services arranged by physicians or physician groups. We believe that bonuses that represent a considerable portion of a physician's payments from an organization potentially provide the same incentives to limit services as withholds. This is true particularly since many physicians do not expect to receive their withholds back, and perceive return of all or a portion of a withhold as a bonus. Therefore, we are proposing to treat bonuses based on levels of referral services comparable to withholds.

Thus, we propose that substantial financial risk exists if bonuses represent an additional payment greater than 33 percent of the total amount the organization would pay the physician or physician group for services provided directly and for administrative costs if the bonus was not paid. The effect of this limit is to ensure that no more than 25 percent of a physician's total potential income is contingent on the status of the referral pool at the end of a specified period.

Thus, this proposal consistently limits liability of physicians or physician groups for referral services to 25 percent of payments received from an organization. Similarly, it limits bonuses based on a physician's or physician group's referral levels. The objective is to treat compensation arrangements that are based on utilization factors similarly. To the extent that surpluses or deficits accrue in risk pools that cover referrals and

inpatient care, individuals subject to withholds and bonuses would be treated comparably in the distribution of the surpluses or deficits. Bonuses that are not based on utilization will be evaluated to determine if they meet the definition of a physician incentive plan as defined in section 4202(a) of OBRA '90.

Example: An organization's annual payments to a physician total $75,000. If the physician does not exceed utilization targets for referral and inpatient hospital services, he or she is eligible for a $25,000 bonus (33 percent of $75,000). The physician is not at substantial financial risk because the bonus did not exceed 33 percent of payments.

c. *Combination Withhold and Bonuses*—We are proposing that, if a physician incentive plan consists of both withholds and bonuses as incentives to provide appropriate utilization, the organization must ensure that no more than 25 percent of the total potential payments to the physicians or physician groups is contingent on the cost of referral services. Stated another way, the amount of the payment without the withheld amount and the bonus must be at least 75 percent of the total amount of the payments, including the withhold and bonus.

There are two methods by which an organization may determine the appropriate bonus for any given withhold. Both methods will result in the same withhold and bonus percentages. In the first method, the organization calculates the withhold's portion of 25 percent. Then, using the remaining percentage, the organization prorates the 33 percent allowed for the bonus. In the second method, the organization enters the withhold percentage in the following equation: (Withhold %) = –0.75(Bonus %) + 25%.

Example: An organization withholds 20 percent of its payments to a physician under a contract that provides for the return of withholds plus bonuses. It wants to calculate the maximum bonus. By method 1, the organization calculates that 20 percent is four-fifths of 25 percent. The organization prorates the 33 percent threshold (1/5 x 33 percent) to calculate that it cannot give more than a 6.6-percent bonus without putting the physician at substantial financial risk. By method 2, the organization puts the withhold percentage in the equation:

(20%) = –0.75(Bonus %) + 25%. This also calculates to be 6.6 percent.

d. *Capitation*—We are proposing that if an organization uses withholds or bonuses in conjunction with capitation payments that cover the costs of services provided directly and administrative costs, the requirements pertaining to withholds or bonuses would apply. If the organization uses only capitation and capitates its physicians for referral services, as well as for the services they provide directly, the physician or physician group would not be considered at "substantial financial risk" if—

- The organization specifies in the physician's or physician group's contract:
  - + The maximum possible payments to be made under the capitation plan, if referral costs are low, and
  - + The minimum possible payments to be made under the capitation plan, if referral costs are high; and
- The difference between the maximum and minimum payments based on referral levels is no more than 25 percent of the maximum payment. This is consistent with the threshold for withhold and bonus incentives.

The contract could either specify actual dollar amounts or a calculation from which HCFA or States could determine that the payment would meet the test. For example, the organization could state that the maximum payment would be $100 x (the number of patients) for low referrals and the minimum payment would be $75 x (the number of patients) for high referrals. If the organization does not clearly state the physician's or physician group's risk in the contract, as expressed in maximum and minimum payments to the physician or physician group, the incentive plan would be considered as "substantial financial risk."

In examples 1 and 2, an organization capitates a physician for all medical services at $200,000 annually. This capitation includes $100,000 for the services the physician provides directly and $100,000 for referral services.

Example 1: The organization pays for all referral services if the total cost of referral services exceeds $100,000. In other words, none of the physician's capitation for his own services is at risk. In addition, the HMO allows the physician to retain up to $33,000 of the unused capitation for referral services. The contract clearly states that:

- Regardless of the level of referral services, the physician will retain the capitation of $100,000 for services provided directly.
- If referrals are lower than anticipated, the physician may retain only the first $33,000 of savings. The highest possible payments from the HMO would be $133,000.

The amount at risk would be $133,000 minus $100,000, or $33,000, which is 24.8 percent of $133,000. Therefore, the physician is not at substantial financial risk.

Example 2: The organization does not allow the physician to retain any savings from the referral account. If referrals cost less than $100,000, the physician must return the remainder of the referral account to the HMO. If the referral costs are more than $100,000, the physician may be liable for up to 25 percent of the capitation for his own services. The contract clearly states that:

- If referrals exceed $125,000, the physician will receive no less than $75,000.
- If referrals are less than $100,000, the physician will receive no more than $100,000.

Since the difference ($25,000) between the highest possible payments ($100,000) and the lowest possible payments ($75,000) is no more than 25 percent of the maximum payments, the physician is not at substantial financial risk.

Example 3: The organization pays its physicians $200/patient/month for all health care services. Of that amount, $110 of the capitation cover the services the physician provides directly and the remaining $90 cover the costs of the referral services. The health plan specifies in its physician contracts that:

- The health plan will pay stop-loss protection for the physician if referral costs average more than $100 per patient. In other words, the physician will receive at least $100/patient/month.
- Physicians may retain only up to $23/patient/month, if referral costs average less than $90/patient/month. In other words, the physician will not retain more than $133/patient/month.

The difference between the highest possible payments ($133/patient/month x the number of patients) and the lowest possible payments ($100/patient/month) is $33/patient/month. This is 24.8 percent of the highest possible payments. Therefore the physician is not at substantial financial risk.

Arrangements that do not fit the above descriptions do not automatically put physicians at substantial financial risk. However, the organization must ensure that no more than 25 percent of the total payments to the physician or physician group for services provided directly and for administrative costs are at risk based on levels of referral services. Risk may exceed the threshold if stop-loss is provided and surveys are conducted.

2. Substantial Financial Risk When Incentive Payments Are Assessed More Often Than Annually

We are proposing a lower risk threshold (15 percent) for incentive

plans that assess or distribute incentive payments more than once a year. As noted in the DHHS Report to the Congress, referenced above, and in the General Accounting Office's (GAO's) Report to the Congress, "Medicare: Physician Incentive Payments by Prepaid Health Plans Could Lower Quality of Care," the shorter the timeframe over which incentive arrangements assess a physician's or physician group's performance, the more influence the incentive arrangement will have. This is because physicians or physician groups have fewer patients in a short timeframe over which to spread the risk of expensive treatment than in a long timeframe. Since these types of arrangements have the potential to have a stronger influence on physician behavior, we believe that the lower risk threshold is appropriate.

We would apply the 15-percent risk threshold in the same manner as we propose to apply the 25-percent risk threshold for incentive payments. As a reminder, the risk threshold applies only if the risk is based on a physician's or physician group's levels or costs of referral services. Specifically, we would implement the 15-percent risk threshold as follows:

a. Withholds—Withholds meet the risk threshold if:

- The withhold is greater than 15 percent of payments for services the physician or physician group provides directly plus administrative costs; or
- The withhold is 15 percent of payments or less, but the physician or physician group is liable for referral amounts over the 15-percent threshold.

b. Bonuses—Bonuses would exceed the risk threshold level if they represent more than 17.6 percent of the payments for administrative costs and services provided directly. Stated another way, bonuses would exceed the risk threshold if they exceeded 15 percent of the total of the payments plus the bonus.

c. Combination Withhold and Bonuses—If a physician incentive plan uses both withholds and bonuses, the organization must ensure that the physician's or physician group's liability is no more than 15 percent of their total payments. Stated another way, the amount of the payments without the withheld amount and the bonus must be at least 85 percent of the amount of the payments including the withhold and the bonus.

The organization may determine the appropriate bonus for any given withhold by two methods. First, the organization may use the prorating method. This method is discussed earlier in this preamble in the section entitled "Substantial Financial Risk When Incentive Payments Are Assessed No More Than Annually." Second, the organization may enter the withhold percentage in the following equation:

(Withhold %) = –0.85 (Bonus %) + 15%.

d. Capitation—If an organization uses withholds or bonuses in conjunction with capitation that covers the costs of services provided directly plus administrative costs, the requirements pertaining to withholds or bonuses would apply. If the organization uses capitation for referral services, we would evaluate the arrangement as discussed earlier in this preamble under the section entitled "Substantial Financial Risk When Incentive Payments Are Assessed No More Than Annually." The only difference would be that we would consider physicians and physician groups to be at substantial financial risk once their risk exceeded 15 percent of payments, as compared to the 25-percent risk threshold.

Arrangements that are not discussed in the preceding categories are not automatically assumed to create substantial financial risk. However, the organization must ensure that no more than 15 percent of the total payments to the physician or physician group are at risk based on referral services. Otherwise, the requirements to provide stop-loss protection and conduct periodic surveys under section 1876(i)(8)(A)(ii) of the Act will apply.

3. Other Options Considered for Defining Substantial Financial Risk

In addition to the definition presented in this NPRM, we considered several other options for defining substantial financial risk. We considered alternatives that would address many factors, in addition to the frequency of risk assessment, that affect the impact of the strength of incentive arrangements. First, we considered rating each factor that could influence an incentive plan. The organization's risk threshold would be the lowest risk threshold rating among its varying factors. For example, HCFA could rate the substantial financial risk threshold for Factor A (less than 5 physicians in a group) at 15 percent and Factor B (less than 250 prepaid health care organization patients) at 10 percent. An organization with no factors would have a threshold of 25 percent. An organization with Factor A would have a threshold of 15 percent. An organization with Factor B would have a threshold of 10 percent. An organization with both Factors A and B would also have a threshold of 10 percent, because the threshold of incentive plans with multiple factors would be the threshold of the lowest individual factor (in this case, Factor B, with a 10-percent threshold).

One specific factor we considered was the size of the physician's or physician group's patient panel. The use of a percentage risk will have varying effects on small and large patient panels. The following examples demonstrate these effects. In examples a. and b., the physician's total income is $100,000; the total patient panel is 1,000 patients; the HMO pays $100/patient/year; and the risk incentive is 25 percent.

a. Individual Physician, 100 HMO patients
Physician's income from HMO = $10,000 (one-tenth of total income)
Total dollars at risk = $2,500 (25% of $10,000)
Total income at risk = 2.5%

b. Individual Physician, 1,000 HMO patients
Physician's income from HMO = $100,000 (all income is from HMO)
Total dollars at risk = $25,000
Total income at risk = 25%

In examples c. and d., there are 10 physicians in the group, each sees 1,000 patients (total panel = 10,000 patients). As above, the HMO pays $100/patient/year and the risk incentive is 25 percent. The physician group's total income is $1,000,000.

c. Physician Group, 1,000 patients
Physician group's income from HMO = $100,000 (one-tenth of total income)
Total dollars at risk = $25,000 (25% of $100,000)
Total income at risk = 2.5%

d. Physician Group, 10,000 patients
Physician group's income from HMO = $1,000,000 (all of income)
Total dollars at risk = $250,000
Total income at risk = 25%

The smaller the patient panel, the more likely the physician or physician group is to lose the entire incentive payment. However, as the examples illustrate, in small patient panels, the incentive payment is also much smaller, both in absolute terms and as a percentage of total payments.

There are two theories on how this risk will affect physicians. First, in cases where the physician is more likely to lose the entire incentive payment (i.e., small patient panels), the incentive might have a larger effect. This would be true if the physician viewed each group of patients as a line of business. Even a small incentive payment may have a large effect if the physician believed that the loss of the incentive payment would make that line of business unprofitable.

On the other hand, a large patient panel would result in a larger absolute incentive payment that represents a larger proportion of total earnings. The physician or physician group may pay more attention to a larger incentive payment, even if he/she/it has a smaller chance of losing the entire payment. Since these results are contradictory, we did not base determinations of substantial financial risk on panel size. However, we are interested in comments that address expected physician behavior in relation to the size of the patient panel.

We also considered developing a grid that would adjust the risk threshold according to the combination of factors in an incentive plan. An organization would identify its factor on the grid to determine its threshold level for substantial financial risk. Possible factors include the size of the physician pool and the services for which physicians are at risk. For example, if Factor A's threshold is 15 percent and Factor B's is 10 percent, Factors A and B could be limited to 5 percent.

With the exception of the special rule for cases in which assessments are made more frequently than annually, we decided not to adjust the threshold according to factors for several reasons. There are many factors that theoretically have the potential to influence incentive arrangements. However, no empirical research has been done in this area. There is no information available on the strength of the factors on incentive plans or on the effect of combinations of factors on incentive plans. In addition, some factors could either strengthen or weaken the incentive plans. For example, small patient panels may either increase or decrease risk. The risk may increase because the physician or physician group has fewer patients among whom to spread the risk. The risk may decrease because a small patient panel would represent a small portion of the physician's total income. Therefore, the level of services the prepaid health care organization patients used would have only a small impact on the physician's total income. The lack of information in this area made it extremely difficult to rate factors or develop grids on appropriate thresholds.

As mentioned earlier, there is no evidence that the customary physician incentive plans in prepaid health care organizations have caused lack of access or quality of care concerns. Since there is so little information available regarding the impact of various factors on physician behavior, and since existing incentive plans have not been problematic, we believe that our approach is reasonable and appropriate. As more information regarding the influence of various elements of physician incentive plans becomes available, we will evaluate it and, if appropriate, reconsider the definition of substantial financial risk.

Another option we considered was to define substantial financial risk as the median percentage plan withhold, as defined in the DHHS Report to the Congress. We would compare the amount of risk under the incentive plan to the median withhold percentage. The DHHS Report identified 15 to 20 percent as the most common median withhold percentages (see p. V–37), and the Physician Payment Review Commission (PPRC) testified before the Congress that most withholds were between 10 and 20 percent. (However, the actual risk to the physicians is often higher. Many plans use bonuses as well as withholds. These medians only account for risk from withholds. Therefore, actual risk is higher than reflected in the DHHS report or PPRC testimony.) Under this option, an exceptions process could be used to permit plans to exceed the median withhold level if the organization could show that the higher level would not place physicians at "substantial financial risk," without triggering the beneficiary survey and stop-loss protection.

We did not choose this option since it would require us to implement a case-by-case review of incentive plans that have not been shown to be problematic. In addition, the term "substantial financial risk" implies a greater than average risk, which supports our use of an outlier approach. Also, as discussed earlier in this preamble, we believe that an outlier approach is reasonable given physician perceptions of withholds. We also want to provide consistent guidelines so that organizations can determine whether their incentive plans are in compliance with our proposed requirements prior to submission for HCFA review.

We are concerned about the appropriateness of the 25-percent threshold for substantial financial risk when incentive payments are assessed no more than annually. As stated previously, we relied, in part, on the DHHS Report that indicated that fee-for-service physicians typically lose 10 to 20 percent of their income to bad debt, and plan physicians may "discount" their charges by 20 to 25 percent. Therefore, the 25 percent risk for services the physicians or physician groups provide may be reasonable. However, with respect to the first instance, we are concerned that such discounts may be factored into the plan's payments to the physician or physician group. If so, the 25-percent risk would be applied to an already discounted amount, which may not be reasonable. We are seeking specific comments regarding how physician compensation is determined in different models of HMOs and whether 25 percent is reasonable for all types of prepaid health care organizations. We also are particularly interested in public comments on our proposed definition of "substantial financial risk" and other alternatives that we considered but did not select.

D. Requirements for Physician Incentive Plans That Place Physicians at Substantial Financial Risk

1. Enrollee Surveys

As required by section 1876(i) of the Act, we are proposing that HMOs, CMPs, and HIOs that place their physicians or physician groups at substantial financial risk must conduct enrollee surveys. We are proposing that the surveys must:

- Either survey all current Medicare/Medicaid enrollees in the organization and those who have disenrolled (due to other than loss of eligibility in Medicaid) in the past 12 months, or survey a statistically valid sample of these same enrollees and disenrollees;
- Be designed, conducted, and results analyzed in accordance with commonly accepted principles of survey design and statistical analysis;
- Address enrollees'/disenrollees' satisfaction with the quality of the services provided and their degree of access to the services; and
- Be conducted at least annually.

We considered specifying additional parameters for the enrollee surveys, such as minimum sample size, minimum response rate, minimum confidence levels, or mandated survey questions. However, we recognize that there are a number of factors that are important to consider in designing an effective survey, and these factors may vary by HMO, e.g., the expected response rate to these surveys based on an organization's previous experiences in surveying enrollees and disenrollees. We further believe that these surveys will have the greatest utility if organizations can use the results of these surveys in conjunction with their other enrollee surveys and internal data collection efforts. For example, organizations may want to compare the survey results to information gathered on quality of care or disenrollment. If we are too prescriptive, organizations' use of the data collected might be limited. Also, stringent requirements

would be unnecessarily burdensome and could result in increased costs without correspondingly increased benefits.

Therefore, we are relying on HMOs to design their own surveys in accordance with commonly accepted principles of survey design and statistical analysis. HCFA (for Medicare) and States (for Medicaid) will review the survey methodology and results through the disclosure requirements and routine monitoring. We believe this affords the necessary safeguards to assure effective surveys. We are interested in comments addressing the approaches we did not take, as well as the proposed approach.

2. Stop-loss Protection

By statute, HMOs, CMPs and HIOs that place physicians or physician groups at substantial financial risk for referral services provided to Medicare beneficiaries and Medicaid recipients must provide adequate and appropriate stop-loss protection. We are proposing two levels of stop-loss protection depending on the incentive plan's risk threshold. If the risk threshold is 25 percent (the incentive plan assesses or distributes payments no more often than annually), then the stop-loss protection must protect physicians and physician groups from losses greater than 30 percent of the payments for services they provide, plus payments for administrative costs and controlling levels of referral services. If the risk threshold is 15 percent (the incentive plan assesses or distributes payments more often than annually), then the stop-loss protection must protect physicians and physician groups from losses greater than 20 percent of payments.

For capitated arrangements, it would be difficult to determine prospectively what stop-loss would cover 30 percent of payments for services the physicians or physician groups provide, plus payments for administrative costs and controlling levels of referral services. To make the stop-loss provisions for capitated arrangements comparable with the stop-loss provisions for bonus and withhold arrangements, we are proposing to permit no more than a 30-percent differential between the minimum and maximum payments a physician or physician group could receive. In other words, the difference between the maximum possible payments and the minimum possible payments could be no more than 30 percent of the maximum possible payments. If the incentive payments (or capitation) were paid more often than annually, the differential would be limited to 20 percent of the maximum payments.

These stop-loss levels are absolute limits on the physician's or physician group's liability. The stop-loss protection must cover all referral costs over 20 or 30 percent of payments, depending on how frequently incentive payments are made. Liability above the stop-loss protection level may not be transferred to physicians or physician groups in later contract years. Since this stop-loss protection limits total liability for all patients, it is referred to as an aggregate liability limit.

We decided to require more stop-loss protection for incentive plans that make payments more often than annually to make the provisions between the two risk thresholds equivalent. Under the 25-percent threshold, which applies to physician incentive plans that potentially exert less influence over physician behavior, the organization may increase the physician's or physician group's risk 5 percent beyond the risk threshold. Under our proposal, organizations with incentive plans with a 15-percent threshold would be able to increase the physician's or physician group's absolute risk beyond the risk threshold to the same extent, 5 percent. The organization can either provide or buy the stop-loss protection, or the physician or physician group can obtain the protection.

Many prepaid health care organizations design their stop-loss arrangements to limit liability for individual patients to a maximum dollar amount. This helps to protect against catastrophic cases. We considered placing limits on a physician or physician group's maximum liability per patient instead of using a maximum aggregate liability limit. However, without an aggregate limit on the physician's liability, a physician or physician group could ultimately receive zero net payments from the prepaid health care organizations.

Although individual stop-loss protection helps protect physicians and physician groups, a maximum limit on aggregate liability is necessary. Even if a physician group's liability is limited to no more than $10,000 per patient, if the physician group earns a good reputation for its treatment of AIDS patients, for example, it could easily be liable for all of its payments if increasing numbers of AIDs patients comprise the Medicare and Medicaid portion of the patient panel. Conceivably, the physician group would be forced to leave the prepaid health care organization, declare bankruptcy, or greatly restrict its treatment of all patients. Since it was Congressional intent to protect physicians and physician groups from unlimited liability, we believe that an aggregate limit is appropriate.

We also considered stop-loss standards that would permit more risk sharing between the prepaid health care organization and the physician or physician group. For example, we considered stop-loss protection that would cover 80 percent of referral costs when they exceeded 30 percent (or 20 percent) of payments. This would cause the physician or physician group to be liable for the remaining 20 percent of referral costs. However, we are proposing 100-percent coverage of referral costs over 30 percent (or 20 percent) of payments because even a limited risk-sharing arrangement could potentially cause a physician or physician group to be liable for large amounts of money. Under this arrangement, however, the organization could arrange any risk-sharing or stop-loss arrangements it finds effective for liability amounts less than 30 percent (or 20 percent) of payments.

We considered requiring the organization to provide the stop-loss insurance instead of permitting the physician or physician group to obtain the protection themselves. However, some physician groups prefer to obtain their own stop-loss protection rather than accepting the protection the organization offers (often the organization lowers capitation rates or charges physicians or physician groups for stop-loss protection). We wanted to retain this flexibility for physicians and physician groups. Since the legislation requires the organization to provide the stop-loss protection, we are requiring the organization to pay the cost of the portion of stop-loss protection that covers its enrollees in the physician incentive plan, or increase the amount of stop-loss protection to account for the physician's cost for stop-loss.

In cases where protection that meets the proposed standards is not available through the market, the organization would have to provide it directly. Regardless of how the stop-loss protection is provided, the organization must assure HCFA or the States that all physicians or physician groups that provide services to Medicare beneficiaries and Medicaid recipients and are at "substantial financial risk" for referral services have stop-loss protection that meets the regulatory requirements.

E. Prohibited Physician Payments

As required by OBRA '90, these regulations provide that physician incentive plans may operate only if no specific payment is made directly or

indirectly under the plan as an inducement to reduce or limit medically necessary services provided to a specific enrollee. This provision specifically prohibits bonuses or other payments to a physician or physician group as an inducement to limit or reduce medically necessary services for any individual patient. The proposed rule clarifies that indirect payments include items of money value, such as waivers of debt, or stock or equity in the organization. For example, an organization would be prohibited from paying a physician a $100 bonus or providing $100 of stock for each individual enrollee released from a hospital after delivery of a child in two days versus three days, if inpatient services were medically necessary on day three.

We considered interpreting "specific payments made indirectly as an inducement" as any payments that had the indirect effect of reducing medically necessary services. However, the statutory provision specifies that "no specific payment is made directly or indirectly under the plan to a physician or physician group as an inducement to reduce or limit medically necessary services . . .". The use of "indirectly" in the statute refers to the method by which payment is made, not to the effect of the payment. Therefore, we believe that the statutory language prohibits an alternative interpretation of the provision.

This proposed provision would not prohibit all bonuses based on utilization. For example, bonuses that are based on general utilization levels (i.e., bonuses determined by aggregate patient utilization) would be permitted.

F. Enforcement

Organizations that do not comply with these requirements may be subject to certain penalties. Determinations of non-compliance may result in civil money penalties, intermediate sanctions, and/or contract termination (for Medicare) or withholding of FFP (for Medicaid). The civil money penalties would be limited to $25,000 for each determination of non-compliance. Under the intermediate sanctions provision, HCFA (for Medicare) could suspend the enrollment of individuals into non-compliant plans and HCFA (for Medicare) or the State (for Medicaid) could suspend payment for new enrollees until it is satisfied that the basis for the determination is not likely to recur. The process for applying civil money penalties and intermediate sanctions would be the same process as that proposed in the July 22, 1991, NPRM discussed earlier in this preamble.

We are proposing that States determine compliance with these provisions for organizations contracting with Medicaid. Unlike Medicare, the Medicaid program is administered by State governments, pursuant to the Federal statutory and regulatory requirements, and a Medicaid State plan approved by HCFA. State governments are thus responsible for contracting with HMOs and other prepaid health care organizations, as well as for monitoring such contracts. In the case of Medicaid contracts, therefore, we believe that States are in the best position to monitor adherence to these specified requirements for physician incentive plans, to make determinations as to whether a violation has occurred, and to recommend intermediate sanctions based upon the nature of the violation. We are, therefore, proposing to rely upon States to perform the same monitoring functions in the Medicaid program that HCFA will perform in the Medicare program.

V. Revisions to the Regulations

Because these regulations would amend the civil money penalties and intermediate sanctions proposed in the July 22, 1991, NPRM discussed earlier in this preamble, we are republishing portions of that NPRM in these proposed regulations. Specifically, we are republishing proposed 42 CFR 417.495, which provides the requirements for imposing sanctions against eligible HMOs and CMPs, and proposed 42 CFR 434.67, which provides the requirements for imposing sanctions against HMOs with comprehensive risk contracts. We also are republishing 42 CFR 1003.100 through 1003.103 and 42 CFR 1003.106, which pertain to civil money penalties and assessments, incorporating the revisions proposed in the July 22, 1991, NPRM. While we are republishing the aforementioned sections of the regulations that were proposed in the July 22, 1991, NPRM for clarity, we request that public comments be limited to penalties and sanctions relating to physician incentive plans proposed in this NPRM.

To incorporate the policies and implement the statutory provisions described in this preamble, we propose to make the following revisions to title 42 of the regulations:

- In part 417, Health Maintenance Organizations, Competitive Medical Plans, and Health Care Prepayment Plans, we would add to subpart L a new § 417.479, Requirements for physician incentive plans, to specify the requirements eligible organizations that use physician incentive plans must meet.
- We would add a new paragraph (a)(7) to proposed § 417.495, Sanctions against the organization, to specify an additional basis upon which sanctions may be applied against organizations.
- In part 434, Contracts, subpart D, we would amend § 434.44(a)(1) to incorporate these requirements into regulations governing certain HIOs that arrange for comprehensive services on a risk basis.
- In subpart E, we would add a new paragraph (a)(5) to proposed § 434.67, Sanctions against HMOs with comprehensive risk contracts, to specify an additional basis upon which sanctions may be applied against organizations.
- In subpart F, we would revise § 434.70 to condition FFP in State contracts with HMOs and certain HIOs on both the State and its HMO or HIO contractor meeting certain specified requirements for physician incentive plans.
- In part 1003, Civil Money Penalties and Assessments, we would revise § 1003.101 to include a definition for "physician incentive plan."
- We would revise § 1003.103 to add a new paragraph (e)(1)(vi) to specify an additional basis upon which the Office of the Inspector General may impose civil money penalties on organizations.
- We would revise §§ 1003.100, 1003.102, and 1003.106 to reference the physician incentive plan requirements, as appropriate.

VI. Collection of Information Requirements

Proposed regulations at § 417.479 (g) and (h), and § 434.70 (a)(2) and (b)(3) contain information collection or recordkeeping requirements or both that are subject to review by the Office of Management and Budget under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). Specifically, § 417.479(g) requires organizations that operate incentive plans that place physicians or physician groups at substantial financial risk to conduct enrollee surveys subject to conditions described in § 417.479(g)(1), and §§ 417.479(h) and 434.70(a)(2) concern the disclosure of information to HCFA or States concerning an HMO or CMP's physician incentive plan and the conducting of annual enrollee surveys. The respondents who will provide the information include HMOs, CMPs and HIOs that contract with the Medicare program or States and have physician incentive plans. Additionally, § 434.70(b)(3) requires States to obtain from certain HMO or HIO contractors

proof that the contractor meet the proposed requirements for physician incentive plans.

The public reporting burden for these information collections is estimated to be 50 hours per organization for survey requirements, 4 hours per organization for disclosure requirements, and 1 hour per State for each physician incentive plan for which proof of compliance is required.

A notice will be published in the **Federal Register** after approval is obtained. Organizations and individuals desiring to submit comments on the information collection and recordkeeping requirements should direct them to the OMB official whose name appears in the "ADDRESSES" section of this preamble.

VII. Response to Comments

Because of the large volume of items of correspondence we normally receive on a proposed rule, we are not able to acknowledge or respond to them individually. However, we will consider all comments that we receive by the date and time specified in the "DATES" section of this preamble, and if we proceed with the final rule, we will respond to the comments in the preamble to the final rule.

VIII. Regulatory Impact Statement

Executive Order 12291 (E.O. 12291) requires us to prepare and publish an initial regulatory impact analysis for any proposed regulations that are likely to meet criteria for a "major rule." A major rule is one that would result in—

- An annual effect on the economy of $100 million or more;
- A major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or any geographic regions; or
- Significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

In addition, we generally prepare and publish an initial regulatory flexibility analysis for proposed regulations consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601–602), unless the Secretary certifies that the regulations would not have a significant impact on a substantial number of small entities. For purposes of the RFA, we treat all HMOs, CMPs, and HIOs as small entities.

These proposed regulations would amend the regulations governing certain Federally qualified HMOs and CMPs contracting with the Medicare program, and certain HMOs and HIOs contracting with the Medicaid program, by adding requirements for physician incentive plans that these entities must meet. We expect these proposed rules to affect approximately 300 HMOs, CMPs, and HIOs. However, we expect few incentive plans will require changes to comply with the regulations. In addition, since we expect that most current incentive plans already comply with the proposed regulations, we believe that we will rarely need to impose sanctions or penalties. Therefore, we expect very little costs to organizations. Likewise, we expect few additional surveys and additional stop-loss protection, with the result being that costs are incurred by only a small number of facilities.

For these reasons, we have determined that a regulatory impact analysis is not required. Further, we have determined, and the Secretary certifies, that these proposed rules would not have a significant economic impact on the operations of a substantial number of small rural hospitals. We, therefore, have not prepared a regulatory flexibility analysis.

Section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis for any proposed rule that may have a significant impact on the operations of a substantial number of small rural hospitals. Such an analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside a metropolitan statistical area and has fewer than 50 beds. These proposed regulations affect HMOs, CMPs, and HIOs. Consequently, we have determined, and the Secretary certifies, that these proposed regulations would not have a significant economic impact on the operations of a substantial number of small rural hospitals and, therefore, have not prepared a rural impact statement.

List of Subjects

42 CFR Part 417

Administrative practice and procedure, Health maintenance organization (HMO), Medicare, Reporting and recordkeeping requirements.

42 CFR Part 434

Grant programs—Health, Health maintenance organization (HMO), Medicaid, Reporting and recordkeeping requirements.

42 CFR Part 1003

Administrative practice and procedure, Fraud; Grant programs—Health; Health facilities; Health profession; Maternal and child health; Medicaid; Medicare; Penalties.

Title 42—Public Health

CHAPTER IV—HEALTH CARE FINANCING ADMINISTRATION, DEPARTMENT OF HEALTH AND HUMAN SERVICES

I. Chapter IV of title 42 would be amended as set forth below:

PART 417—HEALTH MAINTENANCE ORGANIZATIONS, COMPETITIVE MEDICAL PLANS, AND HEALTH CARE PREPAYMENT PLANS

A. Part 417 is amended as follows:

1. The authority citation for part 417 continues to read as follows:

Authority: Secs. 1102, 1833(a)(1)(A), 1861(s)(2)(H), 1866(a), 1871, 1874, and 1876 of the Social Security Act (42 U.S.C. 1302, 13951(a)(1)(A), 1395x(s)(2)(H), 1395cc(a), 1395hh, 1395kk, and 1395mm); sec. 114(c) of Pub. L. 97–248 (42 U.S.C. 1395mm note); 31 U.S.C. 9701; and secs. 215 and 1301 through 1318 of the Public Health Service Act (42 U.S.C. 216 and 300e through 300e–17), unless otherwise noted.

2. A new § 417.479 is added to read as follows:

§ 417.479 Requirements for physician incentive plans.

(a) *Applicability.* The requirements in this section apply to physician incentive plans between eligible organizations and individual physicians or physician groups with whom they contract to provide medical services to enrollees. These requirements do not apply to financial incentive arrangements between physician groups (as defined in paragraph (b) of this section) and individual physicians who are members of such groups. These requirements only apply to physician incentive plans that base compensation (in whole or in part) on the use or cost of services provided to Medicare beneficiaries or Medicaid recipients.

(b) *Definitions.* For purposes of this section:

Bonus means a payment an organization makes to a physician or physician group beyond any salary, fee-for-service payments, capitation, or returned withhold.

Capitation means a set dollar payment per patient per unit time (usually per month) that an organization pays a physician or physician group to cover a specified set of services and administrative costs without regard to the actual number of services provided. The services covered may include the physician's own services, referral services, or all medical services.

Payments means any amounts the organization pays physicians or

physician groups for services they provide directly, plus amounts paid for administration and amounts paid (in whole or in part) based on levels and costs of referral services (such as withhold amounts, bonuses based on referral levels, and any other compensation to the physician or physician group to influence the use of referral services). Bonuses and other compensation that are not based on referral levels (such as bonuses based solely on quality of care provided, patient satisfaction, and participation on committees) are not considered payments for purposes of this subpart.

Physician group means a partnership, association, corporation, individual practice association, or other group that distributes income from practice among members according to a prearranged plan unrelated to the members' referral levels.

Physician incentive plan means any compensation arrangement between an organization and a physician or physician group that may directly or indirectly have the effect of reducing or limiting services provided to Medicare beneficiaries or Medicaid recipients enrolled in the organization.

Referral services means any specialty, inpatient, outpatient, or laboratory services that a physician or physician group orders or arranges, but does not provide directly.

Risk threshold means the maximum risk, if the risk is based on referral services, to which a physician or physician group may be exposed under a physician incentive plan without being at substantial financial risk.

Withhold means a percentage of payments or set dollar amounts that an organization deducts from a physician's service fee, capitation, or salary payment, and which may or may not be returned to the physician, depending on specific predetermined factors.

(c) *Prohibited physician payments.* Organizations may operate physician incentive plans only if no specific payment of any kind is made directly or indirectly under the plan to a physician or physician group as an inducement to reduce or limit medically necessary services provided to an individual enrollee. Indirect payments include offerings of monetary value (such as stock options or waivers of debt) measured in the present or future.

(d) *General Rule: Determination of substantial financial risk.* Substantial financial risk occurs when the incentive arrangements place the physician or physician group at risk for amounts beyond the risk threshold, if the risk is based on the levels or costs of referral services. Amounts at risk based solely on factors other than a physician's or physician group's referral levels do not contribute to the determination of substantial financial risk. The risk thresholds are:

(1) 25 percent if the incentive plan distributes or assesses incentive payments no more often than annually; and

(2) 15 percent if the incentive plan distributes or assesses incentive payments more often than annually.

(e) *Arrangements that cause substantial financial risk when the risk threshold is 25 percent.* The following physician incentive plans cause substantial financial risk if risk is based (in whole or in part) on levels or costs of referral services, and incentive payments are distributed and/or assessed no more than annually:

(1) Withholds greater than 25 percent of payments;

(2) Withholds less than 25 percent of payments if the physician or physician group is potentially liable for amounts exceeding 25 percent of payments;

(3) Bonuses that are greater than 33 percent of payments minus the bonus;

(4) Withholds plus bonuses when the withholds plus bonuses equal more than 25 percent of payments. The threshold bonus percentage for a particular withhold percentage may be calculated using the formula—

Withhold %=−0.75(Bonus %)+25%;

(5) Capitation arrangements, if—

(i) The difference between the maximum possible payments and minimum possible payments is more than 25 percent of the maximum possible payments; or

(ii) The maximum and minimum possible payments are not clearly explained in the physician's or physician group's contract; and

(6) Any other incentive arrangements that have the potential to hold a physician or physician group liable for more than 25 percent of payments.

(f) *Arrangements that cause substantial financial risk when the risk threshold is 15 percent.* The following physician incentive plans cause substantial financial risk if risk is based (in whole or in part) on levels or costs of referral services, and incentive payments are distributed and/or assessed more often than annually:

(1) Withholds greater than 15 percent of payments;

(2) Withholds less than 15 percent of payments if the physician or physician group is potentially liable for amounts exceeding 15 percent of payments;

(3) Bonuses that are greater than 17.6 percent of payments minus the bonus;

(4) Withholds plus bonuses when the withholds plus bonuses equals more than 15 percent of payments for services they provided directly. The threshold bonus percentage may be calculated with the formula—

Withhold %=−0.85(Bonus %)+15%;

(5) Capitation arrangements, if—

(i) The difference between the maximum possible payments and minimum possible payments is more than 25 percent of the maximum possible payments; or

(ii) The maximum and minimum possible payments are not clearly explained in the physician's or physician group's contract; and

(6) Any other incentive arrangements that have the potential to hold a physician or physician group liable for more than 15 percent of payments.

(g) *Requirements for physician incentive plans that place physic' substantial financial risk.* Organizat that operate incentive plans that pla physicians or physician groups at substantial financial risk must do the following:

(1) Conduct enrollee surveys. These surveys must—

(i) Include either all current Medicare/Medicaid enrollees in the organization and those who have disenrolled (due to other than loss of eligibility in Medicaid) in the past 12 months, or a sample of these same enrollees and disenrollees;

(ii) Be designed, implemented, and analyzed in accordance with commonly accepted principles of survey design and statistical analysis;

(iii) Address enrollees/disenrollees satisfaction with the quality of the services provided and their degree of access to the services; and

(iv) Be conducted at least annually.

(2) Ensure that all physicians and physician groups at substantial financial risk have stop-loss protection in accordance with the following requirements:

(i) If the risk threshold is 25 percent, the stop-loss protection must cover the costs of referral services when the costs (beyond allocated amounts) exceed 30 percent of payments.

(ii) If the risk threshold is 15 percent, the stop-loss protection must cover the costs of referral services when the costs (beyond allocated amounts) exceed 20 percent of payments.

(iii) The organization may provide the stop-loss protection directly or purchase the stop-loss protection, or the physician or physician group may purchase the stop-loss protection. If the physician or physician group purchases the stop-loss protection, the organization must pay the portion of the premium that covers its enrollees or

reduce the level at which the stop-loss protection applies by the cost of the stop-loss.

(h) *Disclosure requirements for organizations with physician incentive plans.* All organizations must provide to HCFA information concerning its physician incentive plans as required or requested. The information must contain sufficient descriptive information to enable HCFA to determine whether the plan complies with the requirements specified in this section. Organizations must provide this information to HCFA—

(1) Upon application for a contract;

(2) Upon application for a service area expansion;

(3) 30 days before a change in its incentive plan;

(4) Within 30 days of a request by HCFA; and

(5) For organizations with a contract on [Insert effective date of final rule], by [Insert 30 days from effective date of final rule].

(i) *Sanctions against the organization.* HCFA may apply intermediate sanctions, or the Office of Inspector General may apply civil money penalties described at § 417.495, if HCFA determines that an eligible organization fails to comply with the requirements of this section.

3. A new § 417.495 is added to read as follows:

§ 417.495 Sanctions against the organization.

(a) *Basis for application of sanctions.* HCFA may apply intermediate sanctions specified in paragraph (d) of this section, as an alternative to termination, if HCFA determines that an organization with a contract under this part—

(1) Fails substantially to provide medically necessary items and services that are required to be provided to an individual covered under the contract, and the failure has adversely affected (or has substantial likelihood of adversely affecting) the individual;

(2) Imposes premiums on individuals enrolled under this part in excess of premiums permitted;

(3) Acts to expel or to refuse to re-enroll an individual in violation of the provisions of this part;

(4) Engages in any practice that would reasonably be expected to have the effect of denying or discouraging enrollment (except as permitted by this part) with the organization by eligible individuals whose medical condition or history indicates a need for substantial future medical services;

(5) Misrepresents or falsifies information that is furnished—

(i) To HCFA under this part;

(ii) To an individual or to any other entity under this part;

(6) Fails to comply with the requirements of section 1876(g)(6)(A) of the Act relating to the prompt payment of claims;

(7) Fails to comply with the requirements of § 417.479(c) through (h) relating to physician incentive plans;

(8) Fails to meet the requirement in section 1876(f)(1) of the Act that not more than 50 percent of the organization's enrollment may be Medicare beneficiaries and Medicaid recipients; or

(9) Has a Medicare risk contract and—

(i) Employs or contracts with individuals or entities excluded from participation in Medicare under sections 1128 or 1128A of the Act for the provision of health care, utilization review, medical social work, or administrative services; or

(ii) Employs or contracts with any entity for the provision of such services (directly or indirectly) through an excluded individual or entity.

(b) *Notice of intermediate sanction.* Prior to applying the sanctions specified in paragraph (d) of this section, HCFA will send a written notice to the organization stating the nature and basis of the proposed sanction. A copy of the notice (other than a notice for the violation described in paragraph (a)(8) of this section) will be forwarded to the Office of Inspector General at the same time that it is sent to the organization. HCFA will allow the organization 15 days after the date if receives the notice to provide evidence that the organization has not committed an act or failed to comply with a requirement described in paragraph (a) of this section, as applicable.

(c) *Informal reconsideration.* If the organization submits a timely response to HCFA's notice of intermediate sanction, HCFA will conduct an informal reconsideration that includes:

(1) Review of the evidence by a HCFA official who did not participate in the initial decision to impose a sanction; and

(2) If the decision to impose a sanction is affirmed on review, forwarding to the organization a concise written decision setting forth the factual and legal basis for the decision.

(d) *Intermediate sanctions.* If HCFA determines that an organization has committed a violation described in paragraph (a) of this section and this determination is affirmed on review in the event the organization timely contests the determination under paragraph (b) of this section, HCFA may—

(1) Require the organization to suspend new applications for enrollment from Medicare beneficiaries after the effective date in paragraph (e)(1) of this section; or

(2) Suspend payments to the organization for any individuals who apply for enrollment after the effective date in paragraph (e)(1) of this section.

(e) *Effective date and duration of intermediate sanctions.* (1) Intermediate sanctions will be made effective 15 days after the date that the organization is notified of the decision to impose the sanctions, unless the organization timely seeks reconsideration under paragraph (c) of this section, in which case the intermediate sanction generally will be effective on the date the organization is notified of HCFA's decision under paragraph (c)(2) of this section.

(2) If HCFA determines that the organization's conduct poses a serious threat to an enrollees' health and safety, the intermediate sanction may be made effective on a date prior to issuance of HCFA's decision under paragraph (c)(2) of this section.

(3) The sanction will remain in effect until HCFA notifies the organization that HCFA is satisfied that the basis for applying the sanction has been corrected and is not likely to recur.

(f) *Termination by HCFA.* As an alternative to the sanctions described in paragraph (d) of this section, HCFA may decline to renew an organization's contract in accordance with § 417.492(b), or terminate its contract in accordance with § 417.494(b).

(g) *Civil money penalties.* If HCFA determines that an organization has committed an act or failed to comply with a requirement described in paragraph (a) of this section (with the exception of the violation described in paragraph (a)(8) of this section), HCFA will convey such determination to the Office of Inspector General. In accordance with the provisions of 42 CFR part 1003, the OIG may impose civil money penalties on the organization in addition to or in lieu of the intermediate sanctions imposed by HCFA.

PART 434—CONTRACTS

B. Part 434 is amended as follows:

1. The authority citation for part 434 is revised to read as follows:

Authority: Secs. 1102, 1902(a)(4), 1902(p)(2), and 1903(m) of the Social Security Act (42 U.S.C. 1302, 1396(a)(4), 1396a(p)(2), and 1396b).

2. In subpart D, § 434.44(a)(1) is revised to read as follows:

§ 434.44 Special rules for certain health insuring organizations.

(a) A health insuring organization that first enrolls patients on or after January 1, 1986, and arranges with other providers (through subcontract, or through other arrangements) for the delivery of services (as described in § 434.21(b)) to Medicaid enrollees on a prepaid capitation risk basis is—

(1) Subject to the general requirements set forth in § 434.20(d) concerning services that may be covered and § 434.20(e) which set forth the requirements for all contracts, the additional requirements set forth in §§ 434.21 through 434.38 and the Medicaid agency responsibilities specified in subpart E of this part; and

* * * * *

3. In subpart E, a new § 434.67 is added to read as follows:

§ 434.67 Sanctions against HMOs with comprehensive risk contracts.

(a) *Basis for application of sanctions.* The agency may recommend that the intermediate sanction specified in paragraph (e) of this section be imposed if the agency determines that an HMO with a comprehensive risk contract—

(1) Fails substantially to provide medically necessary items and services that are required under law or under the contract to be provided to an individual covered under the contract, and the failure has adversely affected (or has substantial likelihood of adversely affecting) the individual;

(2) Imposes premiums on individuals covered under the contract in excess of premiums permitted;

(3) Engages in any practice that discriminates among individuals on the basis of their health status or requirements for health care services, including expulsion or refusal to re-enroll an individual, or any practice that could reasonably be expected to have the effect of denying or discouraging enrollment (except as permitted by section 1903(m) of the Act) by eligible individuals whose medical condition or history indicates a need for substantial future medical services;

(4) Misrepresents or falsifies information that is furnished—

(i) To HCFA or the State agency under section 1903(m) of the Act; or

(ii) To an individual or to any other entity under section 1903(m); or

(5) Fails to comply with the requirements of § 417.479 (c) through (g) of this chapter relating to physician incentive plans, or fails to submit to the State Medicaid agency its physician incentive plans as required or requested in § 434.70.

(b) *Effect of an agency determination.* (1) When the agency determines that an HMO with a comprehensive risk contract has committed one of the violations identified in paragraph (a) of this section, the agency must forward this determination to HCFA. This determination becomes HCFA's determination for purposes of section 1903(m)(5)(A) of the Act, if HCFA does not reverse or modify the determination within 15 days.

(2) When the agency decides to recommend imposition of the intermediate sanction specified in paragraph (e) of this section, this recommendation becomes HCFA's decision, for purposes of section 1903(m)(5)(B)(ii) of the Act, if HCFA does not reject this recommendation within 15 days.

(c) *Notice of intermediate sanction.* If a determination to impose intermediate sanctions becomes HCFA's determination in accordance with paragraph (b)(2) of this section, the agency must send a written notice to the HMO stating the nature and basis of the proposed sanction. A copy of the notice will be forwarded to the OIG at the same time that it is sent to the organization. The agency will allow the HMO 15 days after the date it receives the notice to provide evidence that the HMO has not committed an act or failed to comply with a requirement described in paragraph (a) of this section, as applicable.

(d) *Informal reconsideration.* (1) If the HMO submits a timely response to the agency's notice of intermediate sanction, the agency will conduct an informal reconsideration that includes—

(i) Review of the evidence by an agency official who did not participate in the initial recommendation to impose a sanction; and

(ii) A concise written decision setting forth the factual and legal basis for the decision.

(2) The agency decision under paragraph (d)(1)(ii) of this section will be forwarded to HCFA and will become HCFA's decision if HCFA does not reverse or modify the decision within 15 days. The agency will send the HMO a copy of HCFA's decision under this section.

(e) *Intermediate sanction.* If a HCFA determination that an HMO has committed a violation described in paragraph (a) of this section is affirmed on review under paragraph (d) of this section, or is not timely contested by the HMO under paragraph (c) of this section, HCFA, based upon the recommendation of the agency, may deny payment for new enrollees of the HMO pursuant to section 1903(m)(5)(B)(ii) of the Act. Under §§ 434.22 and 434.42, this denial of payment by HCFA for new enrollees automatically results in a denial of agency payments to the HMO for the same enrollees. A "new enrollee" is defined as an enrollee that applies for enrollment after the effective date in paragraph (f)(1) of this section.

(f) *Effective date and duration of intermediate sanction.* (1) Unless an HMO timely seeks a reconsideration in accordance with paragraph (d) of this section or HCFA determines the violation poses a serious threat to enrollees' health or safety, intermediate sanctions will be made effective 15 days after the date that the HMO is notified of the HCFA decision to impose the sanction in accordance with the procedures specified in paragraph (c) of this section. If the HMO seeks reconsideration under paragraph (d) of this section, the intermediate sanction generally will be effective on the date the organization is notified of HCFA's decision under paragraph (d)(1)(ii) of this section.

(2) If HCFA, in consultation with the agency, determines that the HMO's conduct poses a serious threat to an enrollee's health and safety, the intermediate sanction may be made effective on a date prior to issuance of the decision under paragraph (d)(1)(ii) of this section.

(3) The sanction will remain in effect until HCFA, in consultation with the agency, is satisfied that the basis for applying the sanction has been corrected and is not likely to recur.

(g) *Civil money penalties.* If a determination that an organization has committed a violation under paragraph (a) of this section becomes HCFA's determination under paragraph (b)(1) of this section. HCFA will convey such determination to the Office of Inspector General. In accordance with the provisions of 42 CFR Part 1003, the OIG may impose civil money penalties on the organization in addition to or in lieu of the intermediate sanctions imposed under this section.

(h) *Performance of functions.* HCFA retains the right to independently perform the functions assigned to the agency in paragraphs (a) through (f) of this section.

(i) *State plan requirements.* The State plan must include a plan to monitor for violations specified in paragraph (a) of this section and for implementing the provisions of this section.

4. In Subpart F, § 434.70 is revised to read as follows:

§ 434.70 Condition for FFP.

(a) FFP is available in expenditures for payments to contractors only for the periods that—

(1) The contract—

(i) Meets the requirements of this part;

(ii) Meets the appropriate requirements of 45 CFR Part 74; and

(iii) Is in effect; and

(2) The HMO or HIO contractor complies with the requirements specified in § 417.479 (c) through (g) of this chapter, and has supplied sufficient information on its physician incentive plan to the State Medicaid agency to enable the State to determine whether the plan complies with such requirements. The HMO or HIO must supply this information to the State Medicaid agencies—

(i) Upon application for a contract;

(ii) Within 30 days of a change in its incentive plan;

(iii) Within 30 days of a request by the State or HCFA; and

(iv) For organizations with a contract on December 14, 1992 of final rule, by January 13, 1992 of final rule.

(b) HCFA may withhold FFP for any period during which—

(1) The State fails to meet the State plan requirements of this part;

(2) Either party to a contract substantially fails to carry out the terms of the contract; or

(3) The State fails to obtain from each HMO or HIO contractor proof that it meets the requirements for physician incentive plans specified in § 417.479 (c) through (g) of this chapter.

CHAPTER V—OFFICE OF INSPECTOR GENERAL—HEALTH CARE, DEPARTMENT OF HEALTH AND HUMAN SERVICES

II. Chapter V of title 42 would be amended as set forth below:

PART 1003—CIVIL MONEY PENALTIES, ASSESSMENTS AND EXCLUSIONS

A. Part 1003 is amended as follows:

1. The authority citation for part 1003 is revised to read as follows:

Authority: 42 U.S.C. 1302, 1320a–7, 1320a–7a, 1320b–10, 1395mm, 1395ss(d), 1395u(j), 1395u(k), 1396b(m), 11131(c) and 11137(b)(2).

2. Section 1003.100 is amended by revising paragraph (a); republishing paragraph (b)(1) introductory text revising paragraphs (b)(1)(iv) and (b)(1)(v) and adding a new paragraph (b)(1)(vi) to read as follows:

§ 1003.100 Basis and purpose.

(a) *Basis.* This part implements sections 1128, 1128(c), 1128A, 1140, 1842(j), 1842(k), 1876(i)(6), 1882(d), and 1903(m)(5) of the Social Security Act and sections 421(c) and 427(b)(2) of Pub. L. 99–660 (42 U.S.C. 1320a–7, 1320a–7(c), 1320a–7a, 1320b–10, 1395mm, 1395ss(d), 1395u(j), 1395u(k), 1396b(m)), 11131(c) and 11137(b)(2)).

(b) *Purpose.* * * *

(1) Provides for the imposition of civil money penalties and, as applicable, assessments against persons who—

* * * * *

(iv) Fail to report information concerning medical malpractice payments or who improperly disclose, use, or permit access to information reported under part B of title IV of Pub. L. 99–660, and regulations specified in 45 CFR part 60;

(v) Misuse certain Medicare and Social Security program words, letters, symbols, and emblems; or

(vi) Substantially fail to provide an enrollee with required medically necessary items and services, or who engage in certain marketing, enrollment, reporting, claims payment, employment, or contracting abuses, or who do not meet the requirements for physician incentive plans for Medicaid specified in § 417.479 (c) through (g) of this title.

* * * * *

3. Section 1003.101 is amended by adding, in alphabetical order, definitions for the terms *adverse effect, contracting organization, enrollee,* and *physician incentive plan* to read as follows:

§ 1003.101 Definitions.

* * * * *

Adverse effect means medical care has not been provided and the failure to provide such necessary medical care has presented an imminent danger to the health, safety, or well-being of the patient, or has placed the patient unnecessarily in a high-risk situation.

* * * * *

Contracting organization means a public or private entity, inclusive of a health maintenance organization (HMO), competitive medical plan (CMP), or health insuring organization (HIO) which meets the requirements of section 1876(b) or is subject to the requirements in section 1903(m)(2)(A) of the Social Security Act, and which has contracted with the Department or a State to provide medical items and services to Medicare beneficiaries or Medicaid recipients.

Enrollee means an individual who is eligible for Medicare or Medicaid, and who enters into an agreement to receive medical items and services from a contracting organization that contracts with the Department under titles XVIII or XIX of the Social Security Act.

* * * * *

Physician incentive plan means any compensation arrangement between a contracting organization and a physician group that may directly or indirectly have the effect of reducing or limiting services provided with respect to enrollees in the organization.

* * * * *

4. In § 1003.102, paragraph (b) introductory text is republished and a new paragraph (b)(8) is added, to read as follows:

§ 1003.102 Basis for civil money penalties and assessments.

* * * * *

(b) The OIG may impose a penalty, and where authorized, an assessment against any person (including an insurance company in the case of paragraphs (b)(5) and (b)(6) of this section) whom it determines in accordance with this part—

* * * * *

(8) Is a contracting organization that HCFA determines has committed an act or failed to comply with the requirements set forth in §§ 417.495(a), 434.67(a), and 434.80(c) of this title.

* * * * *

5. Section 1003.103 is amended by revising paragraph (a) and adding new paragraph (e), to read as follows:

§ 1003.103 Amount of penalty.

(a) Except as provided in paragraphs (b), (c), (d), and (e) of this section, the OIG may impose a penalty of not more than $2,000 for each item or service that is subject to a determination under § 1003.102.

* * * * *

(e)(1) The OIG may, in addition to or in lieu of other remedies available under law, impose a penalty of up to $25,000 for each determination by HCFA that a contracting organization has:

(i) Failed substantially to provide an enrollee with required medically necessary items and services, if the failure adversely affects (or has the likelihood of adversely affecting) the enrollee;

(ii) Imposed premiums on enrollees in excess of amounts permitted under section 1876 or title XIX of the Act;

(iii) Acted to expel or to refuse to re-enroll a Medicare beneficiary in violation of the provisions of section 1876 of the Act, and for reasons other than the beneficiary's health status or requirements for health care services;

(iv) Misrepresented or falsified information furnished to an individual or any other entity under section 1876 or 1903(m) of the Act;

(v) Failed to comply with the requirements of section 1876(g)(6)(A) of

the Act, regarding prompt payment of claims; or

(vi) Failed to comply with the requirements of § 417.479(c) through (h) of this title for Medicare, and § 417.479(c) through (g) of this title for Medicaid, regarding certain prohibited incentive payments to physicians.

(2) The OIG may, in addition to or in lieu of other remedies available under law, impose a penalty of up to $25,000 for each determination by HCFA that a contracting organization with a contract under section 1876 of the Act:

(i) Employs or contracts with individuals or entities excluded from participation in Medicare, under sections 1128 or 1128A of the Act, for the provision of health care, utilization review, medical social work, or administrative services; or

(ii) Employs or contracts with any entity for the provision of such services (directly or indirectly) through an excluded individual or entity.

(3) The OIG may, in addition to or in lieu of other remedies available under law, impose a penalty of up to $100,000 for each determination that a contracting organization has:

(i) Misrepresented or falsified information furnished to the Secretary under section 1876 of the Act, or to the State under section 1903(m) of the Act; or

(ii) Acted to expel or to refuse to re-enroll a Medicare beneficiary or Medicaid recipient because of the individual's health status or requirements for health care services, or engaged in any practice that would reasonably be expected to have the effect of denying or discouraging enrollment (except as permitted by section 1876 or 1903(m) of the Act) with the contracting organization by enrollees whose medical condition or history indicates a need for substantial future medical services.

(4) In cases where enrollees are charged more than the allowable premium, the OIG will impose an additional penalty equal to double the amount of excess premium charged by the contracting organization. The excess premium amount will be deducted from the penalty and returned to the enrollee.

(5) The OIG will impose an additional $15,000 penalty for each individual not enrolled when it is determined that a contracting organization has committed a violation described in paragraph (e)(3)(ii) of this section.

(6) For purposes of paragraph (e) in this section, a violation is defined as each incident where a person has committed an act or failed to comply with a requirement set forth in §§ 417.495(a), 434.67(a), or 434.80(c) of this title, as determined by HCFA.

6. Section 1003.106 is amended by adding new paragraph (a)(4); redesignating paragraph (d) as paragraph (e) and republishing it; and adding a new paragraph (d) to read as follows:

§ 1003.106 Determinations regarding the amount of the penalty and assessment.

(a) * * *

(4) In determining the appropriate amount of any penalty or assessment under § 1003.103(e), the OIG will consider as appropriate:

(i) The nature and scope of the required medically necessary item or service not provided and the circumstances under which it was not provided;

(ii) The degree of culpability of the contracting organization;

(iii) The seriousness of the adverse effect that resulted or could have resulted from the failure to provide required medically necessary care;

(iv) The harm which resulted or could have resulted from the provision of care by a person that the contracting organization is expressly prohibited, under sections 1876(i)(6) or 1903(p)(2) of the Act, from contracting or employing;

(v) The harm which resulted or could have resulted from the contracting organization's expulsion or refusal to re-enroll a Medicare beneficiary or Medicaid recipient;

(vi) The nature of the misrepresentation or fallacious information furnished by the contracting organization to the Secretary, State, enrollee, or other entity under sections 1876 or 1903(m) of the Act;

(vii) The extent to which the failure to provide medically necessary services could be attributed to a prohibited inducement to reduce or limit services under a physician incentive plan and the harm to the enrollee which resulted or could have resulted from such failure. It would be considered an aggravating factor if the contracting organization knowingly or routinely engaged in any prohibited practice which acted as an inducement to reduce or limit medically necessary services provided with respect to a specific enrollee in the organization;

(viii) The history of prior offenses by the contracting organization, or principals of the contracting organization, including whether at any time prior to determination of the current violation or violations the contracting organization or any of its principals was convicted of a criminal charge, or was held liable for civil or administrative sanctions in connection with a program covered by this part or any other public or private program of payment for medical services; and

(ix) Such other matters as justice may require.

* * * * *

(d) In considering the factors listed in paragraph (a)(4) of this section, for violations subject to a determination under § 1003.103(e), the following circumstances are to be considered, as appropriate, in determining the amount of any penalty:

(1) *Nature and circumstances of the incident.* It would be considered a mitigating circumstance if, where more than one violation exists, the appropriate items or services not provided were:

(i) Few in number, or

(ii) Of the same type and occurred within a short period of time.

It would be considered an aggravating circumstance if such items or services were of several types and occurred over a lengthy period of time, or if there were many such items or services (or the nature and circumstances indicate a pattern of such items or services not being provided).

(2) *Degree of culpability.* It would be considered a mitigating circumstance if the violation was the result of an unintentional, unrecognized error, and corrective action was taken promptly after discovery of the error.

(3) *Failure to provide required care.* It would be considered an aggravating circumstance if the failure to provide required care was attributable to an individual or entity that the contracting organization is expressly prohibited by law from contracting or employing.

(4) *Use of excluded individuals.* It would be considered an aggravating factor if the contracting organization knowingly or routinely engages in the prohibited practice of contracting or employing, either directly or indirectly, individuals or entities excluded from the Medicare program under sections 1128 or 1128A of the Act.

(5) *Routine practices.* It would be considered an aggravating factor if the contracting organization knowingly or routinely engages in any discriminatory or other prohibited practice which has the effect of denying or discouraging enrollment by individuals whose medical condition or history indicates a need for substantial future medical services.

(6) *Prior offenses.* It would be considered an aggravating circumstance if at any time prior to determination of the current violation or violations, the

contracting organization or any of its principals was convicted on criminal charges or held liable for civil or administrative sanctions in connection with a program covered by this part or any other public or private program of payment for medical services. The lack of prior liability for criminal, civil, or administrative sanctions by the contracting organization, or the principals of the contracting organization, would not necessarily be considered a mitigating circumstance in determining civil monetary penalty amounts.

(e) (1) The standards set forth in this section are binding, except to the extent that their application would result in imposition of an amount that would exceed limits imposed by the United States Constitution.

(2) The amount imposed will not be less than the approximate amount required to fully compensate the United States, or any State, for its damages and costs, tangible and intangible, including but not limited to the costs attributable to the investigation, prosecution, and administrative review of the case.

(3) Nothing in this section will limit the authority of the Department to settle any issue or case as provided by § 1003.126, or to compromise any penalty and assessment as provided by § 1003.128.

BILLING CODE 4120-01-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 18

[ET Docket No. 92-255; FCC 92-492]

Remove Unnecessary Regulations Regarding Magnetic Resonance Systems

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: In response to a petition from the National Electrical Manufacturers Association, the Federal Communication Commission is proposing to amend its rules to remove unnecessary regulations regarding Magnetic Resonance Systems. Elimination of such regulations will reduce the amount of time and money required to bring new non-consumer, medical magnetic resonance systems to market.

DATES: Comments must be submitted by March 1, 1993. Reply comments must be submitted by March 31, 1993.

ADDRESSES: All comments and reply comments should be addressed to the Office of the Secretary, Federal Communication Commission, Washington DC 20554. Comments and reply comments will be available for public inspection during regular business hours in the FCC Reference Center (room 239) of the Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Errol Chang, Technical Standards Branch, Office of Engineering and Technology, (202) 653-7316.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making (Notice) in ET Docket No. 92-255, FCC 92-492, adopted on November 4, 1992 and released on December 7, 1992. The full text of this Notice is available for inspection and copying during normal business hours in the FCC Reference Center (room 239), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, Downtown Copy Center, (202) 452-1422, 1990 M Street NW., room 640, Washington DC 20036.

Paperwork Reduction

The following collection of information contained in this proposed rule has been submitted to the Office of Management and Budget for review under Section 3504(h) of the Paperwork Reduction Act (44 U.S.C. 3504(h)). Copies of this submission may be purchased from the Commission's copy contractor: Downtown Copy Center, 1990 M Street NW., room 640, Washington, DC 20036, (202) 452-1422. Persons wishing to comment on this collection of information should direct their comments to Mr. Jonas Neihardt, Office of Management and Budger, room 3235 NEOB, Washington, DC 20554, (202) 395-4814. A copy of any comments filed with the Office of Management and Budget should also be sent to the following address at the Federal Communications Commission: Federal Communications Commission, Office of Managing Director, paperwork Reduction Project, Washington DC 20554. For further information contact Ms. Judy Boley, (202) 632-7513.

OMB Number: 3060-0329

Title: Equipment Authorization—Verification 2.955

Respondents: Business or other for profit, small business or organizations

Frequency of Response: Recordkeeping

Estimated Annual Burden:

Number of recordkeepers: 5,655

Annual hours per recordkeepers: 18

Total annual burden: 101,790

Needs and Uses: Equipment testing is performed and data is gathered to provide information to aid in controlling interference to radio communications. Data collected verifies compliance of equipment to the FCC Rules. The information is retained by the equipment manufacturer, and made available only at the request of the Commission.

Summary of Notice

1. By this action, the Commission proposes to amend Part 18 of its rules to remove regulations that unnecessarily increase the amount of time and money required to bring new non-consumer, medical magnetic resonance (MR) systems to market. These systems are used by medical professionals to study the molecular structure of a patient for diagnostic and monitoring purposes. This proposal addresses a petition for rule making filed by the National Electrical Manufacturers Association on January 29, 1992.

2. Part 18 of the rules sets forth requirements designed to minimize the potential for interference to radio and TV services by industrial, scientific and medical (ISM) equipment. Such equipment generates radio frequency (RF) energy in order to perform a non-communications related function. Common examples of consumer ISM equipment include microwave ovens and RF lighting devices. Examples of non-consumer ISM equipment include industrial heaters, RF stabilized arc welders and magnetic resonance equipment. Before ISM equipment can be marketed in the United States, it must comply with the technical standards and equipment authorization procedures specified in part 18.

3. As indicated in NEMA's petition, as well as comments received regarding NEMA's petition, it appears that MR systems pose little risk of interference because of the way they are designed and installed. We note that there are relatively few installations of MR systems (under 1000), and in the event

that measures need to be taken to correct interference, the locations of the equipment are known. We also recognize that the authorization requirement is burdensome and costly for MR systems. Given the low volume production of MR systems, this can significantly affect the unit cost of each system, contributing to the increasing costs of medical care.

4. We agree with NEMA that the circumstances presented here are similar to those that led us earlier to exempt non-consumer medical ultrasonic equipment from part 18 rules. We are unaware of any interference that resulted from the medical ultrasonic equipment exemption. On balance, we tentatively conclude that the costs of our technical standards and authorization requirements for MR systems are unwarranted given the low risk of interference. Accordingly, we are proposing to amend part 18 to exempt MR systems from the technical standards and authorization requirements that now apply to that equipment. We will, of course, continue to apply the requirements of 47 CFR 18.111(b) that operators of MR systems correct any harmful interference that may occur. The proposed rule changes are set forth below.

5. *Ex Parte Rules—Non-Restricted Proceeding.* This is a non-restricted notice and comment rule making proceeding. *Ex parte* presentations are permitted, except during the Sunshine Agenda period, provided they are disclosed as provided in Commission rules. See generally 47 CFR 1.1202, 1.1203, and 1.1206(a).

6. *Regulatory Flexibility Act.* As required by section 603 of the Regulatory Flexibility Act, the Commission has prepared an Initial Regulatory Flexibility Analysis (IRFA) of the expected impact on small entities of the proposals suggested in this document. The IRFA is set forth below. Written public comments are requested on the IRFA. These comments must be filed in accordance with the same filing deadlines as comments on the rest of the Notice, but they must have a separate and distinct heading designating them as responses to the Initial Regulatory Flexibility Analysis. The Secretary shall send a copy of this Notice of Proposed Rule Making, including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration in accordance with paragraph 603(a) of the Regulatory Flexibility Act. Public Law No. 96–354, 94 Stat. 1164, 5 U.S.C. 601 *et seq.* (1980).

7. *Comment Dates.* Pursuant to the applicable procedures set forth in sections 1.415 and 1.419 of the Commission's Rules, 47 CFR 1.415 and 1.419, interested parties may file comments on or before March 1, 1993 and reply comments on or before March 31, 1993. To file formally in this proceeding, you must file an original and four copies of all comments, reply comments, and supporting comments. If you want each Commissioner to receive a personal copy of your comments, you must file an original plus nine copies. You should send comments and reply comments to Office of the Secretary, Federal Communications Commission, Washington, DC 20554. Comments and reply comments will be available for public inspection during regular business hours in the FCC Reference Center (room 239) of the Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

Initial Regulatory Flexibility Analysis

Reason for Action: This rule making proceeding is initiated to obtain comment on whether the Commission's technical standards and authorization requirements regarding magnetic resonance equipment are necessary.

Objective: The Commission seeks to remove regulations regarding magnetic resonance equipment that appear unnecessary in order to enable advanced medical devices to be brought to market faster and more efficiently.

Legal Basis: The action proposed is authorized under sections 4(i), 302, 303(g) and 303(r) of the Communication Act of 1934, as amended, 47 U.S.C. 154(i), 302, and 303(r).

Reporting, Recordkeeping and Other Compliance Requirements: None.

Federal Rules which Overlap, Duplicate or Conflict with These Rules: None.

Description, Potential Impact and Number of Small Entities Involved: This action would relieve manufacturers and importers of magnetic resonance equipment used for medical diagnosis and monitoring of the responsibility to meet Commission testing and record keeping requirements. We estimate that there are no more than 20 such entities.

Any Significant Alternatives Minimizing the Impact on Small Entities Consistent with Stated Objective: None.

Medical devices, Hospitals, Reporting and recordkeeping requirements.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

Proposed Text

Part 18 of Title 47 of the Code of Federal Regulations is proposed to be amended as follows:

PART 18—INDUSTRIAL, SCIENTIFIC, AND MEDICAL EQUIPMENT

1. The authority citation for part 18 continues to read as follows:

Authority: 47 U.S.C. 4, 301, 302, 303, 304 and 307.

2. Section 18.107 is revised by adding a new paragraph (j) after the "note" to read as follows:

§ 18.107 Definitions.

* * * * *

(j) *Magnetic resonance equipment.* A category of ISM equipment in which RF energy is used to create images and data representing spatially resolved density of transient atomic resonances within an object.

3. Section 18.121 is revised to read as follows:

§ 18.121 Exemptions.

Non-consumer ultrasonic equipment, and non-consumer magnetic resonance equipment, that is used for medical diagnostic and monitoring applications is subject only to the provisions of § 18.105, §§ 18.109 through 18.119, and § 18.303.

BILLING CODE 6712–01–M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR 571

[Docket No. 92–66; Notice 1]

Federal Motor Vehicle Safety Standards; Fuel System Integrity

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Request for comments.

SUMMARY: NHTSA is considering initiating rulemaking to upgrade the protection currently provided by Federal Motor Vehicle Safety Standard (FMVSS) No. 301, Fuel System Integrity. The agency desires to reduce the number of fire-related casualties to occupants of passenger cars and light trucks and vans, in all types of crash modes—frontal, side, rear, and rollover. To assist NHTSA in developing specific

proposals, the agency requests answers to questions contained at the end of this notice.

DATES: Comments must be received by February 12, 1993.

ADDRESSES: Comments should refer to the docket and notice numbers set forth above and be submitted (preferably in 10 copies) to the Docket Section, NHTSA, room 5109, 400 Seventh Street SW., Washington, DC 20590 (Docket hours are from 9:30 a.m. to 4 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Mr. Dan Cohen, Division Chief, Frontal Crash Protection Division, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590. Telephone: (202) 366–2264.

SUPPLEMENTARY INFORMATION: FMVSS No. 301 first became effective for passenger cars in 1968 and for multipurpose passenger vehicles (i.e., passenger vans and sport utility vehicles) and trucks of 10,000 pounds or less Gross Vehicle Weight Rating (GVWR) in 1976. The standard also applies to all school buses, and NHTSA has granted a petition to consider extending the standard to trucks over 10,000 pounds GVWR. However, the context of this notice relates to passenger cars and light trucks and vans (including sport utility vehicles), hereafter termed LTVs.

Since the standard first applied to passenger cars in 1968, it has been revised several times, most significantly in rulemaking actions taken by NHTSA in the period 1973–76. As a result, the initial standard has been extended to vehicle types other than passenger cars and to crash modes other than frontal crashes. The standard, as it applies to passenger cars and LTVs, requires fuel system integrity in a 30 mph frontal fixed barrier crash, a 30 mph rear moving barrier crash, and a 20 mph lateral moving barrier crash. The standard also requires a static rollover test, after the above crashes. Fuel system integrity is defined by limiting the amount of fuel leakage from the crashed vehicle, during and up to 30 minutes after the crash.

The purpose of the standard "is to reduce deaths and injuries occurring from fires that result from fuel spillage during and after motor vehicle crashes" (49 CFR 571.301, S2). In a 1983 evaluation of the standard, NHTSA concluded that FMVSS No. 301 had been effective in reducing post-crash fires and estimated that as a result there were 6,500 fewer passenger car fires annually, resulting in 400 fewer deaths and 630 fewer moderate and serious injuries per year. ("Evaluation of FMVSS 301–75, Fuel System Integrity: Passenger Cars," DOT HS–806–335, January 1983). However, the agency noted that newer vehicles seemed to be experiencing an increasing fire rate and pointed out that the evaluation used limited data. Because of these concerns, and the fact that the 1983 report did not study fires in light truck crashes, the agency reevaluated FMVSS No. 301 in November 1990 ("Motor Vehicle Fires in Traffic Crashes and the Effects of the Fuel System Integrity Standard;" DOT HS 807 675).

The conclusions of this more extensive evaluation were much different from the one conducted 7 years earlier. While the evaluation still found that FMVSS No. 301 reduced post-crash fires (by 14 percent or 3,900 fewer fires annually) for passenger cars, it did not find any statistically significant reductions in fire-related injuries or deaths. For LTVs, the evaluation found that implementation of the standard had no effect at all.

Commenters to the evaluation raised questions concerning the data used by NHTSA and its analysis techniques. Commenters were also concerned about the specific identification of where the fire started and whether vehicle changes to fuel systems, type of gasoline, and changes related to emission standards may have affected fire rates over time. After analyzing these comments, the agency concluded that the results in the evaluation were valid. NHTSA's response can be found in Docket No. 82–21, Notice 03 (82–21–NO3–008).

While fires are relatively rare events (only occurring in one percent of towed vehicles in crashes), they tend to be severe, in terms of casualties. Each year, there are approximately 29,000 occupants exposed to fires occurring in passenger cars and LTV's. Four to five percent of occupant fatalities occur in crashes involving fire and approximately 1,400 occupants per year die in such crashes. In addition, another 9,000 occupants are injured (Crashworthiness Data System, 1991). This number of casualties, coupled with the finding that the existing standard has had a minimal effect, leads the agency to conclude that an upgrade of the standard may be appropriate.

A recent analysis of fires in tow-away crashes ("Fires and Burns in Towed Light Passenger Vehicle Crashes" by Partyka, July 1992) showed that most fires occurred in frontal crashes (59 percent), with about an equal number occurring in rollover, side impacts, and rear impacts (12–14 percent each). Each year, an estimated 1,000 occupants of vehicles in crashes with fires had second or third degree burns over at least six percent of the body and 550 of these were fatalities with second or third degree burns over more than 90 percent of the body. Nearly 650 people per year with moderately severe or greater (AIS≥2) burns had no other moderate or greater injury reported.

In addition to the above-mentioned analysis of tow-away crashes, the agency has undertaken a hard copy analysis of 1991 NASS cases involving fires, and a FARS analysis related to fires, to attempt to obtain more information on how fires occur, in preparation for suggesting regulatory countermeasures. The difficulty in analyzing fires in vehicle crashes is that the vehicles involved are often totally destroyed, resulting in uncertainty as to the vehicle component failure that resulted in the fire.

At this time, while the agency continues its data and other analyses, it is appropriate to seek guidance and information from the public on the most effective means to reduce vehicle fires. Also affecting the agency's decision to consider rulemaking to upgrade the standard is a recent petition by Volkswagen to allow the use of the dynamic test soon to be required by FMVSS No. 214, Side Impact Protection, to be substituted for the 20 mph lateral test in FMVSS No. 301. Volkswagen claims the FMVSS No. 214 test is a more severe test than that in FMVSS No. 301. The agency, in conducting FMVSS No. 214-type dynamic tests, noted fuel leakage in several tests, also indicating that this is a more severe test than the lateral test in FMVSS No. 301. The agency has granted that petition. To help focus its investigation and possible regulatory upgrades, the agency seeks responses to the following questions:

1. Should the standard be upgraded by requiring higher impact speeds? What impact speeds are most appropriate? Why?

2. Is there any reason to continue to have different impact speeds for frontal and rear crashes as compared to side crashes? If so, why?

3. Should the current impact barriers (a moving flat barrier for rear and side impacts and a fixed barrier for frontal impact be replaced by a moving contoured barrier, such as is used to test school buses for fuel system integrity or other types of barriers? Are the current impact barriers representative of typical real-world crash situations? Are there other specifications or test conditions of FMVSS No. 301 which are not representative of real-world crashes?

4. Should the standard be upgraded by requiring all vehicles that have a Gross Vehicle Weight Rating (GVWR) of

10,000 pounds or less be subjected to the impact test requirement for large school buses? The standard requires that the impact test for large school buses (those with a GVWR greater than 10,000 pounds) be conducted with a 4,000 lb, 30-mph-moving, contoured barrier impacting the bus at any point and angle.

5. Should the FMVSS No. 301 side impact requirement be replaced by the FMVSS No. 214 type of dynamic side impact test as has been promulgated for passenger cars? Are there available data on the locations of the fuel system that are vulnerable in a side impact?

6. Accident data show that fire risk increases significantly with vehicle age. Should a test be added to the standard for testing the effect of aging of vehicles related to fires? If so, what types of tests should be considered? For example, should a test be added to the standard for testing the impact of weathering and rust problems on the fuel system and the vehicle? Or, should vehicle maintenance requirements (i.e., as given in owner's manuals) require periodic inspection/replacement of certain fuel system components, such as connector hoses which may harden/crack with age?

7. Do occupants that die with serious burns have other injuries that prevented their escape or were they unconscious from fire-related gases or from impacts? Please report any other findings that seem unique to fire-related death or injury accidents.

8. FMVSS No. 301's fuel leakage limit requirements implicitly address evacuation time from the vehicle. Considering differences of ignitability of gasoline, diesel and other applicable alternative fuels, should the standard specify different levels of permissible fuel leakage based on the type of fuel used?

9. Should a test be added to the standard for testing nonmetallic fuel tanks?

10. What available or foreseeable technologies could be used to improve fuel system integrity? What are their associated costs?

11. From the above discussions, would improving fuel system integrity by upgrading the standard prevent a reasonable number of serious occupant burns and fatalities or are other changes in vehicle materials and design needed as well?

12. The agency would like to consider international harmonization with other regulations and standards. Would an upgrade of FMVSS No. 301 increase or decrease the "window of compliance" with other foreign regulations and standards? For example, the current ECE Regulation No. 34 (for passenger cars only) and the Japanese Technical Standard for Fuel Leakage in Collision, etc. (for passenger cars and MPVs up to 5,600 pounds GVWR) do not require side impact tests or rollover tests.

The agency requests that responses be as specific and quantitative as possible.

Submission of Comments

Interested persons are invited to submit comments. It is requested but not required that 10 copies be submitted.

Comments must not exceed 15 pages in length (49 CFR 533.21). Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion. If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential business information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation 49 CFR part 512.

All comments received before the close of business on the comment closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Comments received too late for consideration in regard to the final rule will be considered as suggestions for further rulemaking action. Comments on the proposal will be available for inspection in the docket. The NHTSA will continue to file relevant information as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose a self-addressed, stamped post card in the envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

Issued on: December 8, 1992.

Barry Felrice,

Associate Administrator for Rulemaking.

[Docket No. 74-14; Notice 79]

RIN 2127-AE46

Federal Motor Vehicle Safety Standards; Occupant Crash Protection

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: Vehicle manufacturers are currently permitted to comply with the automatic crash protection requirements by means of any technology that provides the specified levels of protection in a 30 miles per hour barrier crash test. The two types of automatic crash protection currently installed in vehicles are air bags and automatic belts. However, a new law (the NHTSA Authorization Act of 1991) provides that the agency shall amend the automatic crash protection requirements to specify that air bags must be the means installed to provide the requisite automatic protection. This notice proposes to amend the automatic crash protection requirements to conform to this statutory directive.

In addition, this notice proposes to require that certain information about air bags be labeled in vehicles equipped with air bags. These labeling requirements are intended to ensure that consumers will have access to important safety information with respect to the air bags installed in their vehicles.

DATES: *Comment closing date:* Comments on this notice must be received by NHTSA no later than February 12, 1993.

Proposed effective date: If adopted in a final rule, the amendments to part 571 and part 585 proposed in this notice would become effective 180 days after publication of the final rule in the **Federal Register**.

Proposed compliance dates: See the Proposed Compliance Dates section at the beginning of **SUPPLEMENTARY INFORMATION.**

ADDRESSES: Comments should refer to the docket and notice number set forth in the heading of this notice and be submitted to: NHTSA Docket Section, room 5109, 400 Seventh Street, SW., Washington, DC 20590. The NHTSA Docket Section is open to the public from 9:30 a.m. to 4 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Daniel Cohen, Chief, Frontal Crash Protection Division, Office of Vehicle Safety Standards, NRM–12, 400 Seventh Street, SW., Washington, DC 20590. Mr. Cohen can be reached by telephone at (202) 366–4911.

SUPPLEMENTARY INFORMATION:

Proposed Compliance Dates

At least 95 percent of each manufacturer's passenger cars manufactured on or after September 1, 1996 and before September 1, 1997 would have to be equipped with an air bag and a manual lap/shoulder belt at both the driver's and right front passenger's seating position. Every passenger car manufactured on or after September 1, 1997 would have to be so equipped.

At least 80 percent of each manufacturer's light trucks manufactured on or after September 1, 1997 and before September 1, 1998 would have to be equipped with an air bag and a manual lap/shoulder belt. Manufacturers may count towards compliance with the 80 percent requirement those light trucks it produces that are equipped with an air bag and manual lap/shoulder belt at the driver's position and a dynamically-tested manual lap/shoulder belt at the right front passenger's position.

Every light truck manufactured on or after September 1, 1998 would have to be equipped with an air bag and a manual lap/shoulder belt at both the driver's and right front passenger's seating positions.

Statutory Mandate

President Bush signed into law the "Intermodal Surface Transportation Efficiency Act of 1991" on December 18, 1991 (Pub. L. 102–240). That Act is intended to develop a national intermodal surface transportation system and sets forth guidance and mandates for several different modal administrations within the Department of Transportation. Sections 2500–2509 of this Act are called the "National Highway Traffic Safety Administration Authorization Act of 1991." These sections authorize appropriations for the agency for fiscal years 1992 through 1995 and direct the agency to take certain actions.

Section 2508 of this Act requires NHTSA to issue, not later than September 1, 1993, a final rule making certain amendments to Standard No. 208. This section requires that automatic crash protection must be provided by an inflatable restraint (i.e., an air bag) in all passenger cars and light trucks, and that the seating positions protected by an air bag shall also be equipped with a manual lap/shoulder belt. A schedule of dates by which all vehicles shall be equipped with air bags and manual lap/shoulder belts at both front outboard seating positions is set forth in the Act. The Act also requires certain information about air bags and manual lap/shoulder belts to appear in the owner's manual of new vehicles and requires NHTSA to establish procedures for providing temporary exemptions from the air bag requirement if there is an interruption in the supply of air bag components due to unavoidable events not within the control of vehicle manufacturers. This notice proposes to implement the statutory mandates in section 2508.

Proposed Requirements

1. Vehicles Proposed To Be Covered by this Rulemaking

Section 2508 includes in its air bag mandate all those vehicles that NHTSA had determined in previous rulemaking proceedings should be subject to the existing requirements for automatic crash protection. Accordingly, this notice proposes that all passenger cars be subject to the air bag mandate.

In addition, all trucks, multipurpose passenger vehicles (mpv's), and buses (except walk-in van-type trucks and vehicles designed to be sold exclusively to the United States Postal Service) with a gross vehicle weight rating of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less would also be subject to this air bag mandate. These trucks, mpv's and buses are collectively referred to as "light trucks" throughout the remainder of this preamble. The inclusion of light trucks in this proposal reflects the statutory determination that vehicles such as small pickups, vans, and sport utility vehicles should be equipped with both driver and front passenger air bags.

In connection with the extension of other safety standards to light trucks, some manufacturers of light trucks manufactured in more than one stage have commented that their vehicles should be excluded from the extended requirements because it would not be practicable for such vehicles to comply with the extended safety standard. NHTSA notes that section 2508 draws no distinction between light trucks that are manufactured in a single stage and those that are manufactured in more than one stage. Instead, that section specifies that all light trucks manufactured after September 1, 1998 shall be equipped with air bags and manual lap/shoulder belts at the driver's and front right passenger's seating positions, regardless of how many stages it took to manufacture the light truck. This proposal tracks the statute in that it would require multistage light trucks to comply with the same requirements that would apply to comparable single stage light trucks.

2. Schedule for Compliance

This proposal would simply adopt the schedule for compliance set forth in section 2508. With respect to passenger cars, this would mean that at least 95 percent of each manufacturer's passenger cars manufactured on or after September 1, 1996 and before September 1, 1997 must be equipped with an air bag and a manual lap/shoulder belt at both the driver's and right front passenger's seating position. Every passenger car manufactured on or after September 1, 1997 would have to be so equipped.

With respect to light trucks, this proposal would require that at least 80 percent of each manufacturer's light trucks manufactured on or after September 1, 1997 and before September 1, 1998 be equipped with an air bag and a manual lap/shoulder belt. However, unlike with passenger cars, the Act does not require the air bag and manual lap/shoulder belt to be provided at both the driver's and right front passenger's seating position on light trucks manufactured between September 1, 1997 and September 1, 1998. Instead, manufacturers may count towards compliance with the 80 percent air bag requirement those light trucks it produces that are equipped with an air bag and manual lap/shoulder belt at the driver's position and a dynamically-tested manual lap/shoulder belt at the right front passenger's position.

This conclusion is based upon the provision in section 2508(a)(1) that: "This section supplements and revises, but does not replace, Federal Motor Vehicle Safety Standard 208, including the amendment to such Standard 208 of March 26, 1991 (56 FR 12472), extending the requirements for automatic crash protection, together with incentives for more innovative automatic crash protection, to trucks, buses, and multipurpose passenger vehicles." Particularly significant in that sentence are the references to the March 26, 1991 amendment and to the incentives for more innovative automatic crash protection. The March 26, 1991 amendment is the final rule that extended the automatic crash protection requirements to light trucks. That final rule established a phase-in implementation of the automatic crash protection requirements for light trucks, with a specified percentage of each

manufacturer's production of light trucks required to be equipped with automatic crash protection beginning with vehicles manufactured on or after September 1, 1994. The phase-in for light truck automatic crash protection ends on September 1, 1997, after which date the 1991 final rule requires all light trucks to be equipped with automatic crash protection.

During the phase-in period (i.e., from September 1, 1994 through August 31, 1997), the 1991 final rule provided a number of "credits" for light truck manufacturers. Among these credits are "carry-forward" credits, which permit manufacturers that exceed the specified minimum percentage of light trucks equipped with automatic crash protection in one year of the phase-in to count those excess vehicles as credits toward the specified percentage during any subsequent model years of the phase-in (S4.2.5.5 (b), (c), and (d)); the "1.5 truck credit," which allows manufacturers to count light trucks equipped with an air bag or other non-belt means of automatic crash protection at the driver's position and any type of automatic crash protection at the right front passenger's position as 1.5 trucks equipped with automatic crash protection during the phase-in (S4.2.5.5(a)(1)); and the "one truck credit" provision, which allows manufacturers to count light trucks equipped with an air bag or other non-belt means of automatic crash protection at the driver's position and a dynamically-tested manual lap/shoulder belt at the right front passenger's position as one truck equipped with automatic crash protection during the phase-in (S4.2.5.5(a)(2)).

By the terms of the March 1991 final rule, all of these credits but one expire as of September 1, 1997, the date for full implementation of the automatic crash protection requirements. The only credit that the March 1991 final rule allows after September 1, 1997 is the "one truck credit." From September 1, 1997 through August 31, 1998, the March 1991 final rule allows manufacturers to count light trucks equipped with an air bag or other non-belt automatic crash protection at the driver's position and a dynamically-tested manual lap/shoulder belt at the right front passenger's position as a truck that complies with the automatic crash protection requirement (see S4.2.6).

When viewed against this background, it seems clear that the reference in section 2508 to incentives for more innovative automatic crash protection means the "one truck credit" provision. It also seems clear from the statutory provision that section 2508 "does not replace" the incentives for more innovative automatic crash protection in the March 1991 final rule that Congress intended the one truck credit provision to be available to manufacturers during the period from September 1, 1997 to August 31, 1998. Consistent with this conclusion is the last sentence in section 2508(b)(2): "The incentives or credits available under Standard 208 (as amended by this section) prior to September 1, 1998, shall not be available to the manufacturers to comply with the 100 percent requirement to this paragraph on and after such date." This sentence contemplates at least the possibility that credits will continue to be available through August 31, 1998.

Accordingly, this notice would retain the one truck credit during the period from September 1, 1997 to August 31, 1998. Manufacturers would be permitted to count trucks produced during this period that are equipped with an air bag at the driver's position and a dynamically-tested manual lap/shoulder belt at the right front passenger's position toward compliance with the 80 percent air bag requirement.

Every light truck manufactured on or after September 1, 1998 would have to be equipped with an air bag and a manual lap/shoulder belt at both the driver's and right front passenger's seating positions. The March 1991 rule established no credits that could have been used by manufacturers for light trucks manufactured on or after September 1, 1998. To ensure that there will be no credits after that date, section 2508(b)(2) provides, as noted above, that the incentives or credits available under Standard 208 prior to September 1, 1998, shall not be available to the manufacturers to comply with the 100 percent requirement on and after such date.

3. Information to Appear on Labels and in Owner's Manuals

Section 2508(a)(2) reads as follows:

> The amendment to such Standard 208 shall also require, to be effective as soon as possible after the promulgation of such amendment, that the owner manuals for passenger cars and trucks, buses, and multipurpose passenger vehicles equipped with an inflatable restraint include a statement in an easily understandable format—
>
> (A) That the vehicle is equipped with an inflatable restraint referred to as an "air bag" and a lap and shoulder belt in either or both the front outboard seating positions;
>
> (B) That the air bag is a supplemental restraint;
>
> (C) That it does not substitute for lap and shoulder belts which must also be correctly used by an occupant in such seating position to provide restraint or protection not only from frontal crashes but from other types of crashes or accidents; and
>
> (D) That all occupants, including the driver, should always wear their lap and shoulder belts, where available, or other safety belts, whether or not there is an inflatable restraint.

This notice proposes to require that this information be provided in owner's manuals of vehicles equipped with air bags. In response to the statutory directive that this requirement for information to appear in owner's manuals take effect as soon as possible, this notice proposes that such a requirement become effective 180 days after publication of a final rule. The agency has tentatively concluded that this proposed 180 day leadtime is needed to allow vehicle manufacturers to incorporate this new language into the owner's manuals of their vehicles equipped with air bags, and is short enough so that the public will be provided with this information in new vehicle owner's manuals as soon as possible. Commenters are specifically invited to address this tentative agency conclusion.

NHTSA would also like to point out that this proposed requirement would not establish the precise language that must appear in the owner's manual. Instead, it proposes that manufacturers be required to provide this information in their owner's manuals, and allows the manufacturer to choose the language it believes will most effectively convey the information to readers of the owner's manual.

The agency is proposing additional information requirements in response to a petition for rulemaking from the Motor Vehicle Manufacturers Association (MVMA), requesting changes in the information required to be provided with respect to air bags. The MVMA petition notes that S4.5.1 of Standard No. 208 requires a permanently affixed label on each vehicle equipped with an air bag. The label must indicate the manufacturer's recommended schedule for the maintenance or replacement of such air bag. MVMA stated that, while such a labeling requirement was appropriate when it was established, technical progress with air bags since the mid 1970's has made this labeling requirement no longer appropriate.

In support of this position, MVMA stated that most vehicles currently equipped with air bags are permanently labeled with a statement to the effect that no regular maintenance of the air bag system is necessary. Such information does not, in MVMA's view, rise to the level that it ought to be permanently labeled on each vehicle. MVMA asked that NHTSA update this requirement to limit it to vehicles equipped with air bag systems that require some periodic maintenance or replacement.

MVMA's petition also asked that other information be required to be labeled in vehicles equipped with air bags, so as to increase the effectiveness of those air bags. MVMA asked that the air bag label be revised to require that information be provided on at least the following topics:

a. Limitations of air bag effectiveness (i.e., they are most effective in frontal crashes, but do not deploy in low speed frontal crashes; they are not effective in side, rear, or rollover crashes),

b. The supplementary nature of air bag protection (i.e., safety belts must be worn to provide maximum safety protection),

c. Cautions about proper positioning of child safety seats in vehicles equipped with air bags (i.e., children riding in rear facing safety seats should not be riding in the right front seating position of vehicles equipped with an air bag for that seating position), and

d. Cautions to other passengers not to sit unnecessarily close to the point from which the air bag will be deployed for that seating position (e.g., the steering wheel, the instrument panel, etc.).

NHTSA has tentatively concluded that it agrees with MVMA's suggestion that the air bag labeling requirements should be updated to reflect the technical advances that have been made with air bags since the time when the current labeling requirements were promulgated. The agency tentatively agrees that the maintenance schedule labeling requirement no longer results in consumers being provided with particularly useful information. MVMA notes that, pursuant to the requirement, most current vehicles equipped with air bags are labeled with information akin to the following: "Regular Maintenance of the Air Bag System is not Required." Accordingly, this notice proposes to delete the requirement for scheduled air bag system maintenance and replacement information to appear on a permanently affixed label if the vehicle manufacturer does not recommend any scheduled maintenance or replacement. Such information would still have to be provided on a permanently affixed label for those vehicles equipped with air bag systems for which the vehicle manufacturer specifies some regular maintenance or replacement schedule.

With respect to the four additional types of information that MVMA asked be included on the label, NHTSA has tentatively determined that MVMA's request has merit. It seems appropriate to inform the public about the types of occupant behavior and uses that may reduce the effectiveness of air bags in a frontal crash. Furthermore, with the statutory mandate in section 2508 for all new passenger cars and light trucks to be equipped with air bags, this type of information can help ensure that vehicle occupants will receive the maximum safety benefit from these air bags in the future.

However, the agency is not proposing to require that all of this information be permanently affixed to a label on the vehicle, as MVMA requested. NHTSA has tentatively concluded that providing all of the information MVMA requested on a permanent label would potentially create an "information overload," in response to which consumers would pay less attention to this information. Instead, the agency is proposing in this notice that a label be permanently affixed to the sun visor for each front outboard seating position equipped with an air bag. This label could be positioned on either side of the sun visor, so that it was constantly visible or so that it was visible only when the sun visor was extended down, at the vehicle manufacturer's option. This label would set forth simple statements about the do's and don'ts that should be followed to obtain the maximum safety protection from the air bag. NHTSA is proposing that the following information appear on the sun visor label:

For maximum safety protection in all types of crashes, you must always wear your safety belt.

Do not install rearward-facing child restraints in any front passenger seat position.

Do not sit or lean unnecessarily close to the air bag.

Do not place any objects over the air bag or between the air bag and yourself.

See the owner's manual for further information and explanations.

In addition, if regular maintenance or scheduled replacement is recommended for the air bag, the recommended maintenance or replacement schedule would also have to appear on this label.

The agency has proposed these statements for the label because they will ensure that vehicle occupants will have the basic information necessary to receive the maximum safety protection from their air bags. The statement about the need to wear the safety belt even though an air bag is present is required to appear in the owner's manual, pursuant to section 2508, and is so fundamental to safety protection that NHTSA has tentatively concluded that it should be presented first in the sun visor label. The second proposed statement, about not installing rearward-facing child restraints at seating positions equipped with an air bag, is information that was released in a NHTSA Consumer Advisory Bulletin on December 10, 1991. The third proposed statement, about not sitting unnecessarily close to the air bag, reflects the same premise for adult occupants as the second statement reflects for child occupants. That is, sitting or leaning too close to the air bag creates the chance of injury from a deploying air bag. NHTSA has tentatively concluded that this information would be useful to the public. The fourth proposed statement, about not putting any item over the air bag cover or between the air bag and the occupant, is important information so that the occupant will not inadvertently do something that would prevent the air bag from providing the level of occupant protection it is designed to provide. The fifth and final proposed statement would direct the vehicle occupant to the vehicle owner's manual for further information.

The agency invites public comment on the proposed content of these sun visor labels. Specifically, the agency is interested in comments about whether these five proposed statements are believed to be adequate, or whether the commenter believes that some of these statements are unnecessary or that some other statements should be substituted for one or more of these proposed statements. The agency is especially interested in the commenter's reasons for believing that these statements should be adopted as proposed or that the proposal should be modified.

NHTSA is concerned that some means may be necessary to alert vehicle occupants to the presence of the label on the sun visor, especially if manufacturers choose to affix the label on the side of the sun visor that will not generally be visible. One means of alerting occupants to the sun visor label would be to place a label in a constantly visible location within the occupant compartment alerting occupants to the label on the sun visor. For instance, a label could be placed on each air bag cover stating: "Contains air bag. Please read important safety information labeled on sun visor." The agency requests comments on the need for such a requirement to appear in the final rule on this subject.

NHTSA is also considering other possibilities for alerting the occupant to the label on the sun visor. One possibility is that the air bag covers could be embossed with a new universal air bag symbol, such as the one currently being used on the vehicle identification number (VIN) plate by some vehicle manufacturers. In conjunction with this, it might be valuable to affix a special removable warning label to the air bag cover on all new and used air bag vehicles being displayed for sale. This removal label would explain the reason for the new symbol and call attention to the warning label(s) on the sun visor(s). As part of this approach, a public education campaign could be undertaken to educate the public as to the meaning of the new symbol and the need for first-

time owners of vehicles with air bags to learn what they can do to obtain the maximum safety protection from their air bags. The agency seeks public comments on this approach to alerting occupants and on this issue generally.

The final aspect of this proposed scheme for providing the public with important safety information about air bags would be information in the vehicle owner's manual, in addition to the statutorily-required information on the importance of belt use. The owner's manual would also be required to include information about proper positioning of occupants relative to the air bag (e.g., not to sit unnecessarily close to the air bag), if any such instructions are appropriate for the air bag system installed in the vehicle; information about the positioning of child seats at positions equipped with an air bag (e.g., rear-facing child seats should not be installed at this position and the seat should be adjusted as far rearward as possible if a forward-facing child seat is installed), if any such instructions are appropriate; information about not placing objects on the air bag cover or between the occupant and the air bag, if any such instructions are appropriate; and any other information that is appropriate so that the occupants can receive the full protection the air bag system is designed to provide.

As was proposed above for the information to appear in the owner's manual with respect to the importance of belt use, the agency is not proposing the exact language that must appear in the owner's manual. Instead, this proposed requirement is simply that vehicle manufacturers provide the necessary information. It allows the manufacturers the flexibility to present this information in the most effective manner and in a way that is tailored to the features of the air bag system in the particular vehicle.

4. Temporary Exemption From Air Bag Requirements

Section 2508(c) requires the agency to prescribe the procedures to be followed by manufacturers in applying for temporary exemptions from the air bag requirements, as well as the content and timing of any such applications. That section also provides that a temporary exemption from the air bag installation requirements shall be granted only if the agency "finds that there has been a disruption in the supply of any inflatable restraint component, or a disruption in the use and installation by the manufacturer of such component due to unavoidable events not under the control of the manufacturer, that will prevent the manufacturer from meeting its anticipated production volume of vehicles with (air bags)." In addition, the statute provides that any temporary exemptions must be conditioned upon the manufacturer recalling the exempted vehicles promptly to install the omitted air bag(s) when adequate supplies of air bags become available again. The statute also provides that notice of each application for temporary exemption shall be published in the **Federal Register** and each notice of grant or denial shall be published in the **Federal Register**, along with the reasons therefor.

NHTSA is proposing to provide a temporary exemption section in Standard No. 208 that is modeled closely after the temporary exemption provisions set forth in 49 CFR part 555. Each application for a temporary exemption from the air bag requirement would have to identify the components for the air bag system that have become unavailable due to circumstances beyond the manufacturer's control, explain briefly the cause of the disruption and why it is beyond the manufacturer's control, estimate the anticipated duration of the disruption, set forth any other information the manufacturer believes the agency should consider in reaching a decision on the application, and contain an unconditional statement by the applicant that an air bag will be installed in every vehicle at those seating positions for which a temporary exemption is granted in response to the application. The vehicle manufacturer would also have to propose a reasonable time within which it would recall all vehicles granted an exemption pursuant to this application and install the omitted air bags, and explain why it believes that period of time is reasonable.

Upon receipt of an application for temporary exemption, NHTSA would review the application to see if it was complete. The manufacturer would be advised if the application did not contain all the necessary information. If the application were complete, NHTSA would publish notice of the application in the **Federal Register**. After reviewing the information available to it, NHTSA would issue its decision to grant or deny the exemption application. In no event would NHTSA's final decision on the application be issued later than 60 days after the date on which a complete petition was received.

If NHTSA were to grant a temporary exemption, it would state that the exemption applies to vehicles manufactured between specified dates. The exemption would generally begin upon the date the grant notice was published in the **Federal Register** and end on the date specified in the notice. Under the proposal, the exempted manufacturer would be required to affix a label within the passenger compartment of every vehicle not equipped with an air bag. This label would state in block capitals:

THIS VEHICLE DOES NOT CONTAIN AN AIR BAG IN CONFORMANCE WITH THE FEDERAL MOTOR VEHICLE SAFETY STANDARD FOR OCCUPANT CRASH PROTECTION. IT WAS EXEMPTED PURSUANT TO NHTSA EXEMPTION NO. ____.

This label could only be removed from the vehicle after the manufacturer had recalled the vehicle and installed the required air bag(s). Upon removal of the label, the vehicle would be certified as complying with all the occupant crash protection requirements of Standard No. 208.

In addition, this notice proposes that if any vehicles are delivered without an air bag, pursuant to an exemption, the manufacturer shall furnish written notification to the dealer and to the first purchaser of the vehicle for purposes other than resale that:

1. This vehicle does not conform to Federal Motor Vehicle Safety Standard No. 208, because it is not equipped with an inflatable restraint at (insert the affected seating positions).

2. The vehicle was allowed to be sold pursuant to NHTSA Exemption No. (insert appropriate exemption number).

3. The reason this vehicle was exempted from the requirement for an inflatable restraint was because of factors beyond the vehicle manufacturer's control.

4. The vehicle manufacturer will recall this vehicle not later than (insert the time set forth in the exemption) and install the missing inflatable restraint at no charge.

5. If the reader has any questions or would like some further information, he or she may contact the manufacturer at (insert an address and telephone number).

Commenters are asked to address these proposed exemption procedures. It would be helpful to the agency if the commenter would carefully read section 2508(c) while preparing the comments, so as to minimize instances where commenters ask the agency to omit some requirement mandated by that section. For instance, comments to the effect that there should be no exemption procedures or that special labels should not be required on exempted vehicles will not prove very helpful, since the statute expressly states that there must be exemption procedures and that

exempted vehicles must be labeled. It will be more helpful if commenters identify areas where they believe the agency has not implemented a statutory mandate or areas where the commenter believes the agency has imposed an unnecessary requirement that goes beyond that which is statutorily required.

5. Reporting Requirements

Whenever the agency specifies a phase-in of some performance requirement, it is necessary for enforcement of that phase-in to require manufacturers to report at the end of the production period its total production of vehicles and the number of such vehicles that are certified as complying with the relevant performance requirement. Accordingly, since section 2508 mandates a phase-in of air bags as the exclusive means of complying with the automatic crash protection requirements, it will be necessary to amend the reporting requirements to require manufacturers to report what percentage of their production is equipped with air bags certified as complying with the crash protection requirements. This notice proposes to amend Part 585 in this manner.

This proposed rule would not have any retroactive effect. Under section 103(d) of the National Traffic and Motor Vehicle Safety Act (Safety Act; 15 U.S.C. 1392(d)), whenever a Federal motor vehicle safety standard is in effect, a State may not adopt or maintain a safety standard applicable to the same aspect of performance which is not identical to the Federal standard, except to the extent that the State requirement imposes a higher level of performance and applies only to vehicles procured for the State's use. Section 105 of the Safety Act (15 U.S.C. 1394) sets forth a procedure for judicial review of final rules establishing, amending or revoking Federal motor vehicle safety standards. That section does not require submission of a petition for reconsideration or other administrative proceedings before parties may file suit in court.

Rulemaking Analyses and Notices

Executive Order 12291 (Federal Regulation) and DOT Regulatory Policies and Procedures

NHTSA has considered the costs and other impacts that would be associated with this proposal if it were adopted as a final rule. Based on that consideration, NHTSA has determined that this proposal is not "major" within the meaning of Executive Order 12291, because the costs should be well below the $100 million threshold for categorizing a rule as "major." However, this proposal is "significant" within the meaning of the Department of Transportation's regulatory policies and procedures, because of the level of public interest. Accordingly, NHTSA has prepared a preliminary regulatory evaluation (PRE), a copy of which has been placed in the docket for this rulemaking action. Interested persons may obtain copies of that PRE by writing to: NHTSA Docket Section, room 5109, 400 Seventh Street, SW., Washington, DC 20590.

The PRE may be briefly summarized as follows. Based on the information currently available, the agency believes that almost all manufacturers were planning on using air bags in their vehicles produced during the model years affected by this proposal. Hence, the costs associated with this proposal should be very small. There may be some minor costs associated with the proposed labeling requirements for the sun visors, but again the agency believes that most manufacturers are already labeling the sun visors in their cars equipped with air bags.

Regulatory Flexibility Act

NHTSA has also considered the effects of this regulatory action under the Regulatory Flexibility Act. The agency does not believe that this proposal will have any significant impacts on manufacturers other than final stage manufacturers. However, there are some potentially significant impacts on final stage manufacturers. This is discussed in detail in the PRE for this rulemaking. Interested persons are invited to review this section of the PRE.

National Environmental Policy Act

NHTSA has analyzed the environmental issues associated with air bags as part of its requirements for automatic crash protection in new cars (49 FR 28962; July 17, 1984) and light trucks and vans (56 FR 12472; March 26, 1991), and determined that the widespread introduction and use of air bags would not have a significant impact on the quality of human life. Based on those analyses, which were conducted pursuant to the National Environmental Policy Act, NHTSA has determined that a final rule adopting this proposal would likewise not have a significant impact on the quality of human life. A discussion related to the environmental issues associated with air bags can be found in Docket No. 74–14; Notice 36 (for passenger cars) and Docket No. 74–14; Notice 70 (for light trucks and vans).

Executive Order 12612 (Federalism)

The agency has analyzed this proposal in accordance with the principles and criteria set forth in Executive Order 12612. NHTSA has determined that this proposal does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Paperwork Reduction Act

The reporting and recordkeeping requirements associated with this proposed rule are being submitted to the Office of Management and Budget for approval in accordance with 44 U.S.C. chapter 35 under OMB No.: 2127–0535; *Administration:* National Highway Traffic Safety Administration; *Title:* Production Reporting System for Air Bag Compliance (49 CFR part 585); *Need for Information:* To assess compliance with air bag phase-in requirements; *Proposed Use of Information;* To determine if manufacturers are complying with the air bag phase-in schedule; *Frequency:* Once only; *Burden Estimate:* 828 hours; *Respondents:* 23; *Form(s):* None; *Avergage Burden Hours for Respondent:* 36.

FOR FURTHER INFORMATION CONTACT: The Information Requirements Division, M–34, Office of the Secretary of Transportation, 400 Seventh Street, SW., Washington, DC 20590, (202) 366–4735, or Edward Clarke, Office of Management and Budget, New Executive Office Building, room 3228, Washington, DC 20503, (202) 395–7340.

Request for Comments

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted.

All comments must not exceed 15 pages in length. (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential business information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the

agency's confidential business information regulation. 49 CFR part 512.

All comments received before the close of business on the comment closing date indicated above for the proposal will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Comments received too late for consideration in regard to the final rule will be considered as suggestions for further rulemaking action. Comments on the proposal will be available for inspection in the docket. The NHTSA will continue to file relevant information as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose a self-addressed, stamped postcard in the envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

List of Subjects

49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles.

49 CFR Part 585

Motor vehicles, Reporting and recordkeeping requirements. In consideration of the foregoing, NHTSA proposes to amend chapter V of title 49 of the Code of Federal Regulations as follows:

PART 571—[AMENDED]

1. The authority citation for part 571 would continue to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

§ 571.208 [Amended]

2. S4.1.4 of Standard No. 208 would be revised to read as follows:

S4.1.4 *Passenger cars manufactured on or after September 1, 1989, but before September 1, 1996.*

* * * * *

3. S4.1.5 of Standard No. 208 would be amended by removing existing § 4.1.5 through § 4.1.5.2(d), inclusive, and substituting a revised § 4.1.5 through S4.1.5.3, to read as follows:

S4.1.5 *Passenger cars manufactured on or after September 1, 1996.*

S4.1.5.1 *Frontal/angular automatic protection system.*

(a) Each passenger car manufactured on or after September 1, 1996 shall:

(1) At each front outboard designated seating position meet the frontal crash protection requirements of S5.1 by means that require no action by vehicle occupants;

(2) At any front designated seating positions that are not "outboard designated seating positions," as that term is defined at 49 CFR 571.3, and at any rear designated seating positions that are not "rear outboard designated seating positions," as that term is defined at S4.1.4.2(c) of this standard, have a Type 1 or Type 2 seat belt assembly that conforms to Standard No. 209 and S7.1 and S7.2 of this standard; and

(3) At each front designated seating position that is an "outboard designated seating position," as that term is defined at 49 CFR 571.3, and at each rear designated seating position that is a "rear outboard designated seating positions," as that term is defined at S4.1.4.2(c) of this standard, have a Type 2 seat belt assembly that conforms to Standard No. 209 and S7.1 through S7.3 of this standard, and, in the case of the Type 2 seat belt assemblies installed at the front outboard designated seating positions, meet the frontal crash protection requirements with the appropriate anthropomorphic test dummy restrained by the Type 2 seat belt assembly in addition to the means that requires no action by the vehicle occupant.

(b) For the purposes of this section, an *inflatable restraint system* means an air bag that is concealed in the steering wheel or the instrument panel until it is activated in a crash.

S4.1.5.2 *Passenger cars manufactured on or after September 1, 1996 and before September 1, 1997.*

S4.1.5.2.1 The amount of passenger cars complying with the requirement of S4.1.5.1(a)(1) by means of an inflatable restraint system at the driver's and right front passenger's position shall be not less than 95 percent of the manufacturer's total production of passenger cars manufactured on or after September 1, 1996, and before September 1, 1997. A vehicle shall not be deemed to be in noncompliance with this standard if its manufacturer establishes that it did not have reason to know in the exercise of due care that such vehicle is not in conformity with the requirement of this standard.

S4.1.5.2.2 *Passenger cars produced by more than one manufacturer.*

S4.1.5.2.2.1 For the purpose of calculating the production of passenger cars by each manufacturer during the period specified in S4.1.5.2, a passenger car produced by more than one manufacturer shall be attributed to a single manufacturer as follows, subject to S4.1.5.2.2.2:

(a) A passenger car that is imported into the United States shall be attributed to the importer.

(b) A passenger car manufactured within the United States by more than one manufacturer, one of which also markets the vehicle, shall be attributed to the manufacturer that markets the vehicle.

S4.1.5.2.2.2 A passenger car produced by more than one manufacturer shall be attributed to any one of the vehicle's manufacturers, as specified in an express written contract, reported to the National Highway Traffic Safety Administration pursuant to Part 585 of this title, between the manufacturer so specified and the manufacturer to which the vehicle otherwise would be attributed, pursuant to S4.1.5.2.2.1.

S4.1.5.3 *Passenger cars manufactured on or after September 1, 1997.*

Each passenger car manufactured on or after September 1, 1997 shall comply with the requirement of S4.1.5.1(a)(1) by means of an inflatable restraint system at the driver's and right front passenger's position. A vehicle shall not be deemed to be in noncompliance with this standard if its manufacturer establishes that it did not have reason to know in the exercise of due care that such vehicle is not in conformity with the requirement of this standard.

* * * * *

4. S4.2.6 of Standard No. 208 would be amended by removing existing S4.2.6, and substituting a new S4.2.6 through S4.2.6.2, to read as follows:

S4.2.6 *Trucks, buses, and multipurpose passenger vehicles with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less manufactured on or after September 1, 1997.* Each truck, bus, and multipurpose passenger vehicle with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less, which is manufactured on or after September 1, 1997, shall comply with the requirements of S4.1.5.1 of this standard (as specified for passenger cars), except that walk-in-van-type trucks and vehicles designed to be sold exclusively to the U.S. Postal Service may instead meet the requirements of S4.2.1.1 or S4.2.1.2 of this standard.

S4.2.6.1 *Trucks, buses, and multipurpose passenger vehicles with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less manufactured on or after September 1, 1997 and before September 1, 1998.*

S4.2.6.1.1 The amount of trucks, buses, and multipurpose passenger vehicles complying with the requirement of S4.1.5.1(a)(1) of this standard by means of an inflatable restraint system shall be not less than 80 percent of the manufacturer's total combined production of subject vehicles manufactured on or after September 1, 1997 and before September 1, 1998. Each truck, bus, or multipurpose passenger vehicle with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less manufactured on or after September 1, 1997 and before September 1, 1998, whose driver's seating position complies with S4.1.5.1(a)(1) by means of an inflatable restraint system and whose right front passenger's seating position is equipped with a manual Type 2 seat belt assembly that complies with S5.1 of this standard, with the seat belt assembly adjusted in accordance with S7.4.2 of this standard, shall be counted as a vehicle complying with S4.1.5.1(a)(1) by means of an inflatable restraint system. A vehicle shall not be deemed to be in noncompliance with this standard if its manufacturer establishes that it did not have reason to know in the exercise of due care that such vehicle is not in conformity with the requirement of this standard.

S4.2.6.1.2 *Trucks, buses, and multipurpose passenger vehicles with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less produced by more than one manufacturer.*

S4.2.6.1.2.1 For the purpose of calculating the production by each manufacturer during the period specified in S4.2.6.1.1, a truck, bus, or multipurpose passenger vehicle with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less produced by more than one manufacturer shall be attributed to a single manufacturer as follows, subject to S4.2.6.1.2.2:

(a) A vehicle that is imported into the United States shall be attributed to the importer.

(b) A vehicle manufactured within the United States by more than one manufacturer, one of which also markets the vehicle, shall be attributed to the manufacturer that markets the vehicle.

S4.2.6.1.2.2 A truck, bus, or multipurpose passenger vehicle produced by more than one manufacturer shall be attributed to any one of the vehicle's manufacturers, as specified in an express written contract, reported to the National Highway Traffic Safety Administration pursuant to Part 585 of this title, between the manufacturer so specified and the manufacturer to which the vehicle otherwise would be attributed, pursuant to S4.2.6.1.2.1.

S4.2.6.2 *Trucks, buses, and multipurpose passenger vehicles with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less manufactured on or after September 1, 1998.*

Each truck, bus, or multipurpose passenger vehicle with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less manufactured on or after September 1, 1998 shall comply with the requirement of S4.1.5.1(a)(1) by means of an inflatable restraint system at the driver's and right front passenger's position. A vehicle shall not be deemed to be in noncompliance with this standard if its manufacturer establishes that it did not have reason to know in the exercise of due care that such vehicle is not in conformity with the requirement of this standard.

* * * * *

5. S4.5.1 of Standard No. 208 would be revised to read as follows:

S4.5 *Other general requirements.*

S4.5.1 *Labeling and owner's manual information.*

(a) *Air bag maintenance or replacement information.* If the vehicle manufacturer recommends periodic maintenance or replacement of an inflatable restraint system, as that term is defined in S4.1.5.1(b) of this standard, installed in a vehicle, that vehicle shall be labeled with the recommended schedule for maintenance or replacement. The schedule shall be specified by month and year, or in terms of vehicle mileage, or by intervals measured from the date appearing on the vehicle certification label provided pursuant to 49 CFR part 567. The label shall be permanently affixed to the vehicle within the passenger compartment and lettered in English in block capitals and numerals not less than three thirty-seconds of an inch high. This label may be combined with the label required by S4.5.1(b) of this standard to appear on the sun visor. If some regular maintenance or replacement of the inflatable restraint system(s) in a vehicle is recommended by the vehicle manufacturer, the owner's manual shall also set forth the recommended schedule for maintenance or replacement.

(b) *Label on sun visor above front outboard seating position equipped with inflatable restraint system.* Each front outboard seating position that provides an inflatable restraint shall have a label permanently affixed to the sun visor for such seating position on either side of the sun visor, at the manufacturer's option. This label shall read:

For maximum safety protection in all types of crashes, you must always wear your safety belt.
Do not install rearward-facing child seats in any front passenger seat position.
Do not sit or lean unnecessarily close to the air bag.
Do not place any objects over the air bag or between the air bag and yourself.
See the owner's manual for further information and explanations.

(c) *Information to appear in owner's manual.* The owner's manual for any vehicle equipped with an inflatable restraint system shall include a description of the vehicle's air bag system in an easily understandable format. The owner's manual shall include a statement to the effect that the vehicle is equipped with an air bag and a lap/shoulder belt at one or both front outboard seating positions, and that the air bag is a supplemental restraint at those seating positions. The information should emphasize that all occupants, including the driver, should always wear their seat belts whether or not an air bag is also provided at their seating position to minimize the risk of severe injury or death in the event of a crash. The owner's manual shall also provide any necessary precautions regarding the proper positioning of occupants, including children, at seating positions equipped with air bags to ensure maximum safety protection for those occupants. The owner's manual shall also explain that no objects should be placed over or near the label identifying the air bag on the steering wheel and instrument panel, because any such objects could cause harm if the vehicle is in a crash severe enough to cause the air bag to inflate.

* * * * *

6. A new S12 would be added to Standard No. 208 to read as follows:

S12. *Temporary Exemption from Requirement for Inflatable Restraint System.*

S12.1 *Scope.* This section establishes procedures for filing and processing applications for temporary exemption from the requirements in this standard that vehicles be equipped with inflatable restraint systems.

S12.2 *Definitions.*

"Line" means a name that a manufacturer applies to a group of motor vehicles of the same make which have the same body or chassis, or otherwise are similar in construction or design. A "line" may, for example, include 2-door, 4-door, station wagon,

and hatchback vehicles of the same make.

S12.3 *Standard of review.* In order to receive a temporary exemption from the inflatable restraint requirement, a vehicle manufacturer must demonstrate in its application that there has been a disruption in the supply of one or more inflatable restraint system components, or a disruption in the use and installation by the manufacturer of any such component due to unavoidable events not under the control of the manufacturer, which will prevent a manufacturer from meeting its anticipated production volume of vehicles with inflatable restraint systems.

S12.4 *Exemption applications—General requirements.* Each application for a temporary exemption from the inflatable restraint requirements must—

(a) Be written in the English language;

(b) Be submitted in three copies to: Administrator, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590;

(c) State the full name and address of the manufacturer, the nature of its organization (individual, partnership, corporation, etc.), and the name of the State or country under the laws of which it is organized;

(d) Identify the motor vehicle line or lines for which the temporary exemption is being sought;

(e) Set forth in full the data, views, and arguments of the manufacturer that would support granting the temporary exemption, including the specific information required by S12.5; and

(f) Specify and segregate any part of the information and data submitted in the application that should be withheld from public disclosure in accordance with Part 512 of this chapter.

S12.5 *Exemption applications—Specific content requirements.* Each application for a temporary exemption from the inflatable restraint requirement must include:

(a) A clear and specific identification of any component in the inflatable restraint system that has become unavailable due to circumstances beyond the manufacturer's control, and a diagram showing the location of such component within the restraint system and within the vehicle;

(b) A clear and specific explanation of the cause or causes of the disruption in the supply of the component, and a showing that such disruption is beyond the control of the manufacturer;

(c) An estimate of the length of time that will be needed to correct the disruption and again incorporate the subject components into current production;

(d) A complete statement of the bases for the manufacturer's belief that NHTSA should grant a temporary exemption in response to this application;

(e) An unconditional statement by the manufacturer that an inflatable restraint system will be installed in every vehicle at those seating positions for which a temporary exemption is requested in the application; and

(f) A proposed reasonable period of time after the disruption in the supply of inflatable restraint system components is corrected that the manufacturer estimates will ensure a sufficient quantity of components for both anticipated production and retrofit of those vehicles for which a temporary exemption is requested in the application, so that the vehicle manufacturer can recall those vehicles for which a temporary exemption is requested and install inflatable restraint systems in them, together with a demonstration of why the manufacturer believes this proposed period of time is reasonable for completing this recall.

S12.6 *Processing an application for a temporary exemption.*

(a) NHTSA will process any application for temporary exemption that contains the information specified in S12.4 and S12.5. If an application fails to provide the information specified in S12.4 and S12.5, NHTSA will not process the application, but will advise the manufacturer of the information that must be provided if the agency is to process the application.

(b) Notice of each application for temporary exemption shall be published in the **Federal Register**.

(c) NHTSA will issue its decision to grant or deny the requested temporary exemption not later than 60 days after the agency receives a complete petition, as defined in paragraph (a).

(d) Notice of each decision to grant or deny a temporary exemption, and the reasons for granting or denying it, will be published in the **Federal Register**. Such decisions will be the final agency action on those applications, so no petitions for reconsideration of such decisions will be processed or considered by the agency.

(e) Unless a later effective date is specified in a notice announcing an agency decision to grant a temporary exemption, a temporary exemption from the inflatable restraint requirement will become effective upon the date the decision is published in the **Federal Register**.

S12.7 *Labels and written notice announcing temporary exemption.*

S12.7.1 It shall be a condition of every temporary exemption from the inflatable restraint requirement that the manufacturer of exempted vehicles comply with the provisions of S12.7.2 and S12.7.3.

S12.7.2 (a) The manufacturer of any vehicle granted a temporary exemption from the inflatable restraint requirement shall affix a label within the passenger compartment of such vehicle. The label shall set forth the following information in block capital letters and numerals not less than three thirty-seconds of an inch high:

THIS VEHICLE DOES NOT CONTAIN AN AIR BAG IN CONFORMANCE WITH THE FEDERAL MOTOR VEHICLE SAFETY STANDARD FOR OCCUPANT CRASH PROTECTION. IT WAS EXEMPTED PURSUANT TO NHTSA EXEMPTION NO. (insert number assigned by NHTSA).

(b) This label shall not be removed until after the vehicle manufacturer has recalled the vehicle and installed an inflatable restraint system at those seating positions for which it was granted an exemption.

(c) Removal of the label by the manufacturer or any of its dealers or distributors shall constitute a certification that the vehicle complies in full with the inflatable restraint system requirement of this standard.

S12.7.3 The manufacturer of any vehicle that is delivered without an inflatable restraint system, pursuant to a temporary exemption granted under this section, shall, at the time of delivery of the vehicle, provide a written notice to the dealer to whom the vehicle is delivered and to the first purchaser of the vehicle for purposes other than resale. Such notice shall provide the following information:

(a) This vehicle does not conform to Federal Motor Vehicle Safety Standard No. 208, because it is not equipped with an inflatable restraint at (insert the affected seating positions).

(b) The vehicle was allowed to be sold pursuant to NHTSA Exemption No. (insert appropriate exemption number).

(c) The reason this vehicle was exempted from the requirement for an inflatable restraint was because of factors beyond the manufacturer's control.

(d) The manufacturer will recall this vehicle not later than (insert the time set forth in the exemption) and install the missing inflatable restraint at no charge.

(e) If the reader has any questions or would like some further information, he or she may contact the manufacturer at (insert an address and telephone number).

* * * * *

PART 585—[AMENDED]

7. The authority citation for Part 585 would continue to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1407; delegation of authority at 49 CFR 1.50.

8. Section 585.1 would be revised to read as follows:

§ 585.1 Scope.

This part establishes requirements for manufacturers of passenger cars to submit reports, and to maintain records related to the reports, concerning the number of cars equipped with inflatable restraint systems in compliance with the requirement of S4.1.5.2 of Standard No. 208, *Occupant Crash Protection* (49 CFR 571.208). This part also establishes requirements for manufacturers of trucks, buses, and multipurpose passenger vehicles with a gross vehicle weight rating (GVWR) of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less to submit reports, and to maintain records related to the reports, concerning the number of such vehicles equipped with automatic crash protection in compliance with the requirements of S4.2.5 of Standard No. 208 and the number of such vehicles equipped with inflatable restraint systems in compliance with the requirement of S4.2.6.1 of Standard No. 208.

9. Section 585.2 would be revised to read as follows:

§ 585.2 Purpose.

The purpose of these reporting requirements is to aid the National Highway Traffic Safety Administration in determining whether a vehicle manufacturer has complied with the requirements of Standard No. 208, *Occupant Crash Protection* (49 CFR 571.208) to install automatic crash protection in specified percentages of the manufacturer's annual production and to install an inflatable restraint system that provides automatic crash protection in a specified percentage of the manufacturer's annual production.

10. Section 585.3 would be revised to read as follows:

§ 585.3 Applicability.

This part applies to manufacturers of passenger cars and to manufacturers of trucks, buses, and multipurpose passenger vehicles with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less.

11. Section 585.5 would be revised to read as follows:

§ 585.5 Reporting requirements.

(a) *General reporting requirements—Passenger cars.* Within 60 days after the end of the production year ending August 31, 1997, each manufacturer that manufactured any passenger cars for sale in the United States shall submit a report to the National Highway Traffic Safety Administration concerning its compliance with the requirement of Standard No. 208 (49 CFR 571.208) for installation of inflatable restraint systems that provide automatic crash protection in 95 percent of its cars manufactured during that production year.

(b) *General reporting requirements—Light trucks, buses, and multipurpose passenger vehicles.*

(1) *Automatic crash protection.* Within 60 days after the end of the production years ending August 31, 1995, August 31, 1996, and August 31, 1997, each manufacturer that manufactured any trucks, buses, or multipurpose passenger vehicles with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less during the production year (other than walk-in van-type trucks, vehicles designed to be sold exclusively to the U.S. Postal Service, vehicles manufactured in two or more stages, or vehicles that were altered after previously having been certified in accordance with part 567 of this chapter) shall submit a report to the National Highway Traffic Safety Administration concerning its compliance with the requirements of Standard No. 208 (49 CFR 571.208) for installation of automatic crash protection in such vehicles manufactured during that production year. This report need not be filed by any manufacturer whose production consists exclusively of:

(i) Vehicles manufactured in two or more stages;

(ii) Walk-in van-type trucks;

(iii) Vehicles designed to be sold exclusively to the U.S. Postal Service; and/or

(iv) Vehicles that are altered after previously having been certified in accordance with part 567 of this chapter.

(2) *Inflatable restraint system that provides automatic crash protection.* Within 60 days after the end of the production year ending August 31, 1998, each manufacturer that manufactured any trucks, buses, or multipurpose passenger vehicles with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less during the production year (other than walk-in van-type trucks or vehicles designed to be sold exclusively to the U.S. Postal Service) shall submit a report to the National Highway Traffic Safety Administration concerning its compliance with the requirements of Standard No. 208 (49 CFR 571.208) for installation of inflatable restraint systems that provide automatic crash protection in 80 percent of such vehicles manufactured during that production year. This report need not be filed by any manufacturer whose production consists exclusively of:

(i)Walk-in van-type trucks; and/or

(ii) Vehicles designed to be sold exclusively to the U.S. Postal Service.

(c) Each report submitted in compliance with paragraphs (a), (b)(1), or (b)(2) of this section shall:

(1) Identify the manufacturer;

(2) State the full name, address, and title of the official responsible for preparing the report:

(3) Identify the production year for which the report is filed;

(4) Provide the information specified in paragraph (d) of this section;

(5) Be written in the English language;

(6) Be submitted to: Administrator, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590; and

(7)(i) In the case of a report filed pursuant to paragraph (a) of this section, expressly state whether the manufacturer has complied with the requirement of S4.1.5.2 of Standard No. 208 (§ 571.208 of this chapter);

(ii) In the case of a report filed pursuant to paragraph (b)(1) of this section, expressly state whether the manufacturer has complied with the requirements of S4.2.5 of Standard No. 208 (§ 571.208 of this chapter); and

(iii) In the case of a report filed pursuant to paragraph (b)(2) of this section, expressly state whether the manufacturer has complied with the requirements of S4.2.6.1 of Standard No. 208 (§ 571.208 of this chapter).

(d) *Report content.*

(1) *Passenger cars.*

(i) *Basis for phase-in production goals.* Each manufacturer shall report the total number of passenger cars it manufactured for sale in the United States for the production year ending August 31, 1997.

(ii) *Production.* Each manufacturer shall report the number of passenger cars manufactured for sale in the United States for the production year ending August 31, 1997 that it certified as complying with S4.1.5.1(a) of Standard No. 208 (§ 571.208 of this chapter) because they were equipped with an inflatable restraint system that provided automatic crash protection at both the driver's and the right front passenger's seating position.

(iii) *Vehicles produced by more than one manufacturer.* Each manufacturer whose reporting of information is

affected by one or more of the express written contracts permitted by S4.1.5.2.2 of § 571.208 of this chapter shall:

(A) Report the existence of each such contract, including the names of all parties to the contract, and explain how the contract affects the report being filed; and

(B) Report the number of cars covered by each such contract.

(2) *Trucks, buses, and multipurpose passenger vehicles.*

(i) *Automatic crash protection.*

(A) *Basis for phase-in production goals.* Each manufacturer shall report the number of trucks, buses, and multipurpose passenger vehicles with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less that it manufactured for sale in the United States for each of the three preceding production years, or, at the manufacturer's option, for the production year for which the report is filed. A manufacturer that did not manufacture any trucks, buses, or multipurpose passenger vehicles with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less during each of the three preceding production years must report the number of trucks, buses, or multipurpose passenger vehicles with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less it manufactured during the production year for which the report is filed. However, manufacturers are not required to report any information with respect to those vehicles that are manufactured in two or more stages, walk-in van-type trucks, vehicles designed to be sold exclusively to the U.S. Postal Service, and/or vehicles that are altered after previously having been certified in accordance with part 567 of this chapter.

(B) *Production.* Each manufacturer shall report for the production year for which the report is filed, and for each preceding production year, to the extent that trucks, buses, and multipurpose passenger vehicles produced during the preceding production years are treated under § 571.208 of this chapter as having been produced during the production period for which the report is filed, the information specified in paragraphs (d)(2)(i)(B)(*1*) through (d)(2)(i)(B)(*3*) of this section, inclusive, with respect to its trucks, buses, and multipurpose passenger vehicles with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less.

(*1*) The number of those vehicles certified as complying with S4.1.2.1 of Standard No. 208 (49 CFR 571.208) because they are equipped with automatic seat belts and the seating positions at which those belts are installed;

(*2*) The number of those vehicles certified as complying with S4.1.2.1 of Standard No. 208 (49 CFR 571.208) because they are equipped with air bags and the seating positions at which those air bags are installed; and

(*3*) The number of those vehicles certified as complying with S4.1.2.1 of Standard No. 208 (49 CFR 571.208) because they are equipped with other forms of automatic crash protection, which forms of automatic crash protection shall be described, and the seating positions at which those forms of automatic crash protection are installed.

(C) *Vehicles produced by more than one manufacturer.* Each manufacturer whose reporting of information is affected by one or more of the express written contracts permitted by S4.2.5.6.2 of § 571.208 of this chapter shall:

(*1*) Report the existence of each such contract, including the names of all parties to the contract, and explain how the contract affects the report being filed; and

(*2*) Report the number of vehicles covered by each such contract.

(ii) *Inflatable restraint system that provides automatic crash protection.*

(A) *Basis for phase-in production goals.* Each manufacturer shall report the total number of trucks, buses, and multipurpose passenger vehicles with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less that it manufactured for sale in the United States for the production year ending August 31, 1998. However, manufacturers are not required to report any information with respect to those vehicles that are walk-in van-type trucks, and/or vehicles designed to be sold exclusively to the U.S. Postal Service.

(B) *Production.* Each manufacturer shall report the number of trucks, buses, and multipurpose passenger vehicles with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds that it manufactured for sale in the United States for the production year ending August 31, 1998 that it certified as complying with S4.1.5.1(a) of Standard No. 208 (§ 571.208 of this chapter) because they were equipped with an inflatable restraint system that provided automatic crash protection.

(C) *Vehicles produced by more than one manufacturer.* Each manufacturer whose reporting of information is affected by one or more of the express written contracts permitted by S4.2.6.1.2 of § 571.208 of this chapter shall:

(*1*) Report the existence of each such contract, including the names of all parties to the contract, and explain how the contract affects the report being filed; and

(*2*) Report the number of vehicles covered by each such contract.

12. Section 585.6 would be revised to read as follows:

§ 585.6 Records.

Each manufacturer shall maintain records of the vehicle identification number and type of automatic crash protection for each vehicle for which information was reported under § 585.5 until December 31, 1999.

Issued on December 8, 1992.

Barry Felrice,

Associate Administrator for Rulemaking.

Fish and Wildlife Service

50 CFR Part 17

RIN 1018-AB88

Endangered and Threatened Wildlife and Plants; Proposed Endangered Status for Ten Plants and Threatened Status for Two Plants From Serpentine Habitats in the San Francisco Bay Region of California

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The U.S. Fish and Wildlife Service (Service) proposes endangered status pursuant to the Endangered Species Act of 1973, as amended (Act) for 10 plants: *Castilleja neglecta* (Tiburon paintbrush), *Ceanothus ferrisae* (coyote ceanothus), *Cirsium fontinale* var. *fontinale* (fountain thistle), *Clarkia franciscana* (Presidio clarkia), *Cordylanthus tenuis* ssp. *capillaris* (Pennell's bird's beak), *Dudleya setchellii* (Santa Clara Valley dudleys), *Eriophyllum latilobum* (San Mateo woolly sunflower), *Pentachaeta bellidiflora* (white-rayed pentachaeta), *Streptanthus albidus* ssp. *albidus* (Metcalf Canyon jewelflower), and *Streptanthus niger* (Tiburon jewelflower). The Service also proposes threatened status for two plants, *Calochortus tiburonensis* (Tiburon mariposa lily) and *Hesperolinon congestum* (Marin dwarf-flax). These species are restricted to serpentine soil outcrops in the area near the San

Francisco Bay, California. The 12 plants have been affected variously and are threatened by one or more of the following: Urbanization, pedestrian and off-road vehicular traffic, the invasion of alien plants, road maintenance, soil erosion and slipping, unauthorized dumping, livestock grazing, seed predation by beetles, and stochastic extinction by virtue of the small isolated nature of the remaining populations. This proposal, if made final, would implement the Federal protection and recovery provisions afforded by the Act for these plants. The Service seeks data and comments from the public on this proposal.

DATES: Comments from all interested parties must be received by February 12, 1993. Public hearing requests must be received by January 28, 1993.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Field Supervisor, U.S. Fish and Wildlife Service, 2800 Cottage Way, room E–1803, Sacramento, California 95825–1846. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Jeanine L. Hardison at 916/978–4866 (see **ADDRESSES** section).

SUPPLEMENTARY INFORMATION:

Background

Cordylanthus tenuis ssp. *capillaris*, *Calochortus tiburonensis*, *Castilleja neglecta*, *Streptanthus*, *niger*, *Clarkia franciscana*, *Cirsium fontinale* var. *fontinale*, *Eriophyllum latilobum*, *Hesperolinon congestum*, *Pentachaeta bellidiflora*, *Ceanothus ferrisae*, *Dudleya setchellii*, and *Streptanthus albidus* ssp. *albidus* are endemic to serpentine soils in the region of the San Francisco Bay in California. Serpentine soils are derived from ultramafic rocks such as serpentinite, dunite, and peridotite, which are found in discontinuous outcrops in the Sierra Nevada and in the Coast Ranges from Santa Barbara County, California, to British Columbia. The chief constituent of the parent rock is some variant of iron-magnesium silicate. Most serpentine soils are formed in place over the parent rock, and are therefore shallow, rocky, and highly erodible. Serpentine soils also, because of the parent material, tend to have high concentrations of magnesium, chromium, and nickel, and low concentrations of calcium, nitrogen, potassium, and phosphorus (Kruckeberg 1984). These characteristics make serpentine soil inhospitable for the growth of most plants. Nevertheless, some plants have adapted to the rigors of life on serpentine soils. In fact, serpentine soils often support a high diversity of plants, including many rare species (McCarten 1988). Over 200 taxa in California are endemic (restricted) to serpentine soils (Kruckeberg 1984).

Serpentine soils in the San Francisco Bay region are derived from intrusive igneous rocks associated with fault zones in the sedimentary Franciscan formation. Outcrops occur south of the Bay in the Coyote Valley of Santa Clara County; west of the Bay at Edgewood County Park, near Crystal Springs Reservoir, and at Stanford University's Jasper Ridge Preserve in San Mateo County, and at the Presidio in San Francisco County; east of the Bay in the Oakland hills of Alameda County and at Mt. Diablo in Contra Costa County; and north of the Bay on the Tiburon Peninsula in eastern Marin County and at Mt. Tamalpais, Carson Ridge, and near Nicasio Reservoir in western Marin County, as well as in Sonoma and Napa Counties.

Serpentine soils are variable in soil chemistry, texture, and water availability, both within and between sites (McCarten 1987b). This variability and the variety of micro-climates in the San Francisco Bay region have a profound effect upon the local flora and vegetation. Several serpentine plant communities are found in the San Francisco Bay region (McCarten 1987b). Grassland and annual forb communities (serpentine bunchgrass grassland and serpentine wildflower field) tend to occur on level ground or on gentle slopes with soils to 1 meter (m) (3 feet (ft)) or more in depth. Shrub communities (Franciscan serpentine coastal scrub, mixed serpentine chaparral, and Sargent cypress woodlands) tend to occur on steep rocky slopes with shallow soils. In some areas, soil development is minimal and parent rock is extensively exposed. These serpentine barrens support a distinctive community composed of only a few species, usually growing at low densities. Another unique habitat on serpentine soils occurs near seasonal springs and seeps, which support species requiring moist soil. Most of the 12 species proposed in this rule occur in the serpentine bunchgrass grassland and serpentine wildflower field communities. *Cirsium fontinale* var. *fontinale* occurs in serpentine seep areas. *Cordylanthus tenuis* ssp. *capillaris* and *Ceanothus ferrisae* occur in chaparral, as do a few populations of *Hesperolinon congestum*. *Dudleya setchellii* and *Streptanthus albidus* ssp. *albidus* are found on serpentine barrens. *Eriophyllum latilobum* grows on serpentine-influenced soil in the coast live oak woodland community.

Serpentine endemics may have limited or widespread distributions. Some species are restricted to a single outcrop; others occur on serpentine soils within a particular region; a few species occur throughout almost the entire range of serpentine soils in California (Kruckeberg 1984). Of the taxa proposed in this rule, one (*Calochortus tiburonensis*) is thought to always have been restricted to the single outcrop on which it occurs. Others, including *Cordylanthus tenuis* ssp. *capillaris*, *Streptanthus niger*, *Eriophyllum latilobum*, *Dudleya setchellii*, and *Streptanthus albidus*, ssp. *albidus*, have a known historical range of only a few miles or less. The widest ranging species in historic times was *Pentachaeta bellidiflora*, which occurred from Marin County to Santa Cruz County. It is now restricted to a single population as a result of habitat destruction.

The human population of the San Francisco Bay region has grown rapidly over the last several decades. Urban development (including highway construction) has reduced the amount of serpentine habitat by nearly 20 percent in the past 20 years (McCarten 1987b). The construction of roads, houses, recreational facilities, and waste disposal sites continues. The increasing numbers of people also place an ever greater strain on undeveloped wildlands, through activities such as pedestrian and off-road vehicle traffic, unauthorized garbage dumping, and changes in the pattern of wildland fires. Serpentine habitats, because of their often limited vegetative cover, may appear to the uninitiated as unoccupied space, and so they are especially likely to be subject to disturbances. Recreational activities may directly impact plants; or may result in increased erosion and facilitate the invasion of alien species including many introduced annual grasses common in California. Competition with introduced species is a serious threat to serpentine natives (McCarten 1987b). The destruction of serpentine habitats due to urban development has also increased the fragmentation of rare plant populations, thus increasing the risks of extinction due to chance events such as fire, pest or disease outbreaks, reproductive failure, or other natural or human-caused disaster.

The land that supports these 12 taxa is owned by cities and counties, State and Federal agencies, parks, two water districts and private parties.

Discussion of the Twelve Species Proposed for Listing

North Bay Species

Cordylanthus tenuis ssp. *capillaris* (Pennell's bird's beak) was collected by Herbert Mason about 3 kilometers (km) (2 miles) north of Occidental in Sonoma County, California, in 1946. Francis Whittier Pennell described the plant as *Cordylanthus capillaris* in 1950, using Mason's specimen as the type (Pennell 1950). Pennell was misled by an erroneous label to think that the plants had been collected in Merced County (Bacigalupi 1966), which may have affected his treatment of the taxon (Chuang and Heckard 1986). Artificial hybridization studies of *C. brunneus* and *C. capillaris* (Chuang and Heckard 1975) showed a close relationship between the two plants. The name *C. brunneus* ssp. *capillaris* was proposed for *C. capillaris* by Chuang and Heckard (Heckard 1977) but was never formally published. In 1986 Chuang and Heckard published a revision of the genus, in which both *C. brunneus* and *C. capillaris* were treated as subspecies of *C. tenuis* (Chuang and Heckard 1986).

Cordylanthus tenuis ssp. *capillaris* is a branching herbaceous annual of the snapdragon family (Scrophulariaceae). The plant grows 30–40 centimeters (cm) (12–16 inches (in)) tall, with yellow-green hairless herbage that becomes purplish with age. The leaves are entire, or those of the primary stem three-parted, and threadlike. The floral bracts are three-parted up to two-thirds of their length, with fine marginal hairs on bracts and calyx. The tubular corolla is 1.5 cm (0.6 in) long, and garnet-brown laterally, paler dorsally. Each capsule contains 10–16 seeds. The three-lobed outer bracts of *Cordylanthus tenuis* ssp. *capillaris* distinguish it from its nearest relative (*C. tenuis* ssp. *brunneus*) and from *C. pilosus*, another *Cordylanthus* found in the area. A further distinguishing character is that *C. pilosus* is densely hairy throughout.

Cordylanthus tenuis ssp. *capillaris* is known only from two locations: the type locality in western Sonoma County and a second occurrence a few miles to the west. A third population may occur on property adjacent to the second location, but permission for botanical surveys on that property has been consistently refused (Betty Guggolz, Milo Baker Chapter, California Native Plant Society, pers. comm., 1992). The total number of plants fluctuates from year to year, as is typical of annual plants. *C. tenuis* ssp. *capillaris* is threatened with potential residential development, garbage dumping, and roadside maintenance.

Calochortus tiburonensis (Tiburon mariposa lily) was discovered in 1971 by Robert West on Ring Mountain on the Tiburon Peninsula in Marin County, California. Albert Hill collected the type specimen on Ring Mountain the following year, and published the description in 1973 (Hill 1973).

Calochortus tiburonensis is a bulbous perennial of the lily family (Liliaceae) with a single persistent, basal, linear-oblong leaf 30–60 cm (1–2 ft) long. The flowering stem, about 50 cm (20 in) tall, is usually branched and bears erect flowers in twos or threes at the ends of the branches. The three petals and three sepals are light yellow-green with reddish or purplish-brown markings. The capsule is triangular in cross-section, and about 4 cm (2 in) long. The long slender hairs on the upper surface and margins of the petals and the lack of wings on the capsule distinguish *Calochortus tiburonensis* from the other two *Calochortus* species found on the Tiburon Peninsula, *C. umbellatus* and *C. luteus*.

Calochortus tiburonensis is known only from its type locality, where it grows on rocky serpentine slopes among annual and perennial herbs and grasses. The population, estimated at 40,000 individuals in 1991 (Larry Serpa, The Nature Conservancy, pers. comm., 1992), occurs on land which has been owned and managed by The Nature Conservancy since 1982. The occurrence of this plant in a single population and its proximity to human population centers and intensive development activities renders it vulnerable to catastrophic events such as fire, disease or pest outbreak, severe drought, or other natural or human-caused disasters.

The type specimen of *Castilleja neglecta* (Tiburon paintbrush) was collected by Katherine Brandegee in the early 1900s. The plant was described by Zeile (1925) in Willis Jepson's *Manual of the Flowering Plants of California*.

Castilleja neglecta is a semi-woody perennial of the snapdragon family (Scrophulariaceae), with erect, branched stems 30–60 cm (1–2 ft) tall and a sparse covering of soft, spreading hairs. The lance-shaped leaves have one or two pairs of narrow lobes. The conspicuous floral bracts are yellowish and sometimes red-tipped; the flowers are yellow to red and 18–20 millimeters (mm) (0.7–0.8 in) long. The simple (unbranched) hairs and the lack of glands below the inflorescence distinguish *C. neglecta* from other species of *Castilleja* on the Tiburon Peninsula (*C. latifolia* var. *rubra* and *C. foliosa*) (Howell 1970).

Castilleja neglecta occurs in serpentine bunchgrass communities on north to west facing slopes. It is known from four populations in Marin County, three of which occur on the Tiburon Peninsula, and one population in Napa County. The range of this plant is approximately 50 km (30 miles) from east to west, and 35 km (22 miles) from north to south. Population sizes are small, ranging from 50 plants at a location in western Marin County (Martin 1991) to 600 plants at Ring Mountain Preserve on the Tiburon Peninsula (Hunter 1989a). A total of approximately 1,500 plants exist. The Marin County populations are threatened by residential development, foot traffic, grazing, and soil slumping; the Napa County population is threatened by gravel mining and grazing.

Streptanthus niger (Tiburon jewelflower) was described by Edward L. Greene, who cited as the type a specimen he had collected at St. Hilary's Church in the town of Tiburon in Marin County (Greene 1886a). Greene later redefined the limits of *Euclisia*, formerly a subgenus of *Streptanthus*, treating it as a genus in its own right (Greene 1904). *Streptanthus niger*, as a member of the *Euclisia* group, was thus referred to as *Euclisia niger*. Jepson (1925) returned *Euclisia* to subsection status, and later authors followed his treatment. Munz treated *S. niger* as a subspecies of *S. glandulosus* in *A California Flora* (1959), and then returned it to *S. niger* in his supplement (1968), following Kruckeberg (1958).

Streptanthus niger is an annual herb of the mustard family (Brassicaceae) that reaches 30–60 cm (1–2 ft) in height. The lower leaves are toothed, the upper leaves less toothed or not at all. The sepals are a very dark purple; the petals have a purple claw and a white blade with a purple midvein. The zig-zag inflorescence pattern and the lack of hairs distinguish *S. niger* from its near relative *S. glandulosus*.

Streptanthus niger is found on shallow rocky serpentine soils on southwest-facing slopes on the Tiburon Peninsula of Marin County. Two populations are known from the southern end of the peninsula where they occur within 3 km (2 miles) of one another. Populations number from 50 to 2,000 plants (Hunter 1989b; Andrew Allen, Belvedere-Tiburon Landmarks Society, *in litt.*, 1991). The plant is threatened by residential development, foot traffic, and road construction.

Central Bay Species

The type specimen of *Clarkia franciscana* (Presidio clarkia) was

collected by Peter Raven in 1956. *C. franciscana* was described by Harlan Lewis and Peter Raven (1958).

Clarkia franciscana is a slender, erect, herbaceous annual of the evening-primrose family (Onagraceae) to 40 cm (16 in) tall with few, very small and narrow leaves. The lavender-pink petals have a lighter basal portion and a reddish-purple basal spot. The slender capsule is 2–4 cm (1–2 in) long. *Clarkia franciscana* can be distinguished from *Clarkia rubicunda*, a related species which may occur in the same area, by the fact that its petals have irregular teeth on the apical margin (*C. rubicunda* has petals that are rounded at the apex).

Clarkia franciscana is restricted to serpentine soils in grassland communities in San Francisco and Alameda Counties. Two populations are known from the Presidio in San Francisco. Three populations are known from the Oakland Hills in Alameda County, 27 km (17 miles) east of San Francisco, and all from within 0.6 miles of each other. A fourth population in the Oakland Hills was reported in 1988 (California Department of Fish and Game, Natural Diversity Data Base), but could not be relocated in a search conducted in 1991 (David Bigham, East Bay Chapter, California Native Plant Society, *in litt.*, 1991). Population sizes fluctuate greatly; the upper limit to the total numbers of plants reported in recent years is approximately 8,000 plants. The first of the Alameda County populations was discovered in 1980 at the Redwood Regional Park. Because this discovery occurred so long after the original discovery of the plant, and because this population was relatively far from the previously known population at the Presidio, it was suggested that this population might not be a natural occurrence. This suggestion gained credence from the fact that seed collected from the type location in 1964 had been sown in the East Bay Regional Parks Tilden Botanic Garden and plants grown there for several years (Roof 1971). Seed collected from plants at the botanic garden had been sown in several sites at the Presidio in 1972 (Roof 1972). It was thought that seed might also have been sown at Redwood Regional Park in Alameda County. However, an electrophoretic comparison of the San Francisco and Alameda populations "strongly suggests that the Oakland Hills population did not originate by seed transfer from San Francisco, and that it must be regarded as indigenous to its present locality" (Gottlieb and Edwards 1992). *C. franciscana* is threatened by potential development, roadside maintenance, foot traffic, mowing, competition from alien plants, and shade from native and introduced shrubs and trees.

Cirsium fontinale var. *fontinale* (fountain thistle) was first described as *Cnicus fontinalis* (Greene 1886b). In 1892 Greene reassigned the plant to the genus *Carduus* (Greene 1892). Willis Jepson, in his *Flora of Western Middle California* (1901), put the taxon in the genus *Cirsium*. In 1938 John Thomas Howell described a close relative of the fountain thistle, *Cirsium fontinale* var. *obispoense* (Chorro Creek bog thistle) (Howell 1938). According to the rules for botanical nomenclature, when a new variety is described in a species not previously divided into infraspecific taxa, a "type" variety is automatically created. In this case, the type variety is *C. fontinale* var. *fontinale*.

Cirsium fontinale var. *fontinale* is an herbaceous perennial of the aster family (Asteraceae) with several stout, erect reddish stems 30–60 cm (1–2 ft) high. The basal leaves are 10–20 cm (4–8 in) long with spine-tipped lobes; the leaves on the stems are smaller. The flowers are dull white to pinkish, becoming brown with age. The egg-shaped, recurved bracts beneath the flower head distinguish *Cirsium fontinale* var. *fontinale* from the most similar thistle in the area, brownie thistle (*Cirsium quercetorum*). The nearest relative of *C. fontinale* var. *fontinale*, *Cirsium fontinale* var. *obispoense*, is found further south, in San Luis Obispo County.

Cirsium fontinale var. *fontinale* is restricted to perpetually moist clay openings in riparian or serpentine chaparral. Historically, this plant occurred in both San Mateo and Santa Clara Counties, but it is now found in only three locations in San Mateo County. One population of 1,000–2,800 plants occurs east of Crystal Springs Reservoir, on both sides of Interstate 280. A second population of 100–200 plants occurs 10 km (6 miles) to the south in the "Triangle area," a triangular piece of land west of Edgewood County Park, which is bounded by Interstate 280 to the east, Edgewood Road on the north, and Canada Road on the west. A single plant was found in Edgewood County Park in 1987. In 1992, there was still only one plant in this location (Susan Sommers, Santa Clara Valley Chapter, California Native Plant Society, pers. comm., 1992). The taxon is threatened by proposed recreational development, competition with alien plant species, garbage dumping, and roadside maintenance.

Eriophyllum latilobum (San Mateo woolly sunflower) was first collected by Elmer in 1903. The type specimen was collected by A.A. Heller in 1907. The plant was described by Per Axel Rydberg (1915). *E. latilobum* is believed to have originated as a hybrid between *E. confertiflorum* and *E. lanatum* var. *arachnoideum* (Munz 1959; John Mooring, Santa Clara University, pers. comm. 1992).

Eriophyllum latilobum is a bushy perennial of the aster family (Asteraceae) with leafy stems 30–40 cm (12–16 in) high. The upper surfaces of the deeply three-cleft leaves are a smooth dark green and the lower surfaces are covered with densely interwoven white hairs. The golden flower heads are borne in loose clusters. *E. latilobum* differs from *E. confertiflorum* in having eight ray flowers rather than five, large flower heads, and a more open inflorescence. *E. lanatum* var. *arachnoideum* differs from the other two species in having 13 ray flowers and shallowly cleft leaves.

Eriophyllum latilobum is found in shaded moist sites on steep grassy or sparsely wooded slopes of serpentine-influenced soil. The single remaining occurrence of *E. latilobum* consists of a few hundred plants scattered along 4 km (2.5 miles) of Crystal Springs Road in San Mateo County. These subpopulations are probably the fragments of a once-continuous population. *E. latilobum* has also been reported from southern San Mateo County, on Pescadero Road southwest of La Honda, but this report is most likely erroneous. At least one of the specimens collected at this site (in 1929) is actually *Eriophyllum confertiflorum* (Barry Prigge, University of California, Los Angeles herbarium, pers. comm., 1992), and searches in recent years have found only *Eriophyllum confertiflorum* (Toni Corelli, Santa Clara Valley Chapter, California Native Plant Society, pers. comm., 1992). The plant is threatened by erosion and soil slippage, road maintenance, garbage dumping, and recreational development.

The type specimen of *Hesperolinon congestum* (Marin dwarf-flax) was collected in Marin County by Henry Nicholas Bolander in 1863, while working on the State Geological Survey. Asa Gray described the new species as *Linum congestum*, including it in the section *Hesperolinon* which he described in the same paper (Gray 1865). J.K. Small (1907) established *Hesperolinon* as a distinct genus in 1907. Jepson (1925) treated *Hesperolinon* as a section of the genus *Linum*, and treated *H. congestum* as a subspecies of *L. californicum*. Helen K. Sharsmith (1961) conducted an extensive study of *Hesperolinon* and concluded that it definitely warrants

distinction as a separate genus. She also returned *H. congestum* to the status of a species.

Hesperolinon congestum is an herbaceous annual of the flax family (Linaceae) with slender, threadlike stems, 10–40 cm (4–16 in) tall. The leaves are linear. The flowers are borne in congested clusters; the pedicels are 0.2–2 mm (.01–.08 in) long. The sepals are hairy and the five petals are rose to whitish. The anthers are deep pink to purple; this character helps distinguish *H. congestum* from *H. californicum*, found in the same geographic area, which has white to rose anthers, as well as hairless sepals. Two other species that are found in the same region are *H. micranthum* and *H. spergulinum*. They differ from *H. congestum* in having hairless sepals and a long, open inflorescence, with pedicels 2–25 mm (.08–1 in) long.

Hesperolinon congestum is endemic to serpentine soils from Marin County south to San Mateo County, a range of 80 km (50 miles). Two populations are found in serpentine chaparral; the others occur in serpentine bunchgrass habitat. There are six populations known from Marin County, one from San Francisco County, and seven from San Mateo County. Populations fluctuate in size from hundreds to thousands of plants (Robison and Morey 1992a). The species is threatened with residential and recreational development, foot traffic, and competition from alien species.

Pentachaeta bellidiflora (white-rayed pentachaeta) was first collected in 1853–54 near Corte Madera by John Milton Bigelow, surgeon and botanist for a railway route exploration (Van Horn 1973). The plant was described as *Pentachaeta bellidiflora* (Greene 1885). Keck (1953) transferred the entire genus to *Chaetopappa*. Van Horn (1973) studied *Chaetopappa* and *Pentachaeta* and concluded that the two genera are not closely related. Based on differences in floral and vegetative morphology and chromosome number, Van Horn reinstated the genus *Pentachaeta*.

Pentachaeta bellidiflora is a small annual plant of the aster family (Asteraceae) with one or a few branches that bear narrow, linear leaves. Each flower head has numerous yellow disk florets and 5 to 16 white to purplish ray florets. The fruits are tawny, coarse-haired achenes (dry one-seeded fruits). Related species in the San Francisco Bay area (*P. exilis* ssp. *exilis* and *P. alsinoides*) differ from *P. bellidiflora* in that they have no ray flowers.

Pentachaeta bellidiflora is known only from one location, in a serpentine bunchgrass community in San Mateo County. Historically, *P. bellidiflora* was known from at least nine sites in Marin, San Mateo, and Santa Cruz Counties. The other populations have been destroyed by urbanization, off-road vehicles, or highway construction over the past 50 years (Robison and Morey 1992b). As is common among annual plants, the size of this population fluctuates dramatically from year to year. Numbers have ranged from 10,000 to just under 100 million in the last 10 years, with about 1.5 million plants growing in each of the last 2 years (Zoe Chandik, Santa Clara Valley Chapter, California Native Plant Society, pers. comm., 1992). The species is threatened by recreational development.

South Bay Species

Ceanothus ferrisae (coyote ceanothus) was collected in 1917 by LeRoy Abrams, professor of botany at Stanford University, on Madrone Springs Road above Coyote Creek, in Santa Clara County. The species was described in 1933 by Howard E. McMinn (McMinn 1933), professor of botany at Mills College and author of *An Illustrated Manual of California Shrubs*.

Ceanothus ferrisae is an erect evergreen shrub of the buckthorn family (Rhamnaceae) that grows 1–2 m (3–6 ft) high, with long stiff divergent branches. Its round leaves are dark green and hairless on the upper surface, lighter green with minute hairs below. The leaf margins have short teeth or sometimes no teeth at all; the leaf base is abruptly tapering or rounded. The small white flowers are borne in clusters 1.3–2.5 cm (0.5–1 in) long. The seed capsules are 7–9 mm (.3–.35 in) in width and have three conspicuous apical horns. The related *C. cuneatus* has entire leaves with wedge-shaped (not rounded) bases and seed capsules only 5–6 mm (.2 in) wide.

Ceanothus ferrisae grows on dry slopes in serpentine chaparral. It is known from only three locations, all within 6 km (4 miles) of each other, in Santa Clara County. Fewer than 6,000 plants are known to exist. It was thought at one time to occur in both San Mateo and Santa Cruz Counties as well, but these reports have been found to be erroneous (Corelli 1991). The existing populations are threatened by residential and recreational development and unauthorized dumping.

The type specimen of *Dudleya setchellii* (Santa Clara Valley dudleya) was collected by Willis L. Jepson in 1896 on Tulare Hill in Santa Clara County. He described it as *Cotyledon laxa* var. *setchellii* (Jepson 1901). At the same time, he described *Cotyledon caespitosa* var. *paniculata*, which he had collected from Morrison Canyon near what is now Fremont. Britton and Rose (1903) elevated both taxa to full species and transferred them to the newly-created genus *Dudleya*. Subsequently, *Dudleya setchellii* was variously treated as *Cotyledon setchellii* (Fedde 1904), *Echeveria setchellii (Nelson and Macbride 1913)*, and *Echeveria laxa* var. *setchellii* (Jepson 1936). Reid Moran (1959) combined the material referred to as *Dudleya setchellii* and *D. paniculata* in *D. cymosa* ssp. *setchellii*. Kei Nakai (1987) separated the two entities into *D. cymosa* ssp. *paniculata* and *D. cymosa* ssp. *setchellii* on the basis of leaf shape, inflorescence branching patterns, and pedicel length. Jim Bartel contends that *D. setchellii* should not be placed within *D. cymosa*, and is in fact intermediate to *D. cymosa* and *D. abramsii* (Jim Bartel, U.S. Fish and Wildlife Service, pers. comm., 1992). His forthcoming treatment of *Dudleya* retains Nakai's *D. cymosa* ssp. *paniculata* and resurrects Britton and Rose's *D. setchellii* for the Santa Clara Valley dudleya (Bartel in press).

Dudleya setchellii is a low-growing perennial of the stonecrop family (Crassulaceae) with fleshy, glabrous leaves. The oblong to triangular, slightly glaucous leaves are 3–8 cm (1–3 in) long and 7–15 mm (0.3–0.6 in) wide. Two or three flowering stems ascend to heights of 5–20 cm (2–8 in) in mid to late spring. The pale yellow petals are 8–13 mm (0.3–0.5 in) long. There are two related species in the area. *D. cymosa* ssp. *cymosa* has bright yellow to red petals rather than pale yellow, and is therefore easily distinguished from *D. setchellii* with its pale yellow flowers. *D. cymosa* ssp. *paniculata* can be distinguished from *D. setchellii* by its oblong to oblanceolate leaves (in contrast to the oblong-triangular leaves of *D. setchellii*), its greater degree of rebranching of the inflorescence branches, and its longer pedicels.

Dudleya setchellii is restricted to rocky outcrops within serpentine grasslands in Santa Clara County. It is found only in the Coyote Valley area, from San Jose south about 30 km (20 miles) to San Martin, at elevations of 100–300 m (300–900 ft). *D. cymosa* ssp. *paniculata* ranges from Contra Costa County to Fresno and Monterey Counties; the reports of Moran's combination *D. cymosa* ssp. *setchellii* from Alameda, Contra Costa, and San Benito Counties (Munz 1959, Olson and Lake 1991) reflect the distribution of *D. cymosa* ssp. *paniculata* and do not refer to *D. setchellii* as now recognized. Fourteen sites and a total of 12,000–13,000 plants are known to exist. The

plant is threatened by development, unauthorized dumping, and off-road vehicles.

Streptanthus albidus ssp. *albidus* (Metcalf Canyon jewelflower) was first collected in 1887 by Volney Rattan, a botany teacher and author of an early California flora, from hillsides a few miles south of San Jose. Edward Greene described *S. albidus* ssp. *albidus* in 1887 (Greene 1887); later he redefined the limits of *Euclisia*, formerly a subgenus of *Streptanthus*, treating it as a genus in its own right (Greene 1904). *S. albidus* ssp. *albidus*, as a member of the *Euclisia* group, was included in this change. Jepson (1925) returned *Euclisia* to subsection status, and later authors followed his treatment. Jepson (1925) also treated *S. albidus* ssp. *albidus* as a subspecies of *S. glandulosus*. Kruckeberg published a revision of the *Streptanthus glandulosus* complex in which he recognized the close relationships among *S. glandulosus*, *S. albidus*, and *S. niger* (Kruckeberg 1958). In this paper he notes that the "sharp genetic discontinuity between *S. albidus* and all other populations, coupled with the morphological distinctness and regional restriction of *S. albidus* warrant the restoration of this Greeneian species." He recognized two subspecies: *S. albidus* ssp. *albidus* and *S. albidus* ssp. *peramoenus* (Kruckeberg 1958).

Streptanthus albidus ssp. *albidus* is an annual herb of the mustard family (Brassicaceae) that reaches up to 1 m (3 ft) in height. It has bristly hairs at the base, and pale green, strongly glaucous stem and leaves. The flowers are borne in leafless terminal racemes. The upper three of the white to yellow to whitish-green sepals are fused, with the lower (fourth) sepal free and spreading. The four petals, 8-11 mm (.3–.4 in) long, are whitish with light purple veins. The erect flattened pods are 3–8 cm (1–3 in) long. The only *Streptanthus* species likely to co-occur with *S. albidus* ssp. *albidus* is its close relative *Streptanthus albidus* ssp. *peramoenus*. *S. albidus* ssp. *peramoenus* is distinguished by its dark purple sepals.

Streptanthus albidus ssp. *albidus* has always been rare. It is endemic to serpentine outcrops with little soil development. It can be locally abundant, but its range is limited, extending less than 30 km (20 miles) from San Jose south to Anderson Lake, which lies northeast of Morgan Hill. Furthermore, the serpentine outcrops on which *S. albidus* ssp. *albidus* occurs are patchily distributed and comprise only a small percentage of the area within its range. Nine populations and a total of 20,000–25,000 plants have been recorded (McCarten 1992b). The plant is threatened by urbanization and off-road vehicles.

Previous Federal Action

Federal government actions on the 12 plants began as a result of section 12 of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*), which directed the Secretary of the Smithsonian Institution to prepare a report on those plants considered to be endangered, threatened, or extinct in the United States. This report, designated as House Document No. 94–51, was presented to Congress on January 9, 1975, and included *Cordylanthus tenuis* ssp. *capillaris* (listed as *Cordylanthus brunneus* ssp. *capillaris*), *Calochortus tiburonensis*, *Ceanothus ferrisae*, *Cirsium fontinale* var. *fontinale*, *Clarkia franciscana*, *Hesperolinon congestum*, *Streptanthus albidus* ssp. *albidus*, and *Streptanthus niger* as endangered species and *Castilleja neglecta* and *Eriophyllum latilobum* as threatened taxa. The Service published a notice in the July 1, 1975, **Federal Register** (40 FR 27823) of its acceptance of the report of the Smithsonian Institution as a petition within the context of section 4(c)(2) (petition provisions are now found in section 4(b)(3) of the Act) and its intention thereby to review the status of the plant taxa named therein. The above 10 taxa were included in the July 1, 1975, notice. As a result of that review, on July 16, 1976, the Service published a proposal in the **Federal Register** (41 FR 24523) to determine approximately 1,700 vascular plant species to be endangered species pursuant to section 4 of the Act. The list of 1,700 plant taxa was assembled on the basis of comments and data received by the Smithsonian Institution and the Service in response to House Document No. 94–51 and the July 1, 1975, **Federal Register** publication. *Calochortus tiburonensis*, *Ceanothus ferrisae*, *Cirsium fontinale* var. *fontinale*, *Clarkia franciscana*, *Cordylanthus tenuis* ssp. *capillaris* (listed as *Cordylanthus brunneus* ssp. *capillaris*), *Hesperolinon congestum*, *Streptanthus albidus* ssp. *albidus*, and *Streptanthus niger* were included in the June 16, 1976, **Federal Register** document.

General comments received in response to the 1976 proposal were summarized in an April 26, 1978, **Federal Register** publication (43 FR 17909). The Endangered Species Act Amendments of 1978 required that all proposals over 2 years old be withdrawn. A 1-year grace period was given to those proposals already more than 2 years old. In the December 10, 1979, **Federal Register** (44 FR 70796), the Service published a notice of withdrawal of the June 16, 1976, proposal, along with four other proposals that had expired.

The Service published an updated notice of review for plants on December 15, 1980 (45 FR 82480). This notice included *Calochortus tiburonensis*, *Castilleja neglecta*, *Ceanothus ferrisae*, *Cirsium fontinale* var. *fontinale*, *Clarkia franciscana*, *Cordylanthus tenuis* ssp. *capillaris*, *Hesperolinon congestum*, *Pentachaeta bellidiflora*, *Streptanthus albidus* ssp. *albidus*, and *Streptanthus niger* as category 1 candidates for Federal listing, and *Eriophyllum latilobum* as a category 2 candidate. Category 1 taxa are those for which the Service has on file substantial information on biological vulnerability and threats to support preparation of listing proposals. Category 2 taxa are those for which data in the Service's possession indicate listing is possibly appropriate, but for which substantial data on biological vulnerability and threats are not currently known or on file to support proposed rules. On November 28, 1983, the Service published in the **Federal Register** a supplement to the Notice of Review (48 FR 39526). This supplement changed *Ceanothus ferrisae*, *Cirsium fontinale* var. *fontinale*, *Pentachaeta bellidiflora*, and *Streptanthus albidus* ssp. *albidus* from category 1 to category 2 candidates.

The plant notice was again revised on September 27, 1985 (50 FR 39526). *Calochortus tiburonensis*, *Castilleja neglecta*, *Clarkia franciscana*, *Eriophyllum latilobum*, *Hesperolinon congestum*, and *Streptanthus niger* were included as category 1 candidates; *Ceanothus ferrisae*, *Cirsium fontinale* var. *fontinale*, *Cordylanthus tenuis* ssp. *capillaris*, *Pentachaeta bellidiflora*, and *Streptanthus albidus* ssp. *albidus* were included as category 2 candidates. Another revision of the plant notice was published on February 21, 1990 (55 FR 6184). In this revision, *Castilleja neglecta*, *Ceanothus ferrisae*, *Cirsium fontinale* var. *fontinale*, *Clarkia franciscana*, *Cordylanthus tenuis* ssp. *capillaris*, *Dudleya setchellii*, *Eriophyllum latilobum*, *Hesperolinon congestum*, *Streptanthus albidus* ssp. *albidus*, and *Streptanthus niger* were included as category 1 candidates; *Calochortus tiburonensis* and *Pentachaeta bellidiflora* were included as category 2 candidates. Since the publication of that notice, additional information was received on *Pentachaeta bellidiflora* that elevated it to category 1 status. The Service also re-evaluated the information available for *Calochortus tiburonensis* and elevated it to category 1 status. The Service

therefore believes that sufficient information is now available to support the proposed listing of these two species.

Section 4(b)(3)(B) of the Endangered Species Act, as amended in 1982, requires the Secretary to make certain findings on pending petitions within 12 months of their receipt. Section 2(b)(1) of the 1982 Amendments further requires that all petitions pending on October 13, 1982, be treated as having been newly submitted on that date. This was the case for *Calochortus tiburonensis*, *Ceanothus ferrisae*, *Cirsium fontinale* var. *fontinale*, *Clarkia franciscana*, *Cordylanthus tenuis* ssp. *capillaris*, *Hesperolinon congestum*, *Streptanthus albidus* ssp. *albidus*, *Streptanthus niger*, *Castilleja neglecta*, and *Eriophyllum latilobum*, because the 1975 Smithsonian report had been accepted as a petition. On October 13, 1982, the Service found that the petitioned listing of these species was warranted, but precluded by other pending listing actions, in accordance with section 4(b)(3)(B)(iii) of the Act; notification of this finding was published on January 20, 1984 (49 FR 2485). Such a finding requires the petition to be recycled, pursuant to section 4(b)(3)(c)(i) of the Act. The finding was reviewed in October of 1984, 1985, 1986, 1987, 1988, 1989, 1990, and 1991. Publication of this proposal constitutes the final finding for the petitioned action. There are no pending petitions for *Pentachaeta bellidiflora* or *Dudleya setechellii*.

Summary of Factors Affecting the Species

Section 4 of the Endangered Species Act (Act) and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to the Federal lists of threatened and endangered species. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Calochortus tiburonensis* Hill (Tiburon mariposa lily), *Castilleja neglecta* Zeile (Tiburon paintbrush), *Ceanothus ferrisae* McMinn (coyote ceanothus), *Cirsium fontinale* Jeps. var. *fontinale* (fountain thistle), *Clarkia franciscana* Lewis and Raven (Presidio clarkia), *Cordylanthus tenuis* Gray ssp. *capillaris* (Penn.) Chuang and Heck. (Pennell's bird's beak), *Dudleya setchellii* (Santa Clara Valley dudleya), *Eriophyllum latilobum* Rydb. (San Mateo woolly sunflower), *Hesperolinon congestum* (A. Gray) Small (Marin dwarf-flax), *Pentachaeta bellidiflora* Greene (white-rayed pentachaeta), *Streptanthus albidus* Greene ssp. *albidus* (Metcalf Canyon jewelflower), and *Streptanthus niger* Greene (Tiburon jewelflower) are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of its Habitat or Range

The destruction of habitat through residential or recreational development is the greatest threat faced by these species. The plants are limited to serpentine soils. Serpentine outcrops in the San Francisco Bay area are limited; 20 percent of those outcrops have already been eliminated as plant habitat due to development (McCarten 1987b). The pressure to build more houses, roads, and other facilities for humans is great in all the counties under consideration. Serpentine habitats also have been fragmented by the construction of roads such as Interstate 280. Habitat fragmentation increases the risks of extinction due to chance events such as fire, flood, landslide, pest or disease outbreaks, severe drought, or other natural or human-caused disaster.

Cordylanthus tenuis ssp. *capillaris* has never been known from more than the two populations that occur today. Ownership of the type locality is mixed; part of the population occurs on the Harrison Grade Preserve, which is owned and managed by the California Department of Fish and Game. Habitat on the preserve is threatened by unauthorized activities such as off-road vehicle use. Plants on private parcels are threatened with potential development.

The second population of *Cordylanthus tenuis* ssp. *capillaris* occurs on private property a few miles to the west of the type locality. Plans for residential development of this site are currently under review at the Sonoma County Planning Department (Betty Guggolz, pers. comm. 1992). The owner of this property has been working with the California Department of Fish and Game to minimize impacts to the *Cordylanthus tenuis* ssp. *capillaris* (Ann Howald, California Department of Fish and Game, pers. comm., 1992). Plans include the donation of over 40 hectares (ha) (100 acres), including *C. tenuis* ssp. *capillaris* habitat, to the county for use as a park (Betty Guggolz, pers. comm., 1992). This donation may afford protection to part of the second population of *C. tenuis* ssp. *capillaris*, but since the transfer has not yet taken place and no plans have been made for protection of the plant on this new park, the population still should be considered threatened by development.

Calochortus tiburonensis is at present protected from development because the land on which it occurs is owned and managed by The Nature Conservancy, a group whose management goals are the maintenance of biodiversity and the protection of rare and endangered species (Larry Serpa, pers. comm., 1992). The preserve is fenced to reduce the incidence of off-road vehicle use, but the site is still accessible to bicycles, motorbikes, and pedestrians, and it is not patrolled. The proximity of the preserve to residential areas renders it vulnerable to overuse and vandalism. Furthermore, this preserve, being on The Nature Conservancy's list of potential divestitures, will transfer ownership when a suitable organization is found to manage it (Larry Serpa, pers. comm., 1992).

Castilleja neglecta has never been widespread. Three of the five populations occur on the Tiburon Peninsula in Marin County, and one occurs in Napa County. A recently discovered population on the Golden Gate National Recreation Area extends the known range to western Marin County. Each of the three occurrences on the Tiburon Peninsula has multiple landowners. The Nature Conservancy owns over half of the Ring Mountain occurrence and the town of Tiburon owns portions of the occurrence in the Middle Ridge area of the peninsula. The remainder of each of these occurrences is privately-owned. The third occurrence on the peninsula is on private property near St. Hilary's Church in Tiburon. Development on the Tiburon Peninsula is extensive and rapid; over 60 percent of *C. neglecta* habitat has already been destroyed by development (Hunter 1989a). Residential development is ongoing on several parcels of the Middle Ridge occurrence, and proposed for both parcels at the St. Hilary's occurrence. The habitat at both of these sites is also threatened by pedestrian traffic. The plants on Ring Mountain Preserve are protected from development but are threatened by sliding of the slope on which they occur. The toe of the slope was removed to accommodate residential development in the 1960s. Soil material that slides into the street at the base of the slope is removed by the City of Corte Madera, and the slope continues to slump. Managers from The Nature Conservancy estimate that approximately one-third of the population is at risk (Lynn Lozier, pers. comm., 1992). The Napa County population occurs on private property near a gravel quarry. Although quarry expansion plans that would result in the

destruction of more than 80 percent of the population are no longer being actively pursued, the potential for expansion still exists.

Streptanthus niger is an extremely narrowly-distributed species; its entire range amounts to less than one-third of a square mile. Urban development has destroyed over 40 percent of potential *S. niger* habitat (Hunter 1989b). Both of the two known occurrences have multiple landowners. The town of Tiburon owns portions of the occurrence on the Middle Ridge of the peninsula, and the occurrence at St. Hilary's Church in Tiburon is owned in part by the Tiburon Landmark Society. The remainder of each of these two occurrences is privately-owned. Residential development is ongoing at several parcels of the Middle Ridge occurrence, and proposed for both parcels of the St. Hilary's occurrence. Habitat at both of these sites is also threatened by pedestrian traffic.

Clarkia franciscana was once though to be restricted to the Presidio in San Francisco County, but about 10 years ago a population was discovered in Alameda County in the Oakland hills. The two populations in San Francisco County occur at the Presidio, currently owned by the U.S. Department of Defense. These populations are threatened by habitat degradation. The Army has plans to fence rare plant habitat on the Presidio; at present, however, pedestrian and mountain bicycle traffic on and near casually established "social trails" threatens the habitat. Ownership of the Presidio is expected to be transferred from the Army to the National Park Service within a year. The Presidio represents a significant natural and cultural resource within San Francisco city limits, and is expected to be widely promoted by the Park Service and heavily used by visitors (Terri Thomas, Golden Gate National Recreation Area, pers. comm., 1992). The increase in visitation after transfer to the Park Service will increase the negative impact of traffic on *C. franciscana*.

The three populations of *Clarkia franciscana* in Alameda County are all threatened by alien species (see Factor E). The smallest of the three, consisting of 30 plants (Olson 1991c) occurs on an undeveloped site that bears a sign offering custom-built homes.

One occurrence of *Cirsium fontinale* var. *fontinale* has been reported from Santa Clara County, but the site is thought to have been destroyed by urbanization (Niehaus 1977). The three remaining populations grow in San Mateo County. The largest population occurs to the east of Crystal Springs Reservoir and north of State Highway 92, along both sides of Interstate 280. It occurs partly on San Francisco Water Department land and partly on a California Department of Transportation right-of-way. Given its proximity to the roadside, it is likely to be affected by any highway projects in the area. Major realignments of Highway 92 were planned several years ago, but the plans have been abandoned due to lack of funding (Richard Vonarb, California Department of Transportation, pers. comm., 1992). They could be revived, however, if funding should become available. At present, a smaller project to widen Highway 92 east of the reservoir causeway is under review. Provision for the removal of water from the increased road surface may adversely affect some of the plants. The California Department of Transportation is aware of the plant locations and vulnerability. The proposed construction of multi-use recreational trails on San Francisco Water Department land presents an additional threat. Trail construction would threaten the plants through direct destruction of the habitat or through modification of hydrologic regimes. Because *C. fontinale* var. *fontinale* is dependent upon seeps and springs to provide abundant soil moisture, any disruption in the flow of water (such as that caused by road, trail, or drain construction) would threaten the plants.

A second and substantially smaller population of *Cirsium fontinale* var. *fontinale* occurs in the "Triangle" west of Interstate 280. One to two hundred plants have been observed on San Francisco Water Department lands; an outlying colony of about 25 plants occurs on an easement held by the California Department of Transportation. This colony occupies a smaller territory in 1992 than it has in previous years (Susan Sommers, pers. comm., 1992). The plants on Water Department land are threatened by proposed trail construction, as discussed for *Hesperolinon congestum*. In addition, a general management plan for the Water Department lands currently is being developed (Ed Stewart, San Francisco Water Department, pers. comm., 1992), which may include the possibility of golf course construction at the Triangle.

The single specimen of *Cirsium fontinale* var. *fontinale* in Edgewood County Park occurs in a drainage ditch beside a trail. Clearing of the ditch to improve or maintain drainage could damage or destroy this plant or any seedlings it may produce.

Eriophyllum latilobum has been reported from only two locations, one of which is likely erroneous (specimen misidentified, according to Barry Prigge, pers. comm., 1992). The single remaining population consists of about 300 plants that occur along 4 km (2.5 miles) of Crystal Springs Road in San Mateo County. Seventy-five percent of the plants occur within 9 m (30 ft) of the road, where land ownership is poorly defined (McGuire 1992). The City of Hillsborough, the County of San Mateo, and the San Francisco Water Department have varying jurisdictions over the land. The steep slopes along Crystal Springs Road provide a very unstable habitat for *E. latilobum*. The slopes are subject to erosion and soil slippage. After soil slippage occurs, road maintenance crews remove the slumped soil, which may contain mature individuals, seedlings, and/or seeds of the *E. latilobum*. The road cut is then reshaped, which may damage plants remaining on the banks. The proposed construction of the San Mateo Creek Trail (McGuire and Morey 1992) would have adverse impacts on the plant if trail design does not incorporate plant conservation. The paved trail, which is 3 m (10 ft) wide, is expected to run adjacent to Crystal Springs Road from Skyline Boulevard to the San Mateo City boundary. Construction of the trail could damage or eliminate colonies of *E. latilobum*, alter site hydrology, accelerate soil erosion through increased pedestrian and bicycle traffic, and allow for the introduction of aggressive alien plant species.

Fourteen populations of *Hesperolinon congestum* still exist. One Marin County population is protected at The Nature Conservancy's Ring Mountain Preserve. Two relatively small populations occur on land owned by the Marin Municipal Water District. Another small population is found in the Golden Gate National Recreation Area above Nicasio Reservoir. A fifth population occurs in part on a small preserve at St. Hilary's Church, and in part on private land which recently has been proposed for development (Robison and Morey 1992a). The sixth Marin County site is the Middle Ridge area of the Tiburon Peninsula, on which occur a few scattered groups of plants. Some plants grow on land designated as open space by the city of Tiburon. The remainder of the plants occur on private land and are threatened by ongoing or proposed residential development.

One population of *Hesperolinon congestum* is known from San Francisco County. This occurrence is threatened by foot traffic.

In San Mateo County, three populations of *Hesperolinon congestum* are known to occur on private property.

These plants are threatened by proposed development and by the consequences of recently completed development, such as trampling, trash dumping, and changes in hydrology caused by irrigation runoff (Robison and Morey 1992a). Two populations occur on land owned by the San Francisco Water Department. Their habitat is threatened by the proposed construction of trails in the watershed. The construction of these trails and the accompanying fences may damage *Hesperolinon congestum* habitat. Two populations occur at Edgewood County Park and have been threatened by the proposed construction of a golf course at the park. On May 5, 1992, the county board of supervisors voted to declare Edgewood County Park a natural preserve. This designation will provide guidance to park personnel in determining uses of the park, but it has no enforcement provisions, and can be revoked by a vote of the board of supervisors.

Pentachaeta bellidiflora historically ranged from Marin County to Santa Cruz County. Three populations in Marin County and two in San Mateo County were destroyed by urbanization. One Marin County occurrence was destroyed by off-road vehicles. Two sites in Santa Cruz County no longer support *P. bellidiflora* (Robison and Morey 1992b). The single remaining population of *P. bellidiflora* was bisected by the construction of California Interstate 280 in the late 1960s. The largest portion of the population occurs in the Triangle, on land administered by the San Francisco Water Department. A small remnant of this population is located to the east of Interstate 280, on Edgewood County Park. The proposed construction of trails on Water Department land threatens the *P. bellidiflora* habitat.

Ceanothus ferrisae is known from three populations in Santa Clara County. The largest population, consisting of approximately 5,000 plants, occurs near Anderson Dam, partially on Santa Clara County Park property and partially on private property. The county proposes further recreational development in the park, which could threaten the *Ceanothus ferrisae* (Chris Nagano, U.S. Fish and Wildlife Service, pers. comm., 1992). An outlying population occurs 3 km (2 miles) west on land leased and managed by a waste management firm. Waste Management, Inc. and The Nature Conservancy jointly funded research on *C. ferrisae*, which was conducted by the Center for Conservation Biology. Researchers have found that *C. ferrisae* is relatively easy to propagate from seed, and both Waste Management and the Santa Clara Valley Water District have been experimenting with the use of *C. ferrisae* for revegetation projects. The third population, consisting of approximately 500 plants (Corelli 1989) occurs on private land scheduled for development.

Dudleya setchellii always has been restricted to the Coyote Valley area of Santa Clara County. Eleven of the 14 populations are on private land and are subject to various levels of threat due to development. The three northernmost populations, which occur in southeastern San Jose, and the three southernmost populations, which occur in the area around Morgan Hill, are at greatest risk. These areas are developing especially rapidly, and all six sites have been proposed for development at one time or another. Two of the central populations also are threatened with imminent development, including residential development and road construction. One central population, due to its proximity to an off-road motorcycle park, may be threatened by off-road motorcycle traffic and unauthorized dumping. The remaining two populations that occur on private land are on the grounds of the IBM Bailey Avenue laboratory. The company apparently plans to preserve the habitat (McCarten 1992a). Three populations occur on land owned by Santa Clara County. Of these, two populations occur in county parks. The final population occurs on county-owned land that is slated for the construction of a jail and an animal shelter. The county intends to avoid the *D. setchellii* habitat during construction (Kathy Freas, CH2M Hill, pers. comm., 1992), but specific plans have not yet been developed.

The known historical distribution of *Streptanthus albidus* ssp. *albidus* is as restricted as its current distribution. It is found only in the Coyote Valley area of Santa Clara Valley, primarily on the east side of the valley. Of the 13 documented sites, 9 are known to still harbor plants. Two populations are known to have been extirpated, one by the construction of Anderson Dam, and the other as a result of being covered by fill from a housing development. Two occurrences are known from herbarium records only. One of these historical sites was revisited in 1990, but no plants were found. *Streptanthus albidus* ssp. *albidus* was last observed at the other historical site in 1895. The remaining nine populations are threatened by impending or potential development. Two of these populations occur on county property on which the construction of a jail and an animal shelter is proposed. The county intends to avoid the *Streptanthus* habitat during construction (Kathy Freas, pers. comm., 1992) but specific plans have not yet been developed.

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

Overutilization is not currently known to be a factor for any of the 12 plants, but unrestricted collecting for scientific or horticultural purposes or excessive visits by individuals interested in seeing rare plants could result from increased publicity as a result of this proposal. *Calochortus tiburonensis* is a strikingly unusual member of a much-collected genus. *Eriophyllum latilobum*, with its showy golden flowers and proximity to roads and the proposed San Mateo Creek trail, might prove to be especially tempting to collectors. *Dudleya setchellii* is also vulnerable because of the horticultural appeal of succulents and the slow growth of the plants. The remaining plants are usually not spectacular in flower, but may nonetheless appeal to collectors because of their rarity.

C. Disease or Predation

Both horses and deer have been reported to browse on *Cordylanthus tenuis* ssp. *capillaris*, but the number of plants damaged generally appears to be minimal (Lynn Lozier, pers. comm., 1992). Cattle grazing has been reported to threaten the western Marin population of *Castilleja neglecta* (Martin 1991) and a portion of the American Canyon occurrence (Hunter 1989a). Another source suggests, however, that cattle provide little threat to the American Canyon population because the plants occur on a very steep slope (Jake Ruygt, Napa Valley Chapter, California Native Plant Society, pers. comm., 1992).

Seed predation by beetle larvae has been reported for *Cirsium fontinale* var. *fontinale* (Dean Kelch, University of California, Davis, pers. comm., 1992); however, the extent of the impact of this seed predation on *C. fontinale* var. *fontinale* is unknown. Beetle larvae also have been observed in seed heads of *Eriophyllum latilobum* (McGuire and Morey 1992).

D. The Inadequacy of Existing Regulatory Mechanisms

Under the Native Plant Protection Act (Division 2, Chapter 10 section 1900 *et seq.* of the Fish and Game Code) and California Endangered Species (Division 3, Chapter 1.5 section 2050 *et seq.*), the California Fish and Game Commission has listed three of these species (*Cirsium fontinale* var. *fontinale*, *Clarkia franciscana*, and *Streptanthus niger*) as endangered, two species (*Calochortus*

tiburonensis and *Castilleja neglecta*) as threatened, and one species (*Cordylanthus tenuis* ssp. *capillaris*) as rare. The California Fish and Game Commission recently voted to list two other species (*Eriophyllum latilobum* and *Pentachaeta bellidiflora*) as endangered, and one species (*Hesperolinon congestum*) as threatened. Although both statutes prohibit the "take" of State-listed plants (Chapter 1.5 section 1908 and Chapter 10 section 2080), State law appears to exempt the taking of such plants via habitat modification or land use change by the landowner. After the California Department of Fish and Game notifies a landowner that a State-listed plant grows on his or her property, State law requires only that the landowner notify the agency "at least ten days in advance of changing the land use to allow salvage of such plant." (Chapter 1.5 section 1913).

The California Environmental Quality Act (CEQA) requires a full public disclosure of the potential environmental impacts of proposed projects. The public agency with primary authority or jurisdiction over the project is designated as the lead agency, and is responsible for conducting a review of the project and consulting with other agencies concerned with resources affected by the project. Section 15065 of the CEQA Guidelines requires a finding of significance if a project has the potential to "reduce the number or restrict the range of a rare or endangered plant or animal." Species that are eligible for listing as rare, threatened, or endangered but are not so listed are given the same protection as those species that are officially listed with the State. Once significant effects are identified, the lead agency has the option to require mitigation for effects through changes in the project or to decide that overriding considerations make mitigation infeasible. In the latter case, projects may be approved that cause significant environmental damage, such as destruction of endangered species or their habitat. The protection of threatened and endangered species through CEQA is therefore dependent upon the good will of the lead agency involved, and in practice statements of overriding considerations are commonly prepared.

Three of the plants occur at Edgewood County Park in San Mateo County, which has recently been designated as a natural preserve. This designation is intended to encourage management for environmental protection, but it can be revoked by a vote of the county board of supervisors, and therefore does not provide dependable long-term protection for the plants.

Section 404 of the Clean Water Act regulates the placement of dredge and fill materials into waters of the United States (including small acreages above the headwaters of streams). Under section 404, nationwide permits, which undergo minimal public and agency review, can be issued for projects involving less than 10 acres of waters of the United States and adjacent wetlands, unless a listed species may be adversely affected. Individual permits, which are subject to more extensive review, are required for projects that affect greater than 10 acres.

The U.S. Army Corps of Engineers (Corps) is the agency responsible for administering the section 404 programs. The Service, as part of the section 404 review process, provides comments on both pre-discharge notices for nationwide permits and public notices for individual permits. The Service's comments are only advisory, although procedures exist for elevation when disagreements between the agencies arise. In practice, the Corps' actions under section 404 would not adequately protect *Cirsium fontinale* var. *fontinale*, which occurs in riparian serpentine seep areas.

Most projects within the range of *Cirsium fontinale* var. *fontinale* considered in this proposal may require approval from the Corps as currently described in section 404 of the Clean Water Act. Federal listing of this species would ensure greater consideration of the effects of permitted actions during the review process as well as provide the protections of section 7 of the Act.

E. Other Natural of Manmade Factors Affecting its Continued Existence

As discussed in the "Background" section, the large and still increasing numbers of people in the San Francisco Bay area place a great strain on undeveloped wildlands, through activities such as pedestrian and off-road vehicle traffic and unauthorized garbage dumping. Disturbance may directly impact plants; more seriously, it can increase erosion and allow the invasion of alien species such as the many introduced annual grasses common in California. Competition with introduced species is a serious threat to serpentine natives (McCarten 1987b).

Cordylanthus tenuis ssp. *capillaris* growing along roadsides is threatened by roadside maintenance such as mowing and spraying (Lynn Lozier, pers. comm., 1992). Vehicular traffic threatens plants in and near the parking area at the Harrison Grade Reserve, which is poorly defined and close to the plant population (McCarten 1987a). Unauthorized dumping of large items such as bottles, furniture, appliances, and cut wood is also a threat. Light disturbance at the Harrison Grade Reserve such as infrequent grading of dirt roads appears to increase the number of *C. tenuis* ssp. *capillaris* (Lynn Lozier, The Nature Conservancy, pers. comm., 1992), but higher levels of disturbance may facilitate the invasion of alien species (McCarten 1987a) and result in a decline of *C. tenuis* ssp. *capillaris*.

Calochortus tiburonensis is threatened, by virtue of its occurrence in a single population, with chance events such as fire, severe drought, pest or disease outbreak, landslides, or other natural or human-caused disasters. The proximity of the plant to a large human population increases the likelihood that human-caused disasters or acts of vandalism will affect the plants or their habitat.

Clarkia franciscana is threatened by road maintenance (mowing) at the Presidio. Mowing of grasslands before the *Clarkia franciscana* has set seed also threatens the populations. Populations at the Presidio also are threatened by the encroachment of alien plant species, including *Senecio mikanioides* (German ivy), *Carpobrotus* sp. (iceplant), *Rubus* spp. (blackberries), and by natives planted outside their natural range, such as *Pinus radiata* (Monterey pine) (California Department of Fish and Game 1988). The population size at the type locality increased following removal of alien plant species in the late 1980s. Constant vigilance and effort is needed to prevent reinvasion.

At latest report the largest population of *Clarkia franciscana*, occurring at Redwood Regional Park in Alameda County, consisted of 4,000–5,000 plants (Gottlieb and Edwards 1992, Olson 1991a). The East Bay Regional Park District is aware of the *Clarkia franciscana* population and has been taking it into account in their management plans (Ray Budzinski, East Bay Regional Park District, pers. comm., 1992). The habitat is threatened by competition with annual grasses (Ray Budzinski, pers. comm., 1992) and other alien plants, including *Cortaderia selloana* (pampas grass) and *Cytisus monspessulanus* (French broom) (Olson 1991a). The two smaller populations in Alameda County, consisting of 200 plants (Olson 1991b) and 30 plants (Olson 1991c) respectively, are also threatened by alien species *Cytisus monspessulanus* and *Cortaderia jubatum*. The larger of the two occurs on a roadcut.

The Crystal Springs Reservoir population of *Cirsium fontinale* var. *fontinale* is threatened by several factors, including roadside maintenance. The California Department of Transportation is aware of the rare plants in this area, and the maintenance division submits spraying plans for internal environmental review before spraying in the area where plants are known to occur (Richard Vonarb, pers. comm., 1992). Alien plants such as *Cortaderia selloana* have established themselves near the *C. fontinale* var. *fontinale*, and threaten several subpopulations (Zoe Chandik, pers. comm., 1992). Dumping of garden debris from households on the ridge above the plants covers plants and renders the habitat unsuitable for plant establishment and growth. It has been suggested that *C. fontinale* var. *fontinale* may be threatened with hybridization with *Cirsium quercetorum*, but only one hybrid has been collected in recent years, so this is not thought to be a serious problem (Dean Kelch, pers. comm., 1992).

Eriophyllum latilobum is threatened by many factors. Dumping of garden debris and downhill seepage of pesticides from homeowners living above the population may have negative impacts on *E. latilobum* habitat. The plant also is threatened by competition with alien plants; its habitat is more densely populated with *Carduus* sp. and *Bromus* sp. than it was 10 years ago (John Mooring, pers. comm., 1992). Road maintenance also threatens *E. latilobum*. Preemergent herbicide is commonly used along the side of the road; drift from herbicide spray may damage those plants close to the road. San Mateo County road maintenance crews were alerted to the existence of *E. latilobum* in 1990, and instructed to avoid the plants by the San Mateo County Planning Department; however, road maintenance activities are not monitored to ensure protection (Roman Gankin, San Mateo County Planning Division, pers. comm. to Teri McGuire, Botanist, California Department of Fish and Game, cited in McGuire and Morey 1992). *E. latilobum* is not a vigorous reproducer; low germination rates and low seedling survival have been observed under greenhouse conditions (John Mooring, *in litt.*, 1992, in McGuire and Morey 1992).

Hesperolinon congestum is threatened by the encroachment of native shrubs in San Francisco County. In San Mateo County all three populations are threatened by trash dumping as a consequence of recently completed development.

Pentachaeta bellidiflora is potentially threatened by competition from alien plant species; this competition becomes a problem when the soils are disturbed (Robison and Morey 1992b).

Ceanothus ferrisae is threatened by unauthorized dumping of litter and larger debris at the Anderson dam site.

Streptanthus albidus ssp. *albidus* is threatened by dumping and off-road motorcycle use. Road maintenance or construction threaten populations that occur on roadcuts. Grazing threatens some other populations.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by these species in determining to propose this rule. These 12 plants are endemic to a very specific habitat that occurs in scattered outcrops. The rapid urban development in the San Francisco Bay region offers the greatest threat to these plants. They are threatened further by the invasion of alien species, roadside maintenance, soil erosion and slipping, garbage dumping, livestock grazing, seed predation, and small population sizes that increase their vulnerability to chance events such as fire, flood, drought, pest and disease outbreaks, and other natural and human-caused disasters. Ten of the 12 are in danger of extinction throughout all or a part of their range, and the preferred action is therefore to list *Castilleja neglecta, Ceanothus ferrisae, Cirsium fontinale* var. *fontinale, Clarkia franciscana, Cordylanthus tenuis* ssp. *capillaris, Dudleya setchellii, Eriophyllum latilobum, Pentachaeta bellidiflora, Streptanthus albidus* ssp. *albidus*, and *Streptanthus niger* as endangered. Two of the twelve are not now in immediate danger of extinction throughout all or a significant portion of their range. However, given the extremely limited distribution of *Calochortus tiburonensis*, and if appropriate management actions are not taken to protect *Hesperolinon congestum*, these two species are likely to become in danger of extinction in the near future. As a result, the preferred action is to list *Calochortus tiburonensis* and *Hesperolinon congestum* as threatened.

Critical Habitat

Section 4(a)(3) of the Act requires that, to the maximum extent prudent and determinable, the Secretary designate critical habitat concurrently with determining a species to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for these species. Because the 12 plants face numerous anthropogenic threats (see Factors A and E in "Summary of Factors Affecting the Species") and the 12 occur predominantly on private land, the publication of precise maps and descriptions of critical habitat in the **Federal Register** would make these plants more vulnerable to incidents of vandalism and, therefore, could contribute to the decline of these species and increase enforcement problems. The listing of these species as endangered or threatened also publicizes the rarity of these plants and, thus, can make these plants attractive to researchers or collectors of rare plants. The proper agencies have been notified of the locations and importance of protecting the habitat of these species.

Protection of the habitat of these species will be addressed through the recovery process and through the section 7 jeopardy standard. Therefore, the Service finds that designation of critical habitat for these plants is not prudent at this time, because such designation likely would increase the degree of threat from vandalism, collecting, or other human activities.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain activities. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Act provides for possible land acquisition and cooperation with the State and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required of Federal agencies and the prohibitions against certain activities involving listed plants are discussed, in part, below.

Section 7(a) of the Act requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) of the Act requires Federal agencies to confer with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the

continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service.

Federal activities potentially affecting one or more of the 12 plants likely will involve recreation-related projects and perhaps grazing practices on Federal land. Populations of 3 of the 12 plants occur on Federal land. Two populations of *Hesperolinon congestum* and one of *Castilleja neglecta* occur on the golden Gate National Recreation Area. Two populations of *Clarkia franciscana* occur at the Presidio, on land now owned by the Department of Defense and soon to be transferred to the Golden Gate National Recreation Area.

The San Francisco Water Department owns 9,300 ha (23,000 acres) of land in San Mateo County. In 1969, a four-party agreement among the U.S. Department of the Interior, the State of California, San Mateo County, and the City and County of San Francisco established easements on the watershed lands to ensure that all future land use would be compatible with water quality criteria. These easements were granted to the U.S. Department of the Interior and are jointly administered by the San Francisco Water Department and the Golden Gate National Recreational Area. Populations of *Cirsium fontinale* var. *fontinale*, *Eriophyllum latilobum*, *Hesperolinon congestum* and *Pentachaeta bellidiflora* occur on Water Department land.

Hesperolinon congestum, *Pentachaeta bellidiflora*, *Dudleya setchellii*, and *Streptanthus albidus* ssp. *albidus* co-occur with the bay checkerspot butterfly (*Euphydryas editha bayensis*) in San Mateo or Santa Clara counties. The bay checkerspot is listed as a threatened species under the Endangered Species Act. Permits for incidental take of this species granted under section 10(a) of the Act may affect the plant species listed above. Preparation of Habitat Conservation Plans for the Bay checkerspot butterfly may therefore require internal section 7 consultation with regard to the four species listed above.

The 12 plants also may be affected by Federal mortgage programs, including the Veterans Administration and the U.S. Department of Housing and Urban Development (Federal Home Administration loans), or by construction of roads and highways by the Federal Highways Administration. At least one proposed project that may affect two of the plants also involves wetlands under the jurisdiction of the U.S. Army Corps of Engineers.

Listing these 12 plants would provide for development of a recovery plan (or plans) for them. Such plan(s) would bring together both State and Federal efforts for conservation of the plants. The plan(s) would establish a framework for agencies to coordinate activities and cooperate with each other in conservation efforts. The plan(s) would set recovery priorities and estimate costs of various tasks necessary to accomplish them. They also would describe site-specific management actions necessary to achieve conservation and survival of the 12 serpentine plants.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 for endangered species and 17.71 and 17.72 for threatened species set forth a series of general prohibitions and exceptions that apply to all endangered or threatened plants. With respect to the 12 plants from San Francisco Bay area serpentine habitats, all trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61 or 17.71, would apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export; transport in interstate or foreign commerce in the course of a commercial activity; sell or offer for sale in interstate or foreign commerce; remove and reduce to possession the species from areas under Federal jurisdiction; maliciously damage or destroy any such species on any area under Federal jurisdiction; or remove, cut, dig up, damage, or destroy any such endangered plant species on any other area in knowing violation of any State law or regulation or in the course of any violation of a State criminal trespass law. Certain exceptions apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62, 17.63, and 17.72 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered or threatened plant species under certain circumstances. The Service anticipates few trade permits would ever be sought or issued for the 12 species because the plants are not common in cultivation or in the wild. Requests for copies of the regulations on listed plants and inquiries regarding them may be addressed to the Office of Management Authority, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203–3507 (703/358–2104).

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning this proposed rule are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to *Cordylanthus tenuis* ssp. *capillaris*, *Calochortus tiburonensis*, *Castilleja neglecta*, *Streptanthus niger*, *Clarkia franciscana*, *Cirsium fontinale* var. *fontinale*, *Eriophyllum latilobum*, *Hesperolinon congestum*, *Pentachaeta bellidiflora*, *Ceanothus ferrisae*, *Dudleya setchellii*, or *Streptanthus albidus* ssp. *albidus*;

(2) The location of any additional populations of these species and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range, distribution, and population size of these species; and

(4) Current or planned activities in the subject area and their possible impacts on these species.

Any final decision on this proposal will take into consideration the comments and any additional information received by the Service, and such communications may lead to a final regulation that differs from this proposal.

The Act provides for a public hearing on this proposal, if requested. Requests must be received within 45 days of the date of publication of the proposal. Such requests must be made in writing and addressed to the Field Supervisor of the Sacramento Field Office (see **ADDRESSES** section).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Act. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Endangered and threatened species, Exports, Imports, Reporting and recordkeeping requirements, and Transportation.

Proposed Regulation Promulgation

PART 17—[AMENDED]

Accordingly, it is hereby proposed to amend part 17 subchapter B of Chapter I, title 50 of the Code of Federal Regulations, as set forth below:

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500, unless otherwise noted.

2. It is proposed to amend § 17.12(h) by adding the following, in alphabetical order under the families indicated, and by adding a new family "Linaceae—Flax family," in alphabetical order, to the List of Endangered and Threatened Plants:

§ 17.12 Endangered and threatened plants.

50 CFR Part 17

RIN 1018—AB88

Endangered and Threatened Wildlife and Plants; Proposed Endangered Status for Three Plants from the Waianae Mountains, Island of Oahu, HI

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The U.S. Fish and Wildlife Service (Service) proposes endangered status pursuant to the Endangered Species Act of 1973, as amended (Act), for three plants: *Cyanea grimesiana* ssp. *obatae* (haha), *Diellia unisora* (no common name (NCN)), and *Gouania vitifolia* (NCN). These taxa are known primarily form the Waianae Mountain Range, located on the island of Oahu, Hawaii. The three plant taxa and their habitats have been adversely threatened in various degrees by one or more of the following: Habitat degradation and competition for space, light, water, and nutrients by naturalized, alien vegetation; and habitat degradation and potential predation by feral animals. Because of the low number of extant individuals and severely restricted distributions, populations of these taxa are subject to an increased likelihood of extinction and/or reduced reproductive vigor from stochastic events. This proposal, if made final, would implement the Federal protection and recovery provisions provided by the Act. If made final, it would also implement State regulations protecting these plants as endangered species. Comments and materials related to this proposal are solicited.

DATES: Comments from all interested parties must be received by February 12, 1993. Public hearing requests must be received by January 28, 1993.

ADDRESSES: Comments and materials concerning this proposal should be sent to Robert P. Smith, Field Supervisor, Pacific Islands Office, U.S. Fish and Wildlife Service, 300 Ala Moana Boulevard, room 6307, P.O. Box 50167, Honolulu, Hawaii 96850. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Derral R. Herbst, at the above address (808/541-2749).

SUPPLEMENTARY INFORMATION:

Background

Cyanea grimesiana ssp. *obatae* and *Diellia unisora* are endemic to the Waianae Mountain Range on the western side of the island of Oahu, Hawaii. The only known extant population of *Gouania vitifolia* also occurs in the Waianae Mountains, but the species is known historically also from West Maui and the island of Hawaii.

The island of Oahu is formed from the remnants of two large shield volcanoes, the older Waianae Volcano on the west and the younger Koolau Volcano on the east. Because of the loss of their original shield volcano shape as the result of extensive erosion, today these volcanoes are called "mountains" or "ranges," and consist of long, narrow ridges. The Waianae Mountains were built by eruptions that took place primarily along three rift zones. The two principal rift zones run in a northwestward and south-southeastward direction from the summit, and a lesser one runs to the northeast. The range is approximately 40 miles (mi) (64 kilometers (km)) long. The caldera lies between the north side of Makaha Valley and the head of Nanakuli Valley (Macdonald *et al.* 1983). The Waianae Mountains are in the rain shadow of the parallel Koolau Mountains. Except for Mt. Kaala, the highest point on Oahu (4,020 feet (ft) (1,225 meters (m))), the Waianaes receive much less rainfall (Wagner *et al.* 1990). The median annual rainfall for the Waianae Mountains varies from 20 to 75 inches (in) (51 to 191 centimeters (cm)), with only the small summit area of Mt. Kaala receiving the highest amount.

The land that supports these three plant taxa is owned by the State of Hawaii, the Federal government, and a private estate. Plants on Federal land are located on portions of Schofield Barracks Military Reservation and Lualualei Naval Reservation, both under the jurisdiction of the U.S. Department of Defense.

Discussion of the Three Taxa Proposed for Listing

Harold St. John described *Cyanea grimesiana* ssp. *obatae* based upon a specimen collected by John K. Obata in the Kaluaa Gulch of the Waianae Mountains, Oahu, in 1965 (St. John 1978). St. John named the subspecies in honor of its discoverer.

Cyanea grimesiana ssp. *obatae*, a member of the bellflower family (Campanulaceae), is a shrub, usually unbranched, growing from 3.3 to 10.5 ft (1 to 3.2 m) tall. Its leaves are 10.5 to 23 in (27 to 58 cm) long by 5.5 to 12.5 in (14 to 32 cm) wide and are deeply cut into 9 to 12 lobes per side. The plant usually has small prickles on its stem and leaves. Clusters of 6 to 12 stalked flowers arise from the leaf axils. Sepals are fused to the ovary forming a cup 0.3 to 0.6 in (0.7 to 1.6 cm) long with small, narrow, triangular lobes at the tips. The petals are purplish or greenish to yellow-white, often washed or striped with magenta, and are about 2 to 3 in (5.5 to 8 cm) long and 0.2 to 0.4 in (0.5 to 1 cm) wide. Fruits are elliptical orange berries, 0.7 to 1.2 in (1.8 to 3 cm) long. This subspecies can be distinguished from the other two by its short, narrow, calyx lobes which are not fused or overlapping (Lammers 1990, St. John 1978).

Historically, *Cyanea grimesiana* ssp. *obatae* is known from the southern Waianae Mountains from Puu Hapapa to Kaaikukai (Hawaii Heritage Program (HHP) 1992a1 to 1992a6, Lammers 1990), a distance of about 4 mi (6.5 km). This taxon is known to be extant in Kaluaa, Ekahanui, and North Palawai Gulches, all on privately owned land, and on the slopes of Puu Hapapa in the Schofield Barracks Military Reservation (HHP 1992a2, 1992a5, 1992a6). The known extant plants total about 18 individuals in 4 populations (Joel Lau, HHP, pers. comm., 1992). *Cyanea grimesiana* ssp. *obatae* typically grows on steep, moist, shaded slopes in diverse mesic to wet forests at an elevation of 1,800 to 2,200 ft (550 to 670 m) (HHP 1992a2, Lammers 1990). Associated plants include both native and introduced species such as *Pipturus albidus* (mamaki), *Charpentiera* (papala), *Claoxylon sandwicense* (po'ola), *Pisonia* (papala kepau), *Acacia koa* (koa), *Aleurites moluccana* (kukui) and ferns (HHP 1992a2). The major threats to *Cyanea grimesiana* ssp. *obatae* are competition from alien plant species such as *Clidemia hirta* (Koster's curse) and *Schinus terebinthifolius* (Christmas berry) and stochastic extinction and/or reduced reproductive vigor due to the small number of extant individuals (HHP 1992a2). Habitat degradation by feral pigs is a potential threat (HHP 1992a2).

Donald L. Topping discovered *Diellia unisora* growing on a shaded, mossy bank in Pohakea Pass, Waianae Mountains, Oahu, in 1932. It was first reported and illustrated by Frances Smith (Smith 1934) who believed it to be a specimen of *Diellia pumila*, although she pointed out several differences between that species and the

Topping specimen. Warren H. Wagner, Jr., believing that the plant discovered by Topping merited specific recognition, described the new species, giving it the specific epithet *unisora* in reference to the usually single, marginal spore-producing body (Wagner 1951).

Diellia unisora, in the fern family Polypodiaceae, grows from a slender, erect rhizome (underground stem), 0.2 to 1.2 in (0.5 to 3 cm) tall and 0.2 to 0.4 in (0.4 to 1 cm) in diameter, which is covered with the bases of the leaf stalks and a few small black scales. Stalks of the fronds are black and shiny, and about 0.8 to 2 in (2 to 5 cm) long. The fronds are linear, 3 to 12 in (8 to 30 cm) tall by 0.2 to 1.2 in (0.5 to 3 cm) broad, with 20 to 35 pinnae (leaflets) per side, and gradually narrowing towards the apex. The pinnae are usually strongly asymmetrical in outline, unequally triangular, with mostly entire (smooth) margins. There usually is a single marginal sorus (the spore-producing body) running along the upper margin of the underside of the pinna. This species is distinguished from others in the genus by a rhizome completely covered by the persisting bases of the leaf stalks, and few, very small scales; by sori mostly confined to the upper pinnae margins; and by delicate fronds gradually and symmetrically narrowing toward the apex (Wagner 1951, 1952).

Historically, *Diellia unisora* was known from steep, grassy, rocky slopes on the western side of the Waianae Mountains, Oahu (HHP 1992b1 to 1992b4; Wagner 1951, 1952). This species is known to be extant in three areas of the southern Waianae Mountains: South Ekahanui Gulch, Palawai Gulch, and the Pualii-Napepeiauolelo Ridge (HHP 1992b2 to 1992b4). The 4 known populations, which are on Lualualei Naval Reservation and on privately owned land, are scattered over a distance of about 2 mi (3 km), and contain an estimated 700 individuals (HHP 1992b2 to 1992b4). *Diellia unisora* is a terrestrial fern which typically grows in deep shade or open understory in dryland forest at an elevation of 1,750 to 2,500 ft (530 to 760 m) (HHP 1992b2 to 1992b4). Associated species include koa, Christmas berry, *Psidium cattleianum* (strawberry guava), and *Metrosideros polymorpha* ('ohi'a), and a mixture of alien and native grasses, forbs, and shrubs (HHP 1992b2 to 1992b4). The major threat to *Diellia unisora* is competition from alien plant species (Christmas berry, *Melinus minutiflora* (molasses grass), *Passiflora suberosa* (huehue haole), and strawberry guava); habitat degradation by feral pigs is a potential threat (HHP 1992b2, 1992b4).

Gouania vitifolia was first collected "on dry hills, in the district of Waianai [Waianae]" during the U.S. Exploring Expedition in 1840. Asa Gray was given the task of preparing a report on all of the foreign plants collected by the expedition. Of the two volumes he produced concerning these specimens, only one was published, and in it *Gouania vitifolia* was described as a new species (Gray 1854). The species epithet was derived from the Latin *vitis*, a vine or grapevine, and *folium*, leaf, as the toothed leaves of this species resemble those of the grape. The Maui Island population of this species, first collected above Lahaina on West Maui by Edward F. Bishop, probably in the 1870s, was described and named *G. bishopii* in honor of its discoverer by William Hillebrand (Hillebrand 1888). In his monograph of the genus, St. John described *G. hawaiiensis* as a new species based upon a collection made in the Kau District of Hawaii Island in 1853 by Jules Remy (St. John 1969). Both of these taxa are currently considered synonyms of *Gouania vitifolia* (Wagner *et al.* 1990).

Gouania vitifolia, a member of the buckthorn family (Rhamnaceae), is a climbing shrub or woody vine with tendrils. Leaves are papery in texture with a moderate to dense covering of short, soft hairs on both surfaces. The leaves are elliptic to broadly oval in outline with toothed or lobed margins and 1.2 to 3.2 in (3 to 8 cm) long by 0.8 to 1.9 in (2 to 4.8 cm) wide. Flowers are arranged in axillary spikes 0.3 to 2.8 in (0.8 to 7 cm) long. The flowers are small with sepals and petals ranging from 0.03 to 0.04 in (0.7 to 1.1 millimeters (mm)) in length; both are white. The 2- or 3-winged fruit are about 0.4 in (9 to 10 mm) long. Seeds are oval, glossy, dark brown, and about 0.1 to 0.2 in (3.4 to 5 mm) long. This species is the only Hawaiian member of the genus with tendrils and toothed leaf margins (St. John 1969, Wagner *et al.* 1990).

Historically, *Gouania vitifolia* was known from West Maui; the Kau District of the island of Hawaii; and the northwestern portion of the Waianae Mountains in Makaleha, Keaau, and Waianae Kai Valleys (Degener and Greenwell 1947, HHP 1992c1 to 1992c5, St. John 1969, Wagner *et al.* 1990). A single population of five individuals was discovered in 1990 on the slopes of Waianae Kai Ridge on State-owned land (Anon. 1991, HHP 1992c5). Previously, the plant was believed extinct since it had not been observed since the 1930s. The five plants are close to one another, growing in a single patch in a forest of mostly naturalized, non-native species (HHP 1992c5), and may represent clones of a single individual (J. Lau, pers. comm., 1992). Information is scant, but data from herbarium labels indicate that *Gouania vitifolia* prefers dry, rocky ridges and slopes in dry shrubland or dry to mesic forests at an elevation of about 2,000 ft (610 m). Associated species include strawberry guava, kukui, Christmas berry, huehue haole, and mamaki (HHP 1992c5). The major threats to *Gouania vitifolia* are competition from alien plant species such as strawberry guava and Christmas berry; habitat destruction by feral pigs; and stochastic extinction and/or reduced reproductive vigor due to the small number of extant individuals, all of whom may be genetically identical (HHP 1992c5).

Previous Federal Action

Federal action on these plants began as a result of section 12 of the Act, which directed the Secretary of the Smithsonian Institution to prepare a report on plants considered to be endangered, threatened, or extinct in the United States. This report, designated as House Document No. 94–51, was presented to Congress on January 9, 1975. *Diellia unisora* was considered threatened and *Gouania vitifolia* was considered extinct in that document. On July 1, 1975, the Service published a notice in the **Federal Register** (40 FR 27823) of its acceptance of the Smithsonian report as a petition within the context of section 4(c)(2) (now section 4(b)(3)) of the Act, and giving notice of its intention to review the status of the plant taxa named therein. As a result of that review, on June 16, 1976, the Service published a proposed rule in the **Federal Register** (41 FR 24523) to determine endangered status pursuant to section 4 of the Act for approximately 1,700 vascular plant species. *Gouania vitifolia* was considered endangered in the proposed rule, but *Diellia unisora*, as a threatened species, was not included. The list of 1,700 plant taxa was assembled on the basis of comments and data received by the Smithsonian Institution and the Service in response to House Document No. 94–51 and the July 1, 1975, **Federal Register** publication.

General comments received in response to the 1976 proposal are summarized in an April 26, 1978, **Federal Register** publication (43 FR 17909). In 1978, amendments to the Act required that all proposals over 2 years old be withdrawn. A 1-year grace period was given to proposals already over 2 years old. On December 10, 1979, the Service published a notice in the

Federal Register (44 FR 70796) withdrawing the portion of the June 16, 1976, proposal that had not been made final, along with four other proposals that had expired. The Service published updated notices of review for plants on December 15, 1980 (45 FR 82479), September 27, 1985 (50 FR 39525), and February 21, 1990 (55 FR 6183). *Gouania vitifolia* was included as a Category 1* species on all three notices of review. Category 1* taxa are those for which the Service has on file substantial information on biological vulnerability and threats in the recent past, but which may have already become extinct. Because a population of *Gouania vitifolia* was discovered in 1990, it is proposed herein for listing. *Diellia unisora* was considered a Category 1 species on the 1980 and 1985 notices, but was changed to a Category 1* species on the 1990 notice. Category 1 taxa are those for which the Service has on file substantial information on biological vulnerability and threats to support preparation of listing proposals. With the rediscovery of *Diellia unisora* in 1991, this taxa was given high priority for listing and is thus included in this proposal. *Cyanea grimesiana* ssp. *obatae* first appeared on the 1990 notice, as a Category 2 taxon. Category 2 taxa are those for which there is some evidence of vulnerability, but for which there are not enough data to support listing proposals at the time. Additional recently acquired biological information supports listing of *Cyanea grimesiana* ssp. *obatae*.

Section 4(b)(3)(B) of the Act requires the Secretary to make findings on certain pending petitions within 12 months of their receipt. Section 2(b)(1) of the 1982 amendments further requires all petitions pending on October 13, 1982, be treated as having been newly submitted on that date. On October 13, 1983, the Service found that the petitioned listing of these taxa was warranted, but precluded by other pending listing actions, in accordance with section 4(b)(3)(B)(iii) of the Act; notification of this finding was published on January 20, 1984 (49 FR 2485). Such a finding requires the petition to be recycled, pursuant to section 4(b)(3)(C)(i) of the Act. The finding was reviewed in October of 1984, 1985, 1986, 1987, 1988, 1989, 1990, and 1991. Publication of the present proposal constitutes the final 1-year finding for these taxa.

Summary of Factors Affecting the Species

Section 4 of the Endangered Species Act (16 U.S.C. 1533) and regulations (50 CFR part 424) promulgated to implement the Act set forth the procedures for adding species to the Federal Lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Cyanea grimesiana* ssp. *obatae* St. John (haha), *Diellia unisora* W.H. Wagner (no common name (NCN)), and *Gouania vitifolia* A. Gray (NCN) are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of Its Habitat or Range

The habitats of the plants included in this proposed rule have undergone extreme alteration because of past and present land management practices, including deliberate alien plant and animal introductions, agricultural development, and military use (Frierson 1973, Wagner *et al.* 1985). Competition with alien plants and degradation of habitat by feral pigs are considered the greatest present threats to the three taxa being proposed.

All of the three plant taxa being proposed for listing are threatened by competition from one or more alien plant species. *Schinus terebinthifolius* (Christmas berry), an aggressive tree introduced to Hawaii before 1911 as an ornamental, has had particularly detrimental impacts (Cuddihy and Stone 1990). This fast-growing alien plant is able to form dense thickets, displacing other plants, and also may release a chemical that inhibits the growth of other species (Smith 1985). As early as the 1940s, Christmas berry had invaded the dry slopes of Oahu; it is now replacing the native vegetation of much of the southern Waianae Mountains (Cuddihy and Stone 1990). Christmas berry is gradually invading other areas of the Waianae Mountains as well, and now threatens to occupy the habitat of the three plant taxa being proposed (HHP 1992a2, 1992b2 to 1992b4, 1992c5).

Psidium cattleianum (strawberry guava), a pervasive alien tree in the southern Waianae Mountains, is distributed mainly by feral pigs and fruit-eating birds (Smith 1985). Like Christmas berry, strawberry guava is capable of forming dense stands to the exclusion of other plant species (Cuddihy and Stone 1990). Populations of *Diellia unisora* and *Gouania vitifolia* are immediately threatened by competition with this alien plant (HHP 1992b3, 1992c5).

Clidemia hirta (Koster's curse), a noxious shrub first cultivated in Wahiawa on Oahu, spread to the Koolau Mountains in the early 1960s, where it is now rapidly displacing native vegetation. Koster's curse spread to the Waianae Mountains around 1970 and is now widespread throughout Honouliuli (Cuddihy and Stone 1990, Culliney 1988). This species forms a dense understory, shading other plants and hindering plant regeneration. At present, Koster's curse is the major threat to *Cyanea grimesiana* ssp. *obatae* (HHP 1992a2).

The native vegetation of the leeward ridges of the Waianae Mountains is being replaced by *Melinis minutiflora* (molasses grass), another aggressive alien plant species. Molasses grass ranges from the dry lowlands to the lower wet forests, especially in open areas with sparse vegetation. This fire-adapted grass produces a dense mat capable of smothering plants, provides fuel for fires, and carries fires into areas with native woody plants (Cuddihy and Stone 1990). The population of *Diellia unisora* located on the leeward slopes of the Waianae Mountains is most vulnerable to molasses grass (HHP 1992b2, 1992b4).

Passiflora suberosa (huehue haole), a vine that smothers small plants in the subcanopy of dryland habitats (Smith 1985), poses an immediate threat to some populations of *Diellia unisora* (HHP 1992b2, 1992b3). With its major infestations in the Waianae Mountains, it is also a probable threat to the only known extant population of *Gouania vitifolia* (HHP 1992c5).

Feral pigs (*Sus scrofa*) have been in the Waianae Mountains for about 150 years and are known to be one of the major current modifiers of forest habitats (Stone 1985). Pigs damage the native vegetation by rooting and trampling the forest floor and encourage the expansion of alien plants that are better able to exploit the newly tilled soils than are native species (Stone 1985). Pigs also disseminate alien species through their feces and on their bodies, accelerating the spread of alien plant species within the native forest. Present throughout the Waianae Mountains in low numbers, feral pigs pose a potential threat as some pig trails and rooting have been seen in the general areas of all three plant taxa included in this proposed rule. The rooting was localized and no direct damage to any of the proposed plants was noted. However, this situation could change very quickly (HHP 1992a2, 1992b2, 1992b3, 1992c5).

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

Illegal collecting for scientific or horticultural purposes or excessive

visits by individuals interested in seeing rare plants could result from increased publicity. This is a potential threat to all of the proposed taxa, but especially to *Gouania vitifolia*, which is known from only 1 population of 5 individuals, and *Cyanea grimesiana* ssp. *obatae*, known from 4 populations totaling 18 individuals. Any collection of whole plants or reproductive parts of these two taxa would cause an adverse impact on the gene pool and threaten the survival of the taxon. Disturbance to the area by human trampling also could promote erosion and greater ingress by competing alien species.

C. Disease or Predation

There is no direct evidence that disease or predation threatens the three proposed taxa. However, rats (*Rattus* spp.) and feral goats (*Capra hircus*), as well as feral pigs, are known from the area and damage to fruits, seeds, and plants from their foraging on other species has been observed.

D. The Inadequacy of Existing Regulatory Mechanisms

Of the three proposed taxa, two have populations located on private land, one on State, and two on Federal land: *Cyanea grimesiana* ssp. *obatae* and *Diellia unisora* are known only from Federal and private lands; *Gouania vitifolia* is known only from State land. There are no State laws or existing regulatory mechanisms at the present time to protect or prevent further decline of these taxa on private land. None of the three proposed taxa are now listed by the State. However, Federal listing would automatically invoke listing under Hawaii State law, which prohibits taking of endangered plants in the State and encourages conservation by State agencies. State regulations prohibit the removal, destruction, or damage of plants found on State lands. However, the regulations are difficult to enforce because of limited personnel. Hawaii's Endangered Species Act (HRS, Sect. 195D–4(a)) states, "Any species of aquatic life, wildlife, or wild plant that has been determined to be an endangered species pursuant to the [Federal] Endangered Species Act shall be deemed to be an endangered species under the provisions of this chapter * * *." Further, the State may enter into agreements with Federal agencies to administer and manage any area required for the conservation, management, enhancement, or protection of endangered species (HRS, sect. 195D–5(c)). If listing were to occur, funds for these activities could be made available under section 6 of the Federal Act (State Cooperative Agreements). Listing of these three plant taxa would therefore reinforce and supplement the protection available to the taxa under State law. The Federal Act also would offer additional protection to these three taxa because, if they were to be listed as endangered, it would be a violation of the Act for any person to remove, cut, dig up, damage, or destroy any such plant in an area not under Federal jurisdiction in knowing violation of State law or regulation or in the course of any violation of a State criminal trespass law.

E. Other Natural or Manmade Factors Affecting Its Continued Existence

The small number of populations and individuals of all of these taxa increases the potential for extinction from stochastic events. The limited gene pool may depress reproductive vigor, or a single human-caused or natural environmental disturbance could destroy a significant percentage of the individuals or the only known extant population. *Gouania vitifolia* is known from a single population of five individuals. The other 2 proposed taxa are known from only 4 populations, totaling 18 individuals of *Cyanea grimesiana* ssp. *obatae* and 700 individuals of *Diellia unisora*.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by these taxa in determining to propose this rule. Based on this evaluation, the preferred action is to list these three plant taxa as endangered. These taxa either number no more than about 20 individuals or are known from fewer than 5 populations. The three taxa are threatened by one or more of the following: Habitat degradation and competition from alien plants; habitat degradation and potential predation by feral animals, particularly pigs; and lack of legal protection or difficulty in enforcing laws which are already in effect. Small population size and limited distribution make these taxa particularly vulnerable to extinction and/or reduced reproductive vigor from stochastic events. Because these three taxa are in danger of extinction throughout all or a significant portion of their ranges, they fit the definition of endangered as defined in the Act.

Critical habitat is not being proposed for the three taxa included in this proposed rule, for reasons discussed in the "Critical Habitat" section of this proposal.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that, to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time a species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not presently prudent for these taxa. Such a determination would result in no known benefit to the taxa. The publication of precise maps and descriptions of critical habitat in the **Federal Register** and local newspapers as required in a proposal for critical habitat would increase the degree of threat to these plants from take or vandalism and, therefore, could contribute to their decline and increase enforcement problems. The listing of these taxa as endangered publicizes the rarity of the plants and, thus, can make these plants attractive to researchers, curiosity seekers, or collectors of rare plants. All involved parties and the major landowner have been notified of the general location and importance of protecting the habitat of these taxa. Protection of the habitat of the taxa will be addressed through the recovery process and through the section 7 consultation process. Two of these taxa are located on federally owned military reservations, but both are on steep slopes near the reservation boundaries where they are unlikely to be impacted by Federal activities. Therefore, the Service finds that designation of critical habitat for these taxa is not prudent at this time, because such designation would increase the degree of threat from vandalism, collecting, or other human activities and because it is unlikely to aid in the conservation of these taxa.

Available Conservation Measures

Conservation measures provided to species listed as endangered under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain activities. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the State and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibitions against certain activities involving listed plants are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency

cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) of the Act requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to insure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. Two of these plant taxa are located on the Lualualei Naval Reservation or Schofield Barracks Military Reservation, both under the jurisdiction of the U.S. Department of Defense. There are no other known Federal activities that occur within the present known habitat of these three plant taxa.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 for endangered plants set forth a series of general prohibitions and exceptions that apply to all endangered plant species. With respect to the three plant taxa proposed to be listed as endangered, all trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, would apply. These prohibitions, in part, make it illegal with respect to any endangered plant for any person subject to the jurisdiction of the United States to import or export; transport in interstate or foreign commerce in the course of a commercial activity; sell or offer for sale in interstate or foreign commerce; remove and reduce to possession any such species from areas under Federal jurisdiction; maliciously damage or destroy any such species on any area under Federal jurisdiction; or remove, cut, dig up, damage, or destroy any such species on any other area in knowing violation of any State law or regulation or in the course of any violation of a State criminal trespass law. Certain exceptions apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered plant species under certain circumstances. It is anticipated that few trade permits would ever be sought or issued because the plants are not common in cultivation nor in the wild.

Requests for copies of the regulations concerning listed plants and inquiries regarding prohibitions and permits may be addressed to the Office of Management Authority, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203–3507 (703/358–2104; FAX 703/358–2281).

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning this proposed rule are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to these taxa;

(2) The location of any additional populations of these taxa and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range, distribution, and population size of these taxa; and

(4) Current or planned activities in the subject area and their possible impacts on these taxa.

The final decision on this proposal will take into consideration the comments and any additional information received by the Service, and such communications may lead to a final regulation that differs from this proposal.

The Endangered Species Act provides for at least one public hearing on this proposal, if requested. Hearing requests must be received within 45 days of the date of publication of the proposal. Such requests must be made in writing and addressed to the Field Supervisor (see **ADDRESSES** section).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment or Environmental Impact Statement, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Proposed Regulations Promulgation

PART 17—[AMENDED]

Accordingly, it is hereby proposed to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500; unless otherwise noted.

2. It is proposed to amend § 17.12(h) by adding the following, in alphabetical order under the families indicated, and by adding a new family "Polypodiaceae—Fern family," in alphabetical order to the List of Endangered and Threatened Plants:

§ 17.12 Endangered and threatened plants.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 672 and 675

[Docket No. 921108-2308]

Groundfish Fishery of the Gulf of Alaska, and Groundfish Fishery of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes regulations that would establish two trawl test areas in the Gulf of Alaska (GOA) and one trawl test area in the Bering Sea and Aleutian Islands (BSAI) area where pelagic and bottom trawl fishermen could test their trawl fishing gear when the GOA or BSAI would otherwise be closed to trawling. Establishment of these test areas would allow vessel operators the opportunity to test their trawl gear before a season opens so that they could begin fishing efficiently at the beginning of a season. This would reduce lost fishing time from gear problems, and would promote the goals and objectives of the North Pacific Fishery Management Council (Council) with respect to groundfish management off Alaska. Authority to establish test areas is contained in Amendment 27 to the Fishery Management Plan (FMP) for Groundfish of the GOA and in Amendment 22 to the FMP for the Groundfish Fishery of the BSAI Area. These amendments were submitted to the Secretary of Commerce (Secretary) by the Council and are pending the Secretary's review and approval.

DATE: Comments are invited until January 8, 1993.

ADDRESS: Comments may be sent to Ronald J. Berg, Chief, Fisheries Management Division, Alaska Region, National Marine Fisheries Service, P.O. Box 21668, Juneau, AK 99802. Individual copies of proposed Amendments 22 and 27 and the environmental assessment/regulatory impact review/initial regulatory flexibility analysis (EA/RIR/IRFA) may be obtained from the Council, P.O. Box 103136, Anchorage, AK 99510. Comments on the environmental assessment are particularly requested.

FOR FURTHER INFORMATION CONTACT: David C. Ham, Fisheries Management Biologist, NMFS, (907) 586-7229.

SUPPLEMENTARY INFORMATION:

Background

The domestic and foreign groundfish fisheries in the exclusive economic zone of the GOA and BSAI are managed by the Secretary under the FMP for Groundfish of the GOA and the FMP for the Groundfish of the BSAI area. These FMPs were prepared by the Council under the Magnuson Fishery Conservation and Management Act (Magnuson Act) and are implemented by regulations for the foreign fishery at 50 CFR part 611 and for the U.S. fishery at 50 CFR parts 672 and 675, respectively. General regulations that also pertain to the U.S. fishery appear at 50 CFR part 620.

Amendment 27 to the GOA FMP and Amendment 22 to the BSAI FMP were recommended to the Secretary by the Council at its January 13-18, 1992, meeting, and are under Secretarial review. A notice of availability of the amendments was published on September 25, 1992 (57 FR 44355). If approved by the Secretary, these amendments would provide NMFS with the authority to establish trawl test areas. This rule proposes to establish two areas in the GOA and one area in the BSAI area where pelagic and bottom trawl fishermen could test their trawl fishing gear when the GOA or BSAI is otherwise closed to trawling. Establishment of these test areas would allow vessel operators to test their gear before a season opens and begin fishing efficiently at the beginning of a season, reducing lost fishing time from gear problems.

Until recently, the GOA and BSAI have been open to trawling for most of the year, and fishermen were able to test trawl gear in preparation for a season opening. However, in 1992, new regulations (57 FR 382, January 6, 1992) delayed the opening of the trawl season in the GOA and BSAI from January 1 until January 20. A similar delay of the GOA and BSAI trawl fisheries until January 20 is in effect for 1993 and beyond (57 FR 43926, September 23, 1992) to reduce bycatch rates of chinook salmon and Pacific halibut. Therefore, from January 1 until January 20 of each year, trawl gear may not be deployed in the GOA and BSAI, and fishermen will be unable to test their trawl gear before the trawl season opening.

Fishing with trawl gear is also prohibited at other times of the year in the GOA. If a quarterly allocation of halibut bycatch for trawl gear is taken, non-pelagic trawling is prohibited for the remainder of that quarter. This would prohibit fishermen from testing their bottom trawl gear before the next bottom trawling season begins.

There are several reasons for fishermen to test trawl gear before season openings. Fisheries are closing earlier because increasingly larger fleets are harvesting the total allowable catch (TAC) more quickly. The establishment of trawl test areas would enable fishermen to test their gear and begin fishing efficiently at the beginning of a season, reducing lost fishing time that might result from gear problems. In a similar trawl test program, the State of Washington allows vessels to use State waters in Puget Sound for trawl gear testing.

If approved, Amendments 27 and 22 would provide the Secretary with the authority to establish gear test areas, with no specific reference to a particular gear type. With this authority, the Secretary could implement any future gear test areas for any gear type by regulatory amendment, without amending the FMP. The amendments also include the following five criteria with which any geat test area must comply.

1. Depth and bottom type must be suitable for testing the particular gear type.

2. The areas must be outside State waters.

3. The areas must be in locations not normally closed to fishing with that gear type.

4. The areas must be in locations that are not usually fished heavily by that gear type.

5. The areas must not be within a designated Steller sea lion protection area at any time of the year.

This proposed rule would establish three trawl test areas (see Figure 1) bounded by straight lines connecting the following coordinates in the order listed:

GULF OF ALASKA—KODIAK

W. longitude	N. latitude
152° 02′	57° 37′
151° 25′	57° 37′
151° 25′	57° 23′
152° 02′	57° 23′
152° 02′	57° 37′

GULF OF ALASKA—SAND POINT

W. longitude	N. latitude
161° 00′	54° 50′
160° 30′	54° 50′
160° 30′	54° 35′
161° 00′	54° 35′
161° 00′	54° 50′

BERING SEA

W. longitude	N. latitude
167° 00′	55° 00′
166° 00′	55° 00′
166° 00′	54° 40′
167° 00′	54° 40′
167° 00′	55° 00′

Fishermen would be able to test trawl gear in these areas at times when trawling would otherwise be prohibited in those management areas under the following conditions:

(1) The cod end shall be left unzipped so that the trawl gear will not retain fish;

(2) Groundfish may not be on board; and

(3) The time vessels spend trawl gear testing in these three areas will not contribute towards observer coverage requirements, and the placement of observers on board these vessels will be at the discretion of the Regional Director.

Criteria for Gear Test Areas

The following explains how the three proposed trawl test areas comply with the criteria:

(1) Depth and bottom type must be suitable for testing pelagic and bottom trawl nets.

The Kodiak area has depths ranging from approximately 30–80 fathoms, the Sand Point area from 50–65 fathoms, and the Bering Sea area from 70–160 fathoms. These depths are suitable for bottom and pelagic trawling, and the bottom type is suitable for bottom trawling. Therefore, these test areas should be acceptable testing grounds for bottom and pelagic trawl gear. Each of these trawl test areas was chosen with the advice and assistance of trawl industry representatives.

(2) The areas must be outside Alaska State waters.

All of the trawl test areas are outside State waters.

(3) The areas must be in locations that are not usually heavily fished by trawling.

None of the three test areas is known to be an area of high trawl catch for groundfish.

(4) The areas must be in locations not normally closed to trawling.

None of the trawl test areas is in an area that is normally closed to trawling at any time of the year. However, the Bering Sea test area is entirely within the summer Herring Savings Area 2 (HSA 2). Herring Savings Area 2 regulations require that the attainment of a trawl bycatch allowance for herring would close the HSA 2 for the period from July 1 to August 15. NMFS believes that the Bering Sea test area would be required only from January 1 to January 20 before the trawl season opens. Because trawl bycatch amounts of herring are insignificant in the HSA 2 during January, conflicts should not result from having a trawl test area in HSA 2.

(5) The trawl test area must not be within a designated Steller sea lion protection area at any time of the year.

None of the three test areas is within a designated Steller sea lion protection area at any time of the year.

At the January 1992 Council meeting, the Council's Scientific and Statistical Committee (SSC) and Advisory Panel (AP) recommended that several issues of concern be addressed before the proposed FMP amendments and this proposed rule are published in the **Federal Register**. The following are responses to the SSC's and AP's concerns about the implementation of these trawl test areas:

(1) Species to be encountered in trawl test areas.

From the GOA and BSAI Stock Assessment and Fishery Evaluation Reports for 1992, the species that are likely to be encountered in these test areas are:

Kodiak and Sand Point Areas—walleye pollock, Pacific cod, flatfish, sablefish, rockfish, halibut, salmon, crab and other species.

Bering Sea Area—walleye pollock, Pacific cod, halibut, greenland turbot, arrowtooth flounder, sablefish, Pacific ocean perch, atka mackerel, and small amounts of rock sole, other flatfish, squid, and other species.

(2) Accessibility of these areas to fishermen.

Vessels fishing in the Gulf of Alaska could use the Kodiak and Sand Point test areas. Vessels fishing in the Bering Sea are primarily based in Dutch Harbor and Akutan, making the Bering Sea test area most convenient for testing. These test areas have been positioned to provide the best access to a test area by the majority of trawl vessels, and were chosen with input and consultation with the trawl fishing industry.

(3) The trawl test area should not be larger than is necessary to test the gear.

Kodiak Area—The approximate size for this area is 14 nautical miles (nm) by 18 nm, or 252 square nm. This is approximately the minimum size needed for a test area to allow vessels enough straight line distance and room to maneuver. For example, if a vessel is moving through a test area and begins gear testing at a normal trawling speed of 3–4 knots, the vessel could move in the same direction for about 4 hours. This should be enough time to solve most gear problems. Also, making the area nearly square provides room for vessel operators to use the test area without interfering with each other. This is important because vessels working on gear problems are less able to maneuver.

Sand Point Area—This area is approximately 15 nm by 15 nm, or 225 square nm, about the same size as the Kodiak area.

Bering Sea Area—This area is approximately 20 nm by 30 nm, or 600 square nm. This area is larger than the other two areas, because vessels that operate in the BSAI are larger. These larger vessels tow larger nets and are less capable of maneuvering because of their size. These factors contribute to the need for a larger area in the BSAI.

(4) Enforcement requirements for trawl test areas. Check in/check out or notification of trawl test area use may be required in the future to aid enforcement.

(5) *Trawl testing and crab opening conflicts.*

Crab fishing with pot gear and halibut fishing with hook and line gear are classified as stationary gear. Sometimes, movable gear such as trawl gear can conflict with stationary gear if both gear types are used on the same fishing grounds. If pot or hook and line gear is especially abundant, for example on a season opening for these gear types, it may be difficult for trawlers to avoid the stationary gear in the trawl test areas, resulting in conflict between stationary and movable gear types. In 1991, the King crab openings in the two GOA test areas were on September 25. Conflicts could have resulted in the GOA test areas if heavy use of the test areas occurred at the end of the third quarter due to a prohibition on trawling from exhausting the third quarter halibut PSC bycatch allocation. NMFS does not believe that trawl testing during these times of potential conflict will create a burden for the king crab fisheries; however, NMFS may implement time/area closures for trawl testing if public comments show that significant gear conflicts would occur.

For 1991, the Tanner crab opening for all three areas occurred on January 15. Trawl testing would be required from January 1 to January 20 when trawling is prohibited in the GOA and BSAI. Therefore, heavy use of the trawl test areas could potentially conflict with the Tanner crab opening on January 15. Conflicts are not expected to occur to a great extent in the Bering Sea or the Sand Point test areas because few crab resources exist there. Crab resources in the Kodiak area are abundant, and the potential exists for conflict. NMFS does not believe that trawl testing during

these times of potential conflict will create a burden for the Tanner crab fisheries; however, NMFS may implement time/area closures for trawl testing if public comments show that significant gear conflicts would occur.

(6) *Trawl testing and halibut opening conflicts.*

The Bering Sea test area falls within the International Pacific Halibut Commission (IPHC) fishing area 4A. For 1992, area 4A halibut fishing periods are from June 8 to June 9, from August 6 to announced closure, and from September 22 to announced closure. Trawl testing should not conflict with the halibut opening in the Bering Sea area, because the time of year that the Bering Sea trawl test area would normally be used would be from January 1 to January 20, when fishing with trawl gear in the BSAI is prohibited.

The Sand Point test area is in the IPHC area 3B, where the 1992 halibut fishing periods will be from June 8 to June 9, from September 7 to September 8, and from October 5 to announced closure. The Gulf of Alaska is closed to trawling from January 1 to January 20, and possibly near the end of each quarter if the quarterly allocation of halibut bycatch is exhausted. Halibut openings from June 8 to June 9 and September 7 to September 8 are near the end of the second and third quarters, respectively, so it is possible that the halibut bycatch for the trawl fleet would be taken and trawling would be prohibited resulting in use of the trawl test areas, thereby conflicting with the area 3B halibut opening. NMFS does not believe that trawl testing during these times of potential conflict will create a burden for the Pacific halibut fisheries; however, NMFS may implement time/area closures for trawl testing if public comments show that significant gear conflicts would occur.

The Kodiak test area is in IPHC area 3A, and has the same 1992 halibut fishing periods as the Sand Point area. The Kodiak test area is in the same situation with regard to conflicts with halibut openings as the Sand Point area in the above paragraph. NMFS does not believe that trawl testing during these times of potential conflict will create a burden for the Pacific halibut fisheries; however, NMFS may implement time/area closures for trawl testing if public comments show that significant gear conflicts would occur.

Classification

The Council prepared an environmental assessment (EA) for the FMP amendments and this proposed rule that discusses the impact on the environment as a result of this rule. A copy of the EA may be obtained from the Council (see **ADDRESSES**) and comments on it are requested.

The Assistant Administrator for Fisheries, NOAA (Assistant Administrator), initially determined that this proposed rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291. This determination is based on the RIR prepared for this proposed rule. This proposed rule, if adopted, is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or a significant adverse effect on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Council prepared an initial regulatory flexibility analysis as part of the regulatory impact review which concludes that this proposed rule, if adopted, would have significant effects on small entities. More than 2,000 vessels may fish for groundfish off Alaska in 1992 and future years. This proposed rule is expected to have positive economic effects by allowing vessel operators to test their gear and have it in operating condition for the beginning of the trawl season. This opportunity is expected to improve fishing efficiency and reduce costs resulting from lost time due to inoperative fishing gear during the season. A copy of this analysis is available from the Council (see **ADDRESSES**).

NMFS has determined that none of the management measures proposed under this rule would adversely affect endangered or threatened species. Therefore, formal consultation pursuant to section 7 of the Endangered Species Act is not required for the adoption of these FMP amendments or their implementing rules.

This proposed rule does not contain a collection of information requirement for purposes of the Paperwork Reduction Act.

The Council determined that this rule, if adopted, will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal management program of the State of Alaska. This determination has been submitted for review by the responsible State agencies under section 307 of the Coastal Zone Management Act.

This proposed rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under Executive Order 12612.

List of Subjects in 50 CFR Parts 672 and 675

Fisheries, Fishing vessels.

Dated: December 8, 1992.

Samuel W. McKeen,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Note Fig. 1 will not appear in the Code of Federal Regulations

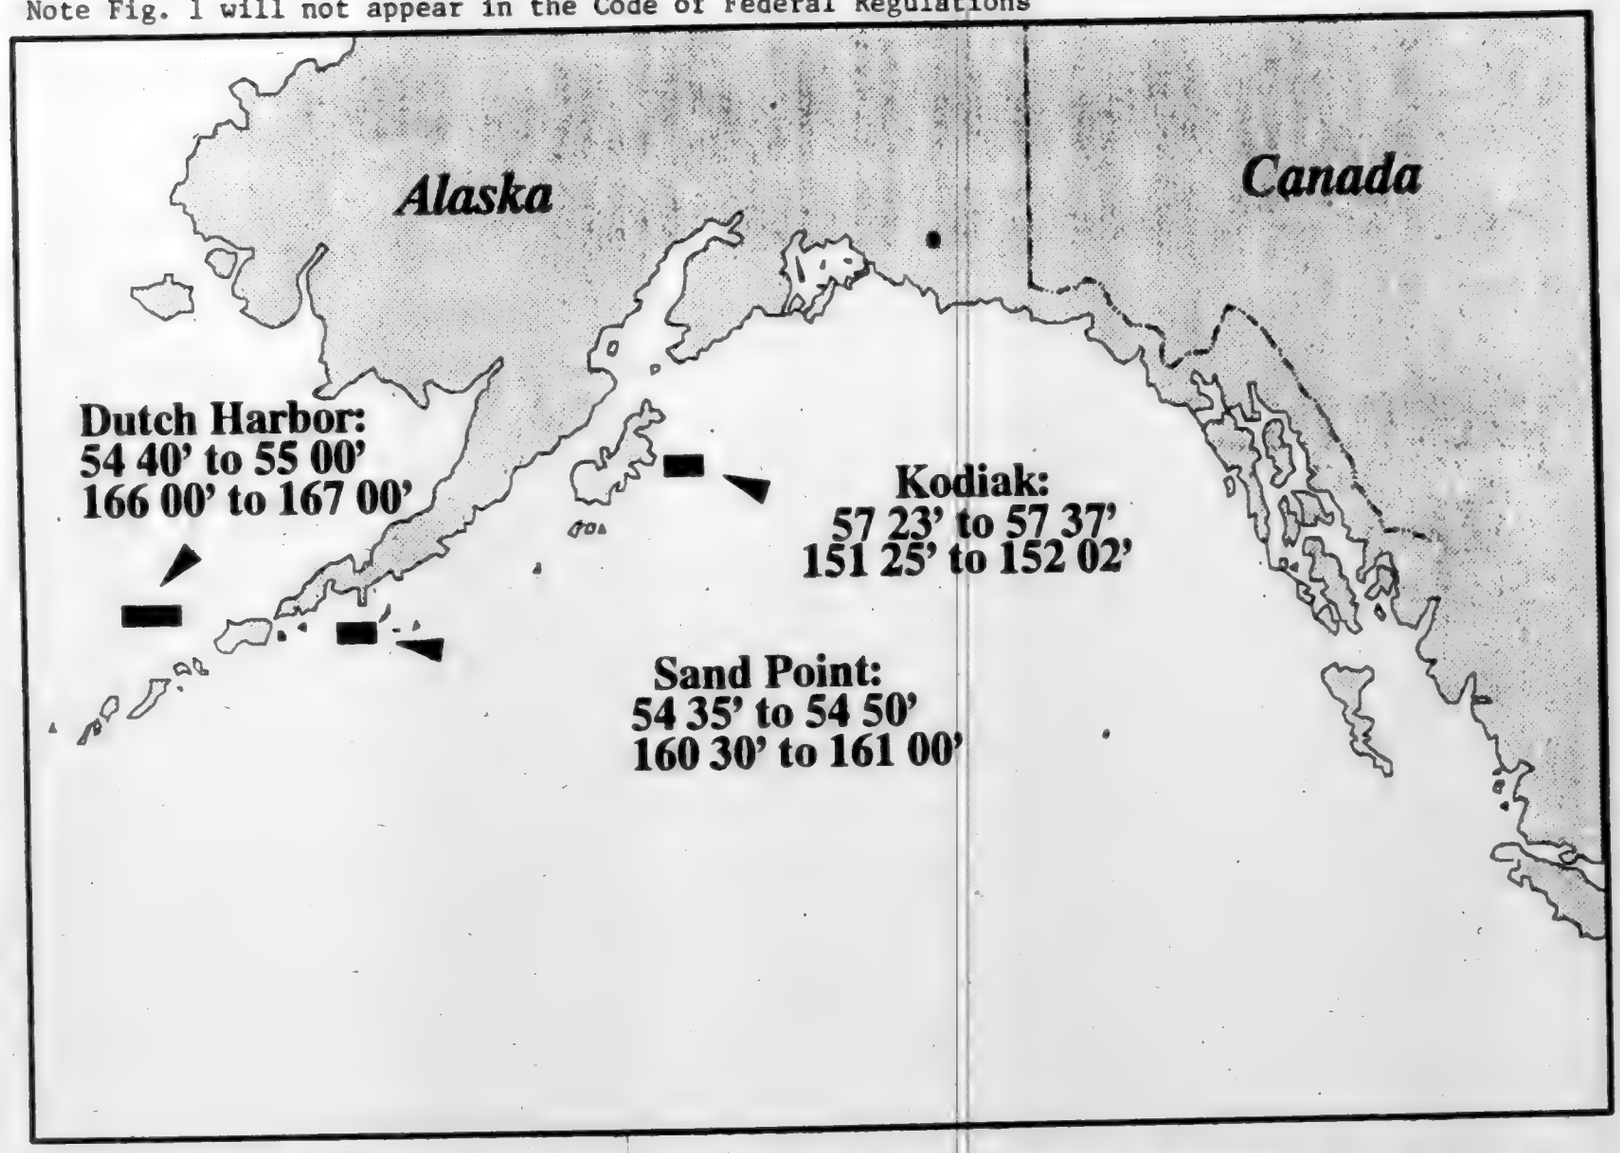

FIG 1 - LOCATION OF PROPOSED TRAWL TEST AREAS IN THE GULF OF ALASKA AND BERING SEA

BILLING CODE 3510-22-C

For the reasons set out in the preamble, 50 CFR parts 672 and 675 are proposed to be amended as follows:

PART 672—GROUNDFISH OF THE GULF OF ALASKA

1. The authority citation for part 672 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 672.24, paragraph (f) is added to read as follows:

§ 672.24 Gear limitations.

* * * * *

(f) *Trawl Gear Test Areas.* (1) *General.* For purposes of allowing pelagic and bottom trawl fishermen to test trawl fishing gear, NMFS may establish, after consulting with the Council, locations for the testing of trawl fishing gear in areas that would otherwise be closed to trawling.

(2) For the purposes of this section, "trawl gear testing" means deploying trawl gear in areas designated in this paragraph under the following conditions:

(i) The cod end shall be unzipped while trawl gear testing;

(ii) Groundfish shall not be possessed on board when trawl gear testing; and

(iii) Observers on board vessels during the time spent trawl gear testing shall not fulfill observer requirements at § 672.27.

(3) The establishment of test areas must comply with the following five criteria:

(i) Depth and bottom type must be suitable for testing the particular gear type.

(ii) The areas must be outside State waters.

(iii) The areas must be in locations not normally closed to fishing with that gear type.

(iv) The areas must be in locations that are not usually fished heavily by that gear type.

(v) The areas must not be within a designated Steller sea lion protection area at any time of the year .

(4) *Kodiak Test Area.* Trawl gear testing is allowed in an area bounded by straight lines connecting the following coordinates in the order listed at times when fishing with trawl gear is prohibited in statistical area 63 as defined in § 672.2:

W. longitude	N. latitude
152° 02′	57° 37′
151° 25′	57° 37′
151° 25′	57° 23′
152° 02′	57° 23′
152° 02′	57° 37′

(5) *Sand Point Test Area.* Trawl gear testing is allowed in an area bounded by straight lines connecting the following coordinates in the order listed at times when fishing with trawl gear is prohibited in statistical area 61 as defined in § 672.2:

W. longitude	N. latitude
161° 00′	54° 50′
160° 30′	54° 50′
160° 30′	54° 35′
161° 00′	54° 35′
161° 00′	54° 50′

PART 675—GROUNDFISH OF THE BERING SEA AND ALEUTIAN ISLANDS AREA

3. The authority citation for part 675 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

4. In § 675.24, paragraph (g) is added to read as follows:

§ 675.24 Gear limitations.

* * * * *

(g) *Trawl Gear Test Areas.* (1) *General.* For purposes of allowing pelagaic and bottom trawl fishermen to test trawl fishing gear, NMFS may establish, after consulting with the Council, locations for the testing of trawl fishing gear in areas that would otherwise be closed to trawling.

(2) For the purposes of this section, "trawl gear testing" means deploying trawl gear in areas designated in this paragraph under the following conditions:

(i) The cod end shall be unzipped while trawl gear testing;

(ii) Groundfish shall not be possessed on board when trawl gear testing; and

(iii) Observers on board vessels during the time spent trawl gear testing shall not fulfill observer requirements at § 672.27 of this part.

(3) The establishment of test areas must comply with the following five criteria:

(i) Depth and bottom type must be suitable for testing the particular gear type.

(ii) The areas must be outside State waters.

(iii) The areas must be in locations not normally closed to fishing with that gear type.

(iv) The areas must be in locations that are not usually fished heavily by that gear type.

(v) The areas must not be within a designated Steller sea lion protection area at any time of the year.

(4) *Bering Sea Test Area.* Trawl gear testing is allowed in an area bounded by straight lines connecting the following coordinates in the order listed at times when fishing with trawl gear is prohibited in the Bering Sea and Aleutian Islands Management Area as defined in § 675.2:

W. longitude	N. latitude
167° 00′	55° 00′
166° 00′	55° 00′
166° 00′	54° 40′
167° 00′	54° 40′
167° 00′	55° 00′

Notices

Federal Register
Vol. 57, No. 240
Monday, December 14, 1992

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Research Service

Government Owned Inventions Available for Licensing

AGENCY: Agricultural Research Service, USDA.

ACTION: Notice of government owned inventions available for licensing.

SUMMARY: The inventions listed below are owned by the U.S. Government as represented by the Department of Agriculture, and are available for licensing in accordance with 35 U.S.C. 207 and 37 CFR 404 to achieve expeditious commercialization of results of federally funded research and development. Foreign patents are filed on selected inventions to extend market coverage for U.S. companies and may also be available for licensing.

FOR FURTHER INFORMATION CONTACT: Technical and licensing information on these inventions may be obtained by writing to: M. Ann Whitehead, Patent Coordinator, USDA, ARS, room 403, Bldg. 005, BARC–West, Beltsville, Maryland 20705; (301) 504–6786 or Fax (301) 504–5060. All patent applications may be purchased, specifying the serial number listed below, by writing NTIS, 5285 Port Royal Road, Springfield, Virginia, 22161; NTIS Sales Desk (703) 487–4650. Issued patents may be obtained from the Commission of Patents, U.S. Patent and Trademark Office, Washington, DC 20231.

SUPPLEMENTARY INFORMATION: The inventions available for licensing are:

7–519,197 (U.S. 5,122,188) Vegetable Oil-Based Printing Ink.
7–912,447 Campy-Cefex Selective and Differential Medium for *Campylobacter.*
7–921,173 Probiotic for Control of Salmonella.
7–936,423 Portable Intron as an Insertion Vector for Gene Insertion.
7–937,634 Oxidative Bleaching of Wood Pulp by Vanadium-Substituted Polyoxometallates.
7–937,764 Fungus-Bioregulator Composition and Methods for Control of Plant Parasitic Nematodes.
7–939,764 Compost Toilet Mixing Tool.
7–965,308 A Stable Beverage Clouding Agent Prepared from Isolated Soy Protein.

M. Ann Whitehead,
National Patent Coordinator.

Food Safety and Inspection Service

[Docket No. 92–028N]

Congressionally-Mandated Exemption Studies

AGENCY: The Food Safety and Inspection Service, USDA.

ACTION: Notice of study commencement; request for public participation.

SUMMARY: The Food Safety and Inspection Service has commenced two exemption studies pursuant to a congressional mandate. The first study will examine present and future exemptions from Federal inspection requirements for specified products; the second will consider the appropriateness of exempting from inspection certain types of wholesale meat and poultry processing. These reports will be submitted to Congress on or before December 13, 1993. Public participation in the form of written comments is encouraged.

DATES: Written comments should be submitted by mail or FAX on or before: February 12, 1993.

ADDRESSES: Written comments to: Policy Office, Attn: Linda Carey, FSIS Hearing Clerk, room 3171, South Building, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250.

FOR FURTHER INFORMATION CONTACT: Dr. Jane R. Roth, Director, Policy Analysis Unit, Policy Evaluation and Planning Staff, FSIS, U.S. Department of Agriculture, Washington, DC 20250, (202) 720–6735 or FAX (202) 690–1030.

SUPPLEMENTARY INFORMATION:

Public Participation

All parties with an interest in the issues these studies raise are invited to submit written comments explaining their position and, where appropriate, make recommendations for consideration by this Agency. In particular, FSIS is interested in potential economic impacts and health-related scientific criteria that should be evaluated during the conduct of these exemption studies. Written comments should refer to docket number 92–028N. All comments submitted in response to this notice will be available for public inspection in the Policy Office from 9 a.m. to 4 p.m., Monday through Friday.

Background

The Food, Agriculture, Conservation, and Trade Act Amendments of 1991 (section 1016, Pub. L. 101–237; approved December 13, 1991) amended the Federal Meat Inspection Act (FMIA) and the Poultry Products Inspection Act (PPIA) and commissioned two studies. The first is referred to as the "Product Exemption Study." The second is referred to as the "Wholesale Exemption Study." Study requirements as set forth in the amendments are as follows:

Product Exemption Study

"A study to develop criteria for, and evaluate, present and future inspection exemptions for meat food products and poultry products under the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*) and the Poultry Products Inspection Act (21 U.S.C. 451 *et seq.*), respectively, which shall examine the potential effect on consumers, on the affected industries, on public health and food safety, on the role of the Department of Agriculture, and the scientific basis for the exemptions."

Wholesale Exemption Study

"A study of the appropriateness of granting an exemption from the requirements of the Federal Meat Inspection Act or the Poultry Products Inspection Act, as appropriate, for wholesale meat outlets selling to hotels, restaurants, or other similar institutional users, provided that the processing of meat by the outlets is limited to cutting, slicing, grinding, or repackaging into smaller quantities."

Commencement of the Studies

Work on these studies has begun. They are being conducted concurrently. FSIS will consult with the National Academy of Sciences before finalizing study results. Reports of the studies will

be provided to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate not later than December 13, 1993.

Done at Washington, DC, on December 8, 1992.

H. Russell Cross,

Administrator, Food Safety and Inspection Service.

BILLING CODE 3410-DM-M

Forest Service

Exemption of Basin Salvage Timber Sale From Appeal, Okanogan National Forest, WA

AGENCY: Forest Service, USDA

ACTION: Notice to exempt decisions from administrative appeal.

SUMAMRY: This is a notification that the decision to implement the Basin Salvage Timber Sale at the base of Mt. Annie on the Okanogan National Forest is exempted from appeal. This is in conformance with provisions of 36 CFR 217.4(a)(11) as published in the **Federal Register** on January 23, 1989 (54 FR 3342).

EFFECTIVE DATE: December 14, 1992.

FURTHER INFORMATION CONTACT: Elaine Zieroth, District Ranger, Tonasket Ranger District, Okanogan National Forest, 1 West Winesap, Tonasket, Washington 98855, Phone (509) 486–2186.

SUPPLEMENTARY INFORMATION: The Basin Salvage Area consists of 168 acres of primarily lodgepole pine with intermixed western larch and Douglas-fir. A population of mountain pine beetles have been present in the area for the past two to three years as evidenced by the past mortality which is present in patches throughout. It appears, that as the lodgepole pine in the area grow to a larger diameter, the population of beetles has been expanding taking advantage of the more favorable, larger diameter trees. In June-October 1992, an interdisciplinary team (IDT) analyzed the infested area to assess the current and potential damage to the resources that had or may occur. The IDT observed that conditions throughout the analysis area are very favorable to the continued expansion of the beetle population. The trend observed appeared to show that in the past three years the population has expanded almost exponentially in numbers and area and seemed to be reaching a critical level.

The IDT identified the need to salvage the timber which has already died and to use an integrated pest management (IPM) process in order to reduce losses from the mountain pine beetle to a tolerable level. Logging before the beetle completes another life cycle and the existing brood, which is over-wintering in the stems of currently dead trees, emerges will minimize attacks on currently healthy trees. This "preventive" IPM system is the best approach to limiting the mountain pine beetle population expansion because the techniques are more effective, economical, environmentally acceptable, and compatible with management for other forest resources.

The IDT developed different alternatives to analyze the effects of no action and implementation of possible salvage opportunities. The effects of these alternatives are disclosed in an environmental assessment which was prepared for the proposal. The Proposed Action (Alternative 2) would implement stocking reductions over approximately 168 acres of land heavily infected and at an extreme high risk of further infection. This harvest would produce about 1.9 million board feet (MMBF) of merchantable volume for local markets. Approximately .57 miles of logging roads would be constructed in order to access the area and then obliterated after log haul and harvest use.

The sale and accompanying work is designed to accomplish the objectives as quickly as possible, limit the amount of merchantable salvage volume lost to mortality, to minimize the population growth of the mountain pine beetle, and to reduce the impacts that any further expansion of this population would have to the surrounding area and affected forest resources. To expedite this sale project and the accompanying work, this project is exempted from appeals (36 CFR 217). Under this Regulation, the following is exempt from appeal.

Decisions related to the rehabilitation of National Forest System lands and recovery of forest resources resulting from natural disasters or other natural phenomena, such as wildfires * * * when the Regional Forester * * * determines and gives notice in the **Federal Register** that good cause exists to exempt such decisions from review under this part.

After publication of this notice in the **Federal Register**, this Decision Notice for the Basin Salvage Timber Sale may be signed by the District Ranger. Therefore, this project will not be subject to review under 36 CFR part 217.

Dated: December 8, 1992.

Michael S. Edrington,

Acting Deputy Regional Forester.

BILLING CODE 3410-11-M

Exemption of Lone Pine Recovery Project Timber Salvage and Connected Activities, Fire Interpretation, Soil and Water Protection and Improvement, Wildlife Habitat Improvement, Sensitive Plant Enhancement From Appeal, Winema National Forest, Klamath County, OR

AGENCY: Forest Service, USDA.

ACTION: Notice to exempt decisions from administrative appeal.

SUMMARY: This is a notification that the decisions to implement Lone Pine Recovery Projects in the area of Lone Pine on the Winema National Forest is exempted from appeal. This is in conformance with provisions of 36 CFR 217.4(a)(11) as published in the **Federal Register** on January 23, 1989 (54 FR 3342).

EFFECTIVE DATE: December 14, 1992.

FOR FURTHER INFORMATION CONTACT: Bob Castaneda, Forest Supervisor, Winema National Forest, 2819 Dahlia Street, Klamath Falls, Oregon 97601, Phone (503) 883–6714.
